1. NATURE AND CONTINUANCE OF OPERATIONS

Harvest Gold Corporation (the “Company”) was incorporated on June 28, 2005, under the laws of the province of British Columbia, Canada, and its principal activity is the acquisition and exploration of mineral properties in North America. The Company is a Tier 2 Mining Issuer listed and trading on the TSX Venture Exchange (“TSX-V”).

The head office, principal address, records office and registered address of the Company are located at 750 West Pender Street, Suite 804, Vancouver, British Columbia, Canada, V6C 2T7.

These condensed consolidated financial statements have been prepared on the assumption that the Company and its subsidiaries will continue as a going concern, meaning it will continue in operation for the foreseeable future and will be able to realize assets and discharge liabilities in the ordinary course of operations. Different bases of measurement may be appropriate if the Company is not expected to continue operations for the foreseeable future. As at December 31, 2015, the Company had not advanced its properties to commercial production and is not able to finance day to day activities through operations, raising significant doubt about its ability to continue as a going concern. The Company’s continuation as a going concern is dependent upon the successful results from its mineral property exploration activities and its ability to attain profitable operations and generate funds there from and/or raise equity capital or borrowings sufficient to meet current and future obligations. Management intends to finance operating costs over the next twelve months with loans from directors and companies controlled by directors and or private placement of common shares.

2. SIGNIFICANT ACCOUNTING POLICIES AND BASIS OF PRESENTATION

These unaudited condensed consolidated financial statements were approved and authorized for issue on February 26, 2016 by the directors of the Company.

Statement of compliance

These unaudited condensed consolidated interim financial statements, including comparatives, have been prepared in accordance with International Accounting Standard 34 “Interim Financial Reporting” (“IAS 34”) using accounting policies consistent with the International Financial Reporting Standards (“IFRS”) issued by the International Accounting Standards Board (“IASB”) and interpretations of the IFRS Interpretations Committee.

These unaudited condensed consolidated interim financial statements do not include all of the information required of a full annual financial report and is intended to provide users with an update in relation to events and transactions that are significant to an understanding of the changes in financial position and performance of the Company since the end of the last annual reporting period. It is therefore recommended that this financial report be read in conjunction with the annual financial statements of the Company for the year ended March 31, 2015.

10. FINANCIAL RISK AND CAPITAL MANAGEMENT

The Company is exposed in varying degrees to a variety of financial instrument related risks. The Board of Directors approves and monitors the risk management processes, inclusive of documented investment policies, counterparty limits, and controlling and reporting structures. The type of risk exposure and the way in which such exposure is managed is provided as follows:

Credit risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. The Company's primary exposure to credit risk is on its cash held in bank accounts. The majority of cash is deposited in bank accounts held with a major bank in Canada. As most of the Company's cash is held by one bank there is a concentration of credit risk. This risk is managed by using major banks that are high credit quality financial institutions as determined by rating agencies. The Company's secondary exposure to risk is on its GST receivable. This risk is minimal as receivables consist of refundable government general sales taxes.

10. FINANCIAL RISK AND CAPITAL MANAGEMENT (cont'd)

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company has a planning and budgeting process in place to help determine the funds required to support the Company's normal operating requirements on an ongoing basis. The Company ensures that there are sufficient funds to meet its short-term business requirements, taking into account its anticipated cash flows from operations and its holdings of cash.

Historically, the Company's sole source of funding has been the issuance of equity securities for cash, primarily through private placements. The Company's access to financing is always uncertain. There can be no assurance of continued access to significant equity funding.

Foreign exchange risk

Foreign exchange risk is the risk that the fair values of future cash flows of a financial instrument will fluctuate because they are denominated in currencies that differ from the respective functional currency. The Company is exposed to currency risks as it incurs expenditures that are denominated in the United States dollar while its functional currency is the Canadian dollar. The Company does not hedge its exposure to fluctuations in foreign exchange rates. The majority of cash is held in Canadian dollars. As a result, the Company's exposure to foreign currency risk is minimal.

Interest rate risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. As at December 31, 2015, the Company did not have any cash equivalents or interest bearing debt and is not subject to interest rate risk.

Capital management

The Company's policy is to maintain a strong capital base so as to maintain investor and creditor confidence and to sustain future development of the business. The capital structure of the Company consists of equity and cash.

There were no changes in the Company's approach to capital management during the year.

The Company is not subject to any externally imposed capital requirements.

Subsequent to December 31, 2015, (the “Company”) is pleased to announce that it has executed a Letter of Intent (LOI) dated February 16, 2016 with Canasur Gold Ltd. (“Canasur”), a private arm’s length Nova Scotia company with mineral interests in Suriname.

The LOI provides for the amalgamation of Canasur with Harvest (the “Amalgamation”) by way of a three cornered amalgamation under the *B.C. Business Corporation Act* whereby Canasur would continue into British Columbia and amalgamate with a newly formed subsidiary of Harvest. In connection with the Amalgamation shareholders of Canasur would collectively receive 16,247,008 shares of Harvest, representing 2/3 of the issued and outstanding shares of Harvest prior to the completion of the equity financing detailed below.

In connection with the Amalgamation, Harvest plans to complete an equity financing of up to \$1,000,000 (minimum \$650,000) by way of the issuance of units at \$0.05, with each unit to be made up of a share and a warrant entitling the holder to acquire a further share of Harvest at \$0.10 for a term of two years. On closing of the Amalgamation it is proposed that Joel Matheson, a director of Canasur, will be appointed to the Board of Directors of Harvest.

The Amalgamation remains subject to completion of satisfactory due diligence, execution of a definitive agreement and receipt of all requisite regulatory approvals, including the acceptance of the TSX Venture Exchange and the approval of the shareholders of Canasur.
