

## **Good-Bye Clutter: Logitech Harmony 900 Remote Controls Home-Entertainment Devices, Even When They're Out of Sight**

### ***Remote Features New Wireless RF Control, Full-Color Touch Screen; Replaces Up to 15 Remotes***

FREMONT, Calif., Aug 11, 2009 (BUSINESS WIRE) -- Logitech (SIX:LOGN) (NASDAQ:LOGI) today [introduced](#) the [Logitech Harmony\(R\) 900 remote](#). With its redesigned RF technology, full-color touch screen and intuitive button layout, the rechargeable Logitech Harmony 900 remote makes it easy to enjoy and control your TV, movies, games and music - even when your components are neatly hidden behind cabinet doors.

"Like all Harmony remotes, the Harmony 900 simplifies home entertainment, which is particularly relevant with more and more people staying home to watch movies on their big-screen TVs and enjoying surround sound and hi-def video from the comfort of the couch," said Ashish Arora, vice president and general manager of Logitech's Harmony business unit. "Unfortunately, more remotes and more wires tend to be byproducts of increasingly sophisticated home-entertainment systems. With the Harmony 900 remote's RF technology and ability to control up to 15 devices, you can say good-bye to the clutter while gaining better control of your devices."

### **Simple-to-Install RF System**

The Harmony 900 remote's completely redesigned RF system makes it easy to control (up to 100 feet away) a cabinet full of devices without the hassles often associated with RF setups. Just place the included IR blaster and one or two of the mini blasters on the cabinet shelves near the devices you want to control. (Unlike other RF remotes, there's no need to tape emitters to each of your devices.) Then use the Harmony 900 remote's color touch screen to choose the devices you want to control with RF. Once setup is complete, you're free to close the doors on entertainment-system clutter and point your remote anywhere you want.

### **Easy to Hold, Easy to Use**

Based on the award-winning design of the Logitech Harmony(R) One remote, the Logitech Harmony 900 remote's intuitive button layout is divided into four distinct zones (numbers; traditional DVD controls; D-pad with volume and channel up/down; and on-screen menu buttons), making it easy to find the right one quickly. Only the 44 most-essential buttons appear on the Harmony 900 remote, and each of those buttons is individually sculpted, providing useful tactile cues so you can operate the remote by touch, rather than having to rely on sight.

### **One Touch to Your Entertainment**

As with all Logitech Harmony remotes, the newest addition to the lineup can have you watching your favorite movie or show with one press of a button. With the Harmony 900 remote, there's no need for complicated lists and long explanations about how to use your home-entertainment system; it simplifies your entertainment with one-touch activity-based control. The whole family, your friends, and even the babysitter can simply select what they want to do by choosing the appropriate on-screen icon - such as "Watch TV" - and the Harmony 900 remote does the rest. The remote will turn on the TV, the cable box, the A/V receiver and any other necessary devices.

### **Guided Online Setup**

Logitech's online setup makes getting the Harmony 900 remote up and running as easy as possible. The intuitive setup wizard guides you, prompting you to enter the make and model numbers of your components. The Harmony software then programs the remote with the appropriate IR codes from Logitech's database of more than 225,000 devices from more than 5,000 manufacturers. And with more device codes added every day, you can be confident that devices you buy tomorrow will be covered, too.

### **Pricing and Availability**

The Logitech Harmony 900 remote is expected to be available in the U.S. and Europe in September for a suggested retail price of \$399.99 (U.S.). The remote ships with a recharging cradle, rechargeable battery, power supply, IR blaster and two mini blasters. Logitech plans to make additional blasters and mini blasters available online in some regions.

### **About Logitech**

Logitech is a world leader in personal peripherals, driving innovation in PC navigation, Internet communications, digital music, home-entertainment control, gaming and wireless devices. Founded in 1981, Logitech International is a Swiss public company traded on the SIX Swiss Exchange (LOGN) and on the Nasdaq Global Select Market (LOGI).
