

NEWS RELEASE

## Werner Enterprises Reports Fourth Quarter and Annual 2014 Revenues and Earnings

1/29/2015

OMAHA, Neb.--(BUSINESS WIRE)--Jan. 29, 2015-- Werner Enterprises, Inc. (NASDAQ:WERN), one of the nation's largest transportation and logistics companies, reported revenues and earnings for the fourth quarter and year ended December 31, 2014.

Summarized financial results for fourth quarter and year 2014 compared to fourth quarter and year 2013 are as follows (dollars in thousands, except per share data):

---

|  | Three Months Ended |            |          | Year Ended   |              |          |
|--|--------------------|------------|----------|--------------|--------------|----------|

| Net income                               | 32,709             | 22,175     | 48%      | 98,650       | 86,785       | 14%      |
| Earnings per diluted share               | 0.45               | 0.30       | 49%      | 1.36         | 1.18         | 15%      |

We would like to take this opportunity to sincerely thank the dedicated and hard working men and women of Werner Enterprises. Their unwavering commitment to our customers by literally going the extra mile each and every day is what enables us to produce these strong results.

Freight demand continued to be strong in fourth quarter 2014. Freight demand (as measured by our daily morning ratio of loads available to trucks available in our One-Way Truckload network, which includes the medium-to-long-haul Van, Expedited and short-haul Regional fleets) showed consistent strength, and we were overbooked (more available freight than available trucks at the beginning of each business day) throughout most of fourth quarter 2014. October 2014 demand was the strongest October since the 2008 recession, and our freight demand strengthened further, as expected, in the seasonally strong months of November and December 2014. Fourth quarter 2013 freight demand showed normal seasonal improvement in October and November, with some further demand strengthening between Thanksgiving and Christmas. Freight demand thus far in 2015 has followed typical seasonal patterns and is similar to the same period of 2014.

An improving economy combined with constrained truck capacity is contributing to improved freight demand. Truck capacity is challenged by an increasingly competitive driver market and heightened regulatory cost increases for truck ownership and safety; thus, we expect this favorable demand trend relative to constrained supply will continue in 2015. There are several new safety regulatory initiatives in process or scheduled for implementation during 2015, and we anticipate they will further tighten truck capacity.

Average revenues per tractor per week, net of fuel surcharge, increased 8.8% in fourth quarter 2014 compared to fourth quarter 2013. This compares to year-over-year percentage improvements in average revenues per tractor per week of 1.6% in first quarter 2014, 4.9% in second quarter 2014, and 7.4% in third quarter 2014. Continued focus on securing driver friendly, highly productive freight and improved freight selection using our proprietary freight optimization system enabled us to raise our average miles per truck by 4.1% compared to fourth quarter 2013. Average revenues per total mile, net of fuel surcharge, increased 4.4% in fourth quarter 2014 compared to fourth quarter 2013. Contractual rate increases and improved freight mix combined with higher seasonal capacity surcharges in the One-Way Truckload fleet were the primary reasons for the rate improvement.

Several factors had a positive impact on our average revenues per tractor per week and profitability, while at the same time reduced the percentage increase in our revenue per total mile. Our average trip length increased by 5.0% in fourth quarter 2014 compared to fourth quarter 2013, and longer length of haul shipments generally have a lower rate per mile due to productivity benefits. Noting the improved freight market in fourth quarter 2014 compared to fourth quarter 2013, during fourth quarter 2014 we accepted less brokerage freight (in which rates are inclusive of fuel) and instead supported our customers with additional capacity priced with a base rate per mile and a fuel surcharge per mile. Finally, customer changes in fuel surcharge programs had a neutral impact on profitability but an adverse effect on revenue per total mile. A few large customers modified their fuel surcharge programs to a "zero peg" in the last 12 months, which shifted revenues from base rates to fuel surcharges.

We made continued progress implementing sustainable rate increases with our customers during fourth quarter

2014. These efforts are ongoing as we move forward in 2015 and work to recoup the cost increases associated with more expensive equipment, a shrinking supply of qualified drivers and an increasingly challenging regulatory environment. Strategic customers understand the collective capacity and service challenges facing our company and our industry and are increasingly supportive of Werner's ongoing initiatives to provide sustainable transportation solutions in support of their supply chain needs.

In fourth quarter 2014, we averaged 7,021 trucks in service in the Truckload segment and 55 intermodal drayage trucks in the VAS segment. We averaged 47 more trucks in service in fourth quarter 2014 than in third quarter 2014 as compared to a decline of 43 trucks in service from third quarter 2013 to fourth quarter 2013. We ended fourth quarter 2014 with 7,050 trucks in the Truckload segment and 55 intermodal drayage trucks in the VAS segment. Our Specialized Services unit, primarily Dedicated, ended the quarter with 3,690 trucks (or 52% of our total Truckload segment fleet).

In periods of rapidly rising fuel prices, the Company's earnings have been negatively impacted by the lag effect that occurs because the cost of fuel rises immediately but the market indexes used to determine fuel surcharges increase at a slower pace and only once per week. During periods of rapidly declining fuel prices, the Company generally experiences a temporary favorable earnings lag effect, since fuel costs decline at a faster pace than the market indexes used to determine fuel surcharges. This occurred in fourth quarter 2014 as the significant decline in diesel fuel prices in the latter half of the quarter reduced the Company's fuel expense while lowering fuel surcharge revenues by a lesser amount.

Diesel fuel prices were 55 cents per gallon lower in fourth quarter 2014 than in fourth quarter 2013 and were 42 cents per gallon lower than in third quarter 2014. For the first 29 days of January 2015, the average diesel fuel price per gallon was \$1.38 lower than the average diesel fuel price per gallon in the same period of 2014 and \$1.48 lower than in first quarter 2014. The components of the Company's total fuel cost consist of and are recorded in our income statement as follows: (i) Fuel (fuel expense for company trucks excluding federal and state fuel taxes); (ii) Taxes and Licenses (federal and state fuel taxes); and (iii) Rent and Purchased Transportation (fuel component of our independent contractor costs, including the base cost of fuel and additional fuel surcharge reimbursement for costs exceeding the fuel base).

We continue to invest in equipment solutions to improve the safety, operational efficiency and fuel miles per gallon of our fleet. We increased our capital expenditures in the second half of 2014 to lower the average age of our truck fleet, and attained an average age of 2.2 years as of December 31, 2014. Net capital expenditures in 2014 were \$212.3 million. We estimate net capital expenditures for 2015 to be in the range of \$275 to \$325 million, which we expect will enable us to further reduce the average age of our truck fleet to under two years. We remain committed to investing in a best in class fleet for the benefit of our customers, our drivers and the Werner brand.

The driver recruiting and retention market was difficult during fourth quarter 2014. In mid-August 2014, we increased pay by varying percentage amounts for many drivers in certain fleets within our One-Way Truckload unit. After these driver pay changes, our driver and truck count recovered and increased from July 2014 levels. Additionally over the last several months, we increased driver pay in multiple Dedicated fleets, most of which were funded by customer rate increases to ensure capacity. However, significant problematic market factors remain including a declining number of, and increased competition for, driver training school graduates, a gradually declining national unemployment rate and job competition from the housing construction and manufacturing industries. We expect that competition for drivers will remain high in the coming months.

Gains on sales of assets were \$5.0 million in fourth quarter 2014. This compares to gains on sales of assets of \$3.7 million in fourth quarter 2013, which included a \$0.7 million gain from the sale of real estate, and \$4.5 million in third quarter 2014. In fourth quarter 2014, we realized higher average gains per truck and trailer and sold more trucks and trailers compared to fourth quarter 2013. Gains on sales of assets are reflected as a reduction of Other Operating Expenses in our income statement.

Our effective income tax rate in fourth quarter 2014 was 38.0%, lower than the expected rate of 40.3%. Tax legislation enacted in December 2014 retroactively reinstated certain qualifying tax credits only for 2014, thereby reducing the Company's fourth quarter 2014 income tax rate.

To provide shippers with additional sources of managed capacity and network analysis, we continue to grow our non-asset-based VAS segment. VAS includes Brokerage, Freight Management, Intermodal and Werner Global Logistics (International).

| Gross margin                                       | 13,400             | 13.6  | 13,062    | 14.3  | 52,020       | 13.3  | 55,802     | 15.4  |
| Other operating expenses                           | 10,997             | 11.2  | 10,693    | 11.7  | 44,485       | 11.4  | 41,138     | 11.3  |
| Operating income                                   | \$ 2,403           | 2.4   | \$ 2,369  | 2.6   | \$ 7,535     | 1.9   | \$ 14,664  | 4.1   |

In fourth quarter 2014, VAS revenues increased \$7.3 million or 8%, and operating income dollars increased by 1%,

compared to fourth quarter 2013. Operating income in fourth quarter 2014 of \$2.4 million improved sequentially compared to operating income of \$1.0 million in third quarter 2014. During fourth quarter 2014, we addressed several customer pricing, contractual and operational issues within VAS with the goal of gradually improving VAS financial performance in 2015.

Comparisons of the operating ratios for the Truckload segment (net of fuel surcharge revenues of \$81.2 million and \$86.9 million in fourth quarters 2014 and 2013, respectively, and \$349.8 million and \$354.6 million in 2014 and 2013 periods, respectively) and the VAS segment are shown below.

---

| Operating Ratios                  | Three Months Ended |       |            | Year Ended   |       |            |
|-----------------------------------|--------------------|-------|------------|--------------|-------|------------|
|                                   | December 31,       |       |            | December 31, |       |            |
|                                   | 2014               | 2013  | Difference | 2014         | 2013  | Difference |
| Truckload Transportation Services | 84.8%              | 89.8% | (5.0)%     | 88.7%        | 90.8% | (2.1)%     |
| Value Added Services              | 97.6%              | 97.4% | 0.2        | 98.1%        | 95.9% | 2.2%       |

Fluctuating fuel prices and fuel surcharge collections impact the total company operating ratio and the Truckload segment's operating ratio when fuel surcharges are reported on a gross basis as revenues versus netting against fuel expenses. Eliminating fuel surcharge revenues, which are generally a more volatile source of revenue, provides a more consistent basis for comparing the results of operations from period to period. The Truckload segment's operating ratios for fourth quarter 2014 and fourth quarter 2013 are 87.6% and 91.9%, respectively, and for 2014 and 2013 are 91.0% and 92.8%, respectively, when fuel surcharge revenues are reported as revenues instead of a reduction of operating expenses.

Our financial position remains strong. As of December 31, 2014, we had \$75.0 million of debt outstanding and \$833.9 million of stockholders' equity. During 2014, the Company purchased 1,200,000 shares of its common stock for a total cost of \$30.6 million.

Werner Enterprises, Inc. was founded in 1956 and is a premier transportation and logistics company, with coverage throughout North America, Asia, Europe, South America, Africa and Australia. Werner maintains its global headquarters in Omaha, Nebraska and maintains offices in the United States, Canada, Mexico, China and Australia. Werner is among the five largest truckload carriers in the United States, with a diversified portfolio of transportation services that includes dedicated van, temperature-controlled and flatbed; medium-to-long-haul, regional and local van; and expedited services. Werner's Value Added Services portfolio includes freight management, truck brokerage, intermodal, and international services. International services are provided through Werner's domestic and global subsidiary companies and include ocean, air and ground transportation; freight forwarding; and customs brokerage.

Werner Enterprises, Inc.'s common stock trades on The NASDAQ Global Select Market<sup>SM</sup> under the symbol "WERN". For further information about Werner, visit the Company's website at [www.werner.com](http://www.werner.com).

This press release may contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, and made pursuant to

the safe harbor provisions of the Private Securities Litigation Reform Act of 1995, as amended. Such forward-looking statements are based on information presently available to the Company's management and are current only as of the date made. Actual results could also differ materially from those anticipated as a result of a number of factors, including, but not limited to, those discussed in the Company's Annual Report on Form 10-K for the year ended December 31, 2013.

For those reasons, undue reliance should not be placed on any forward-looking statement. The Company assumes no duty or obligation to update or revise any forward-looking statement, although it may do so from time to time as management believes is warranted or as may be required by applicable securities law. Any such updates or revisions may be made by filing reports with the U.S. Securities and Exchange Commission, through the issuance of press releases or by other methods of public disclosure.
