Notes to the Condensed Interim Financial Statements (unaudited)

April 30, 2014 and 2013

(Expressed in Canadian dollars unless otherwise noted)

1. Nature of operations

Aberdeen International Inc. ("Aberdeen", or the "Company") operates as a publicly traded global investment and merchant banking company focused on small capitalization companies in the resource sector. Aberdeen seeks to acquire equity participation in pre-IPO and early stage public resource companies with undeveloped or undervalued high-quality resources. Aberdeen focuses on companies that: (i) are in need of managerial, technical and financial resources to realize their full potential; (ii) are undervalued in capital markets; or, (iii) operate in jurisdictions with low to moderate local political risk. Aberdeen has committed to pursue a strategy that would transition the Company from an investment holding company to an asset management business over the coming years. The Company is a publicly listed company incorporated in the Province of Ontario. The Company's shares are listed on the Toronto Stock Exchange ("TSX"). The Company's head office is located at 65 Queen Street West, Suite 815, Toronto, Ontario M5H 2M5.

2. Significant accounting policies

Statement of compliance

These condensed interim financial statements are unaudited and prepared on a condensed basis in accordance with the International Accounting Standards ("IAS") 34, *Interim Financial Reporting* issued by the International Accounting Standard Board ("IASB"). These condensed interim financial statements have been prepared in accordance with the accounting policies described in Note 2 of the Company's annual financial statements as at and for the year ended January 31, 2014 and 2013 except as disclosed below. Accordingly, these condensed interim statements for the three month periods ended April 30, 2014 and 2013 should be read together with the annual financial statements as at and for the year ended January 31, 2014 and 2013.

The condensed interim financial statements of the Company were approved by the Board of Directors on June 13, 2014.

Basis of preparation

The financial statements have been prepared using the historical cost convention except for certain financial instruments which have been measured at fair value. All monetary references expressed in these notes are references to Canadian dollar amounts ("\$"). In addition, these condensed interim financial statements have been prepared using the accrual basis of accounting except for cash flow information.

New accounting policies

IAS 32 – Financial Instruments: Presentation ("IAS 32") was amended by the IASB in December 2011 to clarify certain aspects of the requirements on offsetting. The amendments focus on the criterion that an entity currently has a legally enforceable right to set off the recognized amounts and the criterion that an entity intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously. The amendments to IAS 32 are effective for annual periods beginning on or after January 1, 2014. The adoption of this standard did not result in any changes to the Company's disclosure of its financial instruments.

3. Investments at fair value through profit and loss

At April 30, 2014, the Company's investment portfolio consisted of 21 publicly-traded investments and 17 privately-held investments for a total fair value of \$37,218,829.

During fiscal 2014, the Company purchased a total of 9,100,000 common shares of the Company from the open market for an aggregate cost of \$2,968,409. The RSUs vest in three tranches, 1/3 vesting on the date of grant, 1/3 vesting six months from the date of grant and the remaining 1/3 vesting twelve months from the date of grant. The Company granted and issued 6,066,671 RSUs to certain directors and officers of the Company during fiscal 2014. 10. Capital disclosure

The Company considers its capital to consist of share capital, equity reserve and treasury shares, and retained earnings. The Company's objectives when managing capital are:

- a) to allow the Company to respond to changes in economic and/or marketplace conditions by maintaining the Company's ability to purchase new investments;
- b) to give shareholders sustained growth in value by increasing shareholders' equity; while
- c) taking a conservative approach towards financial leverage and management of financial risks.

The Company's management reviews its capital structure on an on-going basis and makes adjustments to it in light of changes in economic conditions and the risk characteristics of its underlying investments. The Company's current capital is composed of its shareholders' equity and, to-date, has adjusted or maintained its level of capital by:

- a) raising capital through equity financings;
- b) realizing proceeds from the disposition of its investments; and
- c) repurchasing the Company's own shares for cancellation pursuant to its normal course issuer bid.

Aberdeen is not subject to any capital requirements imposed by a regulator and there were no changes to capital management during the three months ended April 30, 2014 and 2013. The Company expects that its capital resources will be sufficient to discharge its liabilities as of the current statement of financial position date.

Aberdeen's operations involve the purchase and sale of securities and in addition, the Company has loans receivable outstanding. Accordingly, the majority of the Company's assets are currently comprised of financial instruments which can expose it to several risks, including market, liquidity, credit and currency risks. There have been no significant changes in the risks, objectives, policies and procedures from the previous year. A discussion of the Company's use of financial instruments and their associated risks is provided below:

11. Financial instruments (continued)

Market risk

Market risk is the risk that the fair value of, or future cash flows from, the Company's financial instruments will significantly fluctuate because of changes in market prices. The Company is exposed to market risk in trading its investments and unfavourable market conditions could result in dispositions of investments at less than favorable prices. In addition, most of the Company's investments are in the resource sector. The Company mitigates this risk by attempting to have a portfolio which is not singularly exposed to any one issuer, with exception to the Company having one position as at April 30, 2014, which made up of approximately 27.4% (January 31, 2014 – 27.0%) of the total equity portfolio.

For the three months ended April 30, 2014, a 10% decrease (increase) in the closing prices of its portfolio investments would result in an estimated increase (decrease) in after-tax net loss of \$2.7 million, or \$0.03 per share (January 31, 2014 - \$2.8 million, or \$0.05 per share). This estimated impact on the statement of comprehensive loss includes the estimated value of the non-traded warrants held, as determined using the Black-Scholes option pricing model.

Liquidity risk

Liquidity risk is the risk that the Company will not have sufficient cash resources to meet its financial obligations as they come due. The Company's liquidity and operating results may be adversely affected if the Company's access to the capital markets is hindered, whether as a result of a downturn in stock market conditions generally or related to matters specific to the Company, or if the value of the Company's investments declines, resulting in losses upon disposition. In addition, some of the investments the Company holds are lightly traded public corporations or not publicly traded and may not be easily liquidated. The Company generates cash flow from its interest on loans receivable, and proceeds from the disposition of its investments, in addition to interest income and advisory service fees. Aberdeen believes that it has sufficient marketable securities which are freely tradable and relatively liquid to fund its obligations as they become due under normal operating conditions. All of the Company's liabilities and obligations are due within one year.

The following table shows the Company's source of liquidity by assets as at April 30, 2014 and January 31, 2014.

Credit risk is the risk associated with the inability of a third party to fulfill its payment obligations. The Company is exposed to the risk that third parties that owe it money or securities will not perform their underlying obligations. Security was obtained against specific assets of the counterparty, in case of non-performance. The total carrying value of these financial instruments at April 30, 2014 was \$3,815,274 (January 31, 2014 - \$4,008,119).

Management has considered the potential impairment of loan and amount receivables. The following summarizes provisions made on loan impairment during the three months ended April 30, 2014 and 2013:

Currency risk

Currency risk is the risk that the fair value of, or future cash flows from, the Company's financial instruments will fluctuate because of changes in foreign exchange rates. The Company's operations are exposed to foreign exchange fluctuations, which could have a significant adverse effect on its results of operations from time to time. The Company currently has financial instruments denominated in U.S. dollars, Australian dollars, Norwegian Krone, South African Rand and UK Pound Sterling.

A change in the foreign exchange rate of the Canadian dollar versus another currency may change the value of its financial instruments.

13. Commitments and contingencies

Management contracts

The Company is party to certain management contracts. These contracts contain minimum commitments of approximately \$1,100,000 (January 31, 2014 - \$1,200,000) ranging from 30 days to 12 months and additional contingent payments of up to approximately \$6,800,000 (January 31, 2014 - \$12,200,000) upon the occurrence of a change of control. As a triggering event has not taken place, the contingent payments have not been reflected in these condensed interim financial statements.

Tax positions

In assessing the probability of realizing income tax assets and the valuation of income tax liabilities, management makes estimates related to expectations of future taxable income, applicable tax planning opportunities, expected timing of reversals of existing temporary differences and the likelihood that tax positions taken will be sustained upon examination by applicable tax authorities. In making its assessments, management gives additional weight to positive and negative evidence that can be objectively verified. Estimates of future taxable income are based on forecasted cash flows from operations and the application of existing tax laws in each jurisdiction. The Company considers relevant tax planning opportunities that are within the Company's control, are feasible and within management's ability to implement. Examination by applicable tax authorities is supported based on individual facts and circumstances of the relevant tax position examined in light of all available evidence. Where applicable tax laws and regulations are either unclear or subject to ongoing varying interpretations, it is reasonably possible that changes in these estimates can occur that materially affect the amounts of income tax assets recognized. Also, future changes in tax laws could limit the Company from realizing the tax benefits from the deferred tax assets. The Company reassesses unrecognized income tax assets at each reporting period.

Strategic advisor

The Company engaged a strategic advisor to provide the Company with advice regarding potential strategic financing alternatives. The Company paid the strategic advisor \$500,000 with \$250,000 paid on May 23, 2013 and \$250,000 paid on November 30, 2013. In addition, the Company will pay the strategic advisor a monthly retainer at the end of each month starting December 23, 2013 if the agreement is not terminated at the Company's option. In addition, the Company is committed to paying success fees to the strategic advisor on the occurrence of certain successful events.
