

**ANNUAL CONSOLIDATED
FINANCIAL STATEMENTS**

for the years ended
December 31, 2015 and 2014
(expressed in Canadian dollars)

INDEPENDENT AUDITOR'S REPORT

To the Shareholders of QMX Gold Corporation:

We have audited the accompanying consolidated financial statements of QMX Gold Corporation and its subsidiary, which comprise the consolidated statements of financial position as at December 31, 2015 and 2014, and the consolidated statements of operations and comprehensive loss, consolidated statements of cash flows and consolidated statements of changes in equity for the years then ended, and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of QMX Gold Corporation and its subsidiary as at December 31, 2015 and 2014, and their financial performance and cash flows for the years then ended in accordance with International Financial Reporting Standards.

Emphasis of Matter

Without qualifying our opinion, we draw attention to Note 1 in the consolidated financial statements which indicates that the Company had continuing losses during the year ended December 31, 2015, a working capital deficiency as at December 31, 2015 and had defaulted on significant amounts of debt as of December 31, 2015. These conditions along with other matters set forth in Note 1 indicate the existence of a material uncertainty that may cast significant doubt about the Company's ability to continue as a going concern.

QMX GOLD CORPORATION

Notes to the Annual Consolidated Financial Statements

December 31, 2015 and 2014

(Expressed in Canadian dollars unless otherwise noted)

1. Nature of operations and going concern

QMX Gold Corporation ("QMX" or the "Company") currently has interests in mineral exploration and evaluation properties in the province of Québec. During the year ended December 31, 2015, the Company sold its mining project in Manitoba. The Company has resumed mining at its Lac Herbin mine and is also continuing to focus on the exploration and evaluation of its other gold and base metal projects within these regions. The registered head office of the Company is located at 65 Queen Street West, Suite 815, Toronto, Ontario, Canada. The Company's shares trade on the TSX Venture Exchange ("TSXV") under the symbol "QMX".

The business of mining and exploring for minerals involves a high degree of risk and there can be no assurance that current operations, including exploration and evaluation programs will result in profitable mining operations. The recoverability of the carrying value of mineral properties and the Company's continued existence is dependent upon the preservation of its interest in the underlying properties, the discovery of economically recoverable reserves, the achievement of profitable operations, or the ability of the Company to raise additional financing, if necessary, or alternatively upon the Company's ability to dispose of its interests on an advantageous basis. Changes in future conditions could require material write-downs of the carrying values.

These annual consolidated financial statements of the Company for the years ended December 31, 2015 and 2014 were approved and authorized for issue by the Board of Directors on April 27, 2016.

Although the Company has taken steps to verify title to the properties on which it is conducting exploration and in which it has an interest, in accordance with industry standards for the current stage of operations of such properties, these procedures do not guarantee the Company's title. Property title may be subject to government licensing requirements or regulations, social licensing requirements, unregistered prior agreements, unregistered claims, aboriginal claims, and non-compliance with regulatory and environmental requirements. The Company's assets may also be subject to increases in taxes and royalties, renegotiation of contracts, political uncertainty and currency exchange fluctuations and restrictions.

The Company has a need for equity capital and financing for working capital and exploration and evaluation of its properties. Because of continuing operating losses, a working capital deficiency and the default of significant amounts of debt (Notes 15 and 16), the Company's continuance as a going concern is dependent upon its ability to obtain adequate financing and to reach profitable levels of operation. It is not possible to predict whether financing efforts will be successful or if the Company will attain profitable levels of operations. These conditions indicate the existence of a material uncertainty that may cast significant doubt about the Company's ability to continue as a going concern.

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") applicable to a going concern. Accordingly, they do not give effect to adjustments that would be necessary should the Company be unable to continue as a going concern and therefore be required to realize its assets and discharge its liabilities in other than the normal course of business and at amounts different from those in the accompanying consolidated financial statements. Such adjustments could be material.

2. Basis of preparation

These annual consolidated financial statements of the Company and its subsidiary were prepared in accordance with IFRS, as issued by the International Accounting Standards Board ("IASB"), and have been prepared in accordance with accounting policies based on the IFRS standards and International Financial Reporting Interpretations Committee ("IFRIC") interpretations. The policies set out below were consistently applied to all the periods presented unless otherwise noted below.

The preparation of financial statements in accordance with International Account Standards ("IAS") 1, Presentation of Financial Statements, requires the use of certain critical accounting estimates. It also requires management to exercise judgement in applying the Company's accounting policies.

These annual consolidated financial statements have been prepared on a historical cost basis except for certain financial instruments, which are stated at their fair values. In addition, these annual consolidated financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

QMX GOLD CORPORATION

Notes to the Annual Consolidated Financial Statements

December 31, 2015 and 2014

(Expressed in Canadian dollars unless otherwise noted)

3. New and future accounting policies

The Company has adopted the following new standards, along with any consequential amendments, effective January 1, 2015.

IAS 24 – Related Party Disclosures (“IAS 24”) was amended to clarify that an entity providing key management services to the reporting entity or the parent of the reporting entity is a related party of the reporting entity. The amendments also require an entity to disclose amounts incurred for key management personnel services provided by a separate management entity. At January 1, 2015, the Company has adopted this standard and has made the required disclosure.

Certain pronouncements were issued by the IASB or the IFRIC that are mandatory for accounting periods on or after January 1, 2016 or later periods. Many are not applicable or do not have a significant impact to the Company and have been excluded. The following have not yet been adopted and are being evaluated to determine their impact on the Company.

IFRS 9 – Financial Instruments (“IFRS 9”) was issued by the IASB in November 2009 with additions in October 2010 and May 2013 and will replace IAS 39 Financial Instruments: Recognition and Measurement (“IAS 39”). IFRS 9 uses a single approach to determine whether a financial asset is measured at amortized cost or fair value, replacing the multiple rules in IAS 39. The approach in IFRS 9 is based on how an entity manages its financial instruments in the context of its business model and the contractual cash flow characteristics of the financial assets. Most of the requirements in IAS 39 for classification and measurement of financial liabilities were carried forward unchanged to IFRS 9, except that an entity choosing to measure a financial liability at fair value will present the portion of any change in its fair value due to changes in the entity's own credit risk in other comprehensive income, rather than within profit or loss. The new standard also requires a single impairment method to be used, replacing the multiple impairment methods in IAS 39. IFRS 9 is effective for annual periods beginning on or after January 1, 2018. Earlier adoption is permitted.

IFRS 15 - Revenue from Contracts with Customers (“IFRS 15”) addresses how and when entities recognize revenue, as well as requires more detailed and relevant disclosures. IFRS 15 supersedes IAS 11 Construction Contracts, IAS 18 Revenue, IFRIC 13 Customer Loyalty Programs, IFRIC 15 Agreements for the Construction of Real Estate, IFRIC 18 Transfers of Assets from Customers and SIC-31 Revenue - Barter Transactions Involving Advertising Services. The Section provides a single, principles based five-step model to be applied to all contracts with customers, with certain exceptions. The standard is effective for annual periods beginning on or after January 1, 2018. Earlier application is permitted.

IFRS 16 - Leases (“IFRS 16”) replaces IAS 17 - Leases. The new model requires the recognition of almost all lease contracts on a lessee's statement of financial position as a lease liability reflecting future lease payments and a ‘right-of-use asset’ with exceptions for certain short-term leases and leases of low-value assets. In addition, the lease payments are required to be presented on the statement of cash flow within operating and financing activities for the interest and principal portions, respectively. IFRS 16 is effective for annual periods beginning on or after January 1, 2019, with early adoption permitted if IFRS 15, Revenue from Contracts with Customers, is also applied.

IAS 1 – Presentation of Financial Statements (“IAS 1”) was amended in December 2014 in order to clarify, among other things, that information should not be obscured by aggregating or by providing immaterial information, that materiality consideration apply to all parts of the financial statements and that even when a standard requires a specific disclosure, materiality considerations do apply. The amendments are effective for annual periods beginning on or after January 1, 2016.

IAS 12 – Income Taxes (“IAS 12”) was amended in January 2016 to clarify that, among other things, unrealized losses on debt instruments measured at fair value and measured at cost for tax purposes give rise to a deductible temporary difference regardless of whether the debt instrument's holder expects to recover the carrying amount of the debt instrument by sale or by use; the carrying amount of an asset does not limit the estimation of probable future taxable profits; and estimates for future taxable profits exclude tax deduction resulting from the reversal of deductible temporary differences. The amendments are effective for annual periods beginning on or after January 1, 2017. Earlier adoption is permitted.

QMX GOLD CORPORATION

Notes to the Annual Consolidated Financial Statements

December 31, 2015 and 2014

(Expressed in Canadian dollars unless otherwise noted)

4. Principles of consolidation

The annual consolidated financial statements comprise the financial statements of the Company and its wholly-owned subsidiary, 0879597 B.C. Ltd. ("Garson").

Subsidiaries

Subsidiaries consist of entities over which the Company is exposed to, or has rights to, variable returns as well as the ability to affect those returns through the power to direct the relevant activities of the entity. Subsidiaries are fully consolidated from the date control is transferred to the Company, and are de-consolidated from the date control ceases.

Business Combinations

On the acquisition of a subsidiary, the purchase method of accounting is used to account for the acquisition as follows:

- cost is measured as the fair value of the assets given, equity instruments issued and liabilities incurred or assumed at the date of exchange;
- directly attributable transaction costs are expensed as incurred;
- identifiable assets acquired and liabilities assumed are measured at their fair values at the acquisition date except for non-current assets that are classified as held for sale in accordance with IFRS 5 Non-current Assets Held for Sale and Discontinued Operations ("IFRS 5"), which are recognized and measured at fair value less costs to sell;
- the excess of acquisition cost over the fair value of the identifiable net assets acquired is recorded as goodwill;
- if the acquisition cost is less than the fair value of the net assets acquired, the difference is recognized directly in profit or loss;
- the interest of non-controlling shareholders in the acquiree is initially measured at the non-controlling shareholder's fair value; and
- the measurement of contingent consideration at fair value on the acquisition date is performed with subsequent changes in the fair value recorded through the consolidated statements of operations and comprehensive income/(loss).

5. Significant accounting judgments, estimates and assumptions

The preparation of consolidated financial statements in conformity with IFRS requires the Company's management to make judgments, estimates and assumptions about future events that affect the amounts reported in the consolidated financial statements and related notes to the financial statements. Although these estimates are based on management's best knowledge of the amount, event or actions, actual results may differ from those estimates and these differences could be material.

The areas which require management to make significant judgments, estimates and assumptions in determining carrying values include, but are not limited to:

- **Assets' carrying values and impairment charges**
In the determination of carrying values and impairment charges, management looks at the higher of the recoverable amount or fair value less costs to sell in the case of assets and at objective evidence, significant or prolonged decline of fair value on financial assets indicating impairment. These determinations and their individual assumptions require that management make a decision based on the best available information at each reporting period.
- **Capitalization of exploration and mineral property expenditures**
Management has determined that mineral property and exploration and evaluation costs incurred during the period have future economic benefits and are economically recoverable. In making this judgment, management has assessed various sources of information including but not limited to the geologic and metallurgic information, history of conversion of mineral deposits to proven and probable mineral reserves, scoping and feasibility studies, proximity of operating facilities, operating management expertise and existing permits. See Note 11 for details of capitalized mineral property and exploration and evaluation costs.
- **Mineral reserve estimates**
The figures for mineral reserves and mineral resources are determined in accordance with National Instrument 43-101, "Standards of Disclosure for Mineral Projects", issued by the Canadian Securities Administrators. There are numerous uncertainties inherent in estimating mineral reserves and mineral resources, including many factors beyond the Company's control. Such estimation is a subjective process, and the accuracy of any mineral reserve or mineral resource estimate is a function of the quantity and quality of available data and of the assumptions made and judgments used in engineering and geological interpretation. Differences between management's assumptions including economic assumptions such as metal prices and market conditions could have a material effect in the future on the Company's financial position and results of operation.

QMX GOLD CORPORATION

Notes to the Annual Consolidated Financial Statements

December 31, 2015 and 2014

(Expressed in Canadian dollars unless otherwise noted)

5. Significant accounting judgments, estimates and assumptions (continued)

- Impairment of mineral properties and deferred exploration expenditures
While assessing whether any indications of impairment exist for mineral properties and deferred exploration expenditures, including producing properties, consideration is given to both external and internal sources of information. Information the Company considers includes changes in the market, economic and legal environment in which the Company operates that are not within its control that could affect the recoverable amount of mineral properties and deferred exploration expenditures. Internal sources of information include the manner in which mineral properties and deferred exploration expenditures are being used or are expected to be used and indications of expected economic performance of the assets. Estimates include but are not limited to estimates of the discounted future after-tax cash flows expected to be derived from the Company's mining properties, costs to sell the properties and the appropriate discount rate. Reductions in metal price forecasts, increases in estimated future costs of production, increases in estimated future capital costs, reductions in the amount of recoverable mineral reserves and mineral resources and/or adverse current economics can result in a write-down of the carrying amounts of the Company's mineral properties and deferred exploration expenditures.
- Estimation of decommissioning and restoration costs and the timing of expenditure
The cost estimates are updated annually during the life of a mine to reflect known developments, (e.g. revisions to cost estimates and to the estimated lives of operations), and are subject to review at regular intervals. Decommissioning, restoration and similar liabilities are estimated based on the Company's interpretation of current regulatory requirements, constructive obligations and are measured at fair value. Fair value is determined based on the net present value of estimated future cash expenditures for the settlement of decommissioning, restoration or similar liabilities that may occur upon decommissioning of the mine. Such estimates are subject to change based on changes in laws and regulations and negotiations with regulatory authorities.
- Income taxes and recoverability of potential deferred tax assets
In assessing the probability of realizing income tax assets recognized, management makes estimates related to expectations of future taxable income, applicable tax planning opportunities, expected timing of reversals of existing temporary differences and the likelihood that tax positions taken will be sustained upon examination by applicable tax authorities. In making its assessments, management gives additional weight to positive and negative evidence that can be objectively verified. Estimates of future taxable income are based on forecasted cash flows from operations and the application of existing tax laws in each jurisdiction. The Company considers whether relevant tax planning opportunities are within the Company's control, are feasible, and are within management's ability to implement. Examination by applicable tax authorities is supported based on individual facts and circumstances of the relevant tax position examined in light of all available evidence. Where applicable tax laws and regulations are either unclear or subject to ongoing varying interpretations, it is reasonably possible that changes in these estimates can occur that materially affect the amounts of income tax assets recognized. Also, future changes in tax laws could limit the Company from realizing the tax benefits from the deferred tax assets. The Company reassesses unrecognized income tax assets at each reporting period.
- Income, value added, withholding and other taxes
The Company is subject to income, value added, withholding and other taxes. Significant judgment is required in determining the Company's provisions for taxes. There are many transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. The Company recognizes liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due. The determination of the Company's income, value added, withholding and other tax liabilities requires interpretation of complex laws and regulations. The Company's interpretation of taxation law as applied to transactions and activities may not coincide with the interpretation of the tax authorities. All tax related filings are subject to government audit and potential reassessment subsequent to the financial statement reporting period. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the tax related accruals and deferred income tax provisions in the period in which such determination is made.
- Share-based payments
Management determines costs for share-based payments using market-based valuation techniques. The fair value of the market-based and performance-based share awards are determined at the date of grant using generally accepted valuation techniques. Assumptions are made and judgment used in applying valuation techniques. These assumptions and judgments include estimating the future volatility of the stock price, expected dividend yield, future employee turnover rates and future employee stock option exercise behaviours and corporate performance. Such judgments and assumptions are inherently uncertain. Changes in these assumptions affect the fair value estimates.
- Contingencies
Refer to Note 28.

QMX GOLD CORPORATION

Notes to the Annual Consolidated Financial Statements

December 31, 2015 and 2014

(Expressed in Canadian dollars unless otherwise noted)

6. Significant accounting policies

Foreign currency translation

In preparing the financial statements of the individual entities, transactions in currencies other than the entity's functional currency (foreign currencies) are recognized at the rates of exchange prevailing at the dates of the transactions. At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the date when the fair value was determined.

Exchange differences are recognized in profit or loss in the period in which they arise except for:

- exchange differences on foreign currency borrowings relating to assets under construction for future productive use, which are included in the cost of those assets when they are regarded as an adjustment to interest costs on those foreign currency borrowings;
- exchange differences on monetary items receivable from or payable to a foreign operation for which settlement is neither planned nor likely to occur (therefore forming part of the net investment in the foreign operation), which are recognized initially in other comprehensive income and reclassified from equity to profit or loss on disposal or partial disposal of the net investment.

Foreign exchange gains and losses are presented in the consolidated statement of operations and comprehensive loss within "other gains and (losses)".

The functional currency of the Company and its subsidiary is the Canadian dollar.

Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation. All other borrowing costs are recognized in profit or loss in the period in which they are incurred.

Revenue recognition

Revenue from the sale of metals or the performance of custom milling services is recognized when all of the following conditions are satisfied:

- the specific risks and rewards of ownership have been transferred to the purchaser;
- the Company does not retain continuing managerial involvement to the degree usually associated with ownership or effective control over the metals sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits associated with the transaction will flow to the Company; and
- the costs incurred or to be incurred in respect of the sale can be measured reliably.

Revenue is measured at the fair value of the consideration received or receivable.

Interest revenue

Interest revenue is recognized when it is probable that the economic benefits will flow to the Company and the amount of revenue can be measured reliably. Interest revenue is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

Share-based payments

Equity-settled share-based payments to employees and others providing similar services are measured at the fair value of the equity instruments at the grant date. Details regarding the determination of the fair value of equity-settled share-based transactions are set out in the share-based payment note.

The fair value is measured at grant date and each tranche is recognized on a graded-vesting basis over the period in which options vest. At the end of each reporting period, the Company revises its estimate of the number of equity instruments expected to vest. The impact of the revision of the original estimates, if any, is recognized in profit or loss such that the cumulative expense reflects the revised estimate, with a corresponding adjustment to share-based payment reserve.

QMX GOLD CORPORATION

Notes to the Annual Consolidated Financial Statements

December 31, 2015 and 2014

(Expressed in Canadian dollars unless otherwise noted)

6. Significant accounting policies (continued)

Equity-settled share-based payment transactions with parties other than employees are measured at the fair value of the goods or services received, except where that fair value cannot be estimated reliably, in which case they are measured at the fair value of the equity instruments granted, measured at the date the entity obtains the goods or the counterparty renders the service. For those options and warrants that expire after vesting, the recorded value is transferred to deficit.

Finance costs

Finance costs comprise interest payable on borrowings calculated using the effective interest rate method.

Company as lessee

Assets held under finance leases are initially recognized as assets of the Company at their fair value at the inception of the lease or, if lower, at the present value of the minimum lease payments. The corresponding liability to the lessor is included in the consolidated statement of financial position as a finance lease obligation.

Lease payments are apportioned between finance expenses and reduction of the lease obligation so as to achieve a constant rate of interest on the remaining balance of the liability. Finance expenses are recognized immediately in profit or loss, unless they are directly attributable to qualifying assets, in which case they are capitalized in accordance with the Company's general policy on borrowing costs. Contingent rentals are recognized as expenses in the periods in which they are incurred.

Operating lease payments are recognized as an expense on a straight-line basis over the lease term, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed. Contingent rentals arising under operating leases are recognized as an expense in the period in which they are incurred.

In the event that lease incentives are received to enter into operating leases, such incentives are recognized as a liability. The aggregate benefit of incentives is recognized as a reduction of rental expense on a straight-line basis, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed.

Taxation

Current tax

Income tax expense represents the sum of the tax currently payable and deferred tax. The tax currently payable is based on taxable profit for the year. Taxable profit differs from profit as reported in the consolidated statement of operations because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Company's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognized for all taxable temporary differences. Deferred tax assets are generally recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized. Such deferred tax assets and liabilities are not recognized if the temporary difference arises from goodwill or from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

Deferred tax liabilities are recognized for taxable temporary differences associated with investments in subsidiaries and associates, and interests in joint ventures, except where the Company is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments and interests are only recognized to the extent that it is probable that there will be sufficient taxable profits against which to utilize the benefits of the temporary differences and they are expected to reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realized, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

QMX GOLD CORPORATION

Notes to the Annual Consolidated Financial Statements

December 31, 2015 and 2014

(Expressed in Canadian dollars unless otherwise noted)

6. Significant accounting policies (continued)

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off tax assets against tax liabilities and when they relate to income taxes levied by the same taxation authority and the Company intends to settle its tax assets and liabilities on a net basis.

Mineral properties and deferred exploration expenditures

Exploration and evaluation properties

Once a license to explore an area has been secured, expenditures on exploration and evaluation activities, net of government assistance received, are capitalized to mineral properties and deferred exploration. Deferred exploration expenditures relate to the initial search for deposits with economic potential and to detailed assessments of deposits or other projects that have been identified as having economic potential.

Once an economically viable reserve has been determined for an area and the decision to proceed with development has been approved, exploration and evaluation assets attributable to that area are first tested for impairment and then reclassified to construction in progress within mineral properties and deferred exploration expenditures.

Subsequent recovery of the resulting carrying value depends on successful development or sale of the undeveloped project. If a project does not prove viable, all irrecoverable costs associated with the project net of any impairment provisions are written off.

Development

When economically viable reserves have been determined and the decision to proceed with development has been approved, the expenditures related to construction are capitalized as construction-in-progress and classified as a component of mineral properties and deferred exploration expenditures. Costs associated with the commissioning of new assets, in the period before they are operating in the way intended by management, are capitalized, net of any pre-production revenues.

Interest on borrowings related to the construction and development of assets are capitalized until substantially all the activities required to make the asset ready for its intended use are complete.

When a mine construction project moves into the production stage, the capitalization of certain mine construction costs ceases and costs are either regarded as inventory or expensed, except for costs which qualify for capitalization relating to mining asset additions or improvements, underground mine development or mineable reserve development.

Depletion/depreciation/amortization

Accumulated mine development costs are depleted on a unit-of-production basis over the estimated economically recoverable reserves of the mine concerned.

Property, plant and equipment

Items of property, plant and equipment are stated at cost, less accumulated depreciation and accumulated impairment losses.

The initial cost of an asset comprises its purchase price or construction cost, any costs directly attributable to bringing the asset into operation, the initial estimate of the rehabilitation obligation, and for qualifying assets, borrowing costs. The purchase price or construction cost is the aggregate amount paid and the fair value of any other consideration given to acquire the asset. The capitalized value of a finance lease is also included within property, plant and equipment.

Depreciation/amortization

Property, plant and equipment are generally depreciated on a straight-line basis over their estimated useful lives as follows:

- ▶ Buildings - 4 to 30 years
- ▶ Machinery and equipment - 4 to 7 years
- ▶ Mobile equipment – 3 to 5 years
- ▶ Office equipment and furniture – 3 to 8 years

The mill is amortized on a straight-line basis over 7 years.

An item of property, plant and equipment and any significant part initially recognized is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the consolidated statement of operations when the asset is derecognized. The assets' residual values, useful lives and methods of depreciation/amortization are reviewed at each reporting period, and adjusted prospectively if appropriate.

QMX GOLD CORPORATION

Notes to the Annual Consolidated Financial Statements

December 31, 2015 and 2014

(Expressed in Canadian dollars unless otherwise noted)

6. Significant accounting policies (continued)

Major maintenance and repairs

Expenditures on major maintenance refits or repairs comprise the cost of replacement assets or parts of assets and overhaul costs. Where an asset or part of an asset that was separately depreciated and is now written off is replaced, and it is probable that future economic benefits associated with the item will flow to the Company through an extended life, the expenditure is capitalized.

Where part of the asset was not separately considered as a component, the replacement value is used to estimate the carrying amount of the replaced assets, which is immediately written off. All other day-to-day maintenance costs are expensed as incurred.

Impairment of non-financial assets

The carrying values of mineral properties and deferred exploration expenditures, and property, plant and equipment are assessed for impairment when indicators of such impairment exist. If any indication of impairment exists an estimate of the asset's recoverable amount is calculated. The recoverable amount is determined as the higher of the fair value less costs to sell for the asset and the asset's value in use.

For exploration and evaluation assets, indicators of impairment would include expiration of a right to explore, no budgeted or planned material expenditures in an area or a decision to discontinue exploration in a specific area.

Impairment is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets. If this is the case, the individual assets of the Company are grouped together into cash generating units ("CGUs") for impairment purposes. Such CGUs represent the lowest level for which there are separately identifiable cash inflows that are largely independent of the cash flows from other assets. This generally results in the Company evaluating its non-financial assets on a geographical basis.

If the carrying amount of the asset exceeds its recoverable amount, the asset is impaired and an impairment loss is charged to the consolidated statement of operations so as to reduce the carrying amount to its recoverable amount.

A previously recognized impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized. If this is the case, the carrying amount of the asset is increased to its recoverable amount. The increased amount cannot exceed the carrying amount that would have been determined, net of depreciation/amortization, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in the consolidated statement of operations.

Financial assets

Financial assets within the scope of IAS 39 are classified as financial assets at fair value through profit or loss, loans and receivables, held-to-maturity investments, available-for-sale financial assets, or derivatives. The Company determines the classification of its financial assets at initial recognition.

All financial assets are recognized initially at fair value plus, in the case of investments not at fair value through profit or loss, directly attributable transaction costs.

Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the marketplace (regular way trades) are recognized on the trade date, (i.e., the date that the Company commits to purchase or sell the asset).

The Company's financial assets include cash and cash equivalents, restricted cash, amounts receivable and investments.

Subsequent measurement

The subsequent measurement of financial assets depends on their classification as follows:

Financial assets at fair value through profit or loss includes financial assets held for trading and financial assets designated upon initial recognition at fair value through profit or loss. Financial assets are classified as held for trading if they are acquired for the purpose of selling or repurchasing in the near term. This category includes derivative financial instruments entered into by the Company that are not designated as hedging instruments in hedge relationships as defined by IAS 39. Derivatives, including separated embedded derivatives are also classified as held for trading unless they are designated as effective hedging instruments. Financial assets at fair value through profit or loss are carried in the statement of financial position at fair value with changes in fair value recognized in finance income and finance costs in the consolidated statement of operations.

QMX GOLD CORPORATION

Notes to the Annual Consolidated Financial Statements

December 31, 2015 and 2014

(Expressed in Canadian dollars unless otherwise noted)

6. Significant accounting policies (continued)

The Company evaluated its financial assets at fair value through profit and loss (held for trading) to determine whether the intent to sell them in the near term is still appropriate. When the Company is unable to trade these financial assets due to inactive markets and management's intent to sell them in the foreseeable future significantly changes, the Company may elect, in rare circumstances, to reclassify these financial assets. The reclassification to loans and receivables, available-for-sale or held-to-maturity depends on the nature of the asset. This evaluation does not affect any financial assets designated at fair value through profit or loss using the fair value option at designation.

Derivatives embedded in host contracts are accounted for as separate derivatives and recorded at fair value if their economic characteristics and risks are not closely related to those of the host contracts and the host contracts are not held for trading or designated at fair value through profit or loss. These embedded derivatives are measured at fair value with changes in fair value recognized in the consolidated statement of operations. Reassessment only occurs if there is a change in the terms of the contract that significantly modifies the cash flows that would otherwise be required.

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. After initial measurement, such financial assets are subsequently measured at amortized cost using the effective interest rate method ("EIR"), less impairment. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included in finance income in the consolidated statement of operations. The losses arising from impairment are recognized in the consolidated statement of operations.

Derecognition

A financial asset is derecognized when:

- The rights to receive cash flows from the asset have expired
- The Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either:
 - (a) the Company has transferred substantially all the risks and rewards of the asset; or
 - (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

Impairment of financial assets

The Company assesses at each reporting date whether there is any objective evidence that a financial asset or a group of financial assets is impaired. A financial asset or a group of financial assets is deemed to be impaired if, and only if, there is objective evidence of impairment as a result of one or more events that have occurred after the initial recognition of the asset (an incurred 'loss event') and that loss event has an impact on the estimated future cash flows of the financial asset or the group of financial assets that can be reliably estimated. Evidence of impairment may include indications that the debtors or a group of debtors is experiencing significant financial difficulty, default or delinquency in interest or principal payments, the probability that they will enter bankruptcy or other financial reorganization and where observable data indicate that there is a measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlate with defaults.

For financial assets carried at amortized cost, the Company first assesses individually whether objective evidence of impairment exists individually for financial assets that are individually significant, or collectively for financial assets that are not individually significant. If the Company determines that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, it includes the asset in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment. Assets that are individually assessed for impairment and for which an impairment loss is, or continues to be, recognized are not included in a collective assessment of impairment.

If there is objective evidence that an impairment loss has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future expected credit losses that have not yet been incurred). The present value of the estimated future cash flows is discounted at the financial asset's original effective interest rate. If a loan has a variable interest rate, the discount rate for measuring any impairment loss is the current effective interest rate.

The carrying amount of the asset is reduced through the use of an allowance account and the amount of the loss is recognized in the consolidated statement of operations. Interest income continues to be accrued on the reduced carrying amount and is accrued using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss. The interest income is recorded as part of finance income in the consolidated statement of operations. Loans together with the associated allowance are written off when there is no realistic prospect of future recovery and all collateral has been realized or has been transferred to the Company. If, in a subsequent year, the amount of the estimated impairment loss increases or decreases because of an event occurring after the impairment was recognized, the previously recognized impairment loss is increased or reduced by adjusting the allowance account. If a future write-off is later recovered, the recovery is credited to finance costs in the consolidated statement of operations.

QMX GOLD CORPORATION

Notes to the Annual Consolidated Financial Statements

December 31, 2015 and 2014

(Expressed in Canadian dollars unless otherwise noted)

6. Significant accounting policies (continued)

The present value of the estimated future cash flows is discounted at the financial asset's original effective interest rate.

Financial liabilities

Initial recognition and measurement

Financial liabilities within the scope of IAS 39 are classified as financial liabilities at fair value through profit or loss, loans and borrowings, or as derivatives designated as hedging instruments in an effective hedge, as appropriate. The Company determines the classification of its financial liabilities at initial recognition.

All financial liabilities are recognized initially at fair value and in the case of loans and borrowings, plus directly attributable transaction costs.

The Company's financial liabilities include accounts payable and accrued liabilities, short-term loan, debentures and debenture.

Subsequent measurement

The measurement of financial liabilities depends on their classification as follows:

Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as fair value through profit or loss.

Financial liabilities are classified as held for trading if they are acquired for the purpose of selling in the near term. This category includes derivative financial instruments entered into by the Company that are not designated as hedging instruments in hedge relationships as defined by IAS 39. Separated embedded derivatives are also classified as held for trading unless they are designated as effective hedging instruments. Gains or losses on liabilities held for trading are recognized in the consolidated statement of operations. The Company has not designated any financial liabilities upon initial recognition as at fair value through profit or loss.

Interest-bearing loans and borrowings

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortized cost using the EIR method. Gains and losses are recognized in the consolidated statement of operations when the liabilities are derecognized, as well as through the EIR amortization process. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included in finance cost in the statement of operations.

Derecognition

A financial liability is derecognized when the obligation under the liability is discharged, cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognized in the consolidated statement of operations.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount reported in the consolidated statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the assets and settle the liabilities simultaneously.

Fair value of financial instruments

The fair value of financial instruments that are traded in active markets at each reporting date is determined by reference to quoted market prices or dealer price quotations (bid price for long positions and ask price for short positions), without any deduction for transaction costs.

For financial instruments not traded in an active market, the fair value is determined using appropriate valuation techniques. Such techniques may include using recent arm's length market transactions; reference to the current fair value of another instrument that is substantially the same; discounted cash flow analysis or other valuation models.

Compound financial instruments (debentures)

Compound financial instruments issued by the Company comprise convertible notes that can be converted to share capital at the option of the holder, and the number of shares to be issued does not vary with changes in their fair value.

The liability component of a compound financial instrument is recognized initially at the fair value of a similar liability that does not have an equity conversion option. The equity component is recognized initially at the difference between the fair value of the compound financial instrument as a whole and the fair value of the liability component. Any directly attributable transaction costs are allocated to the liability and equity components in proportion to their initial carrying amounts.

QMX GOLD CORPORATION

Notes to the Annual Consolidated Financial Statements

December 31, 2015 and 2014

(Expressed in Canadian dollars unless otherwise noted)

6. Significant accounting policies (continued)

Subsequent to initial recognition, the liability component of a compound financial instrument is measured at amortized cost using the effective interest method. The equity component of a compound financial instrument is not re-measured subsequent to initial recognition except on conversion or expiry.

Cash and cash equivalents

Cash and cash equivalents in the statement of financial position comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less.

For the purpose of the consolidated statement of cash flows, cash and cash equivalents consist of cash and cash equivalents as defined above, net of outstanding bank overdrafts.

Inventories

Gold doré and stockpiled ore are physically measured or estimated and valued at the lower of cost or net realizable value. Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and costs of selling final product.

Cost is determined by the weighted average method and comprises direct purchase costs and an appropriate portion of fixed and variable overhead costs, including depletion, depreciation and amortization, incurred in converting materials into finished goods.

Materials and supplies are valued at the lower of cost or net realizable value. Any provision for obsolescence is determined by reference to specific items of stock. A regular review is undertaken to determine the extent of any provision for obsolescence.

Provisions

General

Provisions are recognized when (a), the Company has a present obligation (legal or constructive) as a result of a past event, and (b), it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. The expense relating to any provision is presented in the consolidated statement of operations, net of any reimbursement. If the effect of the time value of money is material, provisions are discounted using a current pre tax rate that reflects, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as a finance cost.

Rehabilitation provision

The Company records the present value of estimated costs of legal and constructive obligations required to restore operating locations in the period in which the obligation is incurred. The nature of these restoration activities includes dismantling and removing structures, rehabilitating mines and tailings dams, dismantling operating facilities, closure of plant and waste sites, and restoration, reclamation and re-vegetation of affected areas.

The obligation generally arises when the asset is installed or the ground / environment is disturbed at the production location. When the liability is initially recognized, the present value of the estimated cost is capitalized by increasing the carrying amount of the related mining assets to the extent that it was incurred prior to the production of related ore. Over time, the discounted liability is increased for the change in present value based on the discount rates that reflect current market assessments and the risks specific to the liability. The periodic unwinding of the discount is recognized in the consolidated statement of operations as a finance cost. Additional disturbances or changes in rehabilitation costs will be recognized as additions or charges to the corresponding assets and rehabilitation liability when they occur. For closed sites, changes to estimated costs are recognized immediately in the consolidated statement of operations and comprehensive (loss).

Employee entitlements

Employee entitlements to annual leave are recognized as the employees earn them. A provision, stated at current cost, is made for the estimated liability at period end.

Loss per share

Loss per share is based on the weighted average number of common shares of the Company outstanding during the period. The diluted loss per share reflects the potential dilution of common share equivalents, such as outstanding stock options and warrants, in the weighted average number of common shares outstanding during the period, if dilutive.

QMX GOLD CORPORATION

Notes to the Annual Consolidated Financial Statements

December 31, 2015 and 2014

(Expressed in Canadian dollars unless otherwise noted)

6. Significant accounting policies (continued)

Flow-through shares

Flow-through shares are a unique Canadian tax incentive. They are the subject of specific guidance under US GAAP, but there is no equivalent IFRS guidance. Therefore, the Company has adopted a policy whereby flow-through proceeds are allocated between the offering of the common shares and the sale of tax benefits when the common shares are offered. The allocation is made based on the difference between the quoted market price of the common shares and the amount the investor pays for the flow-through shares. A current liability is recognized for the premium paid by the investors and is then recognized as a deferred income tax liability in the period of renunciation if the Company does not have sufficient unrealized tax losses and deductions.

Non-current assets held for sale

Non-current assets and disposal groups are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use. This condition is regarded as met only when the asset (or disposal group) is available for immediate sale in its present condition subject only to terms that are usual and customary for sales of such asset (or disposal group) and its sale is highly probable. Management must be committed to the sale, which should be expected to qualify for recognition as a completed sale within one year from the date of classification.

Non-current assets (and disposal groups) classified as held for sale are measured at the lower of their carrying amount and fair value less costs to sell.

7. Amounts receivable

	December 31, 2015	December 31, 2014
Taxes receivable	415,311	135,031
Interest receivable	-	73,097
Other receivables	4,812	7,972
	<u>\$ 420,123</u>	<u>\$ 216,100</u>

8. Inventories

	December 31, 2015	December 31, 2014
Materials and supplies	\$ 443,341	\$ 698,738
Stockpiled ore	863,783	1,059,611
Gold brick or doré bars	-	543,965
	<u>\$ 1,307,124</u>	<u>\$ 2,302,314</u>

The amount of inventories recognized as an expense during the year ended December 31, 2015 is \$13,820,608 (year ended December 31, 2014: \$27,226,751).

All inventory is carried at the lower of cost and net realizable value. Materials and supplies inventory is recorded at cost as at December 31, 2015 and 2014. As at December 31, 2015, stockpiled ore was recorded at net realizable value, with an impairment charge of \$343,546 included in operating costs for the year ended December 31, 2015 (December 31, 2014: \$nil). The Company was not carrying gold brick or doré bars at December 31, 2015. As at December 31, 2014, stockpiled ore and gold brick or doré bars were recorded at cost and no impairment charge was recorded for the year ended December 31, 2014.

9. Prepaid expenses

	December 31, 2015	December 31, 2014
Mining supplier advances	\$ 106,052	\$ 322,388
Reclamation deposits	510,953	187,596
Insurance	60,974	78,290
Corporate and property tax advances	26,168	29,807
	<u>\$ 704,147</u>	<u>\$ 618,081</u>
Current portion:	\$ 193,194	\$ 618,081
Long-term portion:	510,953	-
	<u>\$ 704,147</u>	<u>\$ 618,081</u>

During the year ended December 31, 2015, the Company expensed \$1,267,413 in depreciation after inventory adjustments to the statements of operations and comprehensive loss (December 31, 2014: \$1,383,519) and charged \$316 to mineral properties and deferred exploration expenditures (December 31, 2014: \$52,156).

Included in property, plant and equipment is the Val-d'Or mill that has been operating since the second quarter of 2010. The Company recognized a depreciation expense of \$474,999 on the mill for the year ended December 31, 2015 (December 31, 2014: \$411,979). During the year ended December 31, 2015, as a result of a change in focus to custom milling contracts, the amortization of the mill was changed to the straight-line method over 7 years. This change in estimate has been accounted for prospectively in these annual consolidated financial statements.

During the year ended December 31, 2015, the Company sold equipment with a net book value of \$1,072,856 for proceeds of \$1,527,730 (December 31, 2014: a net book value of \$96,934 for proceeds of \$376,100). The Company consequently recognized a gain of \$454,874 for the year ended December 31, 2015 (December 31, 2014: \$279,166).

Aurbel Property (including Lac Herbin), Québec

The Company holds a 100% interest in the Aurbel Property (including Lac Herbin), subject to a 4.5% Net Smelter Royalty ("NSR"). Forbes & Manhattan Inc. ("F&M") holds 2% of the NSR. See Notes 16 and 27. Teck Resources Limited ("Teck") held 2.5%. During the year ended December 31, 2015, Teck assigned its right to this royalty to Osisko Gold Royalties Ltd. ("Osisko").

During the year ended December 31, 2015, the Company began exploration work and incurred expenditures on the Ferderber property. The Company has decided to no longer advance this project and has consequently written off \$165,851 (December 31, 2014: \$nil) in expenditures to the statements of operations and comprehensive loss.

Lac Pelletier Property, Rouyn-Noranda, Québec

Pursuant to the September 2005 option agreement with Thundermin Resources Inc. ("Thundermin"), the Company was entitled to acquire a 100% interest in the Lac Pelletier Property, subject to a 3.5% NSR and \$1/tonne toll charge, by spending \$1,000,000 in exploration expenditures by September 1, 2008. During 2007, the Company met its expenditure obligations.

Pursuant to the agreement, the Company extended its decision deadline and was required to make a production decision by September 1, 2009 and reach commercial production by September 1, 2010. The Company further amended this agreement such that the production decision deadline had been extended to September 1, 2010 with a payment of \$100,000 in 2009. Prior to September 1, 2010, the Company issued a production commitment notice to Thundermin, thereby exercising its option to acquire the Lac Pelletier Property. Thundermin had initiated an arbitration proceeding pursuant to which it claimed that the purported exercise by the Company of its option to acquire a 100% interest in the property was invalid. Arbitration proceedings took place in August 2013. The arbitrator delivered its binding decision that the Company's exercise of this option was valid as of August 31, 2010. The arbitrator has set out a series of deadlines whereby the parties must agree on the ultimate date for the achievement of commercial production. If commercial production is not achieved before August 31, 2015, the Company will be required to make advance royalty payments of \$75,000 annually until commercial production is achieved. The Company has until June 2018 to achieve commercial production.

QMX GOLD CORPORATION

Notes to the Annual Consolidated Financial Statements

December 31, 2015 and 2014

(Expressed in Canadian dollars unless otherwise noted)

11. Mineral properties and deferred exploration expenditures (continued)

In August 2015, the Company notified Thundermin that, due to market conditions and the loss of momentum due to the four-year arbitration process, the Company considered the production deadline impractical. The Company requested that Thundermin agree to renegotiate the agreement in order to identify reasonable conditions for continuing exploration and subsequent development and production, prior to making the advanced royalty payment. Thundermin has terminated all rights of the Company and the Company has transferred back to Thundermin all claims in the property. As a result, the Company has recorded an impairment charge of \$6,480,803. As well, \$355,000 in reversal of reclamation liabilities and costs of \$998,580 with respect to denied tax credits on the Lac Pelletier property have been recorded against this impairment charge.

VMS Properties, Québec

The Company holds a 100% interest in the VMS properties, subject to Teck retaining between a 2% and a 2.5% NSR on the properties depending on pre-existing underlying royalties. During 2015, Teck assigned its royalty rights to Osisko. Certain claims forming part of this property are subject to NSR royalties of 1% to 2.5%, net profits royalties of 5% or net proceeds of production royalties of 10% or 25 cent charge per ton milled. Certain of the properties were held under previously existing joint venture agreements. The other party to these agreements has opted to no longer fund the properties.

Snow Lake, Manitoba

Through the acquisition of Garson, the Company acquired a 100% interest in the New Britannia Gold Mine ("NBM") in Snow Lake, Manitoba. The Company subsequently renamed the mine "Snow Lake Mine".

In May 2015, the Company completed the sale of the Snow Lake property to Hudbay Minerals Inc. ("Hudbay"). Under the terms of the agreement, Hudbay acquired 100% of the Company's interest in the Snow Lake project for US\$12,300,000 (\$14,996,128) in cash and a contingent payment of US\$5,000,000 million payable if the price of gold is equal to or greater than US\$1400/oz on the third anniversary of the closing date. The Snow Lake project consists of the Snow Lake mine and an associated processing plant, which are currently on care and maintenance, as well as \$1,867,000 in cash which supports the closure obligations associated with the property. The \$1,867,000 in cash was transferred to Hudbay on closing. The Company incurred costs with respect to this transaction in the amount of \$509,300. The Company used the proceeds of the sale, including its right to receive the contingent payment, to pay down the short-term loan (Note 14).

The Company recorded a loss on the sale of the Snow Lake property of \$1,603,339 for the year ended December 31, 2015. The Company recorded an impairment charge on the Snow Lake property of \$3,575,306 on the Snow Lake property for the year ended December 31, 2014.

Herblet Lake, Manitoba

Included in Assets held for sale was the Herblet Lake option. In November 2010, the Company entered into an agreement to acquire a 100% interest in certain mining claims in the Herblet Lake area. The Company terminated its Herblet Lake option as part of the Purchase and Sale Agreement with Hudbay.

Royalties payable	6,305,411	4,854,454
	<u>\$ 10,999,542</u>	<u>\$ 9,686,482</u>

14. Short-term loan

In November 2012, the Company entered into a fully secured bridge financing consisting of a senior, secured note with a face value of US\$17,500,000 (\$17,372,250) and net proceeds of US\$15,500,000 (\$15,386,850). The loan was fully secured by the Company's assets, and was subject to various information and affirmative covenants. The financing was for a one-year term and the Company was required to pay cash interest payments starting June 28, 2013 of US\$250,000 per month. In addition to the interest payments, the Company granted the lender 2,900,000 warrants to acquire common shares of the Company at an exercise price of \$0.27, which expired unexercised in November 2015.

In October 2013, the Company entered into a waiver and amendment agreement extending the term of the loan to January 31, 2014 subject to a monthly monitoring fee of US\$100,000, with the Company agreeing to re-price the 2,900,000 warrants granted to the lender at a new exercise price of \$0.0465, expiring on the original expiry date of November 28, 2015. In August 2014, the Company entered into a sixth amendment agreement with the lenders, extending the maturity date to September 30, 2014.

On October 8, 2014, the lenders delivered to the Company a notice of intention to enforce security pursuant to section 244 of *Bankruptcy and Insolvency Act (Canada)* (the "Act"). The Company and the lender were negotiating the key terms of a forbearance agreement which was not formally executed. Subject to the terms of the forbearance agreement, for a period until March 31, 2015, the lenders would forbear against the enforcement of its security relating to defaults by the Company of the original loan agreement. A forbearance fee of US\$650,000 (\$743,600) was charged by the lender.

The Company carried a term deposit of \$3,903,708 which had been designated as restricted cash on the statements of financial position during prior years. These funds originally secured a letter of credit on behalf of Kinross Gold Corporation ("Kinross") which would have been refundable upon commercial production at the Snow Lake Mine. The letter of credit expired on December 28, 2014. These funds were applied against the principal of its short-term loan during the year ended December 31, 2015.

In May 2015, the Company sold its Snow Lake project and the proceeds of the sale, including the contingent consideration, were used to pay down the short-term loan. The Company and the lenders negotiated a payment schedule with amounts and timing to comprise full and final settlement of the debt. The required payments totaled US\$1,100,000 (\$1,342,363) and \$190,432, all of which were made during the year ended December 31, 2015. As a result, the Company recognized a forgiveness of debt totaling \$1,638,118 for the year ended December 31, 2015 (December 31, 2014: \$nil). The Company had entered into foreign exchange contracts to mitigate the risk of a strengthening US dollar in light of the required US dollar payments and recognized gains on these contracts totaling \$22,787 for the year ended December 31, 2015 (December 31, 2014: \$nil).

During the year ended December 31, 2015, the Company incurred interest expense and fees of \$1,739,597 with respect to this loan (December 31, 2014: \$4,844,623).

15. Debentures

During 2006, the Company completed a private placement debenture financing with Industrial Alliance Securities Inc. ("Industrial Alliance") raising \$4,210,000 in gross proceeds with the issuance of units comprised of \$1,000 principal convertible debentures maturing April 28, 2010. On April 28, 2010, the Company entered into agreements with the holders of the expiring convertible debentures to roll over the existing 6% convertible debentures into units comprised of \$1,000 principal amount 10% convertible unsecured subordinated debentures due April 28, 2014. The debenture holders had agreed to an extension of the maturity date to October 1, 2014. However, as at December 31, 2015, the Company is in default with respect to the repayment of these debentures and the convertible feature has expired.

QMX GOLD CORPORATION

Notes to the Annual Consolidated Financial Statements

December 31, 2015 and 2014

(Expressed in Canadian dollars unless otherwise noted)

15. Debentures (continued)

The debentures were originally classified as a liability, with the exception of the portion relating to the conversion feature, resulting in the carrying value of the debentures being less than its face value. The discount was being accreted over the term of the debentures, utilizing the effective interest rate method at a 15% discount rate. An amount of \$nil in accretion of discount and accretion of financing charges was recorded on the annual consolidated statements of operations and comprehensive loss for the year ended December 31, 2015 (December 31, 2014: \$236,644). The Company recorded accrued interest of \$420,999 for the year ended December 31, 2015 (December 31, 2014: \$280,667) in relation to these debentures.

16. Debenture

In March 2014, the Company converted US\$1,552,454 (\$2,148,596) of royalties payable to F&M. (Note 11) to a debenture which matured on December 31, 2015. The debenture is non-interest bearing and is secured by all the assets and property of the Company. This debenture was discounted on recognition to US\$1,077,142 (\$1,190,781) with an amount of \$525,457 credited to finance costs on the annual consolidated statement of operations and comprehensive loss for the year ended December 31, 2014. The discount was accreted over the term of the debenture. For the year ended December 31, 2015, the Company recorded \$377,316 in accretion expense with respect to this loan (December 31, 2014: \$202,704). This debenture was not repaid as at December 31, 2015 and the Company is currently negotiating a resolution.

17. Provision for closure and reclamation

The Company's provision for closure and reclamation costs is based on management's estimates of costs to abandon and reclaim mineral properties and facilities as well as an estimate of the future timing of the costs to be incurred.

The following table presents the reconciliation of the beginning and ending carrying amount of the provision for closure and reclamation associated with the retirement of the Company's plant and mineral properties:

Balance at December 31, 2013	\$	2,613,000
Additional provisions recognised		681,000
Adjustments resulting from re-measurement		(52,000)
Unwinding of discount and effect of changes in the discount rate		38,000
Balance at December 31, 2014	\$	3,280,000
Provisions derecognised		(355,000)
Additional provisions recognised		705,000
Adjustments resulting from re-measurement		82,000
Unwinding of discount and effect of changes in the discount rate		16,000
Balance at December 31, 2015	\$	3,728,000
Current portion		-
Long-term portion		3,728,000

The Company has assessed its total provision for closure and reclamation and estimated it to be \$3,728,000 at December 31, 2015 for continuing assets (December 31, 2014: \$3,280,000) based on a total future liability of approximately \$3,500,000 (December 31, 2014: \$3,100,000). Reclamation is expected to occur in four to seven years. It was initially anticipated that the Lac Herbin mine would have been mined out with reclamation starting in the near future. However, the Company has re-started mining at Lac Herbin and hopes to continue for several more years. As a result, reclamation provisions have now been classified as long-term with respect to Lac Herbin as at December 31, 2015 whereas they were classified as short-term as at December 31, 2014. Accretion related to these reclamation liabilities totalled \$16,000 for the year ended December 31, 2015 with an increase in provisions estimated to be \$705,000 and a re-measurement adjustment of \$82,000 recorded at December 31, 2015. The reclamation provision related to the Lac Pelletier property (Note 11) has been derecognized during the period as the Company has reverted all claims back to Thundermin.

Reclamation for assets held for sale, specifically the Snow Lake property, was reported separately prior to the sale of the Snow Lake property. Accretion related to the Snow Lake reclamation liabilities totalled \$10,500 for the year ended December 31, 2015 (December 31, 2014: \$76,000).

QMX GOLD CORPORATION

Notes to the Annual Consolidated Financial Statements

December 31, 2015 and 2014

(Expressed in Canadian dollars unless otherwise noted)

17. Provision for closure and reclamation (continued)

Through Garson, the Company held term deposits amounting to \$5,767,000. These funds were restricted for the reclamation of the Snow Lake property (Note 11). The Company placed funds on deposit as collateral for letters of credit issued to the vendor of the Snow Lake Mine, Kinross, as well as to the Government of Manitoba, for Garson's share of assumed reclamation and operating obligations. The letters of credit expired on December 28, 2014 and were not renewed by the financial institution carrying them. With the sale of the Snow Lake property, the Company applied \$3,900,000 related to the Kinross collateral against the principal of its short-term loan (Note 14). An amount of \$1,867,000 restricted for the Manitoba government, as well as the reclamation liabilities, were transferred to Hudbay with the completion of the sale of the Snow Lake property subject to the asset purchase agreement.

18. Share capital

As at December 31, 2015 and December 31, 2014, the Company's authorized number of common shares was unlimited without par value.

19. Share-based payments reserve

Employee share option plan

The shareholders of the Company approved the Company's existing stock option plan, the "Plan", to be administered by the directors of the Company. Under the Plan, the Company may grant to directors, officers, employees and consultants options to purchase shares of the Company. The Plan provides for the issuance of stock options to acquire up to 10% of the Company's issued and outstanding capital. The Plan is a rolling plan as the number of shares reserved for issuance pursuant to the grant of stock options will increase as the Company's issued and outstanding share capital increases. Options granted under the Plan will be for a term not to exceed 5 years. The options currently granted under the Plan vest immediately pending any regulatory hold period. The Plan provides that, it is solely within the discretion of the board to determine who should receive stock options and in what amounts. In no case (calculated at the time of grant) shall the Plan result in:

- The number of options granted in a 12-month period to any one consultant exceeding 2% of the issued shares of the Company;
- The aggregate number of options granted in a 12-month period to any one individual exceeding 5% of the outstanding shares of the Company;
- The number of options granted in any 12-month period to employees or consultants undertaking investor relations activities exceeding in aggregate 2% of the issued shares of the Company;
- The aggregate number of common shares reserved for issuance to any one individual upon the exercise of options granted under the Plan or any previously established and outstanding stock option plans or grants exceeding 5% of the issued shares of the Company in any 12-month period.

Notes to the Annual Consolidated Financial Statements

December 31, 2015 and 2014

(Expressed in Canadian dollars unless otherwise noted)

19. Share-based payments reserve (continued)

The following share-based payment arrangements were in existence as at December 31, 2015:

STOCK OPTIONS:

No. outstanding	No. exercisable	Grant date	Expiry date	Exercise price	Fair value at grant date	Value of vested options	Expected volatility	Expected life (yrs)	Expected dividend yield	Risk-free interest rate
25,000	25,000	10-Feb-11	10-Feb-16	\$ 3.30	\$ 54,350	\$ 54,350	77%	5.00	0%	2.75%
181,250	181,250	29-Nov-11	29-Nov-16	\$ 2.00	\$ 119,262	\$ 119,262	80%	5.00	0%	1.46%
30,000	30,000	8-Jun-12	8-Jun-17	\$ 2.00	\$ 7,200	\$ 7,200	80%	5.00	0%	1.29%
1,160,000	1,160,000	10-Jan-13	10-Jan-18	\$ 0.24	\$ 204,810	\$ 204,810	101%	5.00	0%	1.32%
1,750,000	1,750,000	1-Jun-15	1-Jun-20	\$ 0.05	\$ 24,150	\$ 24,150	177%	5.00	0%	0.90%
3,146,250	3,146,250				\$ 409,772	\$ 409,772				

During the year ended December 31, 2015, 1,750,000 stock options were granted to directors, officers, employees and consultants of the Company, and vested immediately on grant. A charge of \$24,150 was recorded to professional, consulting and management fees for the year ended December 31, 2015. No stock options were granted and no expense incurred during the year ended December 31, 2014. The fair value of options is estimated on the date of grant using the Black-Scholes option pricing model. Where relevant, the expected life used in the model has been adjusted based on management's best estimate for the effects of non-transferability, exercise restrictions (including the probability of meeting market conditions attached to the option), and behavioral considerations. Expected volatility is based on the historical share price volatility over the past 5 years. The expected life of the option was calculated based on the history of option exercises.

The weighted average life of options at December 31, 2015 was 3.28 years (December 31, 2014: 2.82 years).

20. Transaction with owners

The Company acquired the non-controlling interest of Garson on April 29, 2010 through the issuance of 327,510 shares. As at December 31, 2015, some shareholders had not yet tendered their Garson shares, and consequently an amount of \$148,150 (December 31, 2014: \$148,150) is recorded as a commitment to issue shares. The consideration paid was applied against the non-controlling interest and the residual amount of \$100,845 was recorded to transactions with owners.

21. Other gains and (losses)

	Years ended December 31,	
	2015	2014
Net foreign exchange (losses)	\$ (2,460,585)	\$ (2,061,371)
Mining duties	(60,000)	(214,346)
General exploration expenditures	(11,346)	(7,040)
Write off of financial costs related to Snow Lake	-	(499,913)
Write off of deposit received on Snow Lake acquisition	-	1,042,700
Gain on derivative contract (Note 14)	22,787	-
Gain on sale of assets (Note 10)	454,874	286,431
Gain on sale of investments	-	926,758
Unrealized (loss) arising on financial assets designated as FVTPL	(1,708)	(1,133,532)
	\$ (2,055,978)	\$ (1,660,313)

Gain on sale of investments during 2014 relates to the sale of the Company's shares of Falco Pacific Resource Group Inc., which were acquired primarily in 2012 from the sale of the Company's former Rouyn properties. The proceeds of the sale were used to reduce the principal of the Company's loan facility (Note 14).

Notes to the Annual Consolidated Financial Statements

December 31, 2015 and 2014

(Expressed in Canadian dollars unless otherwise noted)

22. Finance costs

	Years ended December 31,	
	2015	2014
Accretion of reclamation provision (Note 17)	\$ (26,500)	\$ (114,000)
Accretion of convertible debentures (Note 15)	-	(236,644)
Interest accrued on debentures (Note 15)	(420,999)	(280,667)
Discount and accretion of discount on debenture financing (Note 16)	(377,316)	322,763
Interest and fees on short-term loan (Note 14)	(1,739,597)	(4,844,623)
Other interest expense	(20,407)	(163,917)
	<u>\$ (2,584,819)</u>	<u>\$ (5,317,088)</u>

23. (Impairment)/reversal of impairment and (loss) on sale of mineral properties

	Years ended December 31,	
	2015	2014
Snow Lake property (Note 12)	\$ (1,603,339)	\$ (3,622,520)
Lac Pelletier property (Note 11)	(7,124,383)	-
Other properties (Note 11)	(165,851)	47,214
	<u>\$ (8,893,573)</u>	<u>\$ (3,575,306)</u>

24. Net loss per share

Shares issuable from options, warrants and convertible debentures were excluded from the computation of diluted loss per share because their effect would be anti-dilutive for the years ended December 31, 2015 and 2014.

25. Financial instruments

Financial assets and financial liabilities as at December 31, 2015 and 2014 were as follows:

December 31, 2015	Loans and receivables, other liabilities	Assets/liabilities at fair value through profit or loss	TOTAL
Cash and cash equivalents	\$ 244,397	\$ 31,156	\$ 275,553
Amounts receivable	4,812	-	4,812
Investments	-	3,214	3,214
Accounts payable and accrued liabilities	10,999,542	-	10,999,542
Debentures	5,119,283	-	5,119,283
Debenture	2,148,596	-	2,148,596

QMX GOLD CORPORATION

Notes to the Annual Consolidated Financial Statements

December 31, 2015 and 2014

(Expressed in Canadian dollars unless otherwise noted)

25. Financial instruments (continued)

December 31, 2014	Loans and receivables, other liabilities	Assets/liabilities at fair value through profit or loss	TOTAL
Cash and cash equivalents	\$ 1,435,482	\$ 30,848	\$ 1,466,330
Restricted cash equivalents	-	3,900,000	3,900,000
Amounts receivable	81,069	-	81,069
Investments	-	4,922	4,922
Restricted cash equivalents (assets held for sale)	-	1,867,000	1,867,000
Accounts payable and accrued liabilities	9,686,482	-	9,686,482
Liabilities of assets held for sale	603,661	-	603,661
Short-term loan	19,191,319	-	19,191,319
Liability component of debentures	4,698,283	-	4,698,283
Debenture	1,461,512	-	1,461,512

The fair values of cash and cash equivalents, amounts receivable, accounts payable and accrued liabilities, debentures and debenture approximate fair value due to the short-term nature of the financial instruments.

A fair value hierarchy prioritizes the methods and assumptions used to develop fair value measurements for those financial assets where fair value is recognized on the statement of financial position. These have been prioritized into three levels.

Level 1 – Quoted prices (unadjusted) in active markets for identical assets or liabilities

Level 2 – Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly

Level 3 – Inputs for the asset or liability that are not based on observable market data.

Fair value amounts represent point-in-time estimates and may not reflect fair value in the future. The measurements are subjective in nature, involve uncertainties and are a matter of significant judgment.

The following table sets forth the Company's financial assets and liabilities measured at fair value by level within the fair value hierarchy as at December 31, 2015 and 2014.

2015	Level 1	Level 2	Level 3
Cash equivalents	\$ -	\$ 31,156	\$ -
Investments	3,214	-	-
2014	Level 1	Level 2	Level 3
Cash equivalents	\$ -	\$ 30,848	\$ -
Restricted cash equivalents, current	-	3,900,000	-
Restricted cash equivalents, long-term	-	1,867,000	-
Investments	4,922	-	-

The Company's risk exposures and the impact on the Company's financial instruments are summarized below. There have been no significant changes in the risks, objectives, policies and procedures for managing risk during the year ended December 31, 2015.

Credit risk

The Company's credit risk is primarily attributable to cash equivalents and amounts receivable. The Company has no significant concentration of credit risk arising from operations. Cash equivalents consist of guaranteed investment certificates, which have been invested with reputable financial institutions, from which management believes the risk of loss to be remote. Financial instruments included in amounts receivable consist of receivables from related and unrelated companies. The Company currently transacts with highly rated counterparties for the sale of gold. Management believes that the credit risk concentration with respect to these financial instruments is remote.

Notes to the Annual Consolidated Financial Statements

December 31, 2015 and 2014

(Expressed in Canadian dollars unless otherwise noted)

25. Financial instruments (continued)

Liquidity risk

The Company's approach to managing liquidity risk is to endeavour to ensure that it will have sufficient liquidity to meet liabilities when due. As at December 31, 2015, the Company had a cash and cash equivalents balance of \$275,553 (December 31, 2014: \$1,466,330) to settle current liabilities of \$18,267,421 (December 31, 2014: \$40,559,257). Approximately \$9,400,000 of the Company's accounts payable and accrued liabilities as at December 31, 2015 have contractual maturities of less than 30 days and are subject to normal trade terms. The Company is carrying a balance of \$5,119,283 (December 31, 2014: \$4,698,283) in unsecured debentures as at December 31, 2015 which are in default. As well, the Company is carrying a balance of \$2,148,596 (December 31, 2014: \$1,461,512) in a secured debenture as at December 31, 2015 which is also in default.

Interest rate risk

The Company has cash balances subject to fluctuations in the prime rate. The Company's current policy is to invest excess cash in investment-grade deposit certificates issued by its banking institutions. The Company periodically monitors the investments it makes and is satisfied with the credit ratings of its banks. The Company carries debentures (Note 15) on which interest is payable quarterly or semi-annually at fixed rates of 10% per annum. Management believes that interest rate risk is remote as investments have maturities of three months or less and the Company currently does not carry interest bearing debt at floating rates.

Foreign currency risk

The Company's functional currency is the Canadian dollar and major purchases are transacted in Canadian dollars. All gold sales revenues are denominated in US dollars. As well, the Company's royalties payable and debenture described in Note 16 are denominated in US dollars. The Company is exposed to currency risk with fluctuations in the Canadian dollar relative to the US dollar. The Company currently does not use derivatives to manage foreign currency risk on these amounts.

Price risk

The Company is exposed to price risk with respect to commodity prices, specifically gold. The Company closely monitors commodity prices to determine the appropriate course of action to be taken by the Company. The Company's future gold mining operations will be significantly affected by changes in the market prices for gold. Gold prices fluctuate on a daily basis and are affected by numerous factors beyond the Company's control. The supply and demand for gold, the level of interest rates, the rate of inflation, investment decisions by large holders of gold including governmental reserves and stability of exchange rates can all cause significant fluctuations in gold prices. Such external economic factors are in turn influenced by changes in international investment patterns and monetary systems and political developments.

Sensitivity analysis

Based on management's knowledge and experience of the financial markets, the Company believes the following movements are "reasonably possible" over the period:

- The Company does not hold interest-bearing debt at interest rates subject to market fluctuations to give rise to interest rate risk.
- The Company is carrying royalties payable and a debenture in US dollars. A 10% change in the CDN\$-US\$ exchange rate as at December 31, 2015 would generate a change to net loss of approximately \$845,000.

QMX GOLD CORPORATION

Notes to the Annual Consolidated Financial Statements

December 31, 2015 and 2014

(Expressed in Canadian dollars unless otherwise noted)

26. Capital management

The Company manages and adjusts its capital structure based on available funds in order to support its operations and the acquisition, exploration and development of mineral properties. The capital of the Company consists of share capital, warrants and options. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business.

The Company continues to rely on capital markets to support continued growth as the Company restarts operations at Lac Herbin. The Company will continue to assess new properties and seek to acquire an interest in additional properties if it feels there is sufficient geologic or economic potential and if it has adequate financial resources to do so.

Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable.

The Company's capital management objectives, policies and processes have remained unchanged during the year ended December 31, 2015.

No other capital requirements are imposed by a lending institution or regulatory body, other than of the TSXV which requires adequate working capital or financial resources of the greater of (i) \$50,000 and (ii) an amount required in order to maintain operations and cover general and administrative expenses for a period of 6 months.

As of December 31, 2015, the Company may not be compliant with the policies of the TSXV. The impact of this violation is not known and is ultimately dependent on the discretion of the TSXV.

27. Related party disclosures

During the years ended December 31, 2015 and 2014, the Company entered into the following transactions in the ordinary course of business with related parties that are not subsidiaries of the Company.

	Purchases of goods and services	
	Years ended December 31,	
	2015	2014
2227929 Ontario Inc.	\$ 153,000	\$ 178,429
Forbes & Manhattan, Inc.	385,243	873,055

The Company shares office space with other companies who may have officers or directors in common with the Company. The costs associated with this space, including the provision of office equipment and supplies, and certain other services are administered by 2227929 Ontario Inc. to whom the Company pays a fee. Other companies who share officers and directors with the Company may have similar arrangements with 2227929 Ontario Inc.

Mr. Stan Bharti is the Executive Chairman of F&M. Mr. Bharti was a director of the Company until his resignation on March 6, 2012; however as the Company is part of the F&M Group of Companies, it continues to receive the benefits of such membership, including access to mining professionals, advice from Mr. Bharti, and strategic advice from the F&M Board of Advisors. An administration fee of \$10,000 per month is charged by F&M pursuant to a consulting agreement. This contract was amended during the second quarter of 2015. The previous fee charged was \$25,000 per month. As well, a 2% royalty is payable on gold sales from the Aurbel properties (including Lac Herbin) to F&M. The Company converted US\$1,552,454 of royalties owed to F&M to a debenture that matured on December 15, 2015 (Note 16). This debenture is currently in default and the Company is in negotiations with Mr. Bharti to resolve the issue.

QMX GOLD CORPORATION

Notes to the Annual Consolidated Financial Statements

December 31, 2015 and 2014

(Expressed in Canadian dollars unless otherwise noted)

27. Related party disclosures (continued)

The following balances were outstanding at the end of the reporting period:

	Amounts owed by related parties		Amounts owed to related parties	
	December 31, 2015	December 31, 2014	December 31, 2015	December 31, 2014
2227929 Ontario Inc.	\$ 18,000	\$ 18,000	\$ 437,027	\$ 272,612
Forbes & Manhattan, Inc.	\$ -	\$ -	\$ 1,301,629	\$ 895,182
Forbes & Manhattan, Inc.*	\$ -	\$ -	\$ 2,148,596	\$ 1,801,002
Directors and officers	\$ -	\$ -	\$ 144,649	\$ 114,000

* The Forbes & Manhattan, Inc. debenture is non-interest bearing and is secured by all the assets and property of the Company. The amount presented here is non-discounted. This debenture is in default at December 31, 2015.

The other amounts outstanding are unsecured, non-interest-bearing with no fixed terms of payments. No guarantees have been given or received. No expense has been recognized in the current or prior periods for bad or doubtful debts in respect of the amounts owed by related parties.

Compensation of key management personnel of the Company

The remuneration of directors and other members of key management personnel during the period were as follows:

	Years ended December 31,	
	2015	2014
Short-term benefits	\$ 1,049,885	\$ 1,111,476
Share-based payments	15,180	-

In accordance with IAS 24, key management personnel are those persons having authority and responsibility for planning, directing and controlling the activities of the Company directly or indirectly, including any directors (executive and non-executive) of the Company.

The remuneration of directors and key executives is determined by the remuneration committee having regard to the performance of individuals and market trends. See also Note 28(a).

28. Commitments and contingencies

(a) The Company is party to certain management contracts. These contracts contain clauses requiring additional payments of up to \$1,385,000 be made upon the occurrence of certain events such as a change of control. As a triggering event has not taken place, the contingent payments have not been reflected in these consolidated financial statements. Additional minimum management contractual commitments remaining under the agreements are approximately \$570,000, all due within one year.

(b) The Company's mining and exploration activities are subject to various laws and regulations governing the protection of the environment. These laws and regulations are continually changing and generally becoming more restrictive. The Company believes its operations are materially in compliance with all applicable laws and regulations. The Company has made, and expects to make in the future, expenditures to comply with such laws and regulations.

(c) The Company is, from time to time, involved in various claims and legal proceedings. The Company cannot reasonably predict the likelihood or outcome of these activities. The Company does not believe that adverse decisions in any pending or threatened proceedings related to any matter, or any amount which may be required to be paid by reasons thereof, will have a material effect on the financial condition or future results of operations. As at December 31, 2015 and 2014, no amounts have been accrued related to such matters.

(d) The Company has indemnified the subscribers of current and previous flow-through share offerings against any tax-related amounts that become payable by the shareholder as a result of the Company not meeting its expenditure commitments.

QMX GOLD CORPORATION

Notes to the Annual Consolidated Financial Statements

December 31, 2015 and 2014

(Expressed in Canadian dollars unless otherwise noted)

29. Income tax

(a) Provision for Income Taxes

Major items causing the Company's income tax rate to differ from the federal statutory rate of 26.5% (2014 - 26.5%) were as follows:

	2015 \$	2014 \$
(Loss) before income taxes	(12,512,454)	(11,512,622)
Expected income tax (recovery) based on statutory rate	(3,316,000)	(3,051,000)
Adjustment to expected income tax benefit:		
Accretion on decommissioning liabilities and convertible debt	680,000	1,366,000
Non-taxable deductions	55,000	(505,000)
Share issue costs	-	(205,000)
Other	2,001,000	1,551,000
Benefit of tax losses not recognized	580,000	844,000
<u>Deferred income tax (recovery)</u>	<u>-</u>	<u>-</u>

(b) Deferred income tax balances

Deferred income tax assets have not been recognized in respect of the following temporary differences:

	2015 \$	2014 \$
Non-capital loss carry-forwards	49,434,000	54,750,000
Share issue costs	709,000	1,853,000
Mineral property costs	47,948,000	44,646,000
Other temporary differences	19,577,000	15,120,000
<u>Total</u>	<u>117,668,000</u>	<u>116,369,000</u>

Deferred tax asset pools have not been recognized in respect of these items because it is not probable that future taxable profit will be available against which the Company can use the benefits.

(c) Non-capital loss carryforwards

The Company has approximately \$49,434,000 of non-capital losses in Canada as at December 31, 2015 which under certain circumstances can be used to reduce the taxable income of future years. The non-capital losses expire as follows:

<u>Expiry Date</u>	
2026	115,000
2028	6,667,000
2029	4,878,000
2030	9,427,000
2031	14,652,000
2032	10,108,000
2033	2,644,000
2034	943,000
	<u>\$ 49,434,000</u>
