Cautionary Statement

NASDAQ: RGLD

- ☹️ This presentation contains certain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements involve known and unknown risks, uncertainties, and other factors that could cause actual results to differ materially from the projections and estimates contained herein and include, but are not limited to: expected production at Rainy River, Wassa and Prestea, and resumption of production at Mount Milligan; embedded growth and sequential growth catalysts, including estimated production and cash flow from Rainy River, Cortez Crossroads and Peñasquito Pyrite Leach in calendar 2018; ability of Rainy River project to achieve and maintain capacity; expected start-up date for and production from Cortez Crossroads; expected commissioning of and estimated production from the Peñasquito Pyrite Leach; expected preliminary economic assessment of the Peak Gold project; diverse portfolio, including recent expansions/extensions at certain producing properties and development activity at other properties; short- and long-term financial impacts of US tax reform; expected effective tax rate; focus on free cash flow to reduce debt; repayment of convertible bonds maturing in June 2019 in cash; depreciation, depletion and amortization; statements concerning amount and payment of dividends; solid, steady performance and efficient capital structure, including systematically paying down debt from cash flow, stronger balance sheet and being prepared for new opportunities; and mine life and reserves estimates and forecasts of throughput, recoveries and production from the operators of our stream and royalty interests. Factors that could cause actual results to differ materially from these forward-looking statements include, among others: the risks inherent in the operation of mining properties; a decreased price environment for gold and other metals on which our stream and royalty interests are determined; performance of and production at properties, and variation of actual production from the production estimates and forecasts made by the operators of those stream and royalty properties; decisions and activities of the Company's management affecting margins, use of capital and changes in strategy; unexpected operating costs, decisions and activities of the operators of the Company's stream and royalty properties; changes in operators' mining and processing techniques or stream or royalty calculation methodologies; resolution of regulatory and legal proceedings; unanticipated grade, geological, metallurgical, environmental, processing or other problems at the properties; operators' inability to access sufficient raw materials, water or power; inability of operators to bring projects into production as expected, including development stage mining properties, mine and mill expansion projects and other development and construction projects; revisions or inaccuracies in technical reports, reserve, resources and production estimates; changes in project parameters as plans of the operators are refined; the results of current or planned exploration activities; errors or disputes in calculating stream deliveries and royalty payments, or deliveries or payments under stream or royalty agreements; the liquidity and future financial needs of the Company; economic and market conditions; the impact of future acquisitions and stream and royalty financing transactions; the impact of issuances of additional common stock; and risks associated with conducting business in foreign countries, including application of foreign laws to contract and other disputes, environmental laws, enforcement and uncertain political and economic environments. These risks and other factors are discussed in more detail in the Company's public filings with the Securities and Exchange Commission. Statements made herein are as of the date hereof and should not be relied upon as of any subsequent date. The Company's past performance is not necessarily indicative of its future performance. The Company disclaims any obligation to update any forward-looking statements.
- ☹️ **Third-party information:** Certain information provided in this presentation has been provided to the Company by the operators of properties subject to our stream and royalty interests, or is publicly available information filed by these operators with applicable securities regulatory bodies, including the Securities and Exchange Commission. The Company has not verified, and is not in a position to verify, and expressly disclaims any responsibility for the accuracy, completeness or fairness of such third-party information and refers readers to the public reports filed by the operators for information regarding those properties.

⁴ The U.S. Securities and Exchange Commission does not recognize this term. Mineralized material is that part of a mineral system that has potential economic significance but cannot be included in the proven and probable ore reserve estimates until further drilling and metallurgical work is completed, and until other economic and technical feasibility factors based upon such work have been resolved. Investors are cautioned not to assume that any part or all of the mineral deposits in this category will ever be converted into reserves.

⁵ The terms measured and indicated resource are not SEC recognized terms. Estimates of resources are subject to further exploration and development, are subject to additional risks, and no assurance can be given that they will eventually convert to future reserves.

Q2FY18 Results

NASDAQ: RGLD

- \$114 million revenue
- US Tax Reform signed into law on December 22, 2017
 - » Reduces US corporate income tax rate from 35% to 21%
 - » Allows efficient repatriation of future foreign earnings
 - » Our reported Q2 loss per share of (\$0.23) included these impacts:
 - **One-time repatriation tax and reassessment** of certain balance sheet assets and liabilities, totaling \$26.4 million (\$0.40 per share)
 - **Foreign currency election in Canada** to use the US dollar as our functional currency for a foreign subsidiary that previously reported tax returns in Canadian dollars, totaling \$15.9 million (\$0.24 per share)
 - » Absent these 2 impacts, **adjusted EPS¹** would have been **\$0.41/share** and effective tax rate for fiscal 2018 to date would have been ~20%

¹ Adjusted EPS is a non-GAAP measure. Please see page 14 for reconciliation.

Liquidity and Debt Outlook

NASDAQ: RGLD

Non-GAAP Financial Measures and Adjusted EBITDA Reconciliation

NASDAQ: RGLD

Non-GAAP Financial Measures

Non-GAAP financial measures are intended to provide additional information only and do not have any standard meaning prescribed by generally accepted accounting principles ("GAAP"). These measures should not be considered in isolation or as a substitute for measures of performance prepared in accordance with GAAP.

Adjusted Net Income (Loss) Reconciliation

Management of the Company uses adjusted net income (loss) to evaluate the Company's operating performance, and for planning and forecasting future business operations. The Company believes the use of adjusted net income (loss) allows investors and analysts to understand the results relating to receipt of revenue from its royalty interests and purchase and sale of gold from its streaming interests by excluding certain items that have a disproportionate impact on our results for a particular period. The net income (loss) adjustments are presented net of tax generally at the Company's statutory effective tax rate. Management's determination of the components of adjusted net income (loss) are evaluated periodically and based, in part, on a review of non-GAAP financial measures used by mining industry analysts. Net income (loss) attributable to Royal Gold stockholders is reconciled to adjusted net income (loss) as follows:
