Information denominated in U.S. dollars is calculated by applying an established U.S. dollar/local currency exchange rate for each local currency in which Visa Inc. volumes are reported ("Nominal USD"). These exchange rates are calculated on a quarterly basis using the established exchange rate for each quarter. To eliminate the impact of foreign currency fluctuations against the U.S. dollar in measuring performance, Visa Inc. also reports year-over-year growth in total volume, payments volume and cash volume on the basis of local currency information ("Constant USD"). This presentation represents Visa's historical methodology which may be subject to review and refinement.

Figures in the tables may not recalculate exactly due to rounding. The totals and percentages are calculated based on unrounded numbers.
