Mr. Tom Maher
Saskatchewan Ministry of Environment
Environmental Assessment Branch
486 - 3211 Albert Street
Regina, SK S4S 5W6

Dear Mr. Maher:

**SUBJECT: Metals Processing Facility - Langham, SK
Fortune Minerals**

This letter serves to update you on the federal coordination exercise undertaken by the Canadian Environmental Assessment Agency (the Agency). I can confirm I have completed a survey of federal departments with respect to determining interest in the project noted above. The project information that was provided was shared with all federal departments with a potential interest. Based on the responses to the survey the application of the *Canadian Environmental Assessment Act* (the Act) by a federal authority will not be required for this project.

Transport Canada (TC) previously requested more information regarding potential water crossings in the project area. Fortune Minerals provided the Agency with information stating that there are no water crossings present in the project area. This information was shared with TC on October 12, 2010. TC has reviewed the information and determined it has no interest in the project.

If I can be of further assistance, please feel free to contact me by telephone at (204) 984-3233 or by e-mail at: Heather.flynn@ceaa-acee.gc.ca.

Sincerely,

Heather Flynn
Environmental Assessment Officer

Encl.

Saskatoon, SK S7S 1H8

Dear Dr. Schryer:

**SUBJECT: Metals Processing Facility - Langham, SK
Fortune Minerals**

Further to my letter dated October 12, 2010, I have received a response from Transport Canada stating the information provided by Fortune Minerals, regarding the lack of water crossings in the area of the project, has satisfied its information needs. Transport Canada no longer has an interest in this project. Therefore please accept this letter as notification that an environmental assessment of the project under the Act will not be necessary.

If you have any questions concerning the Act or its Regulations, please feel free to contact me by telephone at (204) 984-3233 or by email at: Heather.flynn@ceaa-acee.gc.ca.

Sincerely,

Heather Flynn

Dear Dr. Schryer:

**SUBJECT: Metals Processing Facility - Langham, SK
Fortune Minerals**

The Environmental Assessment Branch of Saskatchewan Ministry of Environment forwarded copies of your proposal to the regional office of the Canadian Environmental Assessment Agency (the Agency). Saskatchewan Ministry of Environment requested that the Agency, on behalf of federal government departments, identify any environmental assessment requirements that would exist under the *Canadian Environmental Assessment Act* (the Act) with respect to the project.

I have completed a survey of federal departments with respect to determining any interests pertaining to the project. The project information provided by Saskatchewan Ministry of Environment was shared with all federal departments with potential interest. Please accept this letter as notification that an environmental assessment of the project under the Act will not likely be necessary. Copies of all letters provided by Federal Authorities have been appended for your review.

Transport Canada (TC) requested more information regarding potential water crossings in the project area. Fortune Minerals provided the Agency with information stating no water crossings are present in the project area. This information was shared with TC on October 12, 2010. If TC has any further requirements you will be notified in writing.

Provincial requirements will be identified separately following a review coordinated by Saskatchewan Ministry of Environment. Construction should not begin until you receive a clearance from Saskatchewan Ministry of Environment (Environmental Assessment Branch) and any provincial concerns and requirements have been met.

If you have any questions concerning the Act or its Regulations, please feel free to contact me by telephone at (204) 984-3233 or by email at: Heather.flynn@ceaa-acee.gc.ca.

Sincerely,

Heather Flynn
Environmental Assessment Officer

FCR RESPONSE DUE: October 1, 2010

In accordance with information-sharing requirements of the *Canada-Saskatchewan Agreement on Environmental Assessment Cooperation* (the Agreement), the Environmental Assessment Branch, Saskatchewan Environment (SE) has provided a copy of the above-referenced project proposal for federal review. SE has sent a copy of the EPP directly to EC, DFO and INAC. All of the documentation currently being considered by SE is available on the CEAA Collaboration website: <https://collaboration.ceaa-acee.gc.ca/Home.aspx?locale=en-CA&c=1>.

Please indicate (by checking the appropriate box) whether or not your department/agency:

- has, or anticipates, a responsibility under Section 5(1) of CEAA to assess the environmental effects of the project (i.e. are an RA). Yes _____ No _____
If yes, indicate trigger: _____
- to determine whether, within your departmental mandate, you would be able to offer specialist advice to a Responsible Authority if requested (subsection 12(3) of the Act); and Yes _____ No _____
Specify as appropriate: _____
- requires additional information to make a determination referred to in a) or b) above Yes No _____

If yes, please describe additional information requirements or forward a request within 10 days after making the determination:

Amelioration of any works on, in, over or under a navigable watercourse

- In the absence of a federal trigger, has an interest in the project related to its departmental mandate, and would like to participate in the provincial review (Clause 38(1) of the Agreement). Yes _____ No _____
If yes, please describe requested involvement i.e. comments for the provincial Guidelines, review of EIS, etc.

Please respond to the above questions by **October 1, 2010**. If your response to any of the above determinations is positive, please provide the name and means of contact for a departmental representative for the review.

Heather Flynn
Canadian Environmental Assessment Agency
Suite 101, 167 Lombard Ave.
Winnipeg, MB R3B 0T6

Dear Ms. Flynn,

RE: FORTUNE MINERALS METALS PROCESSING FACILITY – LANGHAM, SK

Environment Canada (EC) has reviewed the Environmental Project Proposal (the proposal) for the above proposed project. EC is not a Responsible Authority (RA) under the *Canadian Environmental Assessment Act* (the Act) because:

- a) EC is not a proponent of the project and is not conducting any act or thing that commits the department to carrying out the project in whole or in part;
- b) EC is not making or authorizing any form of payment or other financial assistance to the proponent for the purpose of enabling the project to be carried out in whole or in part;
- c) EC does not administer any lands involved in enabling the project to be carried out in whole or in part; and
- d) EC does not issue a permit, license, grant an approval or take any action for the purpose of enabling the project to be carried out in whole or in part.

For the purposes of subsection 12(3) of the Act, EC may possess specialist or expert information or knowledge in the areas of EC's mandate that may apply to the project. Should an RA identify any specific environmental concerns with respect to the aforementioned project, EC, as a Federal Authority, will provide specialist or expert information or knowledge pursuant to subsection 12(3) of the Act.

EC requires a formal written request prior to providing any specialist or expert information or knowledge in its possession. To expedite our response to an RA's request, RAs must specify the nature of the expertise they are seeking, preferably by means of targeted questions or specific statements outlining concerns, and must include a deadline for EC's response. To avoid unnecessary delays, we would request that the RA provide, at the time of the request for advice, the proposed scope of project and scope of assessment.

Further, upon confirmation of triggers pursuant to CEAA and receipt of the foregoing request, EC would like to be kept informed, and may formally participate in the provincial environmental assessment review of this project.

EC looks forward to continued dialogue and co-operation with respect to this project. If you have any questions, please call me at (780) 951-8973.

Sincerely,

(original signed by)

Subject: Health Canada's FCR Response for Fortune Mineral's Metals Processing Facility Project in Langham, SK

Dear Ms Flynn,

Thank you for your email dated Sept 30, 2010 requesting Health Canada's (HC) response for environmental assessment of the aforementioned project under the Federal Coordination Regulations.

Based on the information provided, Health Canada has determined that it is not a Responsible Authority (RA) under Section 5 of the *Canadian Environmental Assessment Act* (the Act) with regards to the present scope of the project.

In the context of subsection 12(3) of the Act, Health Canada currently has expertise in the following biophysical areas related to human health that may apply to the project:

- Air quality effects
- Contamination of country foods (e.g. fish, wild game, garden produce, berries, etc)
- Drinking and recreational water quality
- Radiological effects
- Electric and magnetic fields effects
- Noise effects
- Human health risk assessment (HHRA) and risk management
- Federal air, water, and soil quality guidelines/standards used in HHRAs
- Toxicology (multimedia - air, water, soil), and
- First Nations and Inuit Health

Should an RA, or a territorial / provincial authority, identify any specific human health concerns with respect to the aforementioned project, Health Canada would be pleased to provide expertise upon request as a Federal Authority, pursuant to subsection 12(3) of the Act, or under a territorial / provincial EA process.

Health Canada has recently published a document entitled "Useful Information for Environmental Assessments" which describes in greater detail Health Canada's areas of expertise and expectations with respect to human health information to be contained in environmental assessments (as applicable). It can be found at:
http://www.hc-sc.gc.ca/ewh-semt/pubs/eval/environ_assess-eval/index-eng.php

Note that Health Canada now requires a written request prior to providing any expertise in its possession. The request should be specific on the nature of the expertise requested, preferably outlining targeted questions or concerns, and should include the deadline for Health Canada's response. In order to assist us and avoid unnecessary delays, it is suggested that project information such as the scope of project, the scope of the assessment and the subject areas and/or portions of documents to be reviewed be provided at the time of the request for advice, if you have not already done so.

Your written request for expertise should be forwarded to the attention of the undersigned.

Sincerely,

A handwritten signature in black ink, appearing to read "R. A.", followed by a long horizontal line extending to the right.

Dear Mr. Tom Maher:

Subject: Metals Processing Facility – Langham, SK

Fisheries and Oceans Canada - Fish Habitat Management Program (DFO) received the proposal on September 8, 2010. Please refer to the file number below:

DFO File No.: 10-HCAA-CA1-02261

The proposal has been reviewed to determine whether it is likely to result in impacts to fish and fish habitat which are prohibited by the habitat protection provisions of the *Fisheries Act* or those prohibitions of the *Species at Risk Act* that apply to aquatic species.*

Our review was based on the project proposal prepared by MDH Engineered Solutions on behalf of Fortune Minerals Limited entitled, Environmental Project Proposal for The Proposed Saskatchewan Metals Processing Plant, dated July, 2010.

We understand that Fortune Minerals Limited proposes to construct and operate a hydrometallurgical processing facility near Langham, SK, located within SE1/4 23-39-07 W3M and N1/2 14-39-07 W3M.

DFO has concluded that the proposal as submitted is not likely to result in impacts to fish and fish habitat. The proponent will not need to obtain a formal approval from DFO in order to proceed with the project.

If the plans have changed or if this description of the proposal is either incorrect, or incomplete the proponent should contact this office to determine if the advice in this letter still applies.

Please be advised that any impacts to fish and fish habitat which result from a failure to implement this proposal as described included in this letter could lead to corrective action such as enforcement.

*Those sections most relevant to the review of development proposals include 20, 22, 32 and 35 of the *Fisheries Act* and sections 32, 33 and 58 of the *Species at Risk Act*. For more information please visit www.dfo-mpo.gc.ca.

Mr. Tom Maher
Saskatchewan Ministry of Environment
Environmental Assessment Branch
486 - 3211 Albert Street
Regina, SK S4S 5W6

Dear Mr. Maher:

**SUBJECT: Metals Processing Facility - Langham, SK
Fortune Minerals**

I have completed a survey of federal departments with respect to determining interest in the project noted above. I can confirm that the project information that was provided has been shared with all federal departments with a potential interest. I am enclosing copies of the relevant responses for your file. Based on the responses to the survey the application of the *Canadian Environmental Assessment Act* (the Act) by a federal authority will not likely be required for this project.

Transport Canada (TC) has requested more information regarding potential water crossings in the project area. Fortune Minerals provided the Agency with information stating there are no water crossings in the project area. This information was shared with TC on October 12, 2010. If TC has any further requirements you will be notified in writing.

Environment Canada (EC) has confirmed it can provide specialist advice should a Responsible Authority request information. EC has expressed an interest in this project and would like to participate in the provincial review process. Christine Twerdoclib is the contact for EC. Christine can be reached by phone at (780) 951-8973 or email: Christine.twerdoclib@eg.gc.ca. A copy of the letter from EC is attached.

Health Canada (HC) has also indicated it can provide expert advice related to human health, should a Responsible Authority request it. Please see the attached letter from HC.

A list of the appropriate federal contacts is attached. Please note that the project information was also reviewed by the Department of Fisheries and Oceans, the Department of Indian and Northern Affairs, and the Canadian Transportation Agency as part of the federal coordination process.

Thank you again for your continuing effort to ensure coordination and close communication between provincial and federal levels of government with respect to environmental assessment. If I can be of further assistance, please feel free to contact me by telephone at (204) 984-3233 or by e-mail at: Heather.flynn@ceaa-acee.gc.ca.

Sincerely,

Heather Flynn
Environmental Assessment Officer

Encl.
