Cautionary Language Regarding Forward-Looking Statements

This presentation contains forward-looking statements regarding the anticipated outcome and timing of various regulatory proceedings involving Pacific Gas and Electric Company (“Utility”), estimated losses and future insurance recoveries associated with the natural gas explosion and fire that occurred in a residential area of San Bruno, California on September 9, 2010 (“San Bruno Accident”), and forecasts of equity and debt financing for 2011. These statements are based on various assumptions and management’s current knowledge of relevant facts. Actual results could differ materially based on various factors, including:

- the outcome of pending and future regulatory or legislative proceedings or investigations, including the investigations by the National Transportation Safety Board (“NTSB”) and the California Public Utilities Commission (“CPUC”) into the cause of the San Bruno Accident and the safety of the Utility’s natural gas transmission pipelines in its northern and central California service territory, the CPUC’s investigation into the natural gas explosion and fire that occurred on December 24, 2008 in a residential home in Rancho Cordova, California, and whether the Utility is required to pay penalties, fines, or incur costs to comply with regulatory or legislative mandates that it is unable to recover through rates or insurance;
- the extent to which PG&E Corporation or the Utility incurs costs in connection with third-party claims or litigation, including those arising from the San Bruno Accident, that are not recoverable through insurance, rates, or from other third parties;
- the ability of PG&E Corporation, the Utility, and counterparties to access capital markets and other sources of credit in a timely manner on acceptable terms; and
- other factors and risks discussed in PG&E Corporation and the Utility’s 2009 Annual Report on Form 10-K and other reports filed with the Securities and Exchange Commission.

2011 General Rate Case

Sets revenue requirements for Gas and Electric Distribution and Electric Generation businesses for 2011 – 2013

No opposition to settlement between PG&E and nearly all active parties, subject to CPUC approval

2011 Settlement revenue requirement: $6.0B

<table>

Average annual capital expenditures: $2.2 - $2.3B
Attrition revenues: $180M and $185M for 2012 and 2013

Final decision expected Q1 2011
2011 Gas Transmission and Storage Rate Case

Sets revenue requirements, rates, terms and conditions for PG&E’s Gas Transmission and Storage services for 2011 – 2014

PG&E and all but one of the active parties are seeking approval of a settlement agreement

Settlement revenue requirement: $514M for 2011
$52M increase over 2010
$174M average annual capital expenditures

CPUC added a new phase to the case to address pipeline safety measures and emergency response procedures to ensure the safety and reliability of the GT&S system

Final decision expected by Q1 2011
New safety phase timing is TBD
Manzana Wind Project

Request to acquire, own, and operate the 189 - 246MW Manzana wind project in the Tehachapi region of Southern California

Request: $900M capital at 246MW capacity

Manzana Wind Project would be designed, developed, and constructed by Iberdrola Renewables, Inc.

• PG&E proposes to make progress payments throughout construction and take full ownership at completion
• Final size of the project would depend upon permitting requirements, land rights acquisition and turbine supply

Awaiting proposed decision
Sets revenue requirements for PG&E’s Electric Transmission business in 2011

Revenue Requirement Request: $1.026B  
Capital Expenditures: $810M

If approved, revenues would provide for additional transmission capacity and increased maintenance and replacement work on substations to improve overall reliability of our system

- Approved on 7/27/10

TO13 final decision expected by Q3 2011
PG&E received incentive payments in 2008 & 2009 totaling $75 million (pre-tax) for savings achieved in the 2006-2008 program cycle

Three proposed decisions have been issued for the final incentive payment for 2006-2008 program savings

- ALJ Pulsifer Proposed Decision (PD) - $0 million award
- Commissioner Peevey Alternate PD - $29 million award
- Commissioner Bohn Alternate PD - $40 million award

Final decision expected by end of 2010
2011 Financing Needs

Capital Structure: 52% Equity and 48% Debt

**Internal Equity Sources**
401(k) and DRIP Programs
~$200 million each year

**External Equity**
Equity Dribble Program initiated November 2010
Up to $400 million through 2011

**2011 Utility Debt Financing**
Forecasted need in excess of $1 billion
(including debt maturities of $500 million)
San Bruno Update

NTSB released preliminary report in October
Final report expected in about a year, with possible interim reports

Completed aerial resurvey of all 6,700 miles of transmission mains
A full on-the-ground leak survey will be completed by year end

Proposed Pipeline 2020 initiative
Explore industry modernization, improve pipeline management practices, and enhance coordination with public agencies

Complying with CPUC requests for information
Gas leak calls, possible valve automation, actual vs. authorized spending
San Bruno Financial Impact

Range of Estimates:
$220 - $400 million for third-party claims
$100 - $150 million for direct costs

Pre-tax charge to GAAP income in Q3 2010 of $238 million includes $220 million accrual for third-party claims

Expect insurance will cover most third-party claims
