CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING INFORMATION

This report includes "forward-looking statements". All statements other than statements of historical facts included in this report, regarding Tara Minerals' financial position, business strategy, plans and objectives, are forward-looking statements. Although Tara Minerals believes that the expectations reflected in the forward-looking statements and the assumptions upon which such forward-looking statements are based are reasonable, it can give no assurance that such expectations and assumptions will prove to have been correct.

In this filing references to "Company," "we," "our," and/or "us," refers to Tara Minerals Corp. and, unless the context indicates otherwise, its consolidated subsidiaries.

ITEM 1. BUSINESS.

Tara Minerals Corp. (the “Company”) explores and develops mining properties which may be productive of copper, lead, zinc and other industrial metals. The Company was incorporated in Nevada on May 12, 2006 and is in the exploration stage.

Tara Gold Resources Corp., which is also engaged in the exploration and development of mining properties in Mexico, owns 70% of Tara Minerals’ common stock. The reason Tara Gold formed Tara Minerals was that, in the opinion of Tara Gold, some investors prefer gold and silver projects, while others prefer lead, zinc and silver projects. Consequently, capital may be easier to obtain by separating gold properties from industrial metal properties. In this regard, Tara Gold has the first right to acquire any gold or silver prospects and Tara Minerals has the first right to acquire any industrial metal prospects.

Beginning in 2011, Tara Gold Resources Corp. will begin to distribute all of its shares in Tara Minerals to its shareholders at a rate of one Tara Minerals common share for every 20 outstanding shares of Tara Gold Resources Corp. The ex-dividend date is May 18, 2011, the record date is May 20, 2011 and the payment date is May 27, 2011. Additional distributions will be announced over the next 24 months until all Tara Minerals shares, held by Tara Gold, are distributed to Tara Gold shareholders.

Tara Minerals plans to acquire low-cost properties that have the potential to yield high returns. After acquiring a property and selecting a possible exploration area through its own efforts or with others, Tara Minerals typically compiles reports, past production records and geologic surveys concerning the area. Tara Minerals may then undertake a field exploration program to determine whether the area merits work. Initial field exploration on a property normally consists of geologic mapping and geochemical and/or geophysical surveys, together with selected sampling to identify host environments that may contain specific mineral occurrences (referred to also as “technical data”). If an area shows promise, drilling programs may be undertaken in an effort to locate the existence of economic mineralization. If mineralization is delineated, further work will be undertaken to estimate ore reserves, evaluate the feasibility for the development of the mining project, obtain permits for commercial development, and, if the project appears to be economically viable, proceed to place the deposit into commercial production.

The capital required for exploration and development of mining properties is substantial. Tara Minerals plans to finance its future operations through joint venture arrangements with third parties (generally providing that the third party will obtain a specified percentage of Tara Minerals’ interest in a certain property in exchange for the expenditure of a specified amount), the sale by Tara Minerals of interests in properties, cash flow from operations and by the sale of common stock.

The exploration and development of properties that are joint ventured with third parties are normally managed by a joint venture participant that is designated as the operator. The operator of a mining property generally provides all labor, equipment, supplies and management on a cost plus fee basis and often must perform specific tasks over a specified time period. Separate fees may be charged to the joint venture by the operator and, once certain conditions are met, the joint venture is typically required to pay the costs in proportion to its interests in the property.

Tara Minerals’ properties will typically consist of a variety of interests including, properties located in foreign countries and unpatented and patented claims held under lease or owned by Tara Minerals. Typically, the rights to properties which Tara Minerals may acquire will be sub-surface rights which will allow Tara Minerals to explore for, and if warranted, develop the property. See “Mexican Mining Laws and Regulations” below for information concerning use of surface rights in Mexico for mining operations.

In connection with the acquisition of a property, Tara Minerals may conduct limited reviews of title and related matters and obtain certain representations regarding ownership. Although Tara Minerals plans to conduct reasonable investigations (in accordance with standard mining practice) of the validity of ownership, it may be unable to acquire good and marketable title to its properties.

Mines have limited lives, which is an inherent risk in the mining business. Although Tara Minerals plans to acquire other mining properties, there is a limited supply of desirable mineral lands available in Mexico where Tara Minerals would consider conducting exploration and/or production activities. In addition, Tara Minerals faces strong competition for new properties from other mining companies, many of which have substantial financial resources, and Tara Minerals may be unable to acquire attractive new mining properties on terms that are considered acceptable.

Tara Minerals owns 99.9% of the common stock of American Metal Mining S.A. de C.V., a Mexican corporation. The Company also owns 87% of the common stock of Adit Resources Corp., which in turns owns 99.9% of American Copper Mining, S.A. de C.V. Tara Minerals' operations in Mexico are conducted through American Metal Mining and American Copper Mining since Mexican law provides that only Mexican corporations are allowed to own mining properties. However, when the Pilar de Moceribo, Don Roman and Lourdes and Las Nuvias properties were acquired in September and October 2006, American Metal Mining had not been incorporated. As a result, these mining properties owned by Tara Minerals were acquired by Corporacion Amermin, S.A. de C.V., the Mexican subsidiary of Tara Gold. These properties were transferred to American Metal Mining after its formation in December 2006. All references to Tara Minerals include the operations of American Metal Mining, Adit Resources Corp., and American Copper Mining. All of the Company's operations in Mexico are conducted through its Mexican subsidiaries.

As of March 31, 2011 Tara Minerals had a 100% interest in the mining properties listed below. Although Tara Minerals believes that each of these properties has deposits of copper, lead or zinc, the properties are in the exploratory state, and with the exception of Don Roman that is in the operating stage, do not have any known reserves, and may never produce any of these metals in commercial quantities.

The properties owned by American Metal Mining, primarily the Don Roman Groupings, are located in the northern part of the La Reforma Mining District of north eastern Sinaloa State, Mexico. The predominant rocks in the area are Upper Jurassic-Lower Cretaceous carbonate (limestone) rocks and Tertiary granitic intrusives. The La Reforma Mining District has been mined for more than 300 years, with substantial amounts of precious and base metals produced from numerous mines. In the opinion of Tara Minerals, the district has never been properly explored using present day, industry standard, exploration methods, including geochemistry, geophysics, and geology. Tara Minerals feels that this area may potentially host base metals that were never discovered or exploited due in part to market conditions, lack of technology, and lack of funding.

The properties owned by American Copper Mining, primarily known as the Picacho Groupings, are located approximately 100 kilometers south of the US-Mexico border and 65 kilometers northeast of Yamana's Mercedes project within the Northern Sierra Madre gold belt in close proximity to Bacoachi, Sonora, Mexico. The area is underlain by Tertiary and Cretaceous andesitic, rhyolitic flows and tuffs with ignimbritic and less abundant intrusive porphyritic rocks. Past activity on the Picacho Groupings by various parties has resulted in the construction of at least 9 adits, several shafts and raises, numerous workings and diamond drills, remnants of tailings from operations in the 1930's have been found but most of this material was removed and further beneficiated by prior owners. The Company feels that this property has the potential for 1+ million equivalent ounces of gold situated within 10.8 kilometers of gold bearing veins that have been identified to date.

The proposed exploration program for each property will typically consist of rock-chip sampling, soil geochemistry, geological mapping, a geophysical survey, trenching, drilling, and resource calculation. The exploration program will take place in phases, with some phases occurring simultaneously. Rock chip and soil geochemistry may be initiated first to test and define the mineralization. This may be followed up with a CSAMT (Controlled-Source Audio-Frequency Magneto Telluric) to test the extent and depth of sulphide mineralization which could host copper, lead or zinc. The CSAMT is an industry standard geophysical technique that has been used successfully to identify carbonate deposits in Mexico and other locations. Upon completion of the exploration program, and if results are positive, a drilling program may begin. Drilling results will then be evaluated and a mineral resource calculation will be made. Notwithstanding the above, the exploration program for each property will depend on a number of factors, including the property's particular geological conditions and the extent of any prior exploration work.

With the exception of the Don Roman Groupings, as of March 31, 2011 no plants or other facilities were located on any of the properties. Water and power will be required to further explore and, if warranted, develop Tara Minerals mining prospects.

Tara Minerals will contract with qualified personnel to conduct and supervise all aspects of its exploration program.

The exploration programs on the properties will be funded either through Tara Minerals' cash on hand or from operations, proceeds from the sale of Tara Minerals and subsidiaries common stock, or funds obtained from a joint venture partner.

In Mexico, land size is denominated in hectares and weight is denominated in tonnes. One hectare is equal to approximately 2.47 acres and one tonne is equal to 2,200 pounds.

Don Roman Groupings

The Don Roman Groupings, comprised of 9,136 hectares, were acquired in October 2006, November 2008 and March 2011 from unrelated third parties for approximately \$2,076,440, plus value added taxes of approximately \$313,367. The Don Roman Groupings consist of the Pilar, Don Roman, Las Nuvias, Centanario, and the La Verde mining prospects.

The Don Roman plant is 18 kilometers due north from Choix Sinaloa. The plant is accessed by 10 kilometers of paved road, and 8 kilometers of dirt road which the state/federal authorities are paving to the plant site. From plant site, the closest concessions are the Don Roman Groupings from which mine site can be accessed through a company maintained road with a regular pick up truck. The Don Roman Groupings are in the heart of La Reforma Mining District as well as the stated gold belt that stems from the state of Chihuahua.

Preliminary and continuing evaluation of the Don Roman Groupings has identified numerous mineralized systems at various locations on the property, some of which include a series of parallel NE trending lead, zinc, silver structures that can be traced for more than 300 meters; an abandoned lead, zinc, silver mine; and historic vein-type gold mineralization. A number of these mineralized structures lie within a complex suite of volcanic-granitic and sedimentary (carbonate) rocks. Preliminary evaluation of the property has indicated the potential for five separate mineral systems each having varying mineral characteristics. Initial sampling has indicated the potential for two lead, zinc, silver systems; two gold copper systems; and one iron ore, gold, copper system.

Permits needed to move towards continued active mining have been completed. Tara Minerals is assessing options and costs associated with the design of various mining and recovery systems. Mining and processing equipment have been purchased and the plant, which will be capable of processing a minimum of 400 tonnes per day, has begun testing ore runs on one of three circuits. Water rights for the property have been acquired and a 3" water pump and 4.5 km water line are in place to draw water from a nearby reservoir. High voltage electrical service has been supplied to an electrical substation, which will supply power to operate the plant.

Two circuits capable of producing a minimum of 200 tonnes per day have been, with a third circuit that is near completion, and an additional regrind circuit that can be implemented at the appropriate time.

As of December 31, 2010 approximately \$3,500,000 has been spent on the processing plant facilities, processing equipment, and related mining equipment.

In 2010 Tara Minerals began production start up at the Don Roman plant. In the third quarter of 2010, Tara Minerals continued extracting lead, zinc, and silver ore from its mine and stockpiling it for future processing at its processing plant. In the fourth quarter of 2010, plan activity ceased and the plant is in "Care & Maintenance", with management spending the last couple of months reviewing proposals from turn-key contract operators to operate the Don Roman plant, in order to effectively expand capacity and improved recovery rates. At the same time, Tara Minerals has also been entertaining interest from potential joint venture partners, who also have operational expertise. Site visits have taken place and others are being scheduled, along with other due diligence procedures. Tara Minerals continues to maintain a very positive outlook for Don Roman and the surrounding properties and management is committed to resolve all operational issues in an expeditious manner. Tara Minerals believes that it is making steady progress towards its above stated goals.

Godinez Joint Venture

In July 2010, Tara Minerals entered into a joint venture agreement that provides that third parties where they will contribute 100% of the mining rights to the concession "Mina Godinez" and Tara Minerals will have the exclusive rights to manage, operate, explore and exploit the concession. Tara Minerals will pay for the construction of buildings, access roads, and any necessary improvements. Tara Minerals will also pay for the machinery and equipment required for the operation of the mine. Any machinery or equipment used for the development of the mine will remain the exclusive property of Tara Minerals. Once production starts, Tara Minerals will receive 60% of the profits from the mine until it is fully reimbursed for its costs. Tara Minerals will receive 40% of the profits thereafter. Tara Minerals, also has a first right of refusal to purchase the property. The joint venture agreement will expire in July 2020, at which time the joint venture will be liquidated and dissolved. As of March 31, 2011, no costs have been incurred.

This property is located within La Reforma Mining District, and is located south of El Fuerte, state of Sinaloa. The mine can be reached by paved road 25 Km due south from El Fuerte then approximately 3Km dirt road to the mine opening. Godinez contains gold bearing vein structures that after initial testing look very promising.

Picacho Groupings

In July 2009 Tara Minerals acquired eight mining claims known as the "Picacho groupings" from Emilio Acuña Peralta for \$4,800,000, plus value-added tax of \$720,000. Tara Minerals paid \$575,000 of the purchase price and value-added tax in June 2009. The \$575,000 paid to Mr. Acuña in June 2009 was borrowed from Tara Gold by Tara Minerals.

In July 2009 Tara Minerals transferred the Picacho prospect to Adit. In connection with the transfer of the prospect, Adit issued Tara Minerals a promissory note in the principal amount of \$650,000 to compensate Tara Minerals for its down payment toward the purchase price of the property and to reimburse Tara Minerals for other amounts advanced on behalf of Adit. The note is unsecured, bears interest at 3.25% per year, and is due and payable on June 30, 2011. Adit has since repaid \$600,000 towards this note.

On March 31, 2010 Adit and Mr. Acuna amended their agreement. Under the revised agreement Adit paid Mr. Acuna \$500,000 in cash (plus \$80,000 in value added taxes) and in consideration for the transfer of all technical data relating to the prospect, issued Mr. Acuna 320,000 shares of Adit's common stock, which was valued at \$2.50 per share, and 437,500 shares of Tara Minerals' common stock, which was valued at \$4.00 per share.

Adit paid for the Tara Minerals shares by means of a note in the principal amount of \$1,750,000. The note bears interest at 6% per year and is due and payable on March 31, 2012. At any time after July 1, 2010 Tara Minerals may convert the outstanding principal, plus accrued interest, into shares of Adit's common stock. Tara Minerals will receive one share of Adit's common stock for each \$0.75 of principal and interest converted.

On January 28, 2011, Adit sold 500,000 units at a price of \$1.00 per unit to Yamana Gold Inc. Each unit consisted of one share of Adit's common stock and one half warrant. Each full warrant entitles Yamana to purchase one share of Adit's common stock at a price of \$1.50 per share at any time on or before January 28, 2014.

In connection with the sale of the units, Adit also signed a letter of intent that grants Yamana an option to acquire up to a 70% interest in Adit's Picacho gold/silver project. A definitive agreement is expected to be completed by May 15, 2011. Upon completion of the definitive agreement, Adit will sell an additional 2,500,000 units to Yamana at a price of \$1.00 per unit. The units will be identical to the units sold on January 28, 2011. From the \$3,000,000 received from Yamana, Adit will be required to spend \$2,000,000 in exploration work on the Picacho project within 12 months of signing the definitive agreement.

Yamana can earn a 51% interest in the project by spending an additional \$5,000,000 on the project within 30 months of the date of the definitive agreement and paying Adit an additional \$1,000,000.

Yamana can increase its interest to 70% by spending an additional \$9,000,000 on the project and paying Adit an additional \$2,000,000.

The Picacho Groupings consists of 7,060 hectares within the Northern Sierra Madre gold belt, 100 kilometers south of the U.S. border, in close proximity to Bacoachi, Sonora, Mexico. From Bacoachi the concessions can be accessed through a company maintained road with a regular pick up truck. The area has a high level of exploration activity and is close to a national paved highway and power grid.

The following shows the timing and estimated cost for the present exploration plan for this property:

Phase	Projected Completion	Estimated Cost
Surface Evaluation and Exploration Drilling	2011	\$ 2,000,000
Development Drilling, Feasibility, Equipment Ordering	2012	\$ 2,500,000
Development, Construction, Production	2013	\$ 3,000,000

United States Mining Laws and Regulations

In the United States, unpatented mining claims on unappropriated federal land may be acquired pursuant to procedures established by the Mining Law of 1872 and other federal and state laws. These acts generally provide that a citizen of the United States (including corporations) may acquire a possessory right to develop and mine valuable mineral deposits discovered upon unappropriated federal lands, provided that such lands have not been withdrawn from mineral location, e.g., national parks, military reservations and lands designated as part of the National Wilderness Preservation System. The validity of all unpatented mining claims is dependent upon inherent uncertainties and conditions. These uncertainties relate to such non-record facts as the sufficiency of the discovery of minerals, proper posting and marking of boundaries, and possible conflicts with other claims not determinable from descriptions of record. Prior to discovery of a locatable mineral thereon, a mining claim may be open to location by others unless the owner is in possession of the claim.

The domestic exploration programs conducted by Tara Minerals will be subject to federal, state and local environmental regulations. The United States Forest Service and the Bureau of Land Management extensively regulate mining operations conducted on public lands. Most operations involving the exploration for minerals are subject to existing laws and regulations relating to exploration procedures, safety precautions, employee health and safety, air quality standards, pollution of stream and fresh water sources, odor, noise, dust, and other environmental protection controls adopted by federal, state, and local governmental authorities as well as the rights of adjoining property owners. Tara Minerals may be required to prepare and present to federal, state, or local authorities data pertaining to the effect or impact that any proposed exploration or production of minerals may have upon the environment. All requirements imposed by any such authorities may be costly and time-consuming, and may delay commencement or continuation of exploration or production operations.

Future legislation and regulations are expected to continue to emphasize the protection of the environment, and, as a consequence, the activities of Tara Minerals may be more closely regulated to further the cause of environmental protection. Such legislation and regulations, as well as future interpretation of existing laws, may require substantial increases in capital and operating costs to Tara Minerals and may result in delays, interruptions, or a termination of operations, the extent of which cannot be predicted.

Mining operations in the United States are subject to inspection and regulation by the Mine Safety and Health Administration of the Department of Labor (MSHA) under provisions of the Federal Mine Safety and Health Act of 1977.

Tara Minerals' operations will also be subject to regulations under the Comprehensive Environmental Response, Compensation and Liability Act of 1980, as amended (CERCLA or Superfund), which regulates and establishes liability for the release of hazardous substances, and the Endangered Species Act (ESA), which identifies endangered species of plants and animals and regulates activities to protect these species and their habitats. Tara Minerals may incur expenditures for land reclamation pursuant to federal and state land restoration laws and regulations. Under certain circumstances, Tara Minerals may be required to close an operation until a particular problem is remedied or to undertake other remedial actions.

Mexican Mining Laws and Regulations

In Mexico, Article 27 of the Mexican Constitution grants the ownership of essentially all minerals to the Mexican nation. The right to exploit those minerals is given to private parties through concessions issued by the Mexican government. The current Mining Law of Mexico was enacted in 1992. Concessions are granted on mining lots, the sides of which measure 100 meters, or a multiple of 100, except when adjoining lots (granted when there were no size requirements) require a smaller size.

An exploration concession is granted to the first applicant that meets the requirements of the Mining Law, the most important of which is that the claimed area is deemed to be “free land”. Under the Mining Law, areas that are already covered by mining concessions or applications for mining concessions are not free, as well as reserved areas such as the coast and the seabed.

Exploration mining concession applications are filed at government offices. Exploration concessions are valid for fifty years and give their holders the right to carry out exploration work and, if warranted, any mine on the concession put into production.

Mining concessions do not grant the holder the right to enter or use the surface land of the mining lots. It is therefore necessary to obtain the permission of the surface owner for that purpose. Typically, a verbal authorization with no consideration is granted for prospecting and sample gathering. A simple letter agreement or contract is normally used for drilling, trenching, or basic road building. For more advanced exploration activities, a small monetary consideration is normally required. In some cases the concessionaire is also required to make minor improvements which benefit the local community such as fixing a road or fence or building an earthen dam. Building and operating a mine requires a more formal agreement. If an agreement cannot be reached with the surface owner, the Mining Law gives the concessionaire the right to request a temporary occupation of the land or an expropriation (or an easement for the construction of roads, power lines, water pipes, etc.). Compensation is set through an appraisal made by the federal government.

A concessionaire’s most important obligation is the performance of assessment work on the mining lots. A minimum amount of assessment work measured in monetary terms must be performed each year, depending on the size of the mining lot and, for an exploration mining concession, the number of years elapsed since its issue, pursuant to minimum investment tables established by the Mexican government. Assessment work may be done either through expenditures or the sale of minerals. A report must be filed in May of every year regarding the work for the previous calendar year. Lack of performance of the minimum work will result in the cancellation of the concession; payment to the government in lieu of required assessment of work is not allowed.

Concessionaires must comply with federal environmental regulations which generally require that mining activities be subject to an environmental impact statement authorization. Normally an environmental impact statement authorization can be obtained in six to twelve months from the date of its filing. However, mining operations which do not exceed levels established by the Mexican government are not required to file an environmental impact statement.

The Mining Law forbids concessionaires from removing mine timbering and supports and requires compliance with all safety rules promulgated by the Mexican government.

Mexican and foreign individuals, as well as Mexican corporations, are allowed to hold mining concessions. Although foreign corporations may not hold mining concessions, foreign corporations may, however, own Mexican corporations.

Potential Acquisition of Tara Gold by Tara Minerals

In September 2010, Tara Gold entered into a tentative agreement with Tara Minerals which provided that Tara Minerals will acquire all of the outstanding shares of Tara Gold by exchanging one Tara Mineral share for two Tara Gold shares. In an effort to avoid any conflicts due to common directors, the transaction will

require the approval of non-affiliate shareholders owning a majority of the outstanding shares of Tara Minerals and Tara Gold.

In 2011 this acquisition was cancelled. Tara Gold Resources Corp. will begin to distribute all of its shares in Tara Minerals to its shareholders at a rate of one Tara Minerals common share for every 20 outstanding shares of Tara Gold Resources Corp. The ex-dividend date is May 18, 2011, the record date is May 20, 2011 and the payment date is May 27, 2011. Additional distributions will be announced over the next 24 months until all Tara Minerals shares, held by Tara Gold, are distributed to Tara Gold shareholders.

General

Tara Minerals' offices are located at 2162 Acorn Court, Wheaton, IL 60189 and consist of approximately 150 square feet of office space are supplied free of charge by Francis R. Biscan, Jr., the President of Tara Minerals.

As of March 31, 2011 the only employees of Tara Minerals were its three officers.

Tara Minerals' website is www.taraminerals.com.

ITEM 1A. RISK FACTORS.

There is no assurance that any of Tara Gold's remaining properties will be capable of producing precious metals in commercial quantities.

ITEM 3. LEGAL PROCEEDINGS.

On September 13, 2010, Tara Gold Resources Corp. announced that it had entered into a tentative agreement with the Company which provided the Company would acquire all of the common shares of Tara Gold by exchanging one share of the Company's common stock for two Tara Gold shares. In an effort to avoid any conflicts due to common directors, the transaction will require the approval of non-affiliate shareholders owning a majority of the outstanding shares of the Company and Tara Gold.

On September 20, 2010 Chris Columbo filed a lawsuit in the District Court for Carson City Nevada, against the Company Tara Gold, and Tara Gold's officers and directors. The essence of the lawsuit was to obtain the fairest price for Tara Gold, whether from the Company or a third party. On October 25, 2010 Mr. Columbo voluntarily dismissed his lawsuit against the Company and other defendants.

On October 22, 2010 Patricia J. Root filed a lawsuit in the Circuit Court for Dupage County, Illinois, against the Company, Tara Gold, and Tara Gold's directors. The essence of the lawsuit is to prevent the Company's proposed acquisition of Tara Gold.

Tara Minerals believes the lawsuit filed by Ms. Root was premature since, as noted in the September 13, 2010 press release, the transaction was tentative and was subject to the approval of the shareholders of Tara Gold who are not officers or directors of Tara Gold. No binding agreement between Tara Gold and Tara Minerals has been ever signed.

On April 6, 2011 Ms. Root voluntarily dismissed her lawsuit against Tara Minerals, Tara Gold, and all other defendants.

ITEM 5. MARKET FOR REGISTRANT’S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES.

Since June, 2008 Tara Minerals’ common stock has been quoted on the OTC Bulletin Board under the symbol “TARM”. Prior to that date, there was no established trading market for Tara Minerals’ common stock.

Shown below are the ranges of high and low closing prices for Tara Minerals’ common stock for the periods indicated as reported by FINRA and as reported on www.stockwatch.com. The market quotations reflect inter-dealer prices, without retail mark-up, mark-down or commissions and may not necessarily represent actual transactions.

Quarter Ended	High	Low
March 31, 2009	\$ 0.53	\$ 0.16

September 30, 2010	\$ 2.04	\$ 1.36
December 31, 2010	\$ 1.40	\$ 0.58

As of March 31, 2011, Tara Minerals had 58,479,987 outstanding shares of common stock and 77 shareholders of record. The following table lists additional shares of Tara Minerals’ common stock which may be issued.

	Number of Shares	Note Reference
Shares issuable upon exercise of options held by Tara Minerals’ officers	3,250,000	A
Shares issuable upon exercise of warrants sold in private offerings	4,271,999	B

A. See Item 11 of this report for information concerning the terms of these options.

B. In 2008, the Company sold 1,119,167 Units at a price of \$0.60 per Unit. Each Unit consisted of one share of Tara Mineral’s common stock and one warrant. As of December 31, 2010, 1,114,003 warrants had been exercised for \$1,101,138. The remaining 5,164 warrants expired unexercised.

In 2008 and 2009, The Company sold 510,000 and 2,290,000 Units respectively at a price of \$0.20 per Unit. Tara Minerals relied upon the exemption provided by Section 4(2) of the Securities Act of 1933 with respect to the sale of these securities. The persons who acquired these securities were sophisticated investors and were provided full information regarding the business and operations of Tara Minerals. There was no general solicitation in connection with the offer or sale of these securities. The persons who acquired these securities acquired them for their own accounts. The certificates representing the shares of common stock and warrants bear a restricted legend providing that they cannot be sold unless pursuant to an effective registration statement or an exemption from registration.

Holders of common stock are entitled to receive dividends as may be declared by the Board of Directors. Tara Minerals' Board of Directors is not restricted from paying any dividends but is not obligated to declare a dividend. No dividends have ever been declared and it is not anticipated that dividends will ever be paid.

ITEM 6. SELECTED FINANCIAL DATA.

Not applicable.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATION.

Tara Minerals was incorporated on May 12, 2006. During the period from its incorporation through December 31, 2010 Tara Minerals generated revenue of \$160,421 and incurred expenses of \$658,007 in cost of sales; \$2,473,709 in exploration expenses and \$20,372,340 in operating and general administration expenses. Included in operating and general and administrative expenses is a non-cash charge of \$7,648,704 pertaining to the issuance of stock options.

Tara Minerals anticipates that its capital requirements during the twelve months ending March 31, 2012 will be:

Exploration and Development – Centenario	\$ 250,000
Property payments and taxes – Centenario	25,000
Exploration and Development – Choix/Pilar	100,000
Property payments and taxes – Choix/Pilar	30,500
Exploration and Development – La Verde	500,000
Property Payments and taxes – La Verde	62,000
Exploration and Development – Don Roman Groupings	650,000
Property payments and taxes – Don Roman Groupings	3,500
Exploration and Development - Picacho Prospect	2,500,000
Property payments and taxes – Picacho Prospect	40,000
General and administrative expenses	375,000
Total	<u>\$ 4,536,000</u>

The capital requirements shown above include capital required by Tara Minerals and subsidiaries.

Tara Minerals will need to obtain additional capital if it is unable to generate sufficient cash from its operations or find joint venture partners to fund all or part of its exploration and development costs.

As of March 31, 2011 Tara Minerals has sought to expand and advance the Don Roman Groupings project by acquiring additional highly prospective mineral claims; and by opening up the project to numerous parties that have expressed an interest in the possibility of becoming an operating partner in the further development of the Don Roman Groupings. Interest from various parties have also been expressed towards El Oro (a concession within the Don Roman Groupings), Tara Minerals iron ore, gold, copper prospect. Based on this interest, Tara Minerals has been investigating the economic merits surrounding the iron ore market, has found favorable results, and is now working on a number of development strategies relating to iron ore.

Tara Minerals' future plans will be dependent upon the amount of capital available to Tara Minerals, the amount of cash provided by its operations, and the extent to which Tara Minerals is able to have joint venture partners pay the costs of exploring and developing its mining properties.

Tara Minerals does not have any commitments or arrangements from any person to provide Tara Minerals with any additional capital. If additional financing is not available when needed, Tara Minerals may continue to operate in its present mode or Tara Minerals may need to cease operations. Tara Minerals does not have any plans, arrangements or agreements to sell its assets or to merge with another entity.

See Note 1 to the financial statements included as part of this report for a description of Tara Minerals' accounting policies and recent accounting pronouncements.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders
of Tara Minerals Corp. and Subsidiaries

We have audited the accompanying consolidated balance sheets of Tara Minerals Corp. (a Nevada corporation) and subsidiaries as of December 31, 2010 and 2009, and the related consolidated statements of operations and comprehensive loss, stockholders' equity, and cash flows for the fiscal years ended December 31, 2010 and 2009, and for the period from inception (May 12, 2006) through December 31, 2010. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall consolidated financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Tara Minerals Corp. and subsidiaries as of December 31, 2010 and 2009, and the results of their operations and their cash flows for the fiscal years ended December 31, 2010 and 2009, and for the period from inception (May 12, 2006) through December 31, 2010 in conformity with accounting principles generally accepted in the United States of America.

TARA MINERALS CORP. AND SUBSIDIARIES
(A Subsidiary of Tara Gold Resources Corp.)
(An Exploration Stage Company)
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

Note 1. Nature of Business and Significant Accounting Policies

Nature of business and principles of consolidation:

Tara Minerals Corp. (the “Company”) was organized May 12, 2006 under the laws of the State of Nevada. The Company currently is engaged in the acquisition, exploration and development of mineral resource properties in the United States of America and Mexico. The Company owns 99.9% of the common stock of American Metal Mining, S.A. de C.V. (“AMM”), which was established in December 2006 and operates in México. The Company also owns 87% of the common stock of Adit Resources Corp., which in turns owns 99.9% of American Copper Mining, S.A. de C.V. (“ACM”), which was established in December 2006 and operates in México. Adit Resources Corp. (“Adit”) was organized in June 2009 and ACM was purchased in June 2009. The Company currently has limited operations and, in accordance with the Financial Accounting Standards Board Accounting Standards Codification (“FASB ASC”) Development Stage Entities Topic, is considered an Exploration Stage Company.

Tara Minerals Corp. is a subsidiary of Tara Gold Resources Corp., a publicly traded company which trades under the TRGD symbol.

The consolidated financial statements include the financial statements of the Company and its two subsidiaries. All amounts are in U.S. dollars unless otherwise indicated. All significant inter-company balances and transactions have been eliminated in consolidation.

The consolidated financial statements include the accounts of the Company, its subsidiaries and variable interest entities (“VIE”) over which control is achieved through means other than voting rights and we are considered the primary beneficiary. The primary beneficiary of the VIE consolidates the entity if control is achieved through means other than voting rights such as certain capital structures and contractual relationships. All significant intercompany transactions and accounts have been eliminated in consolidation. The consolidated financial statements of the Company have been prepared on the accrual basis of accounting and are in conformity with accounting principles generally accepted in the United States of America and prevailing industry practice. At December 31, 2010 and 2009 the Company has no joint ventures or VIEs.

The reporting currency of the Company, Tara Gold and Adit is the U.S. dollar. The functional currency of AMM and ACM is the Mexican Peso. As a result, the financial statements of the subsidiaries have been re-measured from Mexican pesos into U.S. dollars using (i) current exchange rates for monetary asset and liability accounts, (ii) historical exchange rates for non-monetary asset and liability accounts, (iii) historical exchange rates for revenues and expenses associated with non-monetary assets and liabilities and (iv) the weighted average exchange rate of the reporting period for all other revenues and expenses. In addition, foreign currency transaction gains and losses resulting from U.S. dollar denominated transactions are eliminated. The resulting re-measurement loss is recorded to other comprehensive income.

Current and historical exchange rates are not indicative of what future exchange rates will be and should not be construed as such.

Relevant exchange rates used in the preparation of the financial statements for AMM and ACM are as follows for the years ended December 31, 2010 and 2009 respectively (Mexican peso per one U.S. dollar).

Other comprehensive (loss) income for the years ended December 31, 2010 and December 31, 2009 is (\$106,237) and \$100,901 respectively, and is primarily the result of foreign currency exchange differences. Inception to date other comprehensive loss is (\$246,253).

The Company's significant accounting policies are:

Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Cash and Cash Equivalents

For the Statements of Cash Flows, all highly liquid investments with maturity of three months or less are considered to be cash equivalents. There were no cash equivalents as of December 31, 2010 or December 31, 2009.

Recoverable Value-Added Taxes (IVA) and Allowance for Doubtful Accounts

Impuesto al Valor Agregado taxes (IVA) are recoverable value-added taxes charged by the Mexican government on goods sold and services rendered at a rate of 16%. Under certain circumstances, these taxes are recoverable by filing a tax return. Amounts paid for IVA are tracked and held as receivables until the funds are remitted.

Effective January 1, 2010 the Mexican government increased *Impuest al Valor Agregado* taxes (IVA) from 15% to 16% and *Impuesto Sobre la Renta* (ISR) from 28% to 30%. These financial statements reflect these increases.

Each period receivables are reviewed for collectability. When a receivable is determined to not be collectable we allow for the receivable until we are either assured of collection or assured that a write off is necessary. We have allowed \$1,366,533 and \$114,139 as of December 31, 2010 and 2009, respectively, in association with our receivable from IVA from our Mexico subsidiaries as we have determined that the Mexican government may not allow the complete refund of these taxes.

(An Exploration Stage Company)
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

Property and Equipment and Mining Concessions

Mining concessions and acquisitions, exploration and development costs relating to mineral properties are deferred until the properties are brought into production, at which time they will be amortized on the unit of production method based on estimated recoverable reserves. If it is determined that the deferred costs related to a property are not recoverable over its productive life, those costs will be written down to fair value as a charge to operations in the period in which the determination is made. The amounts at which mineral properties and the related deferred costs are recorded do not necessarily reflect present or future values.

The recoverability of the book value of each property is assessed annually for indicators of impairment such as adverse changes to any of the following:

- estimated recoverable ounces of copper, lead, zinc, silver or other precious minerals
- estimated future commodity prices
- estimated expected future operating costs, capital expenditures and reclamation expenditures

A write-down to fair value is recorded when the expected future cash flow is less than the net book value of the property or when events or changes in the property indicate that carrying amounts are not recoverable. This analysis is completed as needed, and at least annually. As of the date of this filing no events have occurred that would require the write-down of any assets. In addition, the carrying amounts of the group's assets are reviewed at each balance sheet date to determine whether there is any indication of impairment. If such indication of impairment exists, the asset's recoverable amount will be reduced to its estimated fair value. As of December 31, 2010 and 2009, respectively, no indications of impairment existed.

Certain mining plant and equipment included in mine development and infrastructure is depreciated on a straight-line basis over their estimated useful lives from 3 – 10 years. Other non-mining assets are recorded at cost and depreciated on a straight-line basis over their estimated useful lives from 3 – 10 years.

Reclassifications

Certain reclassifications, which have no effect on net (loss) income, have been made in the prior period financial statements to conform to the current presentation.

Revenue recognition

Revenue from the sale of concentrate and industrial metals will be recognized when ownership passes to the purchaser at which time the following conditions are met:

- i) persuasive evidence that an agreement exists;
- ii) the risks and rewards of ownership pass to the purchaser including delivery of the product;
- iii) the selling price is fixed and determinable; or,
- iv) collectivity is reasonably assured.

TARA MINERALS CORP. AND SUBSIDIARIES
(A Subsidiary of Tara Gold Resources Corp.)
(An Exploration Stage Company)
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

Reclamation and remediation costs (asset retirement obligations)

Reclamation costs are allocated to expense over the life of the related assets and are periodically adjusted to reflect changes in the estimated present value resulting from the passage of time and revisions to the estimates of either the timing or amount of the reclamation and abandonment costs.

Future remediation costs for reprocessing plant and buildings are accrued based on management's best estimate at the end of each period of the undiscounted costs expected to be incurred at a site. Such cost estimates include, where applicable, ongoing remediation, maintenance and monitoring costs. Changes in estimates are reflected in earnings in the period an estimate is revised. There were no reclamation and remediation costs accrued as of December 31, 2010 or December 31, 2009.

Exploration expenses

Exploration costs not directly associated with proven reserves on our mining concessions are charged to operations as incurred.

Purchase of Technical Data

Technical data, including engineering reports, maps, assessment reports, exploration samples certificates, surveys, environmental studies and other miscellaneous information, may be purchased for our mining concessions. When purchased for concessions without proven reserves the cost is considered research and development pertaining to a developing mine and in accordance with the Research and Development (R&D) Topic - of the FASB ASC is expensed when incurred.

Income taxes

Income taxes are provided for using the liability method of accounting in accordance with the Income Taxes Topic of the FASB ASC. Deferred tax assets and liabilities are determined based on differences between the financial reporting and tax basis of assets and liabilities and are measured using the enacted tax rates and laws that will be in effect when the differences are expected to reverse. A valuation allowance is established when necessary to reduce deferred tax assets to the amount expected to be realized. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized. The computation of limitations relating to the amount of such tax assets, and the determination of appropriate valuation allowances relating to the realization of such assets, are inherently complex and require the exercise of judgment. As additional information becomes available, we continually assess the carrying value of our net deferred tax assets.

Stock Based Compensation

Stock based compensation is accounted for using the Equity-Based Payments to Non-Employee's Topic of the FASB ASC, which establishes standards for the accounting for transactions in which an entity exchanges its equity instruments for goods or services. It also addresses transactions in which an entity incurs liabilities in exchange for goods or services that are based on the fair value of the entity's equity instruments or that may be settled by the issuance of those equity instruments. We determine the value of stock issued at the date of grant. We also determine at the date of grant the value of stock at fair market value or the value of services rendered (based on contract or otherwise) whichever is more readily determinable.

TARA MINERALS CORP. AND SUBSIDIARIES
(A Subsidiary of Tara Gold Resources Corp.)
(An Exploration Stage Company)
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

Shares issued to employees are expensed upon issuance.

Stock based compensation for employees is accounted for using the Stock Based Compensation Topic of the FASB ASC. We use the fair value method for equity instruments granted to employees and will use the Black-Scholes model for measuring the fair value of options, if issued. The stock based fair value compensation is determined as of the date of the grant or the date at which the performance of the services is completed (measurement date) and is recognized over the vesting periods.

Net Loss per Common Share

Earnings per share is calculated in accordance with the Earnings per Share Topic of the FASB ASC. The weighted-average number of common shares outstanding during each period is used to compute basic earnings (loss) per share. Diluted earnings per share is computed using the weighted average number of shares plus dilutive potential common shares outstanding. Potentially dilutive common shares consist of employee stock options, warrants, and other convertible securities, and are excluded from the diluted earnings per share computation in periods where the Company has incurred net loss. During the years ended December 31, 2010 and 2009, respectively, the Company incurred a net loss, resulting in no potentially dilutive common shares.

Fair Value Accounting

As required by the Fair Value Measurements and Disclosures Topic of the FASB ASC, fair value is measured based on a three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value as follows: (Level 1) observable inputs such as quoted prices in active markets; (Level 2) inputs, other than the quoted prices in active markets, that are observable either directly or indirectly; and (Level 3) unobservable inputs in which there is little or no market data, which require the reporting entity to develop its own assumptions.

The three levels of the fair value hierarchy are described below:

- Level 1 Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;
- Level 2 Quoted prices in markets that are not active, or inputs that are observable, either directly or indirectly, for substantially the full term of the asset or liability;
- Level 3 Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (supported by little or no market activity).

Recently adopted and recently issued accounting guidance

Adopted

In June 2009, the Financial Accounting Standards Board ("FASB") issued authoritative guidance for "Accounting for Transfers of Financial Assets," which eliminates the concept of a "qualifying special-purpose entity," changes the requirements for derecognizing financial assets, and requires additional

TARA MINERALS CORP. AND SUBSIDIARIES
(A Subsidiary of Tara Gold Resources Corp.)
(An Exploration Stage Company)
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

disclosures in order to enhance information reported to users of financial statements by providing greater transparency about transfers of financial assets, including securitization transactions, and an entity's continuing involvement in and exposure to the risks related to transferred financial assets. This guidance is effective for fiscal years beginning after November 15, 2009. The Company adopted this guidance for the period ended March 31, 2010. It does not have a material impact on the consolidated financial statements.

In June 2009, the FASB issued authoritative guidance amending existing guidance. The amendments include: (1) the elimination of the exemption for qualifying special purpose entities, (2) a new approach for determining who should consolidate a variable-interest entity, and (3) changes to when it is necessary to reassess who should consolidate a variable-interest entity. This guidance is effective for the first annual reporting period beginning after November 15, 2009 and for interim periods within that first annual reporting period. The Company adopted this guidance for the period ended March 31, 2010. It does not have a material impact on the consolidated financial statements.

In January 2010, the FASB issued guidance to amend the disclosure requirements related to recurring and nonrecurring fair value measurements. The guidance requires new disclosures on the transfers of assets and liabilities between Level 1 (quoted prices in active market for identical assets or liabilities) and Level 2 (significant other observable inputs) of the fair value measurement hierarchy, including the reasons and the timing of the transfers. The guidance became effective for the Company beginning January 1, 2010. The adoption of this guidance did not have a material impact on the Company's consolidated financial statements.

In February 2010, the FASB issued amended guidance on subsequent events to alleviate potential conflicts between FASB guidance and SEC requirements. Under this amended guidance, SEC filers are no longer required to disclose the date through which subsequent events have been evaluated in originally issued and revised financial statements. This guidance was effective immediately and we adopted these new requirements for the period ended March 31, 2010. The adoption of this guidance did not have a material impact on our financial statements.

Issued

In October 2009, the FASB issued changes to revenue recognition for multiple-deliverable arrangements. These changes require separation of consideration received in such arrangements by establishing a selling price hierarchy (not the same as fair value) for determining the selling price of a deliverable, which will be based on available information in the following order: vendor-specific objective evidence, third-party evidence, or estimated selling price; eliminate the residual method of allocation and require that the consideration be allocated at the inception of the arrangement to all deliverables using the relative selling price method, which allocates any discount in the arrangement to each deliverable on the basis of each deliverable's selling price; require that a vendor determine its best estimate of selling price in a manner that is consistent with that used to determine the price to sell the deliverable on a standalone basis; and expand the disclosures related to multiple-deliverable revenue arrangements. These changes become effective on January 1, 2011. The Company has determined that the adoption of these changes will not have an impact on the consolidated financial statements, as the Company does not currently have any such arrangements with its customers.

In January 2010, the FASB issued guidance to amend the disclosure requirements related to recurring and nonrecurring fair value measurements. The guidance requires a roll forward of activities on purchases, sales, issuance, and settlements of the assets and liabilities measured using significant unobservable

(An Exploration Stage Company)
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

inputs (Level 3 fair value measurements). The guidance will become effective for the Company with the reporting period beginning July 1, 2011. The adoption of this guidance will not have a material impact on the Company's consolidated financial statements.

Other recent accounting pronouncements issued by the FASB (including its Emerging Issues Task Force), the AICPA, and the SEC did not, or are not believed by management to, have a material impact on the Company's present or future consolidated financial statements.

- a. In September 2006 another subsidiary of Tara Gold Resources Corp., the Company's parent, acquired the Pilar de Moceribo Prospect ("Pilar") from an unrelated third party for \$800,000 plus \$120,000 of value added tax. This property was then sold to AMM in January 2007. In June 2009, AMM and the note holder modified the agreement to return one mining concession under this agreement and reduce the purchase by \$60,870 plus the related \$9,130 of value added tax. The resulting purchase price of the remaining concessions is \$739,130 plus \$110,870 of value added tax. The Company is required to repay the other subsidiary of its parent for this mining concession as follows (including the applicable value added tax):

2011	\$ 535,659

In accordance with the Interest Topic of FASB ASC, the future payments of the total payment amount of \$739,130 have been discounted using the incremental borrowing rate of 5.01%. As of December 31, 2010, the present value of future payments is as follows:

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

- b.** On January 8, 2007 the Company amended its October 2006 agreement to acquire the Don Roman Prospect (Don Roman) from an unrelated third party for \$521,739 plus \$78,261 of value added tax. The purchase price was paid in full in January 2007. This property was assigned to the Company in January 2007 by the Company's parent. In October 2007, the Company purchased five hectares of land adjacent to the Don Roman property to build a mill, equipment yard, and campsite for construction and mining. Construction activities on this land began in October 2007 and finished during the first quarter of 2010. In October of 2007, the Company entered into an agreement with an independent third party to purchase construction equipment for the development and operation of the Don Roman Property. Pursuant to this agreement, the Company issued 1,200,000 shares of common stock at a fair value of \$600,000 during the first quarter of 2008.
- c.** On January 8, 2007 the Company acquired the Las Nuvias Prospect (Las Nuvias) for \$100,000 plus \$15,000 of value added tax from an unrelated third party. The purchase price was paid in full in January 2007. This property was assigned to the Company in January 2007 by the Company's parent.
- d.** In November 2008, AMM executed an agreement to acquire eight mining concessions known as "Centenario" from an independent third party. The properties approximate 5,400 hectares and were purchased for a total of \$1,894,050, including \$247,050 in value added taxes.

In June 2009, AMM and the note holder modified the agreement to 1) revalue the entire Centenario concession to \$2,000,000, 2) apply \$127,000 toward the purchase price which we had already paid and recorded as a mining deposit, and 3) apply \$197,956 toward the updated value of the concession which was originally paid by another subsidiary of Tara Gold Resources Corp. These changes resulted in the following 1) additional debt of \$28,044 plus related value added tax for these concessions, 2) the reduction of our mining deposit of \$127,000, 3) the expense of \$6,000 that AMM also paid but which was not included in the revaluation of the concession and 4) and increase in our due to related party of \$197,956 plus related value added tax. Our effective amount financed in relation to this concession \$1,675,044 plus \$251,257 of value added tax.

The debt payment schedule as of December 31, 2010, including applicable value added tax, is as follow:

2011	548,091
2012	981,192
	<u>\$ 1,529,283</u>

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

In accordance with the Interest expense Topic of FASB ASC, the future payments of the total payment amount of \$1,675,044 has been discounted using the incremental borrowing rate of 2.97%. As of December 31, 2010, the present value of future payments on the Centenario contract is as follows.

	Debt	IVA	Total
Future payments	\$ 1,364,429	\$ 218,309	\$ 1,582,738
Imputed interest	(53,455)	-	(53,455)

	<u>\$ 842,883</u>	<u>\$ 138,309</u>	<u>\$ 981,192</u>

In March 2011, AMM and the note holder modified and terminated the agreement resulting in full payment of the concession for the \$732,006 paid.

In March 2011, AMM purchased technical data pertaining to Centenario from the former owner in consideration for \$100,000 in cash and the issuance 416,100 shares of the Company's common stock. As of March 11, Centenario did not have proven reserves.

- e. In June 2009 AMM executed an agreement to acquire three mining concessions known as "Pirita" from an independent third party. The properties approximate 6,700 hectares and were purchased for a total of \$50,000 cash, \$230,000 financed, including \$30,000 in value added taxes.

The resulting debt payment schedule, including applicable value added tax, is as follow:

2011	\$ <u>170,455</u>
------	-------------------

In accordance with the Interest Topic of FASB ASC, the future payments of the total payment amount of \$200,000 have been discounted using the incremental borrowing rate of 2.76%. As of December 31, 2010, the present value of future payments on the Pirita contract is as follows:

	Debt	IVA	Total

- f. In June 2009 Adit acquired eight mining concessions known as "Picacho" from an independent third party. The properties approximate 3,236 hectares and were purchased for a total of \$500,000 cash (plus the related \$75,000 value added taxes), \$4,945,000 financed, including \$645,000 in value added taxes.

In March 2010, Adit and the note holder agreed to reduce the purchase of the Picacho concession to \$1,250,000. Under the revised agreement, Adit paid the vendor \$500,000 in cash (plus applicable taxes) as final consideration for the mining concession. These changes

resulted in the following: 1) decrease debt by \$3,324,485; and 2) decrease recoverable value-added taxes by \$527,500. At March 31, 2010 the amended purchase price was paid in full.

In March 2010, Adit purchased technical data pertaining to the Picacho Prospect from the prospect's former owner in consideration for the issuance to the former owner of 437,500 shares of the Company's common stock and 320,000 shares of Adit's common stock. The technical data includes engineering reports, maps, assessment reports, exploration samples certificates, surveys, environmental studies and other miscellaneous information pertaining to the Picacho Prospect. As of March 31, 2010 the Picacho Prospect did not have any proven reserves. As such, the information purchased was considered research and development pertaining to a developing mine and in accordance with the ASC Research and Development (R&D) Topic - R&D is expensed when incurred. The parties agreed that the value of the stock for the technical data was \$2.25 per share for Adit stock and \$4.00 per share for the Company's common stock. The Company has accounted for the shares at their fair market value as follows: 320,000 shares of Adit's common stock were valued at \$0.75 per share, and 437,500 shares of the Company's common stock were valued at \$2.25. All fair market values were determined based on contemporaneous stock issuances for cash or if the stock was quoted on an exchange, it's closing stock price. All stock was issued April 2010.

Other Fixed Assets

For the twelve months ended December 31, 2010, Tara Minerals and its subsidiaries purchased equipment and other fixed assets in the normal course of business. During the 6 months ended June 30, 2010, Tara Minerals finished the construction of the plant at the Don Roman mine.

Note 3. Mining Deposits

As of December 31, 2009, the Company paid a deposit of \$25,000 toward the involvement in the "El Tigre" mining project in Sinaloa, Mexico. As of December 2010, the Company reclassified \$28,368 given to a third party as mining deposits because they are in fact mining deposits for future acquisitions.

Note 4. Income Taxes

As of December 31, 2010, Adit and the Company will file separate income tax returns from the Tara Gold consolidated return.

For the year ended December 31, 2009 Tara Minerals and American Metal Mining ("AMM") were part of the consolidated Tara Gold Resources Corp. return and as such, all related deferred tax assets or liabilities were calculated on the consolidated tax return and pushed down to the underlying subsidiaries as needed. No tax benefit for the year ending December 31, 2009 was reported in connection with the net operating loss carry forwards that related to Tara Minerals and its subsidiary AMM.

Effective for the year ending December 31, 2010, the Company will begin filing income tax returns in the United States and continue to file Mexican federal jurisdictions. The U.S. returns for 2010 will be filed after the filing of these financial statements; the Mexico 2010 tax return has been filed. No tax returns for the Company or AMM are currently under examination by any tax authorities.

TARA MINERALS CORP. AND SUBSIDIARIES
(A Subsidiary of Tara Gold Resources Corp.)
(An Exploration Stage Company)
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

Adit and its subsidiary American Copper Mining (“ACM”) did not have a deferred tax asset or liability for the year ended December 31, 2009 due to the use of valuation allowances to reduce the benefits of a net operating loss to zero.

Adit files income tax returns in the United States and Mexican federal jurisdictions. The U.S. returns for 2010 will be filed after the filing of these financial statements; the Mexico 2010 tax return has been filed. Upon tax return filing, the U.S. federal returns are considered open tax years, with 2009 an open tax year. The returns for 2010 will be filed after the filing of these financial statements. No tax returns for Adit or ACM are currently under examination by any tax authorities.

The provision for federal and state income taxes for the year ended December 31, 2010 includes elements of Adit and ACM as one filing entity; and Tara Minerals and AMM as a separate filing entity.

The December 31, 2010 and since inception income tax benefit is as follows:

	Adit and ACM	Tara Minerals and AMM	Total
Current – U.S. Federal	\$ -	\$ -	\$ -
Current – Mexico	-	-	-
Deferred – U.S. Federal	(719,319)	(5,142,645)	(5,861,964)
Deferred – Mexico	(129,164)	(926,839)	(1,056,003)
Increase in valuation allowance	488,823	3,498,162	3,986,985
Income tax expense (benefit)	\$ (359,659)	\$ (2,571,322)	\$ (2,930,982)

We believe that the deferred tax asset above is realizable, net of the valuation allowance disclosed, due to Adit’s letter of intent with Yamana that grants Yamana an option to acquire up to a 70% interest in Adit’s Picacho gold/silver project. Additionally, interest from various parties has also been expressed towards El Oro (a concession within the Don Roman Groupings), Tara Gold iron ore, gold, copper prospect. Based on this interest, Tara Gold has been investigating the economic merits surrounding the iron ore market, has found favorable results, and is now working on a number of development strategies relating to iron ore.

A valuation allowance is recorded when it is more likely than not that the deferred tax assets will be realized. The future use of deferred tax assets is dependent on the future taxable profits which arise from taxable temporary timing differences such as:

- Differences in expensed stock based compensation and stock for investor relation services and corporate officers.
- The capitalization of foreign mining exploration expenses for federal income tax purposes.
- A carryforward of a net operating loss.

Net deferred tax asset (liability)	\$ 359,659	\$ 2,571,322	\$ 2,930,982

Net operating losses expire as follows:

	Adit and ACM	Tara Minerals and AMM	Total
December 31, 2020	\$ 57,440	\$ -	\$ 57,440
December 31, 2021	78,507	12,913,910	12,992,417
Total net operating loss	\$ 135,947	\$ 12,913,910	\$ 13,047,857

Per Internal Revenue Code Section 382, in the event of a change of ownership, the availability of Adit and the Company's net operating losses carry forwards may be subject to an annual limitation against taxable income in future periods, which could substantially limit the eventual utilization of this net operating loss carry forwards. This limitation may not apply pursuant to an ownership change as described in Section 1262 of P.L. 111-5.

Net operating losses generated in Mexico may only be used to offset income generated in Mexico. ACM has a net operating loss in Mexico of approximately \$430,546 with an estimated tax benefit of \$129,164 and AMM has a net operating loss in Mexico of \$3,089,464 with an estimated tax benefit of \$926,839. Per the Income Tax topic of the FASB ASC, when it is more likely than not that a tax asset cannot be realized through future income the Company must allow for this future tax benefit. We have fully allowed for the entire deferred tax asset relating to our Mexican subsidiaries at December 31, 2010.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

In October 2009, Adit granted four of its officers options under its Nonqualified Stock Option Plan for the purchase of 1,000,000 shares of common stock. The options have an exercise price of \$0.05 per share, the options will vest at a rate of 20% per year, the first set of options vested on October 28, 2010, and are scheduled to expire on November 15, 2015.

In October 2009, Adit granted four of its officers bonus shares under its Stock Bonus Plan for 475,000 shares, 50% of the shares vested on October 28, 2010 and the remaining 50% will vest on October 28, 2011.

The fair value of each option/warrant award discussed above is estimated on the date of grant using the Black-Scholes option valuation model that uses the assumptions noted in the following table. Expected volatilities are based on volatilities from the Company's traded common stock. The expected term of options granted is estimated at half of the contractual term as noted in the individual option/warrant agreements and represents the period of time that management anticipates option/warrants granted are expected to be outstanding. The risk-free rate for the periods within the contractual life of the option is based on the U.S. Treasury bond rate in effect at the time of grant for bonds with maturity dates at the estimated term of the options.

	2010
Expected volatility	208.37% - 319.79%
Weighted-average volatility	159.17%

Note 11. Joint Ventures

In July 2010, the Company entered into a joint venture agreement with third parties. The joint venture agreement provides that the third parties will contribute 100% of the mining rights to the concession, "Mina Godinez" and the Company will have the exclusive rights to manage, operate, explore and exploit the concession. The Company will pay for the construction of buildings, access roads, and any necessary improvements. The Company will also pay for the machinery and equipment required for the operation of the mine. Any machinery or equipment used for the development of the mine will remain the exclusive property of the Company. Once production starts, the Company will receive 60% of the profits from the mine until it is fully reimbursed for its costs. The Company will receive 40% of the profits thereafter. The Company, also has a first right of refusal to purchase the property. The joint venture agreement will expire in July 2020, at which time the joint venture will be liquidated and dissolved. As of December 31, 2010, no costs have been incurred.

Note 12. Subsequent Events

Management evaluated all activity of the Company through April 14, 2011 (the issue date of the Financial Statements) and concluded the following disclosures are pertinent:

- a. March 2011, Tara Minerals issued 1,118,699 shares to the note holders that elected to convert their notes and related interest as of December 31, 2010. The value of the shares was \$1,342,439 or \$1.20 per share.

TARA MINERALS CORP. AND SUBSIDIARIES
(A Subsidiary of Tara Gold Resources Corp.)
(An Exploration Stage Company)
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

- b.** March 2011, the Company issued 125,000 shares of common stock for warrants exercised, for \$50,000 or \$0.40 a share for cash.
- c.** On January 28, 2011, Adit Resources Corp., a subsidiary of Tara Minerals, sold 500,000 units at a price of \$1.00 per unit to Yamana Gold Inc. Each unit consisted of one share of Adit's common stock and one half warrants. Each full warrant entitles Yamana to purchase one share of Adit's common stock at a price of \$1.50 per share at any time on or before January 28, 2014.

In connection with the sale of the units, Adit also signed a letter of intent that grants Yamana an option to acquire up to a 70% interest in Adit's Picacho gold/silver project. A definitive agreement is expected to be completed May 15, 2011. Upon completion of the definitive agreement, Adit will sell an additional 2,500,000 units to Yamana at a price of \$1.00 per unit. The units will be identical to the units sold on January 28, 2011. From the \$3,000,000 received from Yamana, Adit will be required to spend \$2,000,000 in exploration work on the Picacho project within 12 months of signing the definitive agreement.

Yamana can earn a 51% interest in the project by spending an additional \$5,000,000 on the project within 30 months of the date of the definitive agreement and paying Adit an additional \$1,000,000. Yamana can increase its interest to 70% by spending an additional \$9,000,000 on the project and paying Adit an additional \$2,000,000.

- d.** On March 2011, AMM executed an agreement to acquire six mining concessions known as La Verde from an independent third party. The properties approximate 2,104 hectares, and were purchased for a total of \$92,800, including \$12,800 in value added taxes. AMM paid \$50,000 as a deposit for the concession mining deposit which was applied to the effective price of the property. The remaining balance of \$42,800 is due thirty days after the execution date of the agreement.

March 2011, AMM purchased technical data pertaining to La Verde concessions from the former owner in consideration for 460,000 shares of the Company's common stock.

- e.** In September 2010, Tara Gold entered into a tentative agreement with Tara Minerals which provided that Tara Minerals will acquire all of the outstanding shares of Tara Gold by exchanging one Tara Mineral share for two Tara Gold shares. In 2011 this acquisition was cancelled. Tara Gold Resources Corp. will begin to distribute all of its shares in Tara Minerals to its shareholders at a rate of one Tara Minerals common share for every 20 outstanding shares of Tara Gold Resources Corp. The ex-dividend date is May 18, 2011, the record date is May 20, 2011 and the payment date is May 27, 2011. Additional distributions will be announced over the next 24 months until all Tara Minerals shares, held by Tara Gold, are distributed to Tara Gold shareholders.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE.

Not applicable.

ITEM 9A. CONTROLS AND PROCEDURES.

Francis Richard Biscan, Jr., Tara Minerals' Principal Executive Officer and Lynda R. Keeton-Cardno, Tara Minerals' Principal Financial Officer, have evaluated the effectiveness of Tara Minerals' disclosure controls and procedures (as defined in Rule 13a-15(e) of the Securities Exchange Act of 1934) as of the end of the period covered by this report and in their opinion Tara Minerals' disclosure controls and procedures are effective.

Management's Report on Internal Control Over Financial Reporting

Tara Minerals' management is responsible for establishing and maintaining adequate internal control over financial reporting and for the assessment of the effectiveness of internal control over financial reporting. As defined by the Securities and Exchange Commission, internal control over financial reporting is a process designed by, or under the supervision of Tara Minerals' principal executive officer and principal financial officer and implemented by Tara Minerals' Board of Directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of Tara Minerals' financial statements in accordance with U.S. generally accepted accounting principles and includes those policies and procedures that:

- Pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the company;
- Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with accounting principles generally accepted in the United States of America and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and
- Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Tara Minerals' management evaluated the effectiveness of its internal control over financial reporting as of December 31, 2010 based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission, or the COSO Framework. Management's assessment included an evaluation of the design of Tara Minerals' internal control over financial reporting and testing of the operational effectiveness of those controls.

Based on this evaluation, Tara Minerals' management concluded that Tara Minerals' internal control over financial reporting was effective as of December 31, 2010.

There was no change in Tara Minerals' internal control over financial reporting that occurred during the quarter ended December 31, 2010 that has materially affected, or is reasonably likely to materially affect, Tara Minerals' internal control over financial reporting.

ITEM 9B. OTHER INFORMATION.

Employee Pension, Profit Sharing or other Retirement Plans. Tara Minerals does not have a defined benefit, pension plan, profit sharing or other retirement plan, although it may adopt one or more of such plans in the future.

Compensation of Directors. Tara Minerals' directors did not receive any compensation for their services as directors during the fiscal year ended December 31, 2010.

Stock Option and Bonus Plans. Tara Minerals has adopted stock option and stock bonus plans. A summary description of these plans follows. In some cases these Plans are collectively referred to as the "Plans".

Incentive Stock Option Plan. Tara Minerals' Incentive Stock Option Plan authorizes the issuance of shares of Tara Minerals' common stock to persons that exercise options granted pursuant to the Plan. Only Tara Minerals employees may be granted options pursuant to the Incentive Stock Option Plan. The option exercise price is determined by Tara Minerals' directors but cannot be less than the market price of Tara Minerals' common stock on the date the option is granted.

Non-Qualified Stock Option Plan. Tara Minerals' Non-Qualified Stock Option Plan authorizes the issuance of shares of Tara Minerals' common stock to persons that exercise options granted pursuant to the Plan. Tara Minerals' employees, directors, officers, consultants and advisors are eligible to be granted options pursuant to the Plan, provided however that bona fide services must be rendered by such consultants or advisors and such services must not be in connection with the offer or sale of securities in a capital-raising transaction or promoting the price of Tara Mineral's common stock.

Stock Bonus Plan. Tara Minerals' Stock Bonus Plan allows for the issuance of shares of common stock to its employees, directors, officers, consultants and advisors. However bona fide services must be rendered by the consultants or advisors and such services must not be in connection with the offer or sale of securities in a capital-raising transaction or promoting the price of Tara Mineral's common stock.
