

Aldridge receives independent report on Yenipazar 7.45 Mt resources drilling upgrade

Tuesday, 03 July 2007

Vancouver, B.C.: Aldridge Minerals Inc. ("Aldridge") is pleased to announce that P&E Mining Consultants Inc. of Brampton, Ontario, Canada, has submitted the detailed report on the latest NI-43-101-compliant, independent resource estimate for the Yenipazar Au-Ag-Cu-Pb-Zn deposit in Central Turkey.

Estimated resources result in a total of 7.45 Mt within an optimized open pit shell. For details on grades and resource categories, see the Aldridge news release from May 9, 2007 on <http://www.sedar.com/> or News Center on <http://www.aldrigeminerals.com/>. The updated resource estimate technical report is now available on Aldridge's website. Data used by P&E for this report include 78 RC-holes drilled by Aldridge to January 2007, covering a deposit strike-length of 560 m at an average width of about 160 m. The Yenipazar deposit is still open to the north and south. Martin S. Ocslon, PhD Geo, a director of Aldridge and Qualified Person as defined in NI 43-101, has reviewed and verified the technical content of this press release. Aldridge is active in the exploration and development of gold and base metal projects in Turkey.
