

Consolidated Financial Statements

Year Ended 31 December 2016

(Expressed in Canadian Dollars)

MANAGEMENT'S REPORT

Management of New Zealand Energy Corp. (the "Company") is responsible for the reliability and integrity of the consolidated financial statements, and the notes to the consolidated financial statements.

The consolidated financial statements were prepared by management in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board. Since a precise determination of many assets and liabilities is dependent on future events, the timely preparation of financial statements requires management make estimates and assumptions and use judgment. When alternate accounting methods exist, management has chosen those it deems most appropriate in the circumstances.

PricewaterhouseCoopers LLP, an independent firm of Chartered Professional Accountants, were appointed by shareholders as the external auditor of the Company to express an audit opinion on the consolidated financial statements. Their examination included such tests and procedures as they considered necessary to provide reasonable assurance the consolidated financial statements are in accordance with International Financial Reporting Standards.

The Board of Directors is responsible for ensuring management fulfils its responsibilities for financial reporting and internal control. The Board exercises this responsibility through the Audit Committee. The Audit Committee recommends appointment of the external auditors to the Board, ensures their independence and approves their fees. The Audit Committee meets regularly with management and the external auditors to ensure management's responsibilities are properly discharged, to review the consolidated financial statements and recommend the consolidated financial statements be presented to the Board for approval. The external auditors have full and unrestricted access to the Audit Committee to discuss their audit and their findings.

Independent Auditor's Report

To the Shareholders of New Zealand Energy Corp.

We have audited the accompanying consolidated financial statements of New Zealand Energy Corp. and its subsidiaries (the "Company"), which comprise the consolidated balance sheets as at December 31, 2016 and December 31, 2015 and the consolidated statements of changes in equity, comprehensive loss and cash flows for the years then ended, and the related notes, which comprise a summary of significant accounting policies and other explanatory information.

Management's responsibility for the consolidated financial statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained in our audits is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company as at December 31, 2016 and December 31, 2015 and its financial performance and its cash flows for the years then ended in accordance with International Financial Reporting Standards.

Emphasis of matter

Without qualifying our opinion, we draw attention to note 1 in the consolidated financial statements which describes conditions and matters that indicate the existence of a material uncertainty that may cast significant doubt about the Company's ability to continue as a going concern.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
31 December 2016

(Expressed in Canadian Dollars)

1. DESCRIPTION OF BUSINESS AND GOING CONCERN

New Zealand Energy Corp. (the "Company") commenced operations on 19 April 2010 through its now wholly-owned subsidiary, East Coast Energy Ventures Limited. The Company was subsequently incorporated on 29 October 2010 under the name 0894134 B.C. Ltd. pursuant to the *Business Corporation Act* (British Columbia). On 10 November 2010, 0894134 B.C. Ltd. changed its name to New Zealand Energy Corp.

The Company, through its subsidiaries, is engaged in the exploration and production of oil and natural gas, as well as the operation of midstream assets, in New Zealand.

The Company's registered and records office is located at Suite 2800, Park Place, 666 Burrard St, Vancouver BC V6C 2Z7. The Company's principal place of business is Level 2, 119-125 Devon Street East, New Plymouth, New Zealand 4310.

The Company's shares are listed on the TSX Venture Exchange under the symbol "NZ".

Going Concern

While these consolidated financial statements have been prepared using International Financial Reporting Standards ("IFRS") applicable to a going concern, which contemplates the realization of assets and settlement of liabilities in the normal course of business as they come due, certain conditions cast significant doubt on the validity of this assumption. For the year ended 31 December 2016, the Company reported a Net Loss of \$5,225,884 (2015: \$5,910,543) and a cash outflow from operating activities of \$782,961 (2015: \$1,659,236) and as at that date, the Company had working capital of \$226,866 (2015: \$2,944,931). The Company also has several permit expenditure plans (Note 18) which are associated with the Company's interest in its oil and gas properties and exploration and evaluation assets.

The Company continues to pursue a number of options to improve its financial capacity, including cash flow from oil and gas production, credit facilities, commercial arrangements or other financing alternatives.

The Company's ability to improve its financial capacity and the relative success, and cash flow generated from, intended operations cannot be assured.

These consolidated financial statements do not reflect adjustments in the carrying values of the assets and liabilities, the reported revenues and expenses, and the balance sheet classifications used, would be necessary if the Company were unable to realize its assets and settle its liabilities in the normal course of operations. Such adjustments could be material.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Accounting policies specific to certain balances are described within the detailed note in the sections below.

General accounting policies adhered to in these financial statements are as follows:

Basis of Preparation

The consolidated financial statements have been prepared in accordance with IFRS as issued by the International Accounting Standards Board ("IASB").

These consolidated financial statements have been prepared on a historical cost basis except as disclosed in the accounting policies. In addition, these consolidated financial statements have been prepared using the accrual basis of accounting except for cash flow information.

Basis of Consolidation

The consolidated financial statements include the assets, liabilities, revenues and expenses of the Company and its subsidiaries. Subsidiaries are all entities over which the Company is able to exercise control. Control exists when the Company has the power, directly or indirectly, to govern the financial and operating policies of an entity so as to obtain benefits from its activities. The subsidiaries of the Company are as follows:

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

All intercompany balances and transactions, income and expenses have been eliminated upon consolidation.

Functional and presentation currency

Items included in the financial statements of each of the Company and its subsidiaries are measured using the currency of the primary economic environment in which the entity operates (the "functional currency"). The functional and reporting currency of the Company is the Canadian dollar.

Transactions in foreign currencies are initially recorded in the Company's functional currency at the exchange rate prevailing at the date of the transaction. Monetary assets and liabilities of the Company are denominated in foreign currencies are translated to the functional currency at the exchange rate prevailing at the end of each reporting period. Non-monetary assets and liabilities are measured in terms of historical cost in a foreign currency and are translated using the exchange rate at the date of the transaction.

The functional currency of the Company's New Zealand subsidiaries and joint arrangements is the New Zealand dollar ("NZ\$").

The results and financial position of subsidiaries have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- Assets and liabilities are translated at the closing rate at the reporting date;
- Income and expenses for each statement of comprehensive loss are translated at average exchange rates for the period; and
- All resulting exchange differences are recognized in other comprehensive income as cumulative translation adjustments.

Foreign exchange differences arising on monetary items that form part of the Company's net investment in foreign subsidiaries are initially recognized in other comprehensive income and reclassified from equity to the statement of comprehensive loss on disposal of the net investment.

Significant Accounting Estimates and Judgements

The preparation of the consolidated financial statements requires management to make certain estimates, judgements and assumptions.

The principal areas of judgement for the Company are found in the following notes:

Note 7 – Property, plant and equipment

Note 8 – Exploration and evaluation assets

Note 9 – Long term asset retirement obligations

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
31 December 2016

(Expressed in Canadian Dollars)

Changes in accounting policies

The Company elected to switch from full cost to successful efforts method of accounting at 31 December 2016 for its investments in oil and gas exploration assets. Under full cost method, all costs directly associated with the development of oil and gas reserves were capitalized. The successful efforts method is an alternative method of accounting for exploration and evaluation costs in the oil and gas industry. Under the successful efforts method, all general exploration and evaluation costs are expensed as incurred, except the direct costs of acquiring the right to explore, drilling exploratory wells and evaluating the results of drilling. Only the costs of successful exploration wells are capitalised as exploration and evaluation assets pending the determination of the success of the well. If a well does not result in a successful discovery, the previously capitalised costs are immediately expensed.

The Company believes, with its increased focus on development and production activities, the successful efforts method of accounting provides greater transparency of costs in any period in which exploration activities are undertaken [or subsequently the realisation of assets post any discovery]. As a result, the Company believes the change in accounting method was appropriate.

The change in accounting policy requires prior period financial statements be restated to reflect the results and balances that would have been reported had the Company been following the successful efforts method of accounting from its inception. The cumulative effect of the change in accounting method since inception is set out in the tables below:

	Year ended 31 December 2015	Year ended 31 December 2014
	\$	\$
Increase in exploration and evaluation costs expensed	57,091	-
Decrease in impairment	(4,205,287)	-
Decrease in loss for the year	(4,148,196)	-
Decrease in exploration and evaluation asset	-	(4,193,565)
Decrease in foreign currency translation reserve	358,175	403,544
Increase/(Decrease) in accumulated deficit	(358,175)	3,790,021
Decrease in loss per share	0.02	-

Adoption of New or Revised IFRSs

There have been no new and revised accounting standards, interpretations or amendments effective during the year which have a material impact on the Company's accounting policies or disclosures.

Future IFRS Not Yet Effective

IFRS 9 – Financial Instruments

IFRS 9 *Financial Instruments* ("IFRS 9") is effective for annual reporting periods beginning on or after 1 January 2018. The Company does not expect any significant changes as a result of this standard. The Company is not expected to early adopt this standard.

IFRS 15 Revenue from Contracts with Customers

IFRS 15 *Revenue from Contracts with Customers* ("IFRS 15") is effective for annual reporting periods beginning on or after 1 January 2018. The Company has yet to determine the impact this standard will have on the financial statements. The Company is not expected to early adopt this standard.

IFRS 16 Leases

IFRS 16 *Leases* ("IFRS 16") is effective for annual reporting periods beginning on or after 1 January 2019. The Company has yet to determine the impact this standard will have on the financial statements. The Company is not expected to early adopt this standard.

All other standards, interpretations and amendments approved but not yet effective in the current year are either not applicable to the Company or are not expected to have a material impact on the Company's financial statements and therefore have not been discussed.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

31 December 2016

(Expressed in Canadian Dollars)

3. JOINT ARRANGEMENTS

The consolidated financial statements include the Company's share of the assets, liabilities and cash flows of the joint arrangements, as they are accounted for as joint operations. The Company combines its share of the joint arrangements' individual income and expenses, assets and liabilities and cash flows on a line-by-line basis with similar items in the Company's financial statements. Income taxes are recorded based on the Company's share of the joint arrangement's activities.

The Company accounts for the following joint arrangements.

Company	Principal activity	Location	Interest
TWN Limited Partnership	Operate the Waihapa Production Station	New Zealand	50%
Tariki Joint Arrangement	Operate the Tariki license	New Zealand	50%
Waihapa-Ngaere Joint Arrangement	Operate the Waihapa and Ngaere licenses	New Zealand	50%
Alton Joint Arrangement*	Explore the Alton permit	New Zealand	65%

* As operator, the Company relinquished the Alton exploration permit (NZEC 65%, L&M 35%) in 2016. The permit work programme required the drilling of an exploration well by 22 November 2016. The Company had no carrying value attributed to the Alton Permit exploration and evaluation expenditure at the time of the relinquishment.

4. CASH AND CASH EQUIVALENTS, AND REVOLVING CREDIT FACILITY

Cash is composed of cash on hand and deposits held at banks. Cash equivalents consist of short-term highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and are subject to an insignificant risk of change in value.

On 7 July 2016, NZEC subsidiary company Taranaki Ventures Limited (TVL) entered into an on demand revolving credit facility with the Bank of New Zealand, giving the Company the ability to draw down up to NZD500,000. The interest rate at 31 December 2016 was 5.82%. The facility is secured by way of general security agreement over the present and after acquired assets of TVL with NZEC subsidiaries NZEC Holdings Limited, NZEC Management, NZEC Tariki Limited and NZEC Waihapa Limited guaranteeing the obligations of TVL under the facility.

	2016	2015
	\$	\$
Cash and cash equivalents	57,969	431,976
Revolving credit facility	(363,183)	-
	(305,214)	431,976

5. ACCOUNTS AND OTHER RECEIVABLES

Receivables are recognized initially at fair value and subsequently measured at amortized cost using the effective interest rate method less any provisions for uncollectible accounts.

	2016	2015
	\$	\$
Trade receivables	645,090	424,215
GST receivable	7,878	5,505
Other receivables	155,898	292,424
	808,866	722,144

6. INVENTORIES

Material and supply inventories consist of wellheads, and tubulars purchased for use in oil and gas operations and are valued at the lower of cost, or net realizable value. The costs of purchase of material and supply inventories comprise the purchase price, import duties and other taxes, and transport, handling and other costs directly attributable to their acquisition. Non-current inventories are not expected to be utilised within 1 year.

Oil inventories, as well as any unused purchased oil and condensate, are valued at the lower of the cost and net realizable value. Cost is composed of operating expenses that have been incurred in bringing inventories to their present location and condition, and the portion of depletion expense associated with oil and condensate production. The cost of inventories is

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
31 December 2016

(Expressed in Canadian Dollars)

determined using the weighted average cost method. Net realizable value is the estimated selling price in the ordinary course of business less the estimated costs necessary to make the sale.

	2016	2015
	\$	\$
Material and supplies	218,493	2,313,456
Oil inventories	538,103	277,292
	756,596	2,590,748
Non-current material and supplies	1,868,416	-

7. PROPERTY, PLANT AND EQUIPMENT

Property, plant and equipment are carried at cost, less accumulated depreciation. The depreciable amount of the asset is the cost of the asset less its residual value. Depreciation ceases to be recognized when an asset's residual value exceeds its carrying amount. The Company reviews residual values, depreciation methods and useful lives at least annually. Any changes in estimates that arise from this review are accounted for prospectively.

Property, plant and equipment are depreciated over the estimated useful life of the assets using the straight -line method at the following rates per annum:

Furniture and fixtures	Computer equipment	40%
Furniture and fixtures		8.5% - 10.5%
Plant and equipment	TWN Assets	5%
Plant and equipment		8.5%
Land and building	Leasehold improvements	7%

Oil and gas properties

All costs directly associated with the development of oil and gas reserves are capitalized on an area-by-area basis. These costs include proved property acquisitions, development drillings, completion of wells, gathering facilities and infrastructure, asset retirement costs, and transfers from exploration and evaluation assets where technical feasibility and commercial viability has been determined.

The net carrying value of oil and gas properties is depreciated using the unit-of-production method by reference to the ratio of production in the year to the related total proved and probable reserves of oil and natural gas, taking into account estimated future development costs necessary to bring those reserves into production.

Impairment

Assets that are subject to depreciation and depletion are reviewed for impairment at each reporting date to determine whether there is any indication the carrying amount may not be recoverable. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use.

For impairment losses identified based on a CGU, the loss is allocated on a pro rata basis to the assets within the CGU. The impairment loss is recognized as an expense in the statement of comprehensive loss.

Where an impairment loss subsequently reverses, the carrying amount of the asset or CGU is increased to the revised estimate of its recoverable amount, but so the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset or CGU in prior years. A reversal of an impairment loss is recognized immediately in the statement of comprehensive loss.

At 31 December 2016, the Company assessed and concluded the carrying value of the TWN Assets CGU (TWN Licences & Waihapa Production station) exceeded value in use resulting in an impairment of \$2.956 million (2015: Copper Moki \$1.67 million). The impairment was the result of lower than anticipated use of Waihapa Production Station assets particularly the LPG Plant. The value in use was calculated using a discounted cash flow with the following key (level 3) inputs: recoverable reserve forecasts based on the externally prepared reserves report, a discount rate of 12.5% (2015: 20%), a pre-tax discount rate of 14.5% for Copper Moki, 12.9% for TWN Assets, the external reserve engineer forecasts as at 31 December 2016, a forecast period over the expected life of the asset, and estimated usage of Waihapa Production Station services. The recoverable amount of the Copper Moki CGU is approximately \$6.1 million (2015: \$6.1 million) and the TWN Assets \$11.8 million (2015: \$14.4 million).

The recoverable amount of PP&E is sensitive to the discount rate, forecast future commodity prices and overall plant usage. If the discount rate applied to forecasted net cash flows increased by 5 percent, the Company would have recognized additional impairment of approximately \$2.7 million in the TWN Assets only. A 5 percent reduction in forecast commodity prices would result in additional impairment of approximately \$1.2 million in the TWN Assets only.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

31 December 2016

(Expressed in Canadian Dollars)

Key estimates and assumptions

Oil and gas reserve determination

The process of estimating reserves (using independent reserves engineers) requires significant estimates based on available geological, geophysical, engineering and economic data. The estimate of the economically recoverable oil and natural gas reserves and related future net cash flows incorporates many factors and assumptions including the expected reservoir characteristics, future commodity prices and costs. Future development costs are estimated using assumptions as to the number of wells required to produce the reserves, the cost of such wells and associated production facilities, and other capital costs.

Determination of cash-generating units ("CGUs")

Oil and gas properties, resources properties and other corporate assets are aggregated into CGUs based on their ability to generate largely independent cash flows, and are used for impairment testing. CGUs are determined by similar geological structure, shared infrastructure, geographical proximity, commodity type, similar exposure to market risks, and materiality, and are subject to management's judgement. The Company has two identified CGU's, Copper Moki, and TWN licences and WPS.

Impairment indicators and calculation of impairment

The recoverability of producing asset carrying values is assessed at the CGU level. The asset composition of a CGU can directly impact the recoverability of the assets included therein. At each reporting date, the Company assesses whether or not there are circumstances that indicate a possibility the carrying values of its CGUs are not recoverable, or impaired.

In assessing the recoverability of oil and gas properties, each CGU's carrying value is compared to its recoverable amount, defined as the greater of its fair value less costs of disposal and value in use. In estimating the recoverable amount, the Company uses the net present value of future cash flows from oil and gas reserves of each CGU with reference to the reserves estimates carried out by the Company's independent reserve evaluator.

Key input judgements and estimates used in the determination of cash flows from oil and gas reserves include the following:

- a) Reserves – Assumptions that are valued at the time of reserve estimation may change significantly when new information becomes available. Changes in forward price estimates, production costs or recovery rates may change the economic status of reserves and may ultimately result in reserves being restated.
- b) Oil and natural gas prices – Forward price estimates of oil and natural gas prices are used in the cash flow model. Commodity prices have fluctuated widely in recent years due to global and regional factors including supply and demand fundamentals, inventory levels, exchange rates, weather, economic and geopolitical factors.
- c) Discount rate – The discount rate used to calculate the net present value of cash flows is based on estimates of an approximate industry peer group weighted average cost of capital. Changes in the general economic environment could result in significant changes to this estimate.

8. EXPLORATION AND EVALUATION ASSETS

The Company uses the successful efforts method of accounting for oil and gas exploration costs. All general exploration and evaluation costs are expensed as incurred except the direct costs of acquiring the rights to explore, drilling exploratory wells and evaluating the results of drilling. These direct costs are capitalised as exploration and evaluation assets pending the determination of the success of the well. If a well does not result in a successful discovery, the previously capitalised costs are immediately expensed.

Exploration and evaluation assets are assessed for impairment if facts and circumstances suggest the carrying amount exceeds the recoverable amount. Exploration and evaluation assets can be allocated to CGUs or groups of CGUs for the purposes of assessing such assets for impairment. At 31 December 2016 exploration and evaluation assets were nil and therefore not allocated to CGUs.

Key estimates and assumptions

Assessment of the recoverability of capitalised exploration and evaluation expenditure requires certain estimates and assumptions to be made as to future events and circumstances, particularly in relation to whether economic quantities of reserves have been discovered. Such estimates and assumptions may change as new information becomes available. If it is concluded the carrying value of an exploration and evaluation asset is unlikely to be recovered by future development or sale, the relevant amount will be expensed in the statement of comprehensive loss.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
31 December 2016

(Expressed in Canadian Dollars)

9. LONG TERM ASSET RETIREMENT OBLIGATIONS

The Company recognizes liabilities for statutory, contractual, constructive or legal obligations associated with the retirement of long-lived assets in the period when the liability arises. The net present value of the asset retirement obligation (discounted to its present value using an appropriate discount rate) is capitalized to the long-lived asset to which it relates with a corresponding increase to the liability in the period incurred.

Changes in the liability for an asset retirement obligation due to the passage of time are measured by the present value of the amount of future expenditure. The amount is recognized in the statement of comprehensive loss as an increase in the liability and accretion expense.

Changes resulting from revisions to the timing, discount rates, regulatory requirements or the amount of the original estimate of undiscounted cash flows are recognized as an increase or a decrease to the carrying amount of the liability and the related long-lived asset. The Company's estimates are reviewed at the end of each reporting period for such changes.

The Company's asset retirement obligations are estimated based on the costs to abandon and reclaim its wells in certain licences and permits, and restoration obligations associated with the land at the Waihapa Production Station together with the estimated timing of the costs to be paid in future periods.

	2016	2015
	\$	\$
Opening Balance 1 January	11,006,673	7,902,421
Change in estimate	(338,447)	1,914,001
Accretion expense for the year	312,623	273,029
Reclassified as non-current	-	386,222
Foreign currency translation adjustment	(131,420)	531,000
Closing Balance 31 December	10,849,429	11,006,673

Assumptions

Total undiscounted value of payments	\$17,814,791	\$20,230,760
Discount rate	2.27% to 3.36%	2.6% to 3.55%
Inflation rate	2%	2%
Expected life	2 to 20 years	2 to 23 years

Key estimates and assumptions

The calculation of asset retirement obligations includes estimates of the future costs to settle the liability, the timing of the cash flows to settle the liability, the risk-free discount rate and the future inflation rates. The impact of differences between actual and estimated costs, timing and inflation on the consolidated financial statements of future periods may be material.

10. SHARE CAPITAL

a) Common shares

Common shares are classified as equity. Transaction costs directly attributable to the issue of common shares and share options are recognized as a deduction from equity.

Common shares issued for non-monetary consideration are recorded at their fair value on the measurement date. The measurement date is defined as the earliest of the date at which the commitment for performance by the counterparty to earn the common shares is reached or the date at which the counterparty's performance is complete.

The Company has an unlimited number of common shares without par value authorized for issuance.

Details of issuances of common shares:

On 23 March 2015, the Company completed a non-brokered private placement issuing 44,250,000 common shares at a price of \$0.04 per share, for net proceeds of \$1,737,794. Geoservices Limited ("Geoservices") subscribed for 29,000,000 shares under the private placement and, upon completion of the private placement, Geoservices owns or controls 46,000,000 common shares or approximately 19.82% of NZEC's total issued and outstanding common shares, and 17,000,000 common share purchase warrants. A resolution passed by vote of the disinterested shareholders of the Company granted approval at the AGM on 16 June 2015, for Geoservices to become a new Control Person of the Company.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
31 December 2016

(Expressed in Canadian Dollars)

The purchase of the securities by Geoservices was made for investment purposes. Subject to TSX-V rules, Geoservices may increase or decrease its investment in NZEC depending on market conditions or any other relevant factors.

b) Share purchase options

The share option plan allows the Company's employees and consultants to acquire shares of the Company at a specified exercise price. The fair value of options granted is recognized as a share-based payment expense with a corresponding increase in equity over the vesting period of the options. An individual is classified as an employee when the individual is an employee for legal or tax purposes (direct employee) or provides services similar to those performed by a direct employee.

Equity-settled share-based payment transactions with non-employees are measured at the fair value of the goods or services received. However, if the fair value cannot be estimated reliably, the share-based payment transaction is measured at the fair value of the equity instruments granted at the date the non-employee received the goods or the services.

The fair value is measured at grant date and each tranche is recognized on a graded-vesting basis over the period during which the options or warrants vest. The fair value of the options and warrants granted is measured using the Black-Scholes option pricing model taking into account the terms and conditions upon which the options or warrants were granted. The amount of share based compensation or warrant recognized during a period is based on the best available estimate of the number of options or warrants that are expected to vest. On the vesting date the Company revises the estimate to equal the number of options that are ultimately vested.

Pursuant to the Company's share option plan, non-transferable options to purchase common shares must not exceed 10% of the number of then outstanding common shares, or 23,212,346 options, based on the total issued and outstanding common shares as at 31 December 2016. Such options can be exercisable for a maximum of five years from the date of grant. The exercise price of each share option is set by the Board of Directors at the time of grant but cannot be less than the market price at the time of grant. Vesting of share options is at the discretion of the Board of Directors at the time the options are granted.

In November 2015, the Company granted 10,000,000 incentive share options exercisable at \$0.05 to a senior officer of the Company. The options have an expiry date of 30 June 2020 and will vest on 30 June 2018.

Options activity

	2016		2015

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

31 December 2016

(Expressed in Canadian Dollars)

Options expense and assumptions	2016	2015
Expense	\$51,099	\$(7,513)
Black-Scholes option pricing model assumptions for new options granted:		
Risk-free interest rate	N/A*	0.70%
Expected volatility	N/A*	69.67%
Expected life	N/A*	4.6 years
Expected dividend yield	N/A*	Nil%

*No new options granted in 2016.

Key estimates and assumptions

Option pricing models require the input of subjective assumptions including the expected price volatility and expected option life. Management has calculated expected price volatility using historical share price data of the Company. Changes in these assumptions may have a significant impact on the fair value calculation.

c) Warrants

Warrants that have been issued by the Company are measured at fair value at the issue date. This value is recognized as an expense with a corresponding increase in equity.

The fair value of warrants is measured as for options as discussed above.

Warrants activity

	2016		2015

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

31 December 2016

(Expressed in Canadian Dollars)

11. REVENUE

Revenue from the sale of oil and natural gas is recorded when the significant risks and rewards of ownership of the product are transferred to the buyer, which is at the delivery point. Revenue is measured at the fair value of the consideration received or receivable. Revenue is presented net of royalties.

Revenue from the purchased oil and purchased condensate is recognized when the product is delivered and title and significant risks of the product is transferred to the other party. Revenue from the purchased oil and purchased condensate is measured at the gross amount net of any relevant fees paid or payable.

Processing revenue is recognized at the time the service has been rendered, provided the amount can be measured reliably and management has determined it is probable that economic benefit associated with the services will flow to the Company.

	Note	2016 \$	2015 \$
Oil sales		3,195,196	2,714,584
Gas sales		436,143	327,159
Processing revenue		2,091,165	2,054,883
Other revenue		149,114	40,883
Royalties		(180,691)	(199,991)
		5,690,927	4,937,518
 Purchased light oil sold	a)	175,680	-
		5,866,607	4,937,518

- a) The Company has an arrangement with a third party whereby the Company purchases light oil, charges a processing fee and subsequently sells the light oil to the same major oil company to which the Company sells its oil. Any unsold light oil is carried as inventory.

12. PRODUCTION COSTS

Production costs incurred by the Company include the transportation, day-to-day servicing of the production facilities and other costs directly relating to the revenue recognized from the oil and gas or purchased oil and condensate. Costs paid by the Company for the transportation of oil, natural gas and condensate from the wellhead to the point of title transfer are recognized when the transportation is provided.

13. GENERAL AND ADMINISTRATIVE EXPENSES

	2016 \$	2015 \$

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

31 December 2016

(Expressed in Canadian Dollars)

14. INCOME TAXES

Any income tax on profit or loss for the periods presented comprises current and deferred tax. Income tax is recognized in the statement of comprehensive loss except to the extent it relates to items recognized directly in equity, in which case it is recognized in equity.

Deferred tax assets and liabilities are recognized for deferred tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using the enacted or substantively enacted tax rates expected to apply when the asset is realized or the liability settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period substantive enactment occurs.

A deferred tax asset is recognized to the extent it is probable future taxable profits will be available against which the asset can be used. To the extent the Company does not consider it probable a deferred tax asset will be recovered, the deferred tax asset is reduced.

A reconciliation of the income tax benefit determined by applying the Canadian income tax rates to the consolidated loss for the years ended 31 December 2016 and 2015 has been prepared as follows:

	2016	2015*
	\$	\$
Loss before income taxes	5,225,884	5,910,543
Statutory tax rate	26.0%	26.0%

	(247,763)	(1,203,072)
Net deferred income tax asset	-	-

*Comparative numbers have been restated due to a voluntary change in accounting policy. Refer note 2.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
31 December 2016

(Expressed in Canadian Dollars)

The above losses available for future years have been determined by applying a Canadian income tax rate of 26% (2015: 26%) and a New Zealand tax rate of 28% (2015: 28%). These tax benefits have not been recognized in the consolidated financial statements as the benefits are unlikely to be realized in the foreseeable future.

The Company has operating losses available in Canada to reduce future taxable income of \$17,072,239, which will expire between 2030 and 2036. Tax losses carried forward in New Zealand do not expire, subject to certain requirements related to shareholder continuity, and are estimated at NZ\$95,840,603.

15. RELATED PARTY TRANSACTIONS

Key Management and Personnel Compensation

The key management personnel include the directors and other officers of the Company. Transactions have occurred in the normal course of operations and were measured at the consideration established and agreed to by the related parties. Key management compensation consists of the following:

	2016	2015
	\$	\$
Salary and consulting fees	1,457,656	1,479,543
Share based compensation	50,854	(8,150)
	1,508,510	1,471,393

Included in the above amounts are:

Upstream Consulting Ltd (James Willis)	73,878	168,477
Arenig Energy Ltd (David Llewellyn)	7,789	15,633
Michael Adams Reservoir Engineering Ltd (Michael Adams)	520,089	225,709

Greymouth Petroleum Limited

Greymouth Petroleum Limited became a related party on 23 March 2015 with directors in common. Transactions have occurred in the normal course of operations and are at values established on an arm's length basis. Transactions and balances (revenue to the Company in nature) since that date comprise:

	2016	2015
	\$	\$
Processing revenue	371,376	423,322
Oil & Gas properties expenditure	48	46,299
Accounts receivable	31,606	37,795

Tiger Drilling Ltd

Tiger Drilling Limited became a related party on 23 March 2015 with directors in common. Transactions have occurred in the normal course of operations and are at values established on an arm's length basis. Transactions and balances (expenses to the Company in nature) since that date comprise:

	2016	2015
	\$	\$
Production Costs	103,766	6,445
Accounts payable	9,485	-

GMP Environmental Ltd

GMP Environmental Ltd became a related party on 23 March 2015 with directors in common. Transactions have occurred in the normal course of operations and are at values established on an arm's length basis. Transactions and balances (expenses to the Company in nature) since that date comprise:

	2016	2015
	\$	\$
Production Costs	121,929	-
Accounts payable	89,046	-

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

31 December 2016

(Expressed in Canadian Dollars)

16. SEGMENTED DISCLOSURES

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker, who is responsible for allocating resources and assessing performance of the operating segment, has been identified as the Chief Executive Officer.

The Company conducts its business as a single operating segment being the acquisition, exploration, development and production of conventional oil and natural gas resources in New Zealand. The Company's geographic area for all assets, liabilities and revenues is New Zealand.

17. COMMITMENTS

As at 31 December 2016, the Company had the following undiscounted contractual obligations:

	2017 \$	2018 to 2019 \$	2020 and onwards \$	Total \$
Operating lease obligations	91,000	27,000		118,000
Contract and purchase commitments	243,000	361,000	402,000	1,006,000
	334,000	388,000	402,000	1,124,000

Bonds

Bonds provided to the Crown in respect of the Tariki, Waihapa and Ngaere petroleum mining licences were previously secured by term deposits. These have been replaced with bonds provided by Bank of New Zealand (NZD375,000), secured by way of general security agreement over the present and after acquired assets of Taranaki Ventures Limited (TVL) with NZEC subsidiaries NZEC Holdings Limited, NZEC Tariki Limited, NZEC Waihapa Limited and NZEC Management Limited guaranteeing the obligations of TVL under the facility.

18. PERMIT EXPENDITURE PLANS

The Company undertakes oil and gas production, development and exploration activities and has plans to complete certain exploration activities. Certain permits and licences held by the Company require various work obligations to be performed in order to maintain the permits or licences in good standing. The Company and, where relevant, its co-venturers in a permit, may apply to alter the exploration programs, request extensions, reject development costs, relinquish certain permits or farm out an interest in permits. The permit expenditure plans include those required to maintain its permits in good standing during the current permit term, prior to the Company committing to the next stage of the permit term, where additional expenditure would be required.

Maintaining the permits in good standing during the permit term is based on the fulfilment of the work program and is not based on a specific expenditure level. The anticipated cost of the works planned are set out below and relate to the following permits/licences (in the Taranaki Basin):

Permit/Licence	Note	Type	2017 \$	2018 to 2019 \$	2020 and onwards \$	Total \$
Eltham Permit	1	Exploration	-	3,716,000	-	3,716,000
Tariki Licence	2	Producing	-	213,000	1,076,000	1,289,000
Waihapa Ngaere Licence	3	Producing	-	400,000	190,000	590,000
			-	4,329,000	1,266,000	5,595,000

- 1) Eltham: 2018 - drill an exploration well.
- 2) Tariki: 2018 - update geological models and install a jet pump (if economically viable); 2021 - implement project for gas recovery, drill well or sidetrack, and prepare updated field development plan.
- 3) Waihapa and Ngaere: 2019 - implement enhanced oil recovery project.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

31 December 2016

(Expressed in Canadian Dollars)

19. FINANCIAL INSTRUMENTS BY CATEGORY

Loans and Receivables	2016	2015
	\$	\$
Financial assets as per balance sheet	858,957	1,148,615
Financial liabilities as per balance sheet	1,611,062	1,126,358

Financial assets

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market and with no intention of being traded. They are included in current assets except for maturities greater than 12 months after the balance sheet date, which are classified as non-current assets. Loans and receivables are recognized at the amount expected to be received less any discount or rebate to reduce the loan and receivables to estimated fair value. Loans and receivables are subsequently measured at amortized cost using the effective interest method.

Loans and receivables are included in cash and cash equivalents, restricted cash and accounts receivable in the consolidated balance sheet. All financial assets are classified as level 2 per the fair value hierarchy levels.

Financial liabilities

Accounts payable, accrued liabilities and operating line of credit are classified as other financial liabilities and are initially recognized at fair value, net of transaction costs incurred, and are subsequently stated at amortized cost. Any difference between the amounts originally received, net of transaction costs, and the redemption value is recognized in the statement of comprehensive loss over the period to maturity using the effective interest method. All financial liabilities are classified as level 2 per the fair value hierarchy levels.

Impairment of financial assets

Financial assets, other than those at fair value through profit or loss, are assessed for indicators of impairment at each period-end. Financial assets are impaired when there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the financial asset, the estimated future cash flows of the investment have been impacted.

Objective evidence of impairment may include the following:

- Significant financial difficulty of the issuer or counterparty;
- Default or delinquency in interest or principal payments; or
- It has become probable the borrower will enter bankruptcy or financial reorganization.

For financial assets carried at amortized cost, the amount of the impairment is the difference between the asset's carrying amount and the present value of the estimated future cash flows, discounted at the financial asset's original effective interest rate.

20. CAPITAL RISK MANAGEMENT

The Company's capital includes share capital, shares subscribed, contributed surplus and the cumulative deficit. The Company's objectives when managing capital are to safeguard its ability to continue as a going concern, so it can continue to provide returns for shareholders and benefits for other stakeholders. The Company manages its capital structure and adjusts it in the light of changes in economic conditions and the risk characteristics of the underlying assets. The Company's short-term operating budgets and capital budgets are reviewed and updated annually and as necessary depending on various factors, including successful capital deployment. The Company may issue new shares, issue new debt or dispose of interests in assets in order to meet its financial obligations.

21. FINANCIAL RISK MANAGEMENT

The Company's activities expose it to a variety of financial risks, including credit risk, liquidity risk, foreign exchange risk, interest rate risk, price risk and fair value risk. The Company's overall risk management program focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the financial performance of the Company. This note presents information about the Company's exposure to each of these risks, the Company's objectives and processes for measuring and managing risk, and the Company's management of capital. The Board of Directors has overall responsibility for the establishment and oversight of the Company's risk management framework.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS 31 December 2016

(Expressed in Canadian Dollars)

Credit Risk

Credit risk is the risk of potential loss to the Company if the counterparty to a financial instrument fails to meet its contractual obligations. The Company's credit risk is primarily attributable to its liquid financial assets including cash and cash equivalents and trade receivables.

Cash and cash equivalents consist of cash deposits that are primarily held with a registered New Zealand bank.

All of the Company's production is sold directly to a major oil company. The Company has assessed the risk of non-collection from the buyer as low due to the buyer's financial condition. Trade receivables reported in the Company's balance sheet are aged at or under 30 days and are exposed to the risk of provisional pricing adjustment due to near-term price movements of oil.

The carrying value of the Company's cash and cash equivalents, trade receivables and restricted cash represents the maximum exposure to credit risk. There were no significant amounts past due or impaired as at 31 December 2016.

Liquidity Risk

Liquidity risk is the risk the Company will not be able to meet its capital commitments, and other financial obligations as they are due. The Company's approach to managing liquidity is to ensure, to the extent possible, that it will have sufficient liquidity to meet its liabilities when due without incurring unacceptable losses or risking harm to the Company's reputation.

The Company's liquidity is dependent upon maintaining its current working capital balances, operating cash flows and ability to raise funds. To forecast and monitor liquidity the Company prepares operating and capital expenditure budgets which are monitored and updated as considered necessary.

At 31 December 2016, the Company had (\$363,183) in a revolving credit facility (2015: nil), and \$57,969 in cash and cash equivalents (2015: \$431,976) and \$226,866 in working capital (2015: \$2,944,931). As disclosed in Note 18, the Company has various ongoing permit expenditure plans which are associated with the Company's interest in its exploration and evaluation assets. To the extent the Company elects not to carry out the permit expenditure plans pertaining to a specific permit, the Company stands to forfeit its interest in the relevant permit.

Management has estimated the Company has sufficient working capital to meet short-term operating requirements. However, in light of the reliance on ongoing efforts to increase financial capacity and successful completion of development activities, there is significant doubt about the Company's ability to continue as a going concern. Refer Note 1, Going Concern.

The following are the expected maturities of financial liabilities and obligations at 31 December 2016:

	Less than 1 year	2 to 5 years	Thereafter	Total
	\$	\$	\$	\$
Accounts payable and accrued liabilities	1,247,879	-	-	1,247,879
Revolving credit facility	363,183	-	-	363,183

Foreign Exchange Risk

The Company operates in New Zealand only. All of the Company's petroleum sales are denominated in United States dollars and operational and capital activities related to our properties are transacted primarily in New Zealand dollars and/or United States dollars with some costs also being incurred in Canadian dollars. Foreign exchange risk arises when the future commercial transactions, recognized assets and liabilities are denominated in a currency that is not the entity's functional currency.

The Company currently does not have significant exposure to other currencies and this is not expected to change in the foreseeable future as the work commitments in New Zealand are expected to be carried out in New Zealand and to a lesser extent, in United States dollars.

Interest Rate Risk

Interest rate risk is the risk future cash flows will fluctuate as a result of changes in market interest rates. The Company is exposed to interest rate fluctuations on its cash and cash equivalents that bear a variable rate of interest. The risk is not considered significant.

The Company did not have any interest rate swaps or financial contracts with variable interest rates in place during the period ended 31 December 2016 and any variations in interest rates would not have materially affected net income.

Price Risk

The Company is exposed to price movements as part of its operations in relation to the prices received for its oil production. Such prices may also affect the value of resources properties and the level of spending for future activities. Prices received by the Company for its production are largely beyond the Company's control as petroleum prices are impacted by numerous factors, including, but not limited to, industrial and retail demand, levels of worldwide production, short-term changes in supply and demand related to speculative activities, forward sales by producers and speculators, and other factors. The Company's oil

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

31 December 2016

(Expressed in Canadian Dollars)

production is priced based on an agreed contract price marker based on spot prices, exposing the Company to the risk of price movements. The Company has not entered into any hedge instruments and because oil sales are derived from spot prices, the impact of price risk on the Company's financial instruments is minimal.

Fair Value

Financial instruments recognized at fair value on the consolidated balance sheets must be classified into one of the three following fair value hierarchy levels:

Level 1 – measurement based on quoted prices (unadjusted) observed in active markets for identical assets or liabilities.

Level 2 – measurement based on inputs other than quoted prices included in Level 1 that are observable for the assets or liability.

Level 3 – measurement based on inputs that are not observable (supported by little or no market activity) for the assets or liability.

22. SUBSEQUENT EVENTS

In March 2017 Taranaki Ventures Limited (TVL) acquired an Overriding Royalty (Royalty Agreement) from a third party which contained an obligation due by a related party of TVL. Concurrently TVL agreed to fully discharge and cancel the related party's obligations under the Royalty Agreement in return for payment from the related party. Payment to the third party and receipt from the related party is spread over 2 years, with future payments/receipts secured by back-to-back bank guarantees. The arrangement is immediately cash positive for NZEC by the amount of the gain under the arrangement of NZ\$154,000.
