B. The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. The Company uses the following accounting policies:

- (1) Short-term investments are stated at amortized cost.
- (2) Highest-quality and high-quality (NAIC designations 1 and 2, respectively) bonds not backed by other loans are stated at amortized cost and are amortized using the interest method. All other bonds not backed by other loans (NAIC designations 3 to 6) are stated at the lower of amortized cost or fair value. The Company does not own any mandatory convertible securities or SVO-Identified investments identified in SSAP No. 26R.
- (3) The Company owns no common stocks.
- (4) The Company owns no preferred stocks.

- (11) Unpaid losses and loss adjustment expenses includes an amount determined from estimates of frequency and severity factors applied to each loan that has missed two consecutive payments that the Company refers to as case reserves, and an amount, based on past experience, for losses incurred but not reported. Such liabilities are necessarily based on assumptions and estimates, and the ultimate liability may be in excess of or less than the amount provided.

Reserves remaining for prior years are now \$1,566,450 as a result of re-estimation of unpaid claims and claim adjustment expenses. Therefore, there has been a \$297,611 favorable prior-year development during the year ended December 31, 2021. Original estimates are increased or decreased as additional information becomes known regarding individual claims. The Company does not adjust premiums based on past claim activity.

ANNUAL STATEMENT FOR THE YEAR 2021 OF THE Essent Guaranty of PA, Inc.

NOTES TO FINANCIAL STATEMENTS

B. Due to business restrictions, stay-at-home orders and travel restrictions initially implemented in March 2020 as a result of COVID-19, unemployment in the United States increased significantly in the second quarter of 2020, declining during the second half of 2020 and throughout 2021, although remaining elevated through most of 2021. As unemployment is one of the most common reasons for borrowers to default on their mortgage, the increase in unemployment has increased the number of delinquencies on the mortgages that we insure and has the potential to increase claim frequencies on defaults. As of December 31, 2021, insured loans in default totaled 16,963. For borrowers who have the ability to begin to pay their mortgage at the end of the forbearance period, we expect that mortgage servicers will work with them to modify their loans at which time the mortgage will be removed from delinquency status. We believe that the forbearance process could have a favorable effect on the frequency of claims that we ultimately pay. Based on the forbearance programs in place and the credit characteristics of the defaulted loans, we believe that the ultimate number of COVID-19-related default notices received in April 2020 through September 2020 ("Early COVID Defaults") that result in claims will be less than our historical default-to-claim experience. Accordingly, we recorded a reserve equal to approximately 7% of the risk in force for the Early COVID Defaults. We have not adjusted the loss reserves associated with the Early COVID Defaults as we continue to believe that these reserves represent the best estimate of the ultimate loss. The credit characteristics of defaults reported subsequent to September 30, 2020 have trended towards those of the pre-pandemic periods and we have observed the normalization of other default patterns during this period. In addition, beginning in the fourth quarter of 2020 we observed a normalization of the proportion of unemployment claims related to permanent layoffs as compared to a higher proportion of temporary layoffs during the second and third quarters of 2020. We believe that while defaults subsequent to September 30, 2020 were impacted by the pandemic's effect on the economy, the underlying credit performance of these defaults may not be the same as the expected performance for the Early COVID Defaults that occurred following the onset of the pandemic and defaults after September 30, 2020 are more likely to transition like pre-pandemic defaults. Accordingly, beginning in the fourth quarter of 2020, we resumed establishing reserves for defaults reported after September 2020 using our normal reserve methodology. The reserve for losses and LAE at December 31, 2021 includes \$1.1 million of reserves for Early COVID Defaults. It is reasonably possible that our estimate of the losses for the Early COVID-19 defaults could change in the near term as a result of the continued impact of the pandemic on the economic environment, the results of existing and future governmental programs designed to assist individuals and businesses impacted by the virus and the performance of the COVID-19 defaults in the forbearance programs. A 100 basis point increase or decrease in the reserve rate applied to Early COVID Defaults would result in a corresponding increase or decrease in our reserve for losses and LAE of approximately \$155,000 as of December 31, 2021. The impact on our reserves in future periods will be dependent upon the amount of delinquent notices received from loan servicers, the performance of Early COVID-19 defaults and our expectations for the amount of ultimate losses on these delinquencies.

26. **Intercompany Pooling Arrangements**

The Company has no intercompany pooling arrangements.
