Forward-Looking Statement Disclaimer

Statements included in this presentation that are not based on historical fact are forward-looking statements. Although such statements are based on management’s current estimates and expectations, and currently available competitive, financial and economic data, forward-looking statements are inherently uncertain and you should not place undue reliance on such statements as actual results may differ materially. We caution the reader that there are a variety of risks, uncertainties and other factors that could cause actual results to differ materially from what is contained, projected or implied by our forward-looking statements. For a description of some of the risks, uncertainties and other factors that may occur that could cause actual results to differ from our forward-looking statements see our Annual Report on Form 10-K for the period ended September 30, 2016, and in particular the discussions contained in Item 1 - Business, Item 1A - Risk Factors, Item 3 - Legal Proceedings, and Item 7 - Management’s Discussion and Analysis of Financial Condition and Results of Operations, as well as the Company’s other filings with the Securities and Exchange Commission. We also caution the readers of this presentation that we do not undertake to update any forward-looking statements made herein.

Non-GAAP Financial Measures

To supplement the financial results presented in accordance with generally accepted accounting principles in the United States (“GAAP”), we present certain non-GAAP financial measures within the meaning of Regulation G under the Securities Exchange Act of 1934, as amended. The non-GAAP financial measures used herein include: adjusted EPS, adjusted selling, general & administrative expenses, and adjusted operating profit. These measures are not, and should not be viewed as, substitutes for GAAP financial measures. More information about these non-GAAP financial measures and reconciliations of these non-GAAP financial measures to the most directly comparable GAAP financial measures can be found at the end of this presentation.

Non-US GAAP Financial Measures

The following table reconciles, for Q1FY17, the non-GAAP financial measures of adjusted EPS, adjusted selling general & administrative (“G&A”) expenses and adjusted operating profit to the most directly comparable U.S. GAAP financial measures of net earnings attributable to Jacobs, diluted EPS, G&A expenses and operating profit, respectively. For the comparable period presented below, such adjustments consist of amounts incurred in connection with the 2015 Restructuring. Amounts are shown in thousands, except for per share data.

Non-US GAAP Financial Measures (cont’d)

• Adjusted earnings and adjusted EPS are non-GAAP financial measures that are calculated by excluding the after-tax costs related to certain restructuring activities that began in fiscal year 2015 (the “2015 Restructuring”), which are not considered by management to be part of the Company’s ordinary operations. Adjusted G&A expense and adjusted operating profit are calculated by excluding the pre-tax costs related to the 2015 Restructuring. We believe that the adjusted EPS, adjusted G&A expense and adjusted operating profit measures are useful to management, investors and other users of our financial information in evaluating the Company’s operating results and understanding the Company’s operating trends by excluding the effects of the 2015 Restructuring, which can obscure underlying trends. Additionally, management uses adjusted net earnings, adjusted EPS, adjusted G&A expenses and adjusted operating profit in its own evaluation of the Company’s performance, particularly when comparing performance to past periods, and believes these measures are useful for investors because they facilitate a comparison of our financial results from period to period.

• The Company provides non-GAAP measures to supplement U.S. GAAP measures, as they provide additional insight into the Company’s financial results. However, non-GAAP measures have limitations as analytical tools and should not be considered in isolation and are not in accordance with, or a substitute for, U.S. GAAP measures. In addition, other companies may define non-GAAP measures differently, which limits the ability of investors to compare non-GAAP measures of the Company to those used by our peer companies.
