Inuvo Inc.

(INUV-AMEX)

Inuvo Continues to Focus on Higher Margin Business With Impressive Results

OUTLOOK

At an enterprise value of \$20.2 million the company is valued well below the industry average of 1.6 times enterprise value to sales. **Using 2018 est. revenue of \$88 million yields a \$4.42 target stock price.**

Inuvo, a digital publishing, and advertising technology company, capitalizing on its newly enhanced ad platform, *INUVO Exchange*, and its expanded sales and marketing team. We expect earnings growth as well as operating margins to continue to improve going forward. The company plans to reinvest all its excess cash in growth while continuing to focus on EBITDA positive results. Its goal is to reach \$100m in sales in order to be an attractive acquisition candidate.

Current Price (08/08/18) \$0.69

WHAT'S NEW

Higher EBITDA and A New Product Expected By Year End

Inuvo showed the results of refocusing its efforts on higher margin business by reporting a Q2 that showed lower revenue growth than Q1, but improved gross margins and margin after marketing costs. Rather than spend time and money on its company-owned web sites and labor intensive publisher customer support, its current revenue base has been redirected to more automated solutions yielding higher profits. The company reported revenues of \$19.0 million up 4% from the \$18.3 million reported a year ago as for the first time the company had full quarters of NetSeer revenues as it was purchased February 7, 2017. This revenue number was preannounced in July.

Margins improved versus last year with gross margin before marketing expense moved to 63% versus 58% a year ago and 57% in Q1 2018. After marketing spend, the margin also improved. This year it was 18.8% while last year it was 17.2%. Comparing the first halves, H1 2018 margin was 17.7% versus 16.9%. For the quarter, margin dollars after marketing costs were up 13% in the quarter on a 4% increase in sales.

In this year's quarter Inuvo had the opportunity to make money on about 2.6 billion pages in Q2, down from 5.0 billion pages last year. However the RPM was significantly higher at \$7.40 versus \$3.70. Mobile was again 70% of total revenue.

Expenses increased to \$12.8 million versus \$12.0 million a year ago, but operating losses declined to \$0.7 million versus \$1.3 million. Head count declined to 64 from 92 at the end of March.

The GAAP net loss for the quarter was \$0.8 million versus \$1.4 million a year ago. GAAP EPS loss was \$0.03 vs. \$0.05, but on a non-GAAP basis is was \$0.03 in both years.

EBITDA for the quarter was \$336,000 up from \$167,000 a year ago. For the first half of the year EBITDA was \$191,000 versus a loss last year of \$496,000. The company expects to double the full year EBITDA of last year's \$1.1 million.

The strategy for Inuvo investors and management has always been to grow the business large enough to be attractive as an acquisition. Once the company reaches over \$100 million in sales next year, we believe it could be large enough to be an attractive acquisition to a larger company. The M&A market is certainly variable however, and while private company valuations are high, competitors Outbrain and Taboola have not fared well lately and the appetite for Inuvo may be currently dampened.

Inuvo continues to market a unique solution to advertisers and should be able to increase sales and penetration by its differentiation. Its ability to understand the context of the pages on which it is serving ads, its privacy protections, and its new offerings should make it a key choice for advertisers as they continue to winnow away at the number of ad vendors they use. In particular, in this age of an assault on privacy by web sites and social networks, customers should embrace Inuvo's future new product which will give an alternative way to target consumers other than the use of cookies that are increasing under attack as a method of tracking. By using cookies placed in a browser, big ad or media providers such as Google can track which web sites you visited, even if you didn't login.

On May 15, 2018 Inuvo, sold 2.86 million shares of common stock at a price of \$0.70 per share with an over-allotment of 429,000 shares. This raised a net \$2.1 million for working capital for the company.

KEY POINTS

- Native advertising is a large high growth market. In 2020, the native advertising market in North America is expected to reach \$31.7 billion, of which the US market should comprise \$29.7 billion, up from \$14 billion in 2016 or 18.6% CAGR.
- The company's goal is to reach a \$100 million in revenue run rate. Its trailing twelve months revenues are \$84 million, so \$100 million looms closer. It should reach that goal in Q4 of this year.
- Charles D. Morgan, Director and former founder and Chairman of Acxiom, has a 7% stake in the company (through Tocqueville Asset Management.) We believe that this stake will help keep the company's objectives in line with that of shareholders. We believe that ultimately the company will be sold when it proves it has traction and reaches a size of interest to larger corporations.
- We believe the company is valued below its peers. If we use enterprise value to sales (since many competitors operate at a loss), the stock is still priced well below its peers who trade at an average of 1.4 times enterprise value to sales. **At a multiple of 1.6xs estimated \$88 million in 2018 revenue, the stock should be worth \$4.42.**

VALUATION

Inuvo is hybrid adtech company and digital publisher, but is moving to almost entirely higher margin adtech and deemphasizing the lower margin publishing business. We applied average multiples of sales to Inuvo's historical and projected revenues based on the comparable companies in the table below. Using this multiple and applying it to 2018 estimated revenues of \$88 million the stock should be worth \$4.42.

RISKS

- There are few barriers to entry in the advertising network business and it typically operates with slim margins with competition mainly on price. Recently the industry has been consolidating.
- Some of the company's growth is dependent on the success of new products that may not be adopted by new customers.
- The digital ad business is very competitive and there is far more inventory of ad space than is needed. There could be continued price pressure that would lower click rates going forward. Much of the ad inventory in the US goes unsold; more inventory could exacerbate this supply-demand imbalance. Thus, Inuvo may have to increase volume of ads sold just to maintain revenues.
- Inuvo has limited resources with which to compete against much larger companies and this could hinder its growth as well as its abilities to acquire companies.
- Privacy regulations keep changing, especially in Europe and the company and its competitors have had to adapt to changes, which alters the competitive landscape and how it does business.

OWNERSHIP

Charles D. Morgan owns 2 million of the shares of the Tocqueville Asset Management position that is in transition to Ingalls and Snyder. Onset V was the venture capitalist owner of NetSeer, and still owns 2.6 million shares of Inuvo.

HISTORICAL STOCK PRICE

DISCLOSURES

The following disclosures relate to relationships between Zacks Small-Cap Research ("Zacks SCR"), a division of Zacks Investment Research ("ZIR"), and the issuers covered by the Zacks SCR Analysts in the Small-Cap Universe.

ANALYST DISCLOSURES

I, Lisa Thompson, hereby certify that the view expressed in this research report accurately reflect my personal views about the subject securities and issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the recommendations or views expressed in this research report. I believe the information used for the creation of this report has been obtained from sources I considered reliable, but I can neither guarantee nor represent the completeness or accuracy of the information herewith. Such information and the opinions expressed are subject to change without notice.

INVESTMENT BANKING AND FEES FOR SERVICES

Zacks SCR does not provide investment banking services nor has it received compensation for investment banking services from the issuers of the securities covered in this report or article.

Zacks SCR has received compensation from the issuer directly or from an investor relations consulting firm engaged by the issuer for providing non-investment banking services to this issuer and expects to receive additional compensation for such non-investment banking services provided to this issuer. The non-investment banking services provided to the issuer includes the preparation of this report, investor relations services, investment software, financial database analysis, organization of non-deal road shows, and attendance fees for conferences sponsored or co-sponsored by Zacks SCR. The fees for these services vary on a per-client basis and are subject to the number and types of services contracted. Fees typically range between ten thousand and fifty thousand dollars per annum. Details of fees paid by this issuer are available upon request.

POLICY DISCLOSURES

This report provides an objective valuation of the issuer today and expected valuations of the issuer at various future dates based on applying standard investment valuation methodologies to the revenue and EPS forecasts made by the SCR Analyst of the issuer's business. SCR Analysts are restricted from holding or trading securities in the issuers that they cover. ZIR and Zacks SCR do not make a market in any security followed by SCR nor do they act as dealers in these securities. Each Zacks SCR Analyst has full discretion over the valuation of the issuer included in this report based on his or her own due diligence. SCR Analysts are paid based on the number of companies they cover. SCR Analyst compensation is not, was not, nor will be, directly or indirectly, related to the specific valuations or views expressed in any report or article.

ADDITIONAL INFORMATION

Additional information is available upon request. Zacks SCR reports and articles are based on data obtained from sources that it believes to be reliable, but are not guaranteed to be accurate nor do they purport to be complete. Because of individual financial or investment objectives and/or financial circumstances, this report or article should not be construed as advice designed to meet the particular investment needs of any investor. Investing involves risk. Any opinions expressed by Zacks SCR Analysts are subject to change without notice. Reports or articles or tweets are not to be construed as an offer or solicitation of an offer to buy or sell the securities herein mentioned.
