Value Invest Asia

You Are Your Best Fund Manager

New Launch: Free Step-by-step Basic Investment Program

Singapore, 6 September 2017

Investing in the stock market can be extremely confusing. This was certainly the case for us when we are first starting out. Most of the books and information about investing are skewed towards the US market. For a new investor who believes that Asia has a bright future ahead of itself and want to invest in this fast-growing region, the challenge is even harder. Moreover, we realized that many of the financial advice given by professionals are tainted with conflict of interests.

Yet, like many others, we started out by just experimenting with the different things we read, on the "tips" and advice we get from our friends and brokers. The global financial crisis in 2008 humbled us as we lost much of our investment during that time.

We then decided to document all our investment analysis and decisions. We experimented with investment concepts and shaped it for the Asian stock markets. After more than a decade investing in the market, we have created a system of investing in Asia that has worked for us.

We wanted to create detailed information about how to be a successful investor in Asia. We do it through our book, "Value Investing In Asia: The Definitive Guide To Investing In Asia" and through our website at https://valueinvestasia.com/.

To help new investors get started in investing in Asia, we launched a free step-by-step basic investment program. It is our "Beginner's Guide To Investing In The Asian Stock Market". It is a simple-to-understand investment program that we will release a new episode every week. It is a course that we ourselves would want to have if we are just starting out in investing. The course is perfect for completely new investors and seasoned investors who are struggling to find the right path to successful investing.

We talked about the basics of investing like:

- Can you really make money in the stock market?
- What Is A Stock
- Difference Between Investing & Speculation
- History Of Great Investors
- How To Read A Stock Information Page

To the concepts and practical guide on how to invest in the market. Our Course guide includes:

- What Is Value Investing?
- Do You Have What It Takes To Be A Value Investor?
- How To Read A Financial Statement?
- How To Start A Brokerage Account In Singapore
- How To Start A Brokerage Account In Malaysia
- The Three Type Of Value To Be Found In The Stock Market
- What Is Screening And How To Screen For The Right Stocks
- How To Value A Company
- How To Put It All Together: Case Study

All our lessons come with a video presentation, audio podcast, full written course notes, PowerPoint slides, real-life and current case studies about listed companies in Asia. Our entire basic course is absolutely free for all to learn. To get started, just register at https://valueinvestasia.com/freecourse/.
