

## Wi-LAN COMPLETES TRI-VISION ACQUISITION

OTTAWA, Canada – July 3, 2007 – Wi-LAN Inc. (“Wi-LAN”, or the “Company”) (TSX: WIN) announced today that it has completed the acquisition of Tri-Vision International (“Tri-Vision”) (TSX: TVL). In the all-share purchase, Wi-LAN issued approximately 17.6 million Wi-LAN common shares and assumed Tri-Vision warrants exercisable for approximately 530 thousand Wi-LAN common shares.

Over 90% of Tri-Vision’s shareholders voted in favour of the transaction at a special meeting of Tri-Vision shareholders held in Toronto on June 28. This follows definitive agreements for the business combination signed between the two companies on May 11, 2007.

With the acquisition, Wi-LAN now owns critical patents relating to the V-chip technology, the only solution to parental controls that the U.S. Federal Communications Commission has mandated be built into all digital TV receivers, set-top boxes, VCRs and digital video recorders sold or used in the United States effective March 2007. Wi-LAN’s balance sheet will also be strengthened by the addition of approximately \$6M of cash and short-term investments held by Tri-Vision.

“Closing this deal represents a very exciting development for Wi-LAN and our shareholders,” said Jim Skippen, Wi-LAN President & CEO. “It cements our position as the leading Canadian technology licensing company. It gives us access to the high-growth V-chip market and offers significant licensing opportunities given the synergies between our licensees. It also expands Wi-LAN’s war chest to over \$100 million to pursue other acquisition opportunities and to handle multiple litigations.”

“This merger was a key part of our “go big strategy” to maximize the value of our patents,” added Tim Collings, Chairman of Tri-Vision International and inventor of the V-chip . “We are excited that former Tri-Vision shareholders will now benefit from Wi-LAN’s extensive licensing expertise, broad and diversified portfolio and solid financial resources to assert our patents, especially against the major players supplying the U.S. market.”

Wi-LAN intends to seek buyers for Tri-Vision’s cable television products and distribution.

## About Wi-LAN Inc.

Wi-LAN, which was founded in 1992, licenses intellectual property that drives a full range of products providing access in the communications and consumer electronics markets. Some of the fundamental technologies covered by Wi-LAN's patents include: CDMA, DSL, DOCSIS, V-chip, Wi-Fi and WiMAX. Wi-LAN has already licensed its intellectual property to a number of companies, including Cisco, Fujitsu, March Networks and Nokia.

## Forward-looking Information

*Certain statements in this release, other than statements of historical fact, may include forward-looking information that involves various risks and uncertainties. These may include, without limitation, statements based on current assumptions and expectations involving a number of risks and uncertainties related to all aspects of the wireless and wireline communications industry and the global economy. These risks and uncertainties include, but are not restricted to: the almost exclusive reliance of the Company on licensing its patent portfolio to generate revenues and cash flows; that the Company may be required to establish the enforceability of its patents in court to obtain material licensing revenues; that the Company will need to acquire or develop new patents to continue to grow its business; that the Company requires investment to translate its intellectual property position into sustainable profit in the market; that the Company is dependent on the performance of its key officers and employees; that changes in patent legislation or in the interpretation or application of patent litigation could materially adversely affect the Company; and that the Company has and may make acquisitions of products, technologies or businesses which could materially adversely affect the Company. These risks and uncertainties may cause actual results to differ from information contained herein, when estimates and assumptions have been used to measure and report results. There can be no assurance that such forward-looking statements will prove to be accurate. Actual results and future events could differ materially from those anticipated in such statements. These and all subsequent written and oral forward-looking statements are based on the estimates and opinions of management on the dates they are made and expressly qualified in their entirety by this notice. The Company assumes no obligation to update forward-looking statements should circumstances or management's estimates or opinions change.*
