

GOLDEN STAR

Employee Health and Wellbeing

Creating wealth through health.

Golden Star provides mine-site clinic access and National Health Insurance Scheme coverage for our over 2,100 Ghana based employees and up to four registered family members.

In 2018 some 12,700 illness related and preventative treatments were made at Golden Star clinics.

Since 2012 we have implemented a Health and Wellbeing Action Plan with:

- clinic upgrades,
- enhanced testing and medical surveillance,
- new equipment,
- clinic management software,
- voluntary health screenings and
- health interventions.

The program seeks to achieve a step-change improvement in workforce health status.

Since the start of the program, there has been a marked improvement in malaria cases, diagnosis and treatment. We have achieved this as a result of improved insecticide treatment, 24 hr testing, enhanced speed of diagnosis and improved quality of treatment and distribution of long-lasting insecticide treated nets.
