The accompanying notes are an integral part of these interim consolidated financial statements.

1. Going concern:

These unaudited interim consolidated financial statements ("interim financial statements") have been prepared in accordance with International Accounting Standards ("IAS") 34, Interim Financial Reporting, using accounting policies consistent with the International Financial Reporting Standards ("IFRS") issued by the International Accounting Standards Board and Interpretations of the International Financial Reporting Interpretations Committee ("IFRIC"), as well as Canadian generally accepted accounting principles applicable to a going concern which contemplates the realization of assets and settlement of liabilities in the normal course of business as they become due.

For the six months ended June 30, 2017, TVI Pacific Inc. "(TVI") reported a net loss of $641,747 (June 30, 2016 – net loss $1,179,146) and operating cash outflows of $509,719 (June 30, 2016 - $883,084), resulting in a working capital surplus of $121,493 (December 31, 2016 - $409,548). TVI has no outstanding loans payable nor does it currently have any annual expenditure obligations as at June 30, 2017. As at June 30, 2017, TVI had an ending cash and cash equivalents and short-term deposits balance of $576,757 (December 31, 2016 - $1,097,130, including restricted cash of $350,000). Restricted cash, previously held and reported in short-term deposits for distribution as a death benefit in accordance with certain agreements, has been fully settled during the six months ended June 30, 2017.

TVI is presently dependent on the sale of portions of its interest in various equity holdings and possible distributions from its investment in joint venture to continue its operations and to fund expenses. The ability of TVI to continue as a going concern is dependent on obtaining additional funding to finance ongoing operating activities and to pursue resource projects in the Asia Pacific region that can be rapidly developed and put into production to generate revenue and cash flows. There can be no assurances that these funding activities will be successful; and uncertainty exists in relation to events or conditions that may cast significant doubt as to whether TVI will be able to continue as a going concern.

These financial statements do not reflect the adjustments to the carrying values of assets and liabilities and the reported revenues, expenses and balance sheet classifications that would be necessary if TVI were unable to realize its assets and settle its liabilities as a going concern in the normal course of operations. Such adjustments could be material.

2. Corporate information and nature of operations:

TVI is a publicly listed resource company incorporated in Alberta, Canada on January 12, 1987 under the Alberta Business Corporations Act. TVI's shares were delisted from the Toronto Stock Exchange on July 29, 2016 and listed on the TSX Venture Exchange on August 2, 2016. TVI is focused on the acquisition of diversified resource projects in the Asia Pacific region and on evaluating and acquiring resource projects that can be rapidly developed and put into production to generate revenue and cash flows. TVI does not presently have an active resource property but holds various equity and joint venture investments in resource companies (together referred to as the "Company") engaged in production, development and/or exploration activities in the Philippines and Papua New Guinea ("PNG") as well as the commercialization of plastics-to-fuel technology and biomass to fuel and energy conversion technologies in Australia.

TVI holds a 30.66% interest in TVI Resource Development Phils., Inc. ("TVIRD"). TVIRD's assets include the Canatuan project, the Balabag gold-silver project, a 60% interest in the Agata nickel laterite project and Direct Shipping Ore ("DSO") operations and various interests in the Agata processing project and exploration properties in the Philippines. At June 30, 2017, TVI also holds a 25.50% equity interest in FOY Group Limited ("FOY Group") (name has been changed from Foyson Resources Limited starting

2. Corporate information and nature of operations (continued):

August 2015), an Australian company engaged in the commercialization of technologies related to plastics and biomass to fuel and energy conversion and the construction of a waste plastics-to-diesel conversion plant in Australia, who holds also a 90% interest in Amazon Bay where they have continued to progress their strategy for PNG through continued active dialogue with the PNG Mineral Resource Authority and the community; as well as a 14.4% equity interest in Mindoro Resources Ltd. ("Mindoro"), a Canadian company engaged in mining and exploration in the Philippines. TVI also participates in the business of international petroleum exploration and development through its 100% owned subsidiary, TG World Energy Corp. ("TG World") whose major area of focus is in the Philippines, through its affiliate TG World (BVI) Corp. ("TG BVI"). At June 30, 2017, the TG World entities are inactive. At June 30, 2017 also, TVI continues to carry out a due diligence work program at the Cirianiu gold project in Fiji for the purpose of making an investment decision on the project once it can secure additional funding to carry out resource acquisition and development activities.TVI has established its principal business address at Suite 806, 505 2nd St. SW Calgary, Alberta, Canada T2P 1N8.

These interim consolidated financial statements were authorized for issue by the Board of Directors on August 10, 2017.

3. Basis of preparation:

(a) Statement of compliance

These unaudited interim financial statements have been prepared in accordance with IAS 34, Interim Financial Reporting, using accounting policies consistent with the IFRS issued by the International Accounting Standards Board and IFRIC, as well as generally accepted accounting principles applicable to a going concern which contemplates the realization of assets and settlement of liabilities in the normal course of business as they become due.

These interim financial statements do not include all the information required in annual financial statements in accordance with IFRS and should be read in conjunction with the audited consolidated financial statements for the year ended December 31, 2016 filed with the Canadian Securities Administrators.

These interim financial statements are presented in Canadian Dollars which is the functional and reporting currency of TVI.

These interim financial statements have not been reviewed by the Company's auditor.

(b) Changes in accounting policies

These interim financial statements follow the same accounting policies and methods of application as the audited consolidated financial statements for the year ended December 31, 2016. There are no new IFRSs or IFRIC interpretations that are effective for the period beginning January 1, 2017 that would be expected to have a material impact to the Company.

(c) New standards, amendments and interpretations issued but not effective for the financial year beginning January 1, 2017

IFRS 9, "Financial Instruments" replaces existing requirements included in IAS 39, "Financial Instruments - Recognition and Measurement". The complete version of IFRS 9 was issued in July 2014. It replaces the guidance in IAS 39 that relates to the classification and measurement of financial instruments. IFRS 9 retains but simplifies the mixed measurement model and establishes three primary measurement categories for financial assets: amortized cost, fair value through other comprehensive income and fair value through profit and loss. The basis of classification depends on the entity's business model and the

3. Basis of preparation (continued):

contractual cash flow characteristics of the financial asset. Investments in equity instruments are required to be measured at fair value through profit or loss with the irrevocable option at inception to present changes in fair value in other comprehensive income not recycling. There is now a new expected credit loss model that replaces the incurred loss impairment model used in IAS 39. For financial liabilities there were no changes to classification and measurement except for the recognition of changes in own credit risk in other comprehensive income, for liabilities designated at fair value through profit or loss. The standard is effective for accounting periods beginning on or after January 1, 2018. Early adoption is permitted. The Company expects no significant impact from the new classification, measurement and derecognition rules on the group's financial assets and financial liabilities. The Company currently has no financial assets classified as available-for-sale nor any hedging activities. There will also be no impact on the accounting for financial liabilities, as the Company does not have financial liabilities that are designated at fair value through profit or loss. The Company continues to assess the impact of the new impairment model on the Company's financial assets.

IFRS 15, "Revenue from contracts with customers" deals with revenue recognition and establishes principles for reporting useful information to users of financial statements about the nature, amount, timing and uncertainty of revenue and cash flows arising from an entity's contracts with customers. Revenue is recognized when a customer obtains control of a good or service and thus has the ability to direct the use and obtain the benefits from the good or service. The standard replaces IAS 18 "Revenue" and IAS 11 "Construction contracts" and related interpretations. The standard is effective for annual periods beginning on or after January 1, 2018 and earlier application is permitted. The Company is assessing the impact of IFRS 15.

IFRS 16, "Leases" replaces IAS 17 and related interpretations. It introduces a new approach to lease accounting that requires a lessee to recognize assets and liabilities for the rights and obligations created by leases. It brings most leases on-balance sheet for lessees, eliminating the distinction between operating and finance leases. However, lessor accounting remains similar to previous guidance and the distinction between operating and finance leases is retained. The standard is effective for annual periods beginning on or after January 1, 2019. The Company is assessing the impact of IFRS 16.

There are no other new standards, amendments and interpretations that are not yet effective that would be expected to have a material impact on the Company.

4. Financial risk management:

The Company's activities expose it to a variety of financial risks: market risk (currency risk and interest rate risk), liquidity risk and credit risk.

The interim financial statements do not include all financial risk management information and disclosures required in the annual financial statements. They should be read in conjunction with TVI's audited consolidated financial statements for the year ended December 31, 2016.

a) Financial risk management

(i) Currency risk

For the six months ended June 30, 2017, the pro forma impact on net income (loss) if the US Dollar moved by 3% against the Canadian Dollar, with all other variables held constant, would be $11,231.

The pro forma impact on net income (loss) if the Australian Dollar moved by -3% against the Canadian Dollar, with all other variables held constant, would be ($20,245). The pro-forma impact on net income (loss) of other currencies with all other variables held constant is not material for disclosure.

(in Canadian dollars)

4. Financial risk management (continued):

The following significant exchange rates have been applied during the current year and prior year:

	Average rate		Spot rate	
	Three months ended June 30, 2017	Year ended December 31, 2016	June 30, 2017	December 31, 2016
Canadian Dollar/US Dollar	1.3344	1.3248	1.2977	1.3427
Canadian Dollar/ Australian Dollar	1.0067	0.9852	0.9968	0.9707
Canadian Dollar/ Philippine Peso	0.0267	0.0279	0.0258	0.0272

ii) Interest rate risk

As at June 30, 2017, TVI has no term deposits with fixed interest terms and therefore does not have exposure to interest rate risk that may result from changes in market conditions. The Company reviews its exposure to interest rate risk through regular monitoring of actual interest rates with market interest rates.

iii) Liquidity risk

As at June 30, 2017, the Company has $0.1 million available working capital surplus, as compared to a working capital surplus of $0.4 million at December 31, 2016.

The table below summarizes the Company's financial liabilities by relevant maturity groupings based on contractual maturity date. The amounts disclosed are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances, as the impact of discounting is considered to be not significant.

	June 30, 2017		December 31, 2016	
Due within 12 months:				
Accounts payable and accrued liabilities	$	162,468	$	553,751
Due to related parties		538,654		364,558
	$	701,122	$	918,309

The Company remains focused upon conserving cash through reducing expenditures and is presently dependent on possible distributions from its investment in joint venture and the sale of portions of its interest in various equity holdings to help settle liabilities and continue as a going concern, as well as to be a source of funding to help the Company pursue resource projects that can be rapidly developed and put into production to generate revenue and cash flows. There can be no assurances that these funding activities will be successful; and uncertainty exists in relation to events or conditions that may cast significant doubt as to whether TVI will be able to continue as a going concern.

Note 11 includes a further breakdown and explanation of accounts payable and accrued liabilities.

iv) Credit risk

The carrying amounts of cash and cash equivalents, short-term deposits, accounts receivable, due from related parties, derivative financial instruments, and other assets at June 30, 2017 and December 31, 2016 represent the Company's maximum credit risk exposure.

b) Fair value measurements recognized in the statement of financial position

The analysis of financial instruments that are measured subsequent to initial recognition at fair value can be classified into Levels 1 to 3 based on the degree to which fair value is observable.

- *Level 1 – fair value measurements are those derived from quoted prices (unadjusted) in active markets for identical assets and liabilities.*

(in Canadian dollars)

4. Financial risk management (continued):

- *Level 2 – fair value measurements are those derived from inputs other than quote prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices).*
- *Level 3 – fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data (unobservable inputs).*

The fair value disclosed for the derivative financial instrument (note 6) and option to purchase TVIRD shares (note 10 were classified under Level 3).

During the six months ended June 30, 2017, there were no transfers between levels in the fair value hierarchy of any fair value measurements nor were there changes in valuation techniques.

The carrying value of the Company's financial assets and liabilities consisting of cash and cash equivalents, short-term deposits, accounts receivable, due from and to related parties and accounts payable and accrued liabilities, approximate their fair values at June 30, 2017 and December 31, 2016 due to their short term nature.

c) *Capital risk management*

The Company monitors capital on the basis of the debt-to-equity ratio and the debt-to-assets ratio.

Debt is composed of accounts payable and accrued liabilities and due to related parties. Equity comprises all components of equity other than amounts in accumulated other comprehensive income. Assets are defined as the Company's total current and non-current assets. The Company's strategy is to improve the debt to equity ratio in order to secure access to financing at a reasonable cost by maintaining a good credit rating.

		June 30, 2017		December 31, 2016
Debt	$	701,122	$	918,309
Equity		15,946,472		16,539,867
Assets		14,254,851		15,783,724
Debt-to-equity		4%		6%
Debt-to-assets		5%		6%

5. Cash and cash equivalents and short-term deposits:

Cash and cash equivalents and short-term deposits and restricted cash consist of:

		June 30, 2017		December 31, 2016
Cash on hand	$	743	$	778
Cash in banks		575,014		376,109
Total cash on hand and in banks		575,757		376,887
Short-term deposits and restricted cash		1,000		720,243
	$	576,757	$	1,097,130

Cash in banks and short-term deposits earn interest at the prevailing bank deposit rates. The carrying amounts of cash and cash equivalents approximate their fair value.

(in Canadian dollars)

5. Cash and cash equivalents and short-term deposits (continued):

Cash and cash equivalents and short-term deposits are denominated in the following currencies (Canadian Dollar equivalents):

		June 30, 2017		December 31, 2016
Canadian Dollars	$	192,327	$	487,543
US Dollars		335,107		564,528
Philippine Pesos		49,323		45,059
	$	576,757	$	1,097,130

Cash and cash equivalents and short-term deposits are held in the following countries:

		June 30, 2017		December 31, 2016
Canada	$	410,997	$	951,665
Philippines		120,890		98,986
Others		44,870		46,479
	$	576,757	$	1,097,130

Restricted cash, previously held and reported in short-term deposits for distribution as a death benefit in accordance with certain agreements, has been fully settled during the six months ended June 30, 2017.

6. Derivative financial instrument:

As at June 30, 2017, TVI holds a total of 9,158,621 options to purchase FOY Group shares as a result of the conversion of A$400,000 note receivable and A$200,000 capital promissory notes into shares during the year ended December 31, 2015.

The Company has determined that it has significant influence by virtue of its right to representation on the Board of Directors of the associates and various other contractual terms. The TSX-Venture Exchange announced on July 6, 2016, that Mindoro has been halted from trading for failure to pay their annual sustaining listing fees, while the trading of FOY Group shares will resume upon relisting on the ASX.

(a) Investment in FOY Group

FOY Group is a publicly listed company incorporated in Australia, with shares listed on the ASX. Its annual reporting period ends at June 30. The trading of FOY Group shares was halted since July 29, 2015 and will resume upon relisting on the ASX. TVI holds 17,592,908 shares and 9,158,621 options as at June 30, 2017.

FOY Group initially announced a Business Sale Agreement ("Agreement") on March 18, 2015, with IGE to acquire primarily the royalty-free, perpetual licenses to commercialize the plastics-to-fuel conversion technology, as well as the biomass-to-fuel and biomass-to-energy conversion technologies and a waste plastics-to-diesel and petrol conversion plant located at Berkeley Vale, Australia. Further to subsequent announcements made on February 9, 2016 and September 8, 2016, FOY Group has made amendments to this Agreement. At an Extraordinary General Meeting held on November 15, 2016, FOY Group received shareholder approval of the IGE transaction and to acquire the IGE Assets and Technology Rights, as well as to proceed with an offer of 92.5 million shares at A$0.20 each to raise A$18.5 million (the "Offer").

On November 29, 2016, FOY announced the formation of a new US company (Integrated Green Partners, LLC ("IGP")) together with the US company, GEP Fuel and Energy Indiana, LLC to allow FOY Group greater opportunities to exploit the Waste Plastic-to-Fuel Technologies in the US market, which includes plans to construct and operate a plastic-to-fuel conversion facility in Indiana, USA. On April 28, 2017, FOY Group announced that it has resolved to enter into a US $90 million funding commitment to construct and establish 4 commercial sites in the United Kingdom.

FOY Group must yet meet the requirements of certain ASX Listing Rules prior to relisting. The ASX has advised FOY that the IGE transaction constitutes a significant change to the nature and scale of the company's activities to which ASX Listing Rule 11.1 applies, whereby:

- FOY must provide the ASX information regarding the change and its effects on future potential earnings as well as any other information that may be requested
- FOY must obtain shareholder approval for the IGE transaction; and
- FOY must meet the requirements in ASX Listing Rules Chapters 1 and 2 as if FOY Group were applying for admission to the official list of ASX.

(in Canadian dollars)

8. Investment in associates (continued):

More specifically, Chapter 1 of the ASX Listing Rules sets out the requirements that must be satisfied for an entity to gain admission to the official list, which includes a requirement that the main class of securities is quoted. In addition:

- The entity's structure and operations must be appropriate for a listed entity and the entity must have a constitution that is consistent with the listing rules;
- A prospectus must be issued;
- The entity must have a free float at the time of its admission to the official list of not less than 20%;
- The entity must be a going concern and satisfy certain profit and assets tests;
- Options on issue by the entity must have an exercise price for each underlying security of at least A$0.20; and,
- The entity's main business activity at the date it is admitted must be the same as it was during the last 3 full financial years and the entity must provide audited accounts for the each of these past full financial years.

Chapter 2 of the ASX Listing Rules states that the issue price or sale of all the securities for which the entity seeks quotation must be at least A$0.20.

As noted, shareholder approval of the IGE transaction was received at an Extraordinary General Meeting ("EGM") held on November 15, 2016, as well as approval to proceed with an offer of 92.5 million shares at A$0.20 each to raise A$18.5 million. The relisting timetable, however, has continued to be delayed and has thereby affected the timing of the company's prospectus and the Offer currently put to the market.

On July 5, 2017, FOY Group released its notice of meeting for its upcoming EGM, to be held on August 7, 2017, where among other items FOY Group will seek further shareholder approval of the IGE transaction and for issue of up to 75 million shares to raise up to A$15 million to assist in funding FOY's growth plans (which supercedes FOY Group plans to raise A$18.5 million, as had been approved at the EGM in November 2016). As indicated in the notice of meeting, FOY Group now expects its shares to commence trading on the ASX on September 14, 2017.

Below are the Company's share of FOY Group's result of operations, assets and liabilities:

	June 30, 2017	December 31, 2016

TVI continues to hold 30.66% of the issued and outstanding shares of TVIRD (through TVI International Marketing Limited ("TVI Marketing")). TVIRD continues to be the operator of the Agata and Pan de Azucar joint ventures.

On February 22, 2017, TVIRD issued a cash dividend of 30 million Philippine pesos ($787,647) to all shareholders of record as of December 31, 2016, and TVI Marketing, the direct shareholder of TVIRD, received as its share a dividend of 9.2 million Philippine pesos $241,991), prior to Philippine dividend tax, in the amount of 1.4 million Philippine pesos (CAD $36,301). TVI Marketing in turn transferred a net 7.8 million Philippine pesos (CAD $205,690) through to TVI as a repayment of intercompany advances.

On May 15, 2017, TVIRD issued a second cash dividend of 30 million Philippine pesos ($821,402) to all shareholders of record as of March 31, 2017 and TVI Marketing received as its share a dividend of 9.2 million Philippine pesos ($251,880), prior to Philippine dividend tax, in the amount of 1.4 million Philippine pesos ($37,782). TVI Marketing in turn transferred a net 7.8 million Philippine pesos ($214,098) through to TVI as a repayment of intercompany advances.

10. Other assets:

10. Other assets (continued):

During the year ended December 31, 2014, TVI paid $232,020 as an option to acquire the remaining Class B shares of TVIRD held by a non-controlling interest holder, representing a 0.92% interest in TVIRD, upon execution of TVIRD's listing on the Philippine Stock Exchange ("PSE"). The option requires the listing of TVIRD to take place no later than five (5) years from the execution date of the option, or by December 2018, and the sale and purchase to be completed within 30 days from the date of listing on the PSE. The total net purchase price is expected to be US $500,000, including the payment, plus 10% of (i) the initial public offering ("IPO") value of the Class B shares, to be calculated as if they were included in the TVIRD IPO, or (ii) the average price of the Class B shares during the first 5 trading days of TVIRD's listing – whichever is higher. At December 31, 2016, the Company determined the fair value of the option to be $142,603 based on the current estimated value of TVIRD, taking into account the effects of ongoing mining at Agata, the probability of TVIRD's PSE listing and the estimated future value of other projects. In the event the listing of TVIRD does not take place within the required period, for whatever reason, whether or not attributable to the Company, or should the Company decide not to pursue its purchase of the Class B Shares, funds paid with respect to this option will be forfeited.

14. Segmented information:

The Company's revenue from mining, extraction, production and selling of metal concentrates is indirectly recognized within the Company's investment in joint venture, through the application of the equity method. The Company's segmented information is reported in the same way as internal reporting provided to TVI's executive management to make decisions about resource allocation and performance assessment of the operating segments.

The Company has two reporting segments:

- mining exploration in Fiji and investments in associates and joint venture with mining activities in the Philippines and Papua New Guinea; and
- petroleum exploration in the Philippines

The Company's corporate operations do not earn revenue and incurs expenses that are considered incidental to the activities of the Company and therefore does not meet the definition of an operating segment as defined in IFRS 8, *Operating Segments*.
