Investor Presentation
May 2016

*North American exposure to commodities
critical to a growing world economy*

FORTUNEMINERALS.COM

Forward-Looking Information

- This management presentation (the “presentation”) was prepared as a summary overview of current information about Fortune Minerals Limited (the “Company”) only and is not a prospectus or other offering document intended to provide investors with the information required to make investment decisions. This presentation does not purport to contain full and complete information about the Company and its operations and recipients of this information are advised to review the Company’s public disclosure, available on SEDAR at www.sedar.com under the Corporate Profiles heading for full and complete information about the Company.
- This presentation contains certain information and statements that constitute “forward-looking statements” or “forward-looking information” including “financial outlook”, as such terms are defined under applicable Canadian and United States securities laws. These statements are subject to certain risks and uncertainties that could cause actual results to differ materially from those included in the forward-looking information and financial outlook. All statements or information other than statements or information of historical fact may constitute forward-looking information and financial outlook. These statements and information are only predictions.
- Actual events or results may differ materially. In addition, this presentation may contain forward-looking information attributed to third party industry sources. Undue reliance should not be placed on the forward-looking information and financial outlook, as there can be no assurance that the plans, intentions or expectations upon which this information is based will occur. By its nature, forward-looking information (which includes financial outlook) involves numerous assumptions, known and unknown risks and uncertainties, both general and specific, that contribute to the possibility that the predictions, forecasts, projections made will not occur.
- Specific forward-looking information contained in this presentation includes, among others, statements regarding: the anticipated timing of production at the NICO Project; metal recoveries and products to be generated by the Company’s Saskatchewan Metals Processing Plant (the “SMPP”); the expected capital and operating costs for the NICO Project and the SMPP; Company’s anticipated revenues and internal rate of return from the NICO Project; and the Company’s future developments plans for, and anticipated mine life of, the Arctos Anthracite Project and the Company’s strategy with respect to the development and potential expansion of its projects. The financial outlook with respect to the NICO Project and the Arctos Anthracite Project contained in this presentation, respectively, is derived from the feasibility report included in the Micon Technical Report and the feasibility report included in the Marston Technical Report, respectively, each of which was prepared for strategic planning purposes, and is not appropriate for any other purpose.
- With respect to forward-looking information and financial outlook contained in this presentation, the Company has made assumptions (including those assumptions set forth in certain pages of this presentation regarding, among other things: the Company’s ability to develop and operate the NICO Project; expected production and associated costs being in line with estimates; the Company’s ability to expand production in the future; the ability to increase capital spending as necessary in the circumstances; and the production potential of its properties and properties to be acquired being consistent with its expectations.
- Some of the risks that could affect the Company’s future results and could cause results to differ materially from those expressed in the Company’s forward-looking information and financial outlook include: the inherent risks involved in the exploration and development of mineral properties and in the mining industry in general; the risk that the Company may not be able to arrange the necessary financing to develop, construct and operate the NICO Project and the SMPP; uncertainties with respect to the timing of, or the ability to repurchase the Arctos coal deposits; uncertainties with respect to the receipt or timing of required permits for the development of the NICO Project, the SMPP and the Arctos Anthracite Project; the possibility of delays in the commencement of production from the NICO Project; the risk that the operating and/or capital costs for any of the Company’s projects may be materially higher than anticipated; the risk of decreases in the market prices of the metals to be produced by the Company’s projects; loss of key personnel; discrepancies between actual and estimated production; discrepancies between actual and estimated mineral resources or between actual and estimated metallurgical recoveries; uncertainties associated with estimating mineral resources and even if such resources prove accurate the risk that such resources may not be converted into mineral reserves, once economic conditions are applied; labour shortages; mining accidents; the cost and timing of expansion activities; changes in applicable laws or regulations; competition for, among other things, capital and skilled personnel; unforeseen geological, technical, drilling and processing problems; compliance with and liabilities under environmental laws and regulations; changes to the Company’s current business strategies and objectives; and other factors, many of which are beyond the Company’s control. In addition, the risk factors described or referred to in the Company’s Annual Information Form for the year ended December 31, 2014, which is available on the SEDAR website under the heading Corporate Profiles, should be reviewed in conjunction with the information contained in this presentation.
- The financial outlook and forward-looking information contained herein, speak only as of the date of this presentation. Except as required by law, the Company and its subsidiaries do not intend, and do not assume any obligation, to update the financial outlook and forward-looking information contained herein.
- This presentation does not constitute an offer to sell or a solicitation of an offer to buy nor shall there be any sale of any of the securities in any jurisdiction in which such offer, solicitation or sale would be unlawful. The Company’s securities have not been and will not be registered under the United States Securities Act of 1933, as amended (the “U.S. Securities Act”), or the securities laws of any state of the United States and will not be offered or sold within the United States or to or for the account or benefit of a U.S. Person or a person in the United States (as such terms are defined in Regulation S under the U.S. Securities Act) unless registered under the U.S. Securities Act and applicable state securities laws or pursuant to an exemption from such registration requirements.

Technical Information

- The scientific and technical information with respect to the NICO Project contained in this presentation is based on the technical report dated May 5, 2014 prepared by Micon International entitled “Technical Report on the Feasibility Study for the Nico Gold-Cobalt-Bismuth-Copper Project, Northwest Territories, Canada” (the “**Micon Technical Report**”) prepared by Harry Burgess, P.Eng., Richard M. Gowans, P.Eng., B. Terrence Hennessey, P.Geo., Christopher R. Lattanzi, P.Eng. and Eugene Puritch, P.Eng., the qualified persons for the purposes of NI 43-101, a copy of which is available for review on SEDAR at www.sedar.com under the Company’s profile.
- Except as other wise set forth herein, the scientific and technical information with respect to the Arctos Anthracite Project contained in this presentation is based on the technical report dated November 28, 2012 prepared by Golder Associates entitled “Technical Report on the 2012 update of the Arctos Anthracite Project Mine Feasibility Study” prepared by Edward H. Minnes, P.E., the qualified person for purposes of NI 43-101, a copy of which is available for review on SEDAR at www.sedar.com under the Company’s profile.
- Mineral resources referred to herein are not mineral reserves and do not have demonstrated economic viability. There is no certainty that all or any part of the mineral resources estimated will be converted into mineral reserves. The mineral resource estimates include inferred mineral resources that are normally considered too speculative geologically to have economic considerations applied to them that would enable them to be categorized as mineral reserves. There is also no certainty that inferred mineral resources will be converted to measured and indicated categories through further drilling, or into mineral reserves, once economic considerations are applied. Mineral resource tonnage and contained metal as disclosed herein have been rounded to reflect the accuracy of the estimate, and numbers may not add due to rounding.
- The disclosure of scientific and technical information contained in this presentation has been approved by Robin Goad, M.Sc., P.Geo., President and Chief Executive Officer of Fortune Minerals Limited, who is a “Qualified Person” under NI 43-101

Ownership

Directors, Officers & Insiders 28%

Fortune Restructured

- Arctos Anthracite Project
 - Arctos Anthracite Joint Venture (Fortune 50% / POSCO 50%) sold Arctos coal licenses to BC Rail for \$18.3 million
 - Fortune eliminated \$16 million joint venture obligation to POSCO by reducing its interest in JV to 50% & pro rata sharing of BC Rail proceeds
 - Fortune & POSCO retain 10-year option to repurchase Arctos coal licenses from BC Rail for \$18.3 million
- Debt restructuring
 - Shares of Revenue Silver Mine subsidiary transferred to creditor
 - Converted US\$55 to US\$85 million of debt to C\$8.75 unsecured debenture & warrants
 - Canadian assets intact & unencumbered

Building the Next Diversified Producer

- Headquartered in London, Ontario, Canada
- Operating in mining friendly jurisdictions
- Strong management team with proven records

Assets

- NICO Gold-Cobalt-Bismuth-Copper Project, Northwest Territories (NT) & Saskatchewan (SK)
 - Late stage vertically integrated development asset with mine & concentrator planned in NT & refinery in SK
 - Pursuing off-take agreements & Project Financing for construction
- Sue-Dianne Copper-Silver-Gold Deposit, NT
 - Potential future incremental mill feed for NICO
- Arctos Anthracite deposit, British Columbia (BC)
 - Sold to BC Rail with 10-year re-purchase option

NICO Project, NT & SK

- Vertically integrated project to recover gold, cobalt & bismuth (12% of global reserves) co-products with by-product copper
 - Mine & concentrator in NT
 - Saskatchewan Metals Processing Plant (SMPP) – Refinery to process concentrates from mine to high value metals & chemicals
- Bulk flotation concentrate (<4% of original ore) contains the economic metals for cost effective transportation to SMPP & low cost refining
- C\$ 115 million already invested, including test mining & pilot plant processing to reduce risks
- 2014 updated positive Feasibility Study
- EA, Land Use Permit & Class A Water License approvals received in NT & EA approval in SK
- Pursuing off-take agreements & Project Financing for construction

NICO is positioned to become a reliable, vertically integrated North American source of battery grade cobalt in a market that has rising demand, supply uncertainty & a desire for supply chain transparency

NICO Products

- Proven flow sheet to produce high value metal & chemical products
 - **Gold:** Average annual production of 41,360 ozs in doré bars
 - **Cobalt:** Average annual production of 1,615 tonnes in cobalt sulphate heptahydrate (~20.9% Co)
 - **Bismuth:** Average annual production of 1,750 tonnes in ingots & needles (>99.995% Bi) & Oxide (89.7% Bi)
 - **Copper:** Average annual production of 265 tonnes in a metal cement (~90% Cu)
- Opportunities:
 - Product flexibility to meet market needs & diversify revenue stream
 - Potential for custom processing of ores or concentrates from other mines
 - Diversify business into battery & metal recycling

Gold

Cobalt Sulphate

Copper Cement

Bismuth Ingot

Bismuth Needles

Bismuth Oxide

Metal Price Index at 10-Year low – Recovery started in 2016

Commodity Metals Price Index Monthly Price - Index Number

Range

Mar-2006 - Mar-2016: -14.220 (-10.92 %)

Description: Commodity Metals Price Index, 2005 = 100, includes Copper, Aluminum, Iron Ore, Tin, Nickel, Zinc, Lead, and Uranium Price Indices

Unit: Index Number

Cobalt: Growing Demand, Supply Uncertainty & Legislated Responsible Sourcing

- Wide chemical & metallurgical markets
- ~110,000 tpa market growing at ~6% CAGR
- Chemicals account for ~65% of worldwide cobalt demand & driving future consumption
- Biggest market is in rechargeable batteries (49%) used to power portable electronics, electric vehicles & stationary storage cells
- Stormcrow forecasts **cobalt battery demand alone** will be 89,316 t in 2020 & 120,600 t in 2025, up from 53,043 t in 2015
- Supply concerns with 65% of mine production in politically unstable Congo & 52% of refinery production in China
- Rise of responsible sourcing & supply chain transparency (US Dodd Frank & EU conflict minerals legislation, Electronic Industry Citizenship Coalition (EICC))
- CRU anticipates growing cobalt deficit starting in 2016

Source: Darton Commodities

Cobalt & Rechargeable Batteries

- Cobalt chemicals are used in lithium-ion & nickel metal hydride batteries – primarily in the cathodes
- Growth in use of cell phones, power tools, toys, computers & electric & hybrid-electric cars from 1990s to 2015 has driven the demand for cobalt in batteries from 1% to 49% of the total market
- Major lithium-ion battery producers confirm cobalt-based chemistries will remain as the industry standard for the foreseeable future

LITHIUM-ION BATTERIES: Advanced, Higher Energy Density, Lighter

Lithium Cobalt Oxide (LCO)

60%

COBALT BY WEIGHT

Ideal for cell phones, laptops, cameras.

Lithium Nickel Manganese Cobalt Oxide (NMC)

10-20%

COBALT BY WEIGHT

Use in power tools, e-bikes, EV, medical, hobbyist.

Lithium Nickel Cobalt Aluminum Oxide (NCA)

9%

COBALT BY WEIGHT

Gaining importance in electric power train & grid storage

BY THE YEAR **2020** Cobalt use in battery applications alone could be greater than the entire world market for refined cobalt in 2015!

Timeline: Battery commercialisation

| 1969-1990 | Late-1990s | 2006-2016 | 2017 onwards |
|----------------------|--|--|--|
| I | II | III | IV |
| Watches Cars | Cell phones Power tools Personal music | Smartphones Tablets Laptops Hybrid cars | Full Electric vehicles Utility/Stationary |
| Mercury Lead acid | NiMH/Lithium-ion | Lithium-ion / NiMH | Lithium-ion |
| 1969-1990 | Late-1990s | 2006-2016 | 2017 onwards |

Electric vehicles & stationary power storage to drive phase IV of battery commercialization starting in 2017

Cobalt: Battery Use Drives Demand

“There will need to be many Gigafactories in the future...”

Elon Musk – June 2015 Benchmark Minerals

- Battery sector cobalt demand grew by ~12% in 2015
- By 2020 Tesla’s first Gigafactory in Nevada anticipated to produce more lithium-ion batteries annually than the world did in 2013
- Market estimates 5,000 – 10,000 t annual cobalt demand from Tesla’s first Giga factory (NICO to produce 1615 tpa)
- Vehicle electrification going mainstream- Tesla validates EV interest with ~400,000 preorders for Model 3
- Battery Megafactories announced: Tesla (35 GWh), LG Chem (7 GWh), FoxConn (15 GWh), BYD (20 GWh), Boston Power (10 GWh)

“At General Motors, we see the future of the automobile and vehicle ownership being far different than it is today. Vehicles will be electric, connected, self-driving and shared.” Stephen Carlisle, President GM Canada - April 2016

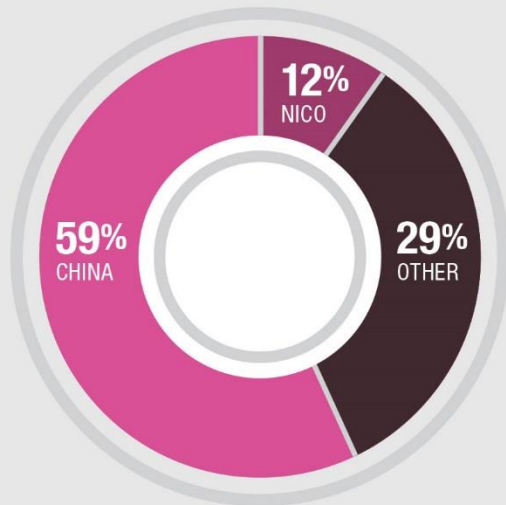

Photo credit: Tesla Motors

Bismuth: Limited Supply

- World market ~20,000 tonnes per year
- China principal source of bismuth accounting for 60% of world reserves & 80% of world production
- China closed 20% of its production due to environmental & mine safety issues & has policies to restrict exports
- NICO is World's largest deposit - 12% of global reserves
- NICO will be a reliable North American vertically integrated producer

WORLD BISMUTH RESERVES

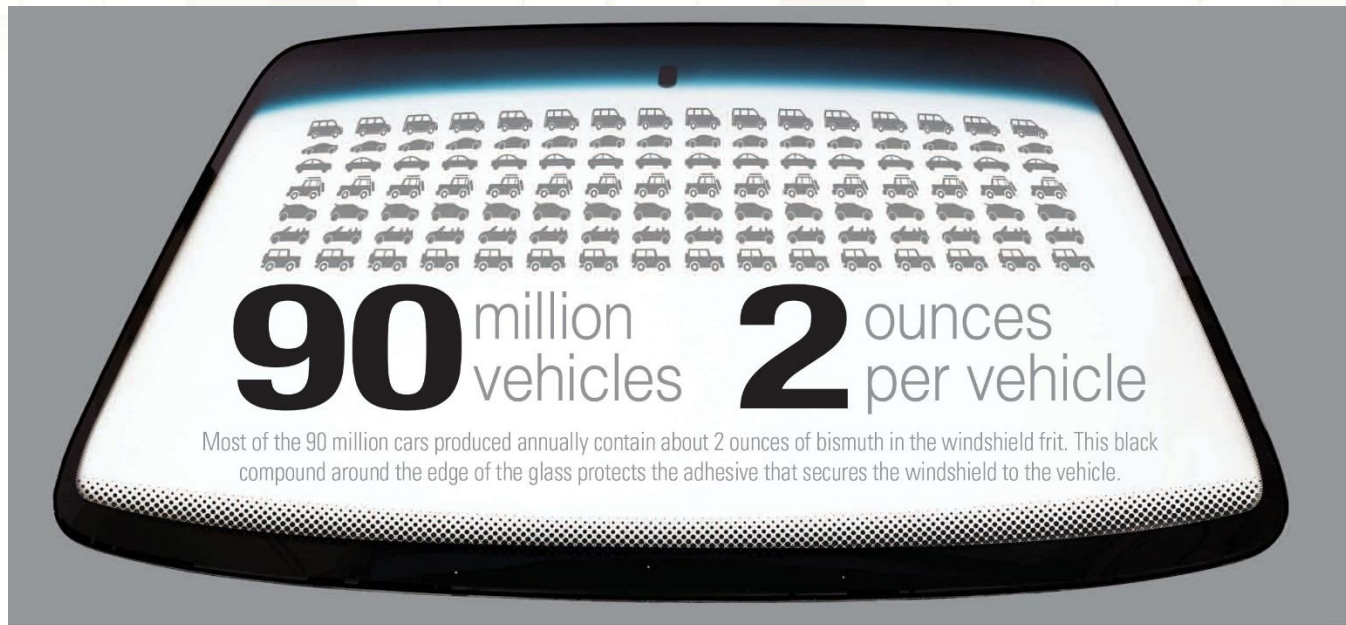

WORLD BISMUTH MINE PRODUCTION

Bismuth has a crustal abundance similar to that of silver and its supply is concentrated in China, contributing to bismuth being identified by the British Geological Survey as an economically important metal at very high risk to supply disruptions.

Bismuth: Automotive & Health Use

Health

- Pepto-Bismol® & similar stomach settling medicines
- Cosmetics
- Lead replacement in potable water sources & electronics
- Catheters & bandages

Other

- Castings, fire retardants, sprinkler systems, lubricating greases

Automotive

- Rust protection undercoating
- Paint pigments & pearlescent coating
- Brake linings & clutch pads

Electronics

- Electronic solders
- Free-machining steel lubricating greases

Bismuth: Environmentally Friendly

- Traditional uses in low temperature & fusible alloys, medicines, cosmetics, chemicals, fire retardants & sprinkler systems
- New markets focus on non-toxic, environmentally safe replacement for lead in plumbing & electronic solders, brass, steel & aluminum, ceramic glazes, hot-dip galvanizing, pigments, automotive anti-corrosion coatings, windshield frits & pearlescent paints:
 - Global framework to eliminate lead expected to drive increased bismuth consumption
 - European REACH & RoHS legislation to eliminate lead in electronics
 - Lead banned in US from wetted surfaces of potable drinking water sources (pipes, fixtures & solders)

Growing Number of Applications

Demand for bismuth is increasing in a variety of new products as a result of legislation, growing environmental awareness, and health & safety concerns of manufacturers

- U.S. Reduction of Lead in Drinking Water Act
- EU REACH, Restriction of Hazardous Substances Directives & Waste Electrical and Electronic Equipment Directive

Gold: Countercyclical Hedge

- Highly liquid gold co-product is also a countercyclical hedge to cobalt & bismuth price volatility
- Asian physical demand rapidly expanding
- Central Banks continue to buy
- Geopolitical stress & global debt crisis

Mine Location & Infrastructure

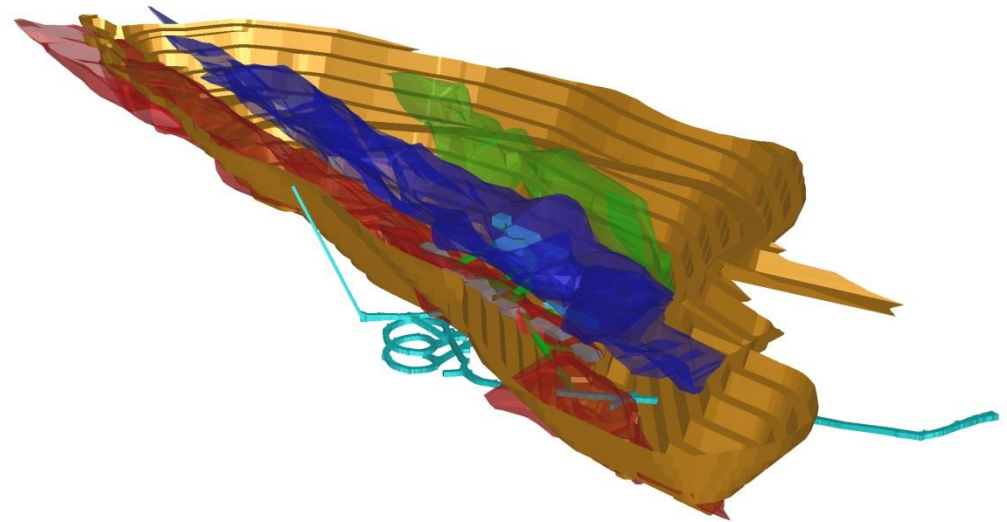

- 5,140 Ha lease in southern NT
- Winter ice road access
- All-season public highway to community of Whati (94 km)
 - Government of NT initiative with support of Tlicho Government
 - Permitting underway
- Fortune has EA approval to build spur road from Whati to mine (50 km)
- 450 km truck haul from mine to railway at Hay River for transport of concentrates to SMPP
- 160 km from City of Yellowknife
- 22 km from Snare Hydro & lower cost hydro power supply
- Settled land claim with Tlicho Government

Known Geology & Risk Mitigation

The NICO mineral reserves are based on 327 drill holes, test mining & surface trenches

- Iron Oxide Copper Gold (“IOCG”) class (Olympic Dam-type) deposit
- Ore hosted in 3 lenses of ironstone breccia up to 1.3 km in length, 550 m in width, & 70 m in thickness
- Underground test mining has verified geometry & grade of deposit
- Pilot plants completed at SGS Lakefield to verify process designs, flow sheet & product quality
- Engineering & Feasibility Studies completed

Green = Upper Ore Zone, Blue = Middle Ore Zone, Red = Lower Ore Zone
Brown = Open Pit, Cyan = Underground Development and Stopes

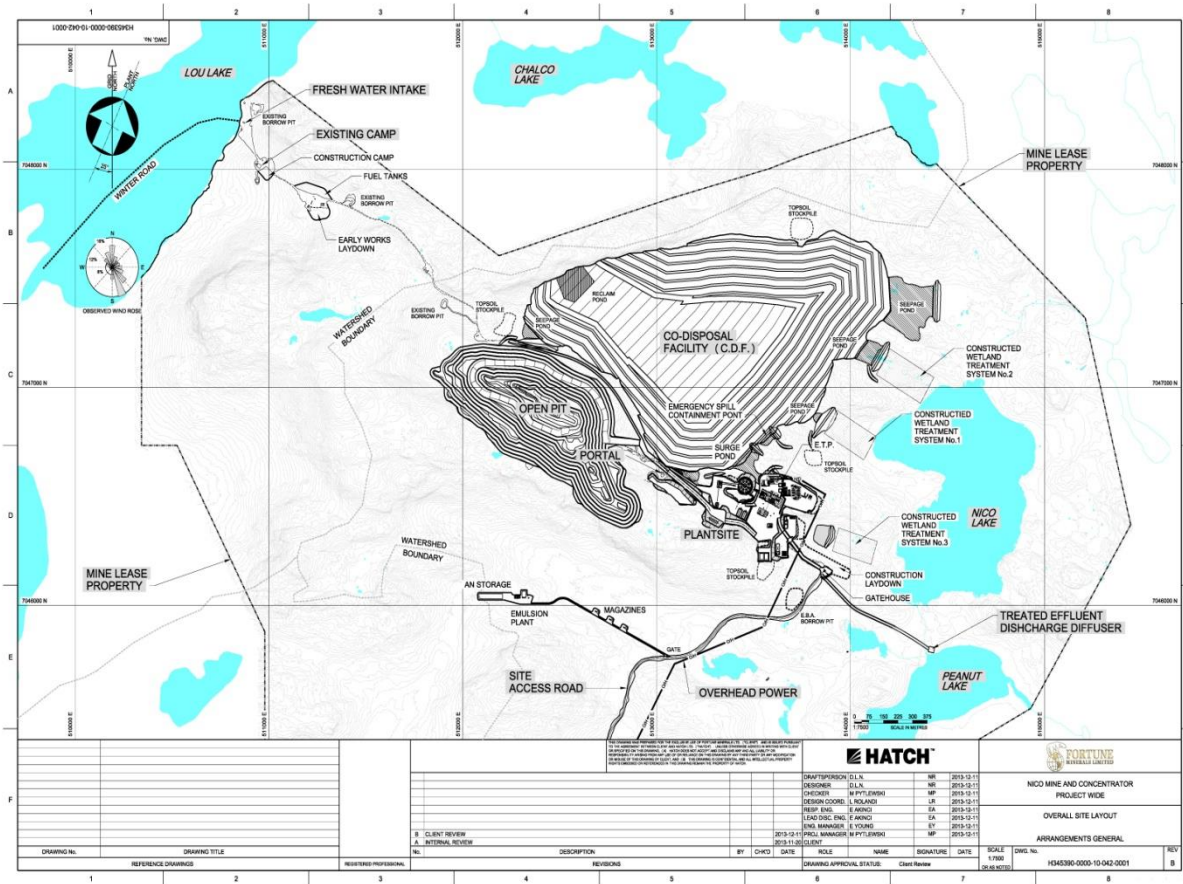

NICO Mineral Reserves

Supports 21-Year Mine Life at 4650 tpd

| Underground Mineral Reserves | Tonnes (Thousands) | Au (g/t) | Co (%) | Bi (%) | Cu (%) |
|------------------------------|-----------------------|-------------|-----------|-----------|-----------|
| Proven | 282 | 4.93 | 0.14 | 0.27 | 0.03 |
| Probable | 295 | 5.00 | 0.07 | 0.07 | 0.01 |
| Total | 577 | 4.96 | 0.10 | 0.17 | 0.02 |
| Open Pit Mineral Reserves | Tonnes (Thousands) | Au (g/t) | Co (%) | Bi (%) | Cu (%) |
| Proven | 20,453 | 0.92 | 0.11 | 0.15 | 0.04 |
| Probable | 12,047 | 1.03 | 0.11 | 0.13 | 0.04 |
| Total | 32,500 | 0.96 | 0.11 | 0.14 | 0.04 |
| Combined Mineral Reserves | Tonnes (Thousands) | Au (g/t) | Co (%) | Bi (%) | Cu (%) |
| Proven | 20,735 | 0.97 | 0.11 | 0.15 | 0.04 |
| Probable | 12,342 | 1.13 | 0.11 | 0.13 | 0.04 |
| Total | 33,077 | 1.03 | 0.11 | 0.14 | 0.04 |
| Metal Contained | | 1.11 Moz | 82.3 Mlb | 102.1 Mlb | 27.2 Mlb |

Sums of the combined reserves may not exactly equal sums of the underground and open pit reserves due to rounding error.

Mine & Concentrator in NT

- 21-yr mine life at 4,650 tpd
 - Additional 5.5 Mt low grade to be stockpiled for future processing
- Primarily open pit mining
- Underground mining in first 2 years
 - Early access to high grade improves economics
- Co-mingled waste rock & mill tailings
- Plant site
 - Mill & flotation concentrator
 - Camp & ancillary buildings
- Access road
- 180 employees (270 during underground operations)

SMPP Refinery in Sk

- Saskatchewan Metals Processing Plant (SMPP) - Hydrometallurgical refinery to be built on land owned by Fortune 27 km north of Saskatoon near the Town of Langham
- High concentration ratio of ores during flotation reduces mass to <4% in bulk concentrate for efficient transport by truck & rail to SMPP – Transportation Cost neutral because required reagents sourced in southern Canada
- SMPP will process NICO concentrate to high value metals & chemicals in a low cost jurisdiction
 - Low cost power (~5.7 cents kWh)
 - Skilled labour pool
 - Proximity to reagents & services
 - 5-year tax holiday

2014 Micon Feasibility Study

Positive Feasibility Study with strong economics

- Vertically integrated project consisting of open pit & underground mine & mill in NT & refinery in SK
- Low capital costs of C\$ 589 million
- Negative cash cost for products net of by-product credits
- Significant detailed engineering reducing risk
- Metal recoveries verified from pilot plants;
 - Gold recovery ranges from 56 to 85%, with an average ~73.7%
 - Cobalt recovery ~84%
 - Bismuth recovery ~72%
 - Copper recovery ~41%

Feasibility Study Highlights – Base Case

| | |
|---|--|
| Mine type | Open pit with underground in 2 nd year |
| Mining method | Open pit: conventional truck & loader Underground: blasthole open stoping |
| Strip Ratio | Waste to ore 3.0 : 1 |
| Processing rate | 4,650 tonnes of ore/day |
| Mine life | 20 years (potential for additional 3.2) |
| Processing | Processed to high value metal products |
| Levered pre-tax NPV (7%) | C\$ 254 million |
| Levered pre-tax IRR | 15.6% |
| Capital costs | C\$ 589 million |
| LOM average revenue/yr | C\$ 196 million |
| LOM average operating cost/yr | C\$ 98 million |
| Cobalt operating cost (net of credits) | Negative US\$ 5.03/lb at Base Case |

Project Validation

- **CAPEX/OPEX Validation:** Micon (Feasibility Report), Procon/CAMCE & Hatch (NICO & SMPP CAPEX/OPEX Reports), EBA (NICO Project Access Road (NPAR Design))
- **Production Validation:** Micon (Feasibility Report), Hatch (Detailed Engineering), Procon (Underground Production), P&E (Reserves, Open Pit & Underground Production), Golder Associates (Waste Rock & Tailings Disposal, Environmental & Geotechnical Technical Reports), SGS (Metallurgical Tests, Pilot Plant, Flow Sheet & Product Samples), Jacobs (FEED Study), EBA (NPAR Design), DMA (Bismuth)
- **Market Validation:** CRU, Darton, Skybeco, Falso & Ian (Formerly MCP Metal Specialists)

Shovel Ready

Permitting substantially complete

- Environmental Assessments completed for mine & SMPP
- Land Use Permit & Class A Water License approvals received

Advanced relationships with NT & Tlicho Governments

- 20 years of active community engagement with Tlicho
- Co-operative Relationship Agreement with Tlicho (aboriginal) Government (settled land claim)
- Infrastructure, Socio-Economic & Participation Agreements near completion with NT Government

Project Financing & Development

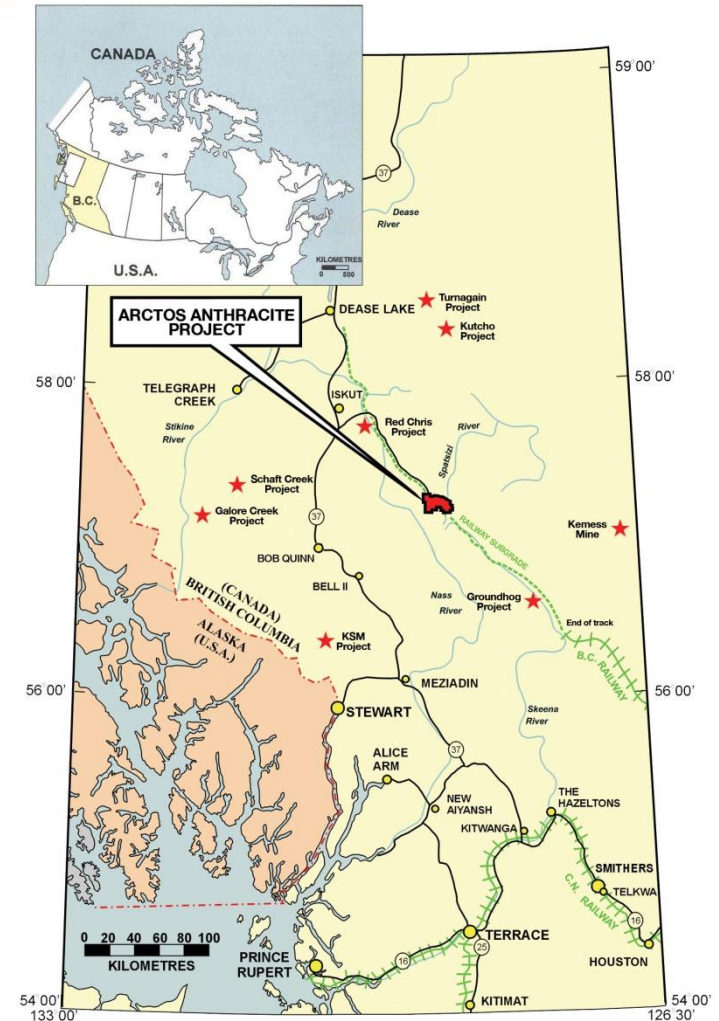

- Project financing & development options targeting project level joint venture
- Project Financing with strategic partner & banks
 - Partner equity investment
 - Commitment to arrange debt financing for construction
 - Pursuing off-take discussions with metal / chemical users

Arctos Anthracite Project

Summary Highlights

- One of world's premier metallurgical coal development projects
- Joint Venture partnership with South Korean steel producer POSCO (50%)
- C\$110 million of work completed including test mining, pilot plant processing & trial cargos
- Positive Feasibility Study with robust economics
- 125 Mt of run of mine coal reserves will support 25+ years of production (small fraction of total resource)
- Railway transport of coal to Ridley Terminal in Prince Rupert
- Premium lump coal, ultra-low volatile PCI & sinter products
- Sold to BC Government with a 10-year repurchase option

Company Strategy

- **NICO & SMPP Project**

- Complete detailed engineering & secure remaining permits for construction readiness
- Complete re-zoning of SMPP lands
- Complete Participation & Socio-economic agreements with NT & Tlicho Governments
- Secure project financing

- **Sue-Dianne Project**

- Satellite deposit ~25km north of NICO
- Potential future source of incremental mill feed

- **Arctos Project**

- World Class deposit with ~\$110 million of work carried out
- 50% joint venture with South Korean steel company POSCO
- Sold to BC Rail with 10-year repurchase option if coal prices & development environment improves

- **Project financing & development**

- Identify strategic partners for project financing
- Equity investment in projects
