Toronto, ON (October 30, 2018) – Genworth MI Canada Inc. (the “**Company**”) (TSX: MIC) today reported third quarter 2018 net income of \$128 million or \$1.42 earnings per fully diluted common share, net operating income of \$121 million or \$1.35 operating earnings per fully diluted common share, and an operating return on equity of 12%.

As part of our ongoing focus on capital efficiency, we are pleased to have completed another \$50 million share buyback under our normal course issuer bid during the quarter, underscoring our view that business fundamentals remain strong.”

Key Third Quarter 2018 Financial Results And Operational Metrics:

- **New insurance written** from **transactional insurance** was \$5.5 billion, a decrease of \$0.1 billion, or 2%, compared to the same quarter in the prior year primarily due to a modestly smaller transactional mortgage originations market. Compared to the prior quarter, transactional new insurance written increased by \$0.8 billion, or 16%, primarily as a result of typical seasonality.
- **Premiums written** from **transactional insurance** were \$192 million. This represents a decrease of \$3 million, or 1%, from the third quarter of 2017, primarily due to lower new insurance written. Compared to the prior quarter, premiums written increased by \$26 million, or 16%, primarily as a result of higher new insurance written.
- **New insurance written** from **portfolio insurance** on low loan-to-value mortgages was \$0.8 billion, consistent with the same quarter in the prior year. Compared to the prior quarter, portfolio new insurance written decreased by \$0.3 billion.

- **Premiums written from portfolio insurance** were \$4 million, representing a decrease of \$3 million compared to the same quarter in the prior year primarily due to a lower average premium rate resulting from a higher proportion of insured mortgages with a loan-to-value of less than 75%. Compared to the prior quarter, premiums written decreased by \$1 million.
- **Premiums earned** of \$169 million were relatively unchanged with the same quarter in the prior year. Premiums earned decreased by \$2 million, or 1%, compared to the prior quarter reflecting the relatively smaller recent books of business. The **unearned premiums reserve** was \$2.1 billion at the end of the quarter, consistent with the balance at December 31, 2017. These unearned premiums will be recognized as premiums earned over time in accordance with the Company's historical pattern of loss emergence.
- **New delinquencies, net of cures**, of 328 were 9 lower than the third quarter of 2017, primarily due to decreases in Ontario (26), the Atlantic Region (23), and Quebec (18), partially offset by increases in Alberta (18), the Pacific region (23), and the Prairies region (17). Compared to the prior quarter, new delinquencies, net of cures, decreased by 32 primarily due to decreases in the Atlantic region (20) and Ontario (21).
- The **loss ratio**, as a percentage of premiums earned, for the quarter was 14% compared to 13% in the same quarter in the prior year and 14% in the prior quarter. **Losses on claims** of \$23 million were relatively consistent with the same quarter in 2017. Losses on claims decreased by \$2 million, or 6%, from the prior quarter, primarily due to a decrease in new delinquencies, net of cures.

Compared to the prior quarter, the number of delinquencies outstanding decreased by 47, primarily due to decreases in Ontario (20), Quebec (19), and the Atlantic region (23).
- **Expenses** were \$32 million during the quarter, resulting in an **expense ratio** of 19%, as a percentage of premiums earned. This ratio was one percentage point lower than the same quarter in the prior year and consistent with the prior quarter and the Company's expected operating range of 18% to 20%.
- **Net underwriting income** of \$114 million was \$1 million higher relative to the same quarter in the prior year primarily due to lower expenses, partially offset by lower premiums earned. Net underwriting income was consistent with the prior quarter.

- **Operating investment income**, of \$54 million was \$10 million higher than the same quarter in the prior year primarily due to an increase in the amount of invested assets and realized income of \$6 million from the interest rate hedging program. Compared to the prior quarter, operating investment income was \$4 million higher, primarily due to the higher interest rate environment.

- **Realized and unrealized gains on derivatives and foreign exchange**, excluding the realized income from the interest rate hedging program, of \$10 million were \$28 million lower than the same quarter in 2017 primarily due to a smaller increase in the market value of the Company's interest rate swaps. - **The regulatory capital ratio or Minimum Capital Test ("MCT") ratio** was approximately 171%, 14 percentage points higher than the Company's internal MCT ratio target of 157% and 21 percentage points higher than the Office of the Superintendent of Financial Institutions Supervisory MCT ratio target of 150%.
