About Aldridge Minerals Inc.

Aldridge is a publicly-traded junior exploration company focussed on advancing its flagship Yenipazar polymetallic VMS deposit (Au, Ag, Cu, Pb, Zn) in Turkey with a feasibility study, which is building on its December 2010 Technical Report and Preliminary Economic Assessment. The feasibility study is expected to be completed by the end of 2012. The Yenipazar deposit is subject to an earn-in agreement with Alacer Gold Corp., wherein Aldridge can earn a 100% working interest subject to certain conditions, subject to a 6% net profit interest ("NPI", revenues less operational costs) until revenues of US$165 million are generated, and a 10% NPI from there on.

Aldridge also holds a 338 square kilometre exploration license in Papua New Guinea known as Kili Teke. The license area is prospective for gold, silver and copper.
