Forward-Looking Statements

This presentation contains forward-looking statements within the meaning of the U.S. Private Securities Litigation Reform Act of 1995 that relate to, among other things, our future operations, prospects, developments, strategies, business growth and financial outlook for fiscal full-year 2019. Forward-looking statements generally are identified by words such as "believes," "estimates," "expects," "intends," "may," "projects," "outlook", "could," "should," "will," "continue" and other similar expressions. All statements other than statements of historical fact could be forward-looking statements, which speak only as of the date they are made, are not guarantees of future performance and are subject to certain risks, uncertainties and other factors, many of which are beyond our control and are difficult to predict.

Actual results could differ materially from those expressed in, or implied by, our forward-looking statements due to a variety of factors, including, but not limited to:

- increased oversight and regulation of the global payments industry and our business;
- impact of government-imposed restrictions on international payment systems;
- outcome of tax, litigation and governmental investigation matters;
- increasingly intense competition in the payments industry, including competition for our clients and merchants;
- proliferation and continuous evolution of new technologies and business models;
- our ability to maintain relationships with our clients, merchants and other third parties;
- brand or reputational damage;
- management changes;
- impact of global economic, political, market and social events or conditions;
- exposure to loss or illiquidity due to settlement guarantees;
- uncertainty surrounding the impact of the United Kingdom's withdrawal from the European Union;
- a disruption, failure, breach or cyber-attack of our networks or systems;
- our ability to successfully integrate and manage our acquisitions and other strategic investments; and
- other factors described in our filings with the U.S. Securities and Exchange Commission, including our Annual Report on Form 10-K for the year ended September 30, 2018, and our subsequent reports on Forms 10-Q and 8-K.

Except as required by law, we do not intend to update or revise any forward-looking statements as a result of new information, future events or otherwise.

Calculation of Adjusted Free Cash Flow

Management believes that presentation of adjusted free cash flow is useful to measure the Company's generation of cash available to first re-invest in the business and then return excess cash to shareholders through stock buybacks and cash dividends. During the three months ended December 31, 2018, the Company generated adjusted free cash flow of \$3.1 billion, and returned \$2.9 billion to investors through stock buybacks of \$2.3 billion and dividends paid of \$572 million. The Company defines adjusted free cash flow as cash provided by operating activities adjusted to reflect capital investments made in the business. Adjusted free cash flow is a non-GAAP performance measure and should not be relied upon as a substitute for measures calculated in accordance with U.S. GAAP. The following table reconciles as-reported net cash provided by operating activities to non-GAAP adjusted free cash flow.

<i>US\$ in millions</i>	Q1 2019 (Ending December 31, 2018)
Net cash provided by operating activities	\$3,294
Less: capital expenditures	(157)
Adjusted free cash flow	\$3,137
