

Management Discussion and Analysis
For the Nine Months Ended December 31, 2021

PRELIMINARY INFORMATION

This Management's Discussion and Analysis ("MD&A") contains information up to and including February 28, 2022.

The following MD&A of Harvest Gold Corp. (the "Company") should be read in conjunction with the unaudited condensed interim consolidated financial statements for the nine months ended December 31, 2021 and the audited consolidated financial statements for the year ended March 31, 2021 and the related notes contained therein. The financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS").

All financial information in this MD&A have been prepared in accordance with IFRS, and all dollar amounts are expressed in Canadian dollars unless otherwise indicated.

FORWARD-LOOKING INFORMATION

Statements in this report that are not historical facts are forward-looking statements involving known and unknown risks and uncertainties, which could cause actual results to vary considerably from these statements. Readers are cautioned not to put undue reliance on forward-looking statements. For more information on forward-looking information please refer to the "Caution Regarding Forward Looking Statements" section below.

OVERVIEW

The Company was incorporated on June 28, 2005 under the BC Business Corporations Act and is a reporting issuer in British Columbia and Alberta. The Company's common shares are traded on the TSX Venture Exchange under the symbol "HVG".

The Company is a mineral exploration and resource development company engaged in the business of acquiring, exploring and evaluating natural resource properties, and either joint venturing or developing these properties further or disposing of them when the evaluation is complete. As at the date of this MD&A, the Company has not earned any production revenue and is considered to be an exploration stage company.

RESOURCE PROPERTIES - PERFORMANCE SUMMARY

Emerson, Jacobite & Goathorn – British Columbia

On June 23, 2020, the Company entered into an Option Agreement with two private B.C. companies, Running Dog Resources Ltd. and Attunga Holdings Inc. (or collectively, "the Vendors") whereby the Company can earn up to an 100% interest in up to three early stage Copper-Gold porphyry projects located in the Omineca Mining Division of central B.C. The agreement was amended on July 20, 2021 and was approved by the TSX on July 21, 2020.

The Company can earn a 100% interest in any or all of the three projects by completing the following:

Time	Exploration (CDN)	Cash (CDN)
TSX-V Approval	-	\$35,000 for all three projects
TSX-V Approval	-	\$7,000* for all three projects
December 31, 2021	\$450,000**	\$20,000 per property
December 31, 2022	-	\$25,000 per property
December 31, 2023	-	\$50,000 per property
December 31, 2024	-	\$75,000 per property
TOTAL	\$450,000	Minimum: \$42,000; Maximum: \$552,000

- *\$7,000 to be applied as a credit to the exploration work commitments
- ** Minimum of \$100,000 on each property

Once the Company has completed the Phase 1 work program it will have until December 31, 2021 to elect to retain one or more of the three projects or return any not selected to the Vendors with two years good standing. Providing that the Company continues to make cash payments or equivalent payments in shares on the anniversary dates it will earn a 100% interest in each project, subject to a 1.5% NSR royalty in favour of the Vendors. One half of the NSR royalty (0.75%) may be purchased for \$500,000 prior to the publication of a mineral resource or for \$1,500,000 thereafter. The Vendors will also be entitled to annual Advance Royalty Payments ("ARP") of \$5,000 per project per year for four years commencing January 1, 2025 and increasing to \$10,000 per project per year for four years commencing January 1, 2029. Thereafter and continuing for as long as the Company or successor owns the permits, the annual ARP will increase to \$20,000 per project. All amounts provided as advance royalty payments can be paid in shares, at the Company's option and will be deductible from future NSR royalty payments.

Subsequent to the end of the period, the Company paid \$40,000 and has earned a 100% interest in the Emerson and Goathorn projects, subject to payment of the remaining cash obligations noted above. The Company also entered into an amending agreement with the Vendors whereby the Company paid the 2021 cash payment of \$20,000 and may elect to retain a 100% interest in the Jacobite project (subject to payment of the remaining cash obligations noted above) by completing a 2D induced polarization study on Jacobite during 2022.

Harvest Gold Corp.'s review of technical data on the recently acquired 56-square-kilometre (5,600-hectare) Emerson project has provided historic drill log evidence of a strong mineralized system that is gold bearing and that has many similarities to Artemis Gold Inc.'s Blackwater gold project, located in central British Columbia, 200 km southeast of Emerson in a similar geological setting.

During 2021 the Company successfully completed the three stages of its pre drill exploration plan with the completion of an airborne magnetic survey in January, 2021, top-of-bedrock RAB drilling in July/August, 2021 and a 3D IP survey in September, 2021. The Company has confirmed its Blackwater near surface gold model hypothesis and the Emerson Property is now ready to drill.

3D IP PROGRAM RESULTS

The 3D IP program, executed and interpreted by Dias Geophysics, was chosen because of its impressive data collection capability and modeling. The resultant inversions show a strong, cohesive chargeability high anomaly (>40 mV/V), which forms a tabular body measuring 1000 metres x 1800 metres in plan and 300 metres in thickness, dipping gently to the south. (See Figure 1)

The chargeability anomaly strikes northwest southeast and remains open to the northwest past the limits of the IP grid. The chargeability high anomaly is accompanied by extremely low resistivity (<100 ohm-m). It shows that the strong quartz-sericite-pyrite alteration revealed by the top-of-bedrock RAB drilling is the surface expression of this impressive chargeability anomaly. The chargeability high and resistivity low are favourable indicators for the presence of highly altered, sulphide-rich rock in this region. (See Figure 2).

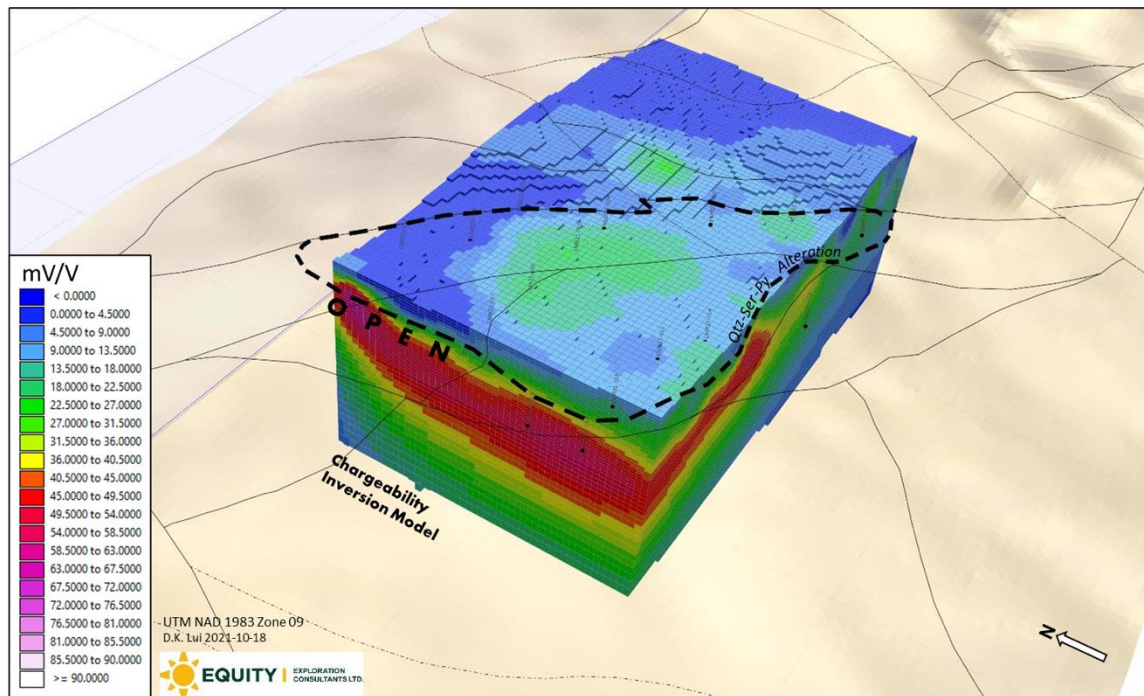

Figure 1: 3D chargeability inversion model looking northeast. Dashed line shows outline of quartz-sericite-pyrite alteration as revealed in RAB holes.

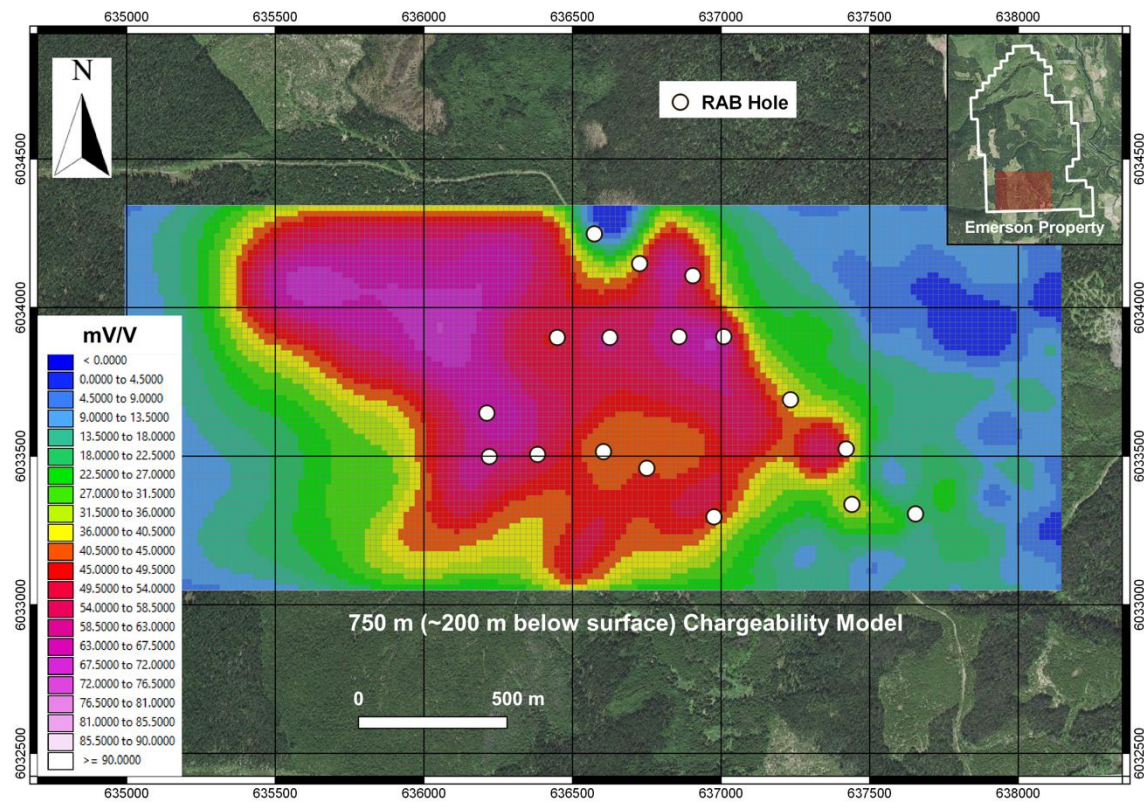

Figure 2: 3D IP chargeability inversion model (750 m elevation slice) showing location of RAB drill holes

Subsequent to December 31, 2021, the Company received induced polarization results for its 100-per-cent-owned gold-copper Goathorn property located in central British Columbia. The 23-square-kilometre Goathorn property comprises six contiguous mineral claims located 20 kilometres southeast of Smithers, B.C., with a nearby railroad, high-voltage powerline and gas pipeline. Goathorn is located 15 kilometres northwest of the company's flagship property, Emerson.

Harvest now has received chargeability and resistivity inversions for the 11.3-line-kilometre IP survey carried out on the Goathorn property in September, 2021. As well, the company has extended the Goathorn property to the northeast by acquiring an additional 5.24-square-kilometre claim block.

Chargeability levels in the 2021 IP survey are roughly similar to those reported from the historic 2012 IP survey. The company believes the chargeability anomalies in the two IP surveys indicate a single body of sulphide-bearing rocks over at least 5.3 kilometres in length on the Goathorn property. These sulphide-bearing rocks and the extensive magnetite skarn are interpreted to represent the cap above a major porphyry system.

The 2021 IP survey at Goathorn was designed as a reconnaissance test in the vicinity of the magnetite skarn and the copper-gold mineralized dikes. It was conducted along four southeasterly trending lines spaced 400 metres apart. Inversions at depths of 100 to 500 metres below surface reveal a northeasterly trending chargeability high (greater than 10 millivolts per volt) ranging from 400 metres to greater than 1,300 metres wide and extending along the entire 1,200-metre length of the IP grid.

Harvest Gold has extended the Goathorn property to the northeast by acquiring a 5.24-square-kilometre claim block. This new claim covers the historic IP survey with a reported 1,400-metre-by-1,800-metre chargeability high (greater than 10 mV/V) which is aligned with the chargeability anomaly revealed by Harvest Gold's 2021 IP survey. Harvest Gold has not verified the results of the historic IP survey.

On February 14, 2022, the Company begun drilling on its 100-per-cent-owned gold-copper Emerson property located in central British Columbia. The 56-square-kilometre Emerson property comprises 14 contiguous mineral claims located 15 kilometres west of Houston, B.C., with a nearby railway, high-voltage powerline and gas pipeline.

The drill holes on this initial diamond drill program will follow targets provided by the cumulative results of the RAB drilling, the 3-D induced polarization survey and magnetics inversions. Specifically, the RAB drilling helped to refine the bedrock location of anomalous gold-silver-copper-arsenic-zinc chemistry highlighted in historical soil and shallow trench data, as well as clearly define the extensive alteration which Harvest believes is creating the chargeability-conductivity-high and magnetic-low anomalies modelled from the geophysical surveys.

The planned drill program consists of up to 2,600 metres in up to five holes and is scheduled to be completed in six to seven weeks. This program is being managed by Equity Explorations Inc. with the assistance of local subcontractors.

CERRO CASCARON PROJECT - MEXICO

On June 7, 2017, as amended on April 17, 2018 and June 21, 2019, the Company had entered into an Option Agreement (the "Option Agreement") to acquire up to an 80% interest in the Cerro Cascarón Project located in Mexico. Under the terms of the Option Agreement, the Company was to earn an initial 80% interest (the "Initial Interest") in the Cerro Cascarón Project by issuing 200,000 common shares, cash payments of \$900,000 and incur exploration expenditures of \$6,000,000 by June 7, 2021.

During the year ended March 31, 2020, the Company and the Optionor agreed to terminate the agreement. The Company wrote off \$1,602,425 to operations.

SURINAME CONCESSIONS

On July 27, 2016, the Company completed its 100% acquisition of Canasur Gold Limited ("Canasur") and its wholly owned projects located in Suriname.

On May 7, 2018, the Company entered into a Share Purchase Agreement for the sale of its 100% interest in Canasur for \$192,753 (US\$150,000). The consideration of US\$150,000 was payable in increments of US\$30,000 due on or before July 1, 2018, November 1, 2018, March 1, 2019, July 1, 2019 and November 1, 2019. The option is secured by a pledge of the 100% interest in Canasur.

During the year ended March 31, 2018, the Company had derecognized the assets and liabilities of Canasur from the consolidated statements of financial position setting up the amount to be collected as the fair value of the remaining exploration and evaluation asset and recognized a corresponding impairment.

During the year ended March 31, 2021, the Company received US\$Nil (2020 – US\$10,000 (\$13,051) in relation to this agreement.

During the year ended March 31, 2021, the parties agreed to amend the Share Purchase Agreement for a final payment of \$62,877 (US\$50,000) resulting in the Company recognizing an impairment of \$72,005 to record the carrying value of the property to its recoverable amount

ROSEBUD GOLD MINE, NEVADA

During the year ended March 31, 2016, the Company reached an option to sell agreement with Rosebud Exploration LLC ("RE"), a private Nevada corporation, for its Rosebud Gold Mine Property as follows. In Stage One, RE paid the Company US\$25,000 upon signing. RE then paid US\$50,000 to Newmont for the Company's December 15, 2015 Advanced Royalty Payment on Rosebud. RE also paid all Bureau of Land Management ("BLM") and county fees on Rosebud for its 2015 obligations. RE then informed the Company of its intention to continue with the project and paid the Company US\$15,000 in September 2016. RE also paid the US\$50,000 2016 Advanced Royalty Payment to Newmont and has committed to pay 2017 BLM and county fees on the property by the end of July 2017.

RE exercised its option to purchase Rosebud any time after January 1, 2016 up to November 23, 2017 and paid the Company CDN\$100,000. As RE exercised its option to purchase, it has also committed to paying CDN\$1,000,000 to the Company within 30 days of RE receiving funding designed to commission and construct a mine at Rosebud. On Closing of the sale of Rosebud, RE assumed all obligations of the Company in respect of the 3% NSR on Rosebud including the obligations to make annual Advanced Royalty Payments

RW PROPERTY, EUREKA COUNTY, NEVADA

Effective January 1, 2012 the Company entered into a mining lease and option to purchase agreement with Kinetic Gold (US) Inc. ("Kinetic"). As per the terms in the agreement the Company is in receipt of the first US\$10,000 upon execution of the agreement and is in receipt of the next installment which was paid on December 21, 2012. On September 5, 2013 there was an amendment to the Mining Lease and Option to Purchase RW Claims to incorporate an additional year on the payment schedule. On August 13, 2015 the agreement was amended whereby Kinetic paid US\$5,000 (CDN\$6,475; received) and will pay US\$15,000 thirty days after Kinetic assigns the property to a third party. Kinetic will then pay a further US\$30,000 on the first anniversary and US\$40,000 on the second anniversary of assigning the property to a third party. With the property optioned to Kinetic, the Company no longer manages the property and has no activities planned.

On June 1, 2019, the Company entered into a royalty agreement with Kinetic whereby the Company received a 1% net smelter royalty on the RW claims located in Eureka County, Nevada, USA in exchange for \$1,000.

RESULTS FROM OPERATIONS

Three Months Ended December 31, 2021 compared to Three Months Ended December 31, 2020

The Company incurred a loss of \$404,829 for the period ended December 31, 2021 compared to a loss of \$71,817 for the period ended December 31, 2020. The increase was primarily due to share-based payments. In the current period, the Company incurred share-based payments charge of \$294,811, a non-cash expense on the granting of stock options. There was no stock options granted in the current period.

SUMMARY OF QUARTERLY RESULTS

	Three Months Ended December 31, 2021	Three Months Ended September 30, 2021	Three Months Ended June 30, 2021	Three Months Ended March 31, 2021
Total assets	\$ 3,426,105	\$ 1,854,507	\$ 1,961,872	\$ 1,125,042
Evaluation and exploration assets	1,307,092	947,477	357,790	287,401
Working capital (deficiency)	2,028,314	823,997	1,519,830	691,057
Shareholders' equity	3,335,406	1,771,474	1,877,620	978,458
Net loss for the period	(294,811)	(106,146)	(101,588)	(227,468)
Net loss per share	(0.01)	(0.00)	(0.00)	(0.01)

	Three Months Ended December 31, 2020	Three Months Ended September 30, 2020	Three Months Ended June 30, 2020	Three Months Ended March 31, 2020
Total assets	\$ 1,292,681	\$ 307,618	\$ 242,213	\$ 299,056
Evaluation and exploration assets	228,139	182,882	134,882	134,882
Working capital	901,909	(19,993)	(765)	46,550
Shareholders' equity	1,130,048	162,889	134,117	197,415
Loss for the period	(71,817)	(141,462)	(63,298)	(1,692,165)
Loss per share	(0.01)	(0.01)	(0.01)	(0.19)

LIQUIDITY AND CAPITAL RESOURCES,

As at December 31, 2021, the Company had cash of \$1,996,733. The Company has closely monitored its utilization of its cash resources on administrative requirements. The Company has no significant income and will rely on replenishing cash balances by capital fundraising.

On June 28, 2021, the Company closed a non-brokered private placement issuing 5,003,750 units at a price of \$0.20 per unit raising total gross proceeds of \$1,000,750. Each unit consists of one common share in the capital of the Company and one-half of one transferable common share purchase warrant. Each full warrant entitles the holder to purchase one additional share of the Company at an exercise price of \$0.30 per warrant share until June 28, 2023, provided that in the event that the closing price of the Company's shares on the TSX-V (or such other exchange on which the Company's shares may become traded) is \$0.50 or greater per share during any 20-consecutive-trading-day period at any time subsequent to four months and one day after the closing date, the warrants will expire on the 30th day after the date on which the Company provides notice of such accelerated expiry to the holders of the warrants.

On December 17, 2021 the Company closed a non-brokered private placement issuing 11,076,000 flow-through units ("FT units") at a price of \$0.125 per FT Unit raising total gross proceeds of \$1,384,500. Each FT Unit consists of one flow-through common share and one-half of one common share purchase warrant with each whole warrant exercisable at a price of \$0.20 per share for a period of two years, provided that in the event that the closing price of the Company's shares on the TSX-V (or such other exchange on which the Company's shares may become traded) is \$0.40 or greater per share during any 15 non-consecutive trading day period after June 1, 2022, the warrants will expire at 4:00 p.m. (Pacific time) on the 30th day after the date on which the Company provides notice of such accelerated expiry to the holders of the warrants.

On December 31, 2021 the Company closed a non-brokered private placement issuing 3,400,000 units at a price of \$0.10 per unit raising total gross proceeds of \$340,000. Each unit consists of one common share and one common share purchase warrant with each warrant exercisable at a price of \$0.20 per share for a period of three years, provided that in the event that the closing price of the Company's shares on the TSX-V (or such other exchange on which the Company's shares may become traded) is \$0.50 or greater per share during any 15 non-consecutive trading day period after June 15, 2022, the warrants will expire at 4:00 p.m. (Pacific time) on the 30th day after the date on which the Company provides notice of such accelerated expiry to the holders of the warrants.

The financial statements have been prepared on a going concern basis which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. The continuing operations of the Company are dependent upon its ability to continue to raise adequate financing and to commence profitable operations in the future.

FINANCIAL INSTRUMENTS AND OTHER INSTRUMENTS

The Company's financial instruments consist of cash and trade payables. Cash is designated as amortized cost. Trade payables are designated as other financial liabilities and recorded at amortized cost.

The fair value hierarchy establishes three levels to classify inputs to the valuation techniques used to measure fair value. Level 1 inputs are quoted market prices (unadjusted) in active markets for identical assets or liabilities. Level 2 inputs are inputs other than quoted market prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 3 inputs are unobservable (supported by little or no market activity).

Cash is stated at fair value and are classified as Level 1 of the fair value hierarchy. The fair value of trade payables approximated the carrying value because of the short-term nature of these instruments.

The fair value of available for sale investments are determined based on a market approach reflecting the closing price of each particular security at the closing balance sheet date. The closing price is a quoted market price obtained from the exchange that is the principal active market for the particular security, and therefore available for sale securities are classified within Level 1 of the fair value hierarchy.

RISKS AND UNCERTAINTIES

The Company is in the mineral exploration and development business and as such is exposed to a number of risks and uncertainties that are not uncommon to other companies in the same business. Exploration for mineral resources involves a high degree of risk, and the cost of conducting programs may be substantial and the likelihood of success is difficult to assess. The Company attempts to mitigate its exploration risk through joint ventures with other companies.

Beyond exploration risk, management is faced with other possible risks which include the following:

Metal Price Risk

The price of gold and silver greatly affects the value of the Company and the potential value of its properties and investments. This, in turn, greatly affects its ability to form joint ventures and the structure of any joint ventures formed.

Financial Market Risk

The Company is dependent on the equity markets as its sole source of operating working capital and the Company's capital resources are largely determined by the strength of the resource markets and by the status of the Company's projects in relation to these markets, and its ability to compete for the investor support of its projects.

Title Risk

The Company has investigated its right to explore and exploit its properties and, to the best of its knowledge, has title to properties in which it has a material interest. However, the results of the Company's investigations should not be construed as a guarantee of title.

Environmental Risk

The Company seeks to operate within environmental protection standards that meet or exceed existing requirements in each country in which the Company operates. Present or future laws and regulations, however, may affect the Company's operations. Future environmental costs may increase due to changing requirements or costs associated with exploration and the developing, operating and closing of mines. Programs may also be delayed or prohibited in some areas. Although minimal at this time, site restoration costs are a component of exploration expenses.

Value Risk

There is no certainty that the properties which the Company has deferred as assets on its consolidated balance sheet will be realized at the amounts recorded. These amounts should not be taken to reflect realizable value.

Should one or more of these risks and uncertainties materialize, or should underlying assumptions prove incorrect, then actual results may vary materially from those described on forward-looking statements. The Company has not completed a feasibility study on any of its properties to determine if it hosts a mineral resource that can be economically developed and profitably mined.

COVID-19

In March 2020 the World Health Organization declared coronavirus COVID-19 a global pandemic. This contagious disease outbreak, which has continued to spread, and any related adverse public health developments, has adversely affected workforces, economies, and financial markets globally, potentially leading to an economic downturn. It is not possible for the Company to predict the duration or magnitude of the adverse results of the outbreak and its effects on the Company's exploration activities or its ability to raise funds. As of the date of this report Covid-19 has had no impact on the Company's ability to access and explore its current properties but may impact the Company's ability to raise money or explore its properties should travel restrictions due to Covid-19 be extended, expanded, or, in the case in B.C., be reintroduced. The impact on the Company is not currently determinable but management continues to monitor the situation.

OFF-BALANCE SHEET ARRANGEMENTS

The Company did not enter into any off-balance sheet arrangements during the period.

MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL STATEMENTS

The information provided in this report, including the financial statements, is the responsibility of management. In the preparation of these statements, estimates are sometimes necessary to make a determination of future values for certain assets or liabilities. Management believes such estimates have been based on careful judgments and have been properly reflected in the accompanying consolidated financial statements.

OUTSTANDING COMMON SHARE DATA

As at the date of this report, the Company had 39,165,628 common shares issued and outstanding. The Company also had 23,061,126 warrants with an exercise price between \$0.15 and \$0.30 expiring between December 10, 2022 and December 31, 2024. The Company also had 3,550,000 stock options exercisable between \$0.16 and \$0.75 between December 8, 2021 and December 31, 2026.

RELATED PARTY TRANSACTIONS

Related party transactions are measured at their exchange amounts, which is the amount of consideration paid or received as agreed by the parties. Related party transactions are as follows:

a. Contractual commitment with related parties

On January 1, 2015, the Company entered into a management agreement with an officer and director to fulfil the role as Chief Executive Officer for a period of 5 years for a monthly rate of \$4,000 per month. In October 2016, the contract was renewed at a new monthly rate of \$5,000. In October of 2018, the contract was renewed at a new monthly rate of \$7,500. On March 1, 2021, the contract was renewed at the same monthly rate of \$7,500.

b. Transactions with related parties

During the period ended December 31, 2021, the Company paid or accrued \$18,000 (December 31, 2020 - \$18,000) of consulting fees and \$85,500 (December 31, 2020 - \$76,500) of management fees to officers and directors and companies controlled by officers and directors of the Company.

As at December 31, 2021, included in accounts payable and accrued liabilities was \$Nil (March 31, 2021 - \$20,475), owing for fees due to certain officers and directors of the Company (Note 6). These amounts are non-interest bearing, unsecured and have no fixed terms of repayment.

c. Transactions with key management personnel

	Nine months ended	
	Dec. 31, 2021	Dec. 31, 2020
Management and professional fees	\$ 90,000	\$ 94,500
Share-based payments	\$ 221,108	\$ 31,764

CAUTION REGARDING FORWARD LOOKING STATEMENTS

Statements contained in this MD&A that are not historical facts are forward-looking statements (within the meaning of the Canadian securities legislation and the U.S. Private Securities Litigation Reform Act of 1995) that involve risks and uncertainties. Forward-looking statements include, but are not limited to, statements with respect to the future price of metals; the estimation of mineral reserves and resources, the realization of mineral reserve estimates; the timing and amount of estimated future production, costs of production, and capital expenditures; costs and timing of the development of new deposits; success of exploration activities, permitting time lines, currency fluctuations, requirements for additional capital, government regulation of mining operations, environmental risks, unanticipated reclamation expenses, title disputes or claims, limitations on insurance coverage and the timing and possible outcome of pending litigation. In certain cases, forward-looking statements can be identified by the use of words such as "plans", "expects" or "does not expect", "is expected", "budget", "scheduled", "estimates", "forecasts", "intends", "anticipates" or "does not anticipate", or "believes", or variations of such words and phrases or state that certain actions, events or results "may", "could", "would", "might" or "will be taken", "occur" or "be achieved". Forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. Such risks and other factors include, among others, risks related to the integration of acquisitions; risks related to operations; risks related to joint venture operations; actual results of current exploration activities; actual results of current reclamation activities; conclusions of economic evaluations; changes in project parameters as plans continue to be refined; future prices of metals; possible variations in ore reserves, grade or recovery rates; failure of plant, equipment or processes to operate as anticipated; accidents, labour disputes and other risks of the mining industry; delays in obtaining governmental approvals or financing or in the completion of development or construction activities, as well as those factors discussed in the sections entitled "Risks and Uncertainties" in this MD&A. Although the Company has attempted to identify important factors that could affect the Company and may cause actual actions, events or results to differ materially from those described in forward-looking statements, there may be other factors that cause actions, events or results not to be as anticipated, estimated or intended. There can be no assurance that forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements. The forward-looking statements in this MD&A speak only as of the date hereof. The Company does not undertake any obligation to release publicly any revisions to these forward-looking statements to reflect events or circumstances after the date hereof to reflect the occurrence of unanticipated events.

Forward-looking statements and other information contained herein concerning the mining industry and general expectations concerning the mining industry are based on estimates prepared by the Company using data from publicly available industry sources as well as from market research and industry analysis and on assumptions based on data and knowledge of this industry which the Company believes to be reasonable. However, this data is inherently imprecise, although generally indicative of relative market positions, market shares and performance characteristics. While the Company is not aware of any misstatements regarding any industry data presented herein, the industry involves risks and uncertainties and is subject to change based on various factors.

INTERNAL CONTROLS OVER FINANCIAL REPORTING

There have been no changes in the Company's internal control over financial reporting that occurred during the Company's most recent period ended December 31, 2021 that has materially affected, or is reasonably likely to materially affect, the issuer's internal control over financial reporting.

APPROVAL

The Board of Directors of Harvest Gold Corporation has approved the disclosure contained in this MD&A. A copy of this MD&A will be provided to anyone who requests it.

CHANGES IN ACCOUNTING POLICIES AND CRITICAL ACCOUNTING ESTIMATES

New Standards, Interpretations and Amendments Effective This Year

New standards, interpretations and amendments not adopted in the current year have not been disclosed as they have been assessed to not have a significant impact on the Company's financial statements.

Recent Accounting Pronouncements

Certain new accounting standards, amendments to standards and interpretations have been issued, effective for annual periods beginning on or after April 1, 2021. These standards have been assessed to not have a significant impact on the Company's financial statements.

GOING CONCERN ISSUE

The Company is in the exploration stage and has no revenue or income from operations. The Company has limited capital resources and has to rely upon the sale of equity and/or debt securities for cash required for exploration and development purposes, for acquisitions and to fund the administration of the Company. Since the Company does not expect to generate any revenues from operations in the near future, it must continue to rely upon the sales of its equity or debt securities or joint venture agreements to raise capital. It follows that there can be no assurance that financing, whether debt or equity, will be available to the Company in the amount required by the Company at any particular time or for any period and that such financing can be obtained on terms satisfactory to the Company.

The Company's financial statements have been prepared on a going concern basis which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. The continuing operations of the Company are dependent upon its ability to obtain the necessary financing to meet its ongoing commitments and further its mineral exploration programs.

The Company may encounter difficulty sourcing future financing in light of the recent economic downturn. The current financial equity market conditions and the inhospitable funding environment make it difficult to raise capital through the private placements of shares. The junior resource industry has been severely affected by the world economic situation as it is considered speculative and high-risk in nature, making it even more difficult to fund. While the Company is using its best efforts to achieve its business plans by examining various financing alternatives, there is no assurance that the Company will be successful with any financing ventures.
