DID YOU KNOW?

67% of all freight tonnage was moved by truck in 2011. That is 92 billion tons of freight; more than twice the amount moved by rail, water and air combined.

1982 was the last time Congress established the length standard for a twin trailer at 28 ft.

JUST 5 FT. MAKES ALL THE DIFFERENCE.

Reduce CO₂ Emissions

Reduce Fuel Consumption

2.2 billion lbs. of carbon emissions saved

102 million gallons of fuel saved

No increase in weight.

Good for the economy. Good for jobs.

663 million miles and 3.3 million trips saved

456 fewer crashes (based on FMCSA crash data)

Fewer Trucks on the Road

Reduce Highway Crashes
