

PRINCETON

About Princeton: 2020 data

Princeton is a coal mine in Princeton, West Virginia, that specializes in surface and underground mining of coal to produce coke and pulverized coal injection (PCI). The majority of the production is consumed at Cliffs facilities. It is a 12,000-square-foot facility with an annual production capacity of five million tons. Princeton primarily serves coke facilities, steel mills and utility markets.

Facility facts

Plant leadership	Michael Day, CEO
Employees	544
Acreage	120,000
Building space	12,000 sq. ft.
Mining capacity	Approximately 5 million tons
Site founded	1990
Products	Coking coal, pulverized coal injection (PCI)
Markets served	Primarily Cliffs furnaces

About Cleveland-Cliffs

Cleveland-Cliffs is the largest flat-rolled steel producer in North America. Founded in 1847 as a mine operator, Cliffs also is the largest supplier of iron ore pellets in North America. In 2020, Cliffs acquired two major steelmakers, AK Steel and ArcelorMittal USA, vertically integrating its legacy iron ore business with quality-focused steel production and emphasis on the automotive end market. Cliffs' fully integrated portfolio includes custom-made pellets and Hot Briquetted Iron (HBI); flat-rolled carbon steel, stainless, electrical, plate, tin and long steel products; as well as carbon and stainless steel tubing, hot and cold stamping and tooling. Headquartered in Cleveland, Ohio, Cliffs employs approximately 25,000 people across its mining, steel and downstream manufacturing operations in the United States and Canada.
