The accompanying notes are an integral part of the financial statements

1. Nature of operations

Aberdeen International Inc. ("Aberdeen", or the "Company") operates as a publicly traded global investment and merchant banking company focused on small capitalization companies in the resource sector. Aberdeen seeks to acquire equity participation in pre-IPO and early stage public resource companies with undeveloped or undervalued high-quality resources. Aberdeen focuses on companies that: (i) are in need of managerial, technical and financial resources to realize their full potential; (ii) are undervalued in capital markets; or, (iii) operate in jurisdictions with low to moderate local political risk. Aberdeen has committed to pursue a strategy that would transition the Company from an investment holding company to an asset management business over the coming years. The Company is a publicly listed company incorporated in the Province of Ontario. The Company's shares are listed on the Toronto Stock Exchange ("TSX"). The Company's head office is located at 65 Queen Street West, Suite 815, Toronto, Ontario M5H 2M5.

2. Significant accounting policies

Statement of compliance

These condensed interim financial statements are unaudited and prepared on a condensed basis in accordance with the International Accounting Standards ("IAS") 34, *Interim Financial Reporting* issued by the International Accounting Standard Board ("IASB"). These condensed interim financial statements have been prepared in accordance with the accounting policies described in Note 2 of the Company's annual financial statements as at and for the year ended January 31, 2013 except as disclosed below. Accordingly, these condensed interim statements for the three and nine month periods ended October 31, 2013 and 2012 should be read together with the annual financial statements as at and for the year ended January 31, 2013.

These condensed interim financial statements of the Company were approved by the Board of Directors on December 13, 2013.

Basis of preparation

The financial statements have been prepared using the historical cost convention except for certain financial instruments which have been measured at fair value. All monetary references expressed in these notes are references to Canadian dollar amounts ("$"). In addition, these financial statements have been prepared using the accrual basis of accounting except for cash flow information.

The preparation of financial statements in accordance with IAS 34 requires the use of certain critical accounting estimates. It also requires management to exercise judgment in applying the Company's accounting policies.

Certain comparative amounts have been reclassified to conform to the current year's presentation.

New accounting policies

Certain new standards, interpretations, amendments and improvements to existing standards were issued by the IASB or IFRIC that are mandatory for accounting periods effective beginning February 1, 2013. Updates that are not applicable or are not consequential to the Company have been excluded thereof.

IFRS 7 – Financial Instruments: Disclosures ("IFRS 7") was amended by the IASB in December 2011 to amend the disclosure requirements in IFRS 7 to require information about all recognized financial instruments that are offset in accordance with paragraph 42 of IAS 32 Financial Instruments: Presentation. The amendments also require disclosure of information about recognized financial instruments subject to enforceable master netting arrangements and similar agreements even if they are not set off under IAS 32. The Company has determined that the adoption of IFRS 7 did not result in any material change to the condensed interim financial statements.

IFRS 13 – Fair Value Measurement ("IFRS 13") was issued by the IASB in May 2011. IFRS 13 is a new standard which provides a precise definition of fair value and a single source of fair value measurement considerations for use across IFRS. IFRS 13 clarifies that fair value is the price that would be received to sell an asset, or paid to transfer a liability in an orderly transaction between market participants at the measurement date under current market conditions. It also establishes disclosures about fair value measurement. The Company has determined that the adoption of IFRS 13 did not result in any material change to the condensed interim financial statements.

2. Significant accounting policies (continued)

New accounting policies (continued)

IAS 1 – Presentation of Financial Statements ("IAS 1") was amended by the IASB in June 2011. As a result of the amendment, items in other comprehensive income will be required to be presented in two categories: items that will be reclassified into profit or loss and those that will not be reclassified. The flexibility to present a statement of comprehensive income as one statement or two separate statements of profit and loss and other comprehensive income remains unchanged. The Company has determined that that the adoption of IAS 1 did not result in any material change to the condensed interim financial statements.

IAS 19 – Employee Benefits ("IAS 19") was amended by the IASB in June 2011 to include revised requirements for pension and other post-retirement benefits, termination benefits and other changes. IAS 19 requires the recognition of all changes in the net defined benefit liability (asset) when they occur such that service costs and net interest is recognized in profit or loss while re-measurements are recorded in other comprehensive income. The Company has determined that the adoption of IAS 19 did not result in any material change to the condensed interim financial statements.

Deferred share unit ("DSU") incentive plan

The initial fair value of the DSU compensation liability is calculated as of the grant date. Subsequently, the Company's DSU compensation liability is accounted for based on the number of units outstanding and the quoted market value of the Company's common shares at the financial position date. The Company recognizes the compensation cost in the condensed interim statements of comprehensive loss on the date of grant and makes adjustment for changes in fair value until the end of the performance date.

Restricted share unit ("RSU") incentive plan

The Company purchases shares of the Company from the open market to distribute to management as compensation. These shares are restricted and reserved in trust for issuances. The restricted share units vest in three tranches, 1/3 vesting on the date of grant, 1/3 vesting six months from the date of grant and the remaining vesting twelve months from the date of grant. The restricted share units are measured at the fair value at the grant date. The Company recognizes the compensation cost in the condensed interim statements of comprehensive loss over the appropriate vesting periods using the graded vesting method.

Future accounting policies

Certain pronouncements were issued by the IASB or the IFRIC that are mandatory for accounting periods on or after February 1, 2014 or later periods. Many are not applicable or do not have a significant impact to the Company and have been excluded. The following have not yet been adopted and are being evaluated to determine their impact on the Company.

IAS 32 – Financial Instruments: Presentation ("IAS 32") was amended by the IASB in December 2011 to clarify certain aspects of the requirements on offsetting. The amendments focus on the criterion that an entity currently has a legally enforceable right to set off the recognized amounts and the criterion that an entity intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously. The amendments to IAS 32 are effective for annual periods beginning on or after January 1, 2014. Earlier adoption is permitted.

3. Investments at fair value through profit and loss

At October 31, 2013, the Company's investment portfolio consisted of 24 publicly-traded investments and 15 privately-held investments for a total fair value of $38,052,236.

At January 31, 2013, the Company's investment portfolio consisted of 34 publicly-traded investments and 14 privately-held investments for a total fair value of $53,332,006.

Dividends

The Company has suspended its dividend policy in fiscal 2014. During the nine months ended October 31, 2013, the Company did not declare or pay any dividends (October 31, 2012 - $1,734,088).

Normal course issuer bid ("NCIB")

On February 23, 2012, the Company instituted a NCIB, in respect of its common shares. Pursuant to the terms of the NCIB, and in accordance with the policies of the TSX, during the period commencing February 27, 2012 and ending on February 26, 2013, the Company could purchase up to 7,474,230 representing 10% of the common shares in the public float as at February 22, 2012. Daily purchases were limited to 30,714 common shares other than block purchase exceptions. Purchases were made in open market transactions through the facilities of the TSX and on other published markets at market prices prevailing at the time of acquisition. All common shares purchased under the NCIB were cancelled. During the year ended January 31, 2013, the Company purchased and cancelled 1,005,500 common shares at an average price of $0.41 per share.

On May 28, 2013, the Company announced its intention to make a NCIB, subject to TSX approval, to buy back its common shares through the facilities of the TSX. Any purchases made pursuant to the NCIB will be made in accordance with the rules of the TSX. The maximum number of common shares that may be purchased for cancellation pursuant to the NCIB is that number of common shares that represents 10% of the common shares in the public float. Based on the 70,739,102 common shares in the public float as at May 27, 2013, the maximum number of shares to be purchased and cancelled would be 7,073,910. Daily purchases will be limited to 50,036 common shares other than block purchase exceptions. Purchases under the NCIB are permitted to commence on May 30, 2013 and will terminate on May 29, 2014 or the date upon which the maximum number of common shares have been purchased by Aberdeen pursuant to the NCIB. Aberdeen intends that any shares acquired pursuant to the NCIB will be cancelled.

During the nine months ended October 31, 2013, the Company purchased and cancelled 725,180 shares (2012 – 727,800) at an average price of $0.17 per share (2012 – $0.44).

Employee share option plan

The Company has adopted a stock option plan (the "Plan"). Pursuant to the Plan, the Company may grant stock options to acquire up to 10% of the number of issued and outstanding common shares of the Company. The Plan provides that the Company cannot grant stock options to any one person representing more than 5% of the outstanding common shares of the Company. Directors, officers, employees and certain consultants are eligible to receive stock options under the Plan in accordance with the terms and conditions determined by the Board, upon the recommendations of the Compensation Committee. Vesting terms will be determined at the discretion of the Board. The Board also determines the term of stock options granted under the Plan, provided that no stock option shall be outstanding for a period greater than five years.

The Company did not grant any options during the nine months ended October 31, 2013. During the nine months ended October 31, 2012, 2,500,000 options were granted to certain directors, officers and employees of the Company with a weighted-average grant date fair value of $0.19 per option. These options vested immediately. Share based compensation expenses of $397,176 relating to these options and others that vested during the nine months ended October 31, 2012 was recorded in operating, general and administration fees. The fair value of these options was estimated on the date of grant using the Black-Scholes option pricing model. Where relevant, the expected life used in the model has been adjusted based on management's best estimate for the effectors of non-transferability, exercise restriction, expected forfeiture rate, and behavioral considerations. Expected volatility is based on the historical share price volatility over the expected life of the option. The expected life of the options was calculated based on the history of options exercised.

The weighted average exercise price of stock options outstanding and exercisable as at October 31, 2013 was $0.41 (January 31, 2013 - $0.41). The weighted average remaining contractual life of options outstanding and exercisable as at October 31, 2013 was 2.03 years (January 31, 2013 – 2.65 years).

On April 24, 2013, the Company approved the adoption of a RSU and a DSU plan. Upon adoption of the new plans, the Company is authorized to grant and issue an aggregate of 8,600,000 RSUs to directors and officers of the Company. Each RSU shall entitle the director or officer to receive one common share of the Company upon completion of certain terms. The common shares are to be purchased from the open market and held in trust for subsequent conversion of RSUs. The Company has granted and issued an aggregate of 800,000 DSUs to the Company's independent directors. The DSUs are deferred and will be issued in the form of cash in an amount that represents the value of one common share of the Company for each DSU held on the date upon which the director ceases to be director of the Company.

During the nine months ended October 31, 2013, a director received $34,000 cash in relation to 200,000 DSU vested at $0.17 per share upon his resignation on July 18, 2013. The remaining balance of DSU valued at $96,000 was recorded under operating, general and administration expenses and included in accounts payable and accrued liabilities as at October 31, 2013.

During the three months ended October 31, 2013, the Company authorized to grant an additional 500,000 RSU to a director of the Company.

Restricted share unit incentive plan

During the nine months ended October 31, 2013, 8,600,000 common shares of the Company were purchased from the open market for an aggregate cost of $2,884,145. These shares are restricted and reserved in trust for future issuances.

On July 1, 2013, the Company granted and issued 2,866,667 restricted shares units to certain directors and officers of the Company. The restricted shares units vest in three tranches, 1/3 on vesting on the date of grant, 1/3 vesting nine months from the date of grant and the remaining vesting twelve months from the date of grant. The grant date fair value of these restricted shares units was determined to be $1,290,000. During the nine months ended October 31, 2013, compensation cost of $859,500 was recognized in the condensed interim statements of comprehensive loss using the graded vesting method and a $531,382 loss on the issuance was charged to retained earnings.

During the three months ended October 31, 2013, the Company purchased an additional 500,000 common shares from the open market for an aggregate cost of $84,264. These shares are restricted and reserved in trust for future issuances.

Aberdeen's operations involve the purchase and sale of securities and in addition, the Company has loans receivable outstanding. Accordingly, the majority of the Company's assets are currently comprised of financial instruments which can expose it to several risks, including market, liquidity, credit and currency risks. There have been no significant changes in the risks, objectives, policies and procedures from the previous year. A discussion of the Company's use of financial instruments and their associated risks is provided below:

(Expressed in Canadian dollars unless otherwise noted)

11. Financial instruments (continued)

Market risk

Market risk is the risk that the fair value of, or future cash flows from, the Company's financial instruments will significantly fluctuate because of changes in market prices. The Company is exposed to market risk in trading its investments and unfavourable market conditions could result in dispositions of investments at less than favorable prices. In addition, most of the Company's investments are in the resource sector. The Company mitigates this risk by attempting to have a portfolio which is not singularly exposed to any one issuer, with exception to the Company having one position as at October 31, 2013, which made up of approximately 22% (January 31, 2013 – 27%) of the total equity portfolio.

For the nine months ended October 31, 2013, a 10% decrease in the closing prices of its portfolio investments would result in an estimated increase in after-tax net loss of $2.8 million, or $0.03 per share (January 31, 2013 - $4 million, or $0.05 per share). This estimated impact on the statement of comprehensive loss includes the estimated value of the non-traded warrants held, as determined using the Black-Scholes option pricing model.

Liquidity risk

Liquidity risk is the risk that the Company will not have sufficient cash resources to meet its financial obligations as they come due. The Company's liquidity and operating results may be adversely affected if the Company's access to the capital markets is hindered, whether as a result of a downturn in stock market conditions generally or related to matters specific to the Company, or if the value of the Company's investments declines, resulting in losses upon disposition. In addition, some of the investments the Company holds are lightly traded public corporations or not publicly traded and may not be easily liquidated. The Company generates cash flow from its interest on loans receivable, and proceeds from the disposition of its investments, in addition to interest income and advisory service fees. Aberdeen believes that it has sufficient marketable securities which are freely tradable and relatively liquid to fund its obligations as they become due under normal operating conditions. All of the Company's liabilities and obligations are due within one year.

The following table shows the Company's source of liquidity by assets as at October 31, 2013 and January 31, 2013.

Credit risk

Credit risk is the risk associated with the inability of a third party to fulfill its payment obligations. The Company is exposed to the risk that third parties that owe it money or securities will not perform their underlying obligations. Security was obtained against specific assets of the counterparty, in case of non-performance. The total carrying value of these financial instruments at October 31, 2013 was $6,199,863 (January 31, 2013 - $18,019,774).

Management has considered the potential impairment of loan and amount receivables. The following summarized provisions made on loan impairment during the periods ended October 31, 2013 and 2012.

Currency risk

Currency risk is the risk that the fair value of, or future cash flows from, the Company's financial instruments will fluctuate because of changes in foreign exchange rates. The Company's operations are exposed to foreign exchange fluctuations, which could have a significant adverse effect on its results of operations from time to time. The Company currently has financial instruments denominated in U.S. dollars, Australian dollars, Norwegian Krone, South African Rand and UK Pound Sterling.

A change in the foreign exchange rate of the Canadian dollar versus another currency may change the value of its financial instruments.

	$ 5,646,312	$ 2,697,140	$ 128,940	$ 222,407	$ 47,468

A 10% increase in the value of the Canadian dollar against all foreign currencies in which the Company held financial instruments as of October 31, 2013 would result in an estimated increase in after-tax net loss of approximately $0.7 million or $0.01 per share (January 31, 2013 – after-tax net loss of approximately $0.6 million or $0.01 per share). The Company does not currently hedge its foreign currency exposure.

Fair value of financial instruments

The Company has determined the carrying values of its financial instruments as follows:

i. The carrying values of cash, amounts receivable, due to broker, and accounts payable and accrual liabilities approximate their fair values due to the short-term nature of these instruments.

ii. Loans receivable, public investments, private investments and preferred shares are carried at amounts in accordance with the Company's accounting policy as set out in Note 2 of the annual financial statements as at and for the year ended January 31, 2013.

iii. Prior to maturity, the outstanding loans receivable are carried at their discounted value. Following their maturity, loans receivable are carried at their estimated realizable value.

Mr. Stan Bharti, a director of the Company, is the Executive Chairman of Forbes & Manhattan, Inc., a corporation that provides administrative and consulting services to the Company, including but not limited to strategic planning and business development. Forbes & Manhattan, Inc. charges a monthly consulting fee of $25,000.

The amounts outstanding on advisory service fees and other fees are unsecured, non-interest bearing, with no fixed terms of repayment. No guarantees have been given or received. No expense has been recognized in the current or prior periods for bad or doubtful debts in respect of the amounts owed by related parties on these fees.

Compensation of key management personnel of the Company

In accordance with IAS 24, key management personnel are those persons having authority and responsibility for planning, directing and controlling the activities of the Company directly or indirectly, including any directors (executive and non-executive) of the Company.

The remuneration of directors and key executives is determined by the remuneration committee having regard to the performance of individuals and market trends.

The remuneration of directors and other members of key management personnel during the three and nine months ended October 31, 2013 and 2012 were as follows:

	Three months ended October 31,		Nine months ended October 31,	
	2013	2012	2013	2012

13. Commitments and contingencies

Management contracts

The Company is party to certain management contracts. These contracts contain minimum commitments of approximately $1,200,000 (January 31, 2013 - $1,600,000) ranging from 30 days to 12 months and additional contingent payments of up to approximately $12,200,000 (January 31, 2013 - $13,300,000) upon the occurrence of a change of control. As a triggering event has not taken place, the contingent payments have not been reflected in these financial statements.

Tax positions

In assessing the probability of realizing income tax assets and the valuation of income tax liabilities, management makes estimates related to expectations of future taxable income, applicable tax planning opportunities, expected timing of reversals of existing temporary differences and the likelihood that tax positions taken will be sustained upon examination by applicable tax authorities. In making its assessments, management gives additional weight to positive and negative evidence that can be objectively verified. Estimates of future taxable income are based on forecasted cash flows from operations and the application of existing tax laws in each jurisdiction. The Company considers relevant tax planning opportunities that are within the Company's control, are feasible and within management's ability to implement. Examination by applicable tax authorities is supported based on individual facts and circumstances of the relevant tax position examined in light of all available evidence. Where applicable tax laws and regulations are either unclear or subject to ongoing varying interpretations, it is reasonably possible that changes in these estimates can occur that materially affect the amounts of income tax assets recognized. Also, future changes in tax laws could limit the Company from realizing the tax benefits from the deferred tax assets. The Company reassesses unrecognized income tax assets at each reporting period.

Strategic advisor

The Company has engaged a strategic advisor to provide the Company with advice regarding potential strategic financing alternatives. The Company will pay the strategic advisor $500,000 with $250,000 paid on May 23, 2013 and $250,000 payable on November 30, 2013. In addition, the Company will pay the strategic advisor a monthly retainer at the end of each month starting December 23, 2013 if the agreement is not terminated at the Company's option. In addition, the Company is committed to paying success fees to the strategic advisor on the occurrence of certain successful events.

14. Subsequent event

Subsequent to October 31, 2013, the Company granted 500,000 RSUs to an executive director of the Company. Of the total RSUs granted, one third vest immediately; one third each of the remaining balance vest on January 1, 2014 and July 1, 2014 respectively.
