President's Message

2019 was an exciting year for IAMGOLD. We focused on operational improvements, advancements of engineering and further de-risking of projects while maintaining and strengthening our balance sheet. At Westwood, we aligned our cost structure with production levels. We delivered the first ore from the Saramacca deposit to the Rosebel Mill, thereby positioning Rosebel for a strong future. At Essakane, we announced positive results from the Carbon-In-Leach and Heap Leach Project feasibility study. This feasibility study produced a robust, low cost plan with optionality in the future which will be integrated into the Essakane optimization review that is currently underway. Our exploration team has done an outstanding job of maintaining a strong pipeline of projects. Their efforts were recognized by the Quebec Mineral Exploration Association for Discovery of Year for the Nelligan project in 2019.

Gord Stohart
President and Chief Executive Officer

We have also undergone some significant organizational changes since 2019. With Steve Letwin's decision to retire in Q1 of 2020, I took over the role of President and CEO of IAMGOLD. I joined IAMGOLD in 2007 and as COO, oversaw all aspects of operations and project development. I strongly believe in IAMGOLD's safe operational culture and commitment to Zero Harm. The organizational changes I have made since taking office reflects my desire to bolster our organizational commitment to sustainability and Zero Harm.

2019 put the organization in a strong position to weather a tumultuous year globally in 2020. IAMGOLD's corporate and site teams have done a remarkable job in ensuring business continuity at the onset of the COVID-19 outbreak. This year, the pandemic has shown us why our commitment to excellence in ESG is so important. At the outset of the pandemic, our operations were given the dual challenge of business continuity and supporting our host communities and governments. Within a few weeks, we marshalled our resources and made a commitment of US\$1.5 million in additional community support on top of our existing community investments. With a combination of in-kind donations and monetary support, our contributions ranged from bolstering food security, donating medical equipment and PPEs to bolstering COVID-19 aid funds. We have outlined the details of our support in this year's UN Sustainable Development Goals report.

The impact of COVID-19 has driven home for many how fragile our economies and societies are to certain risks. In that context, we would be remiss if we did not address the risks presented by climate change. IAMGOLD has spent the last few years steadily reducing our carbon footprint with investments in renewable energy at our operations. As an industry, the fight against climate change requires us to prioritize responsible energy use, maximize efficiencies, and explore strategies towards carbon neutrality. At IAMGOLD, discussions have begun in earnest on a path forward on achieving carbon neutral status as we position the business for a post-carbon economy. We have recently assembled an ESG committee comprised of senior corporate executives, senior operations management and corporate sustainability leads to develop a definitive action plan with set targets. Our goal is to have a preliminary plan in place by the end of 2021.

Also in 2020, recent events in the US and elsewhere have sparked global protests calling for greater justice and fair treatment for those who are underrepresented, impoverished and marginalized, particularly because of their race. At IAMGOLD we unequivocally condemn inequity, discrimination and hatred in all its forms and this is reflected explicitly in our Values: that we conduct ourselves with respect and embrace diversity. To put concrete actions in place to back up these words, we have established a working group led by the Executive Leadership Team, but incorporating a spectrum of individuals from across the organization, to consider Diversity and Inclusion at IAMGOLD.

“

Health and safety is core to IAMGOLD'S relentless pursuit of our Zero Harm vision. To maintain a healthy and safe workplace, we know it is about more than just policies and procedures – it is about building a culture of health and safety alongside our employees and promoting local community health and well-being.”

Health and safety is core to IAMGOLD's relentless pursuit of our Zero Harm vision. To maintain a healthy and safe workplace, we know it is about more than just policies and procedures- it is about building a culture of health and safety alongside our employees and promoting local community health and well-being. We continue to implement the Mind-Body-Achievement (MBA) program, Version 2.0, at all of our sites. In 2019, we were able to improve both the Total Recordable Incident (TRI) and Days Away, Restricted or Transferred (DART) metrics from 2018. We ended 2019 with TRI and DART rates of 0.87 and 0.51, which represents a decrease of 23% for each indicator from 2018. Our overall Lost Time Incident (LTI) rates increased by 8% from 2018. Unfortunately, we did have a fatality at Essakane in 2019. This incident acts as a sobering reminder that despite our progress to date, which has been significant, we cannot afford to be complacent. At both Rosebel and Westwood, significant improvements have been made in key health and safety metrics by both operations with both TRI and DART rates trending down from 2018. Essakane's DART and TRI rate did increase by 40% and 54% respectively. Overall, year over year, our performance in key health and safety indicators are trending downwards, and thus far, 2020 should be one of our best health and safety performance years yet.

In 2019, there was an unfortunate incident on our Rosebel concession in 2019 involving local police and unauthorized artisanal miners which resulted in the death of an unauthorized miner. Following the event we temporarily suspended mining activities while we worked with government authorities to investigate the incident and ensure proper mitigation measures were in place to prevent future incidents before resuming operations. Earlier this year, Rosebel, the Government of Suriname, the Traditional Authority of Nieuw Koffiekamp, Makambo and Kamp Mining NV, signed a joint letter to start work in the East Tailings Road Resource and the Roma East Protocol. With these agreements, a legal basis has been established to allow a maximum of 500 small scale miners from Nieuw Koffiekamp to work in these two locations in the Gross Rosebel concession. We view this tragic incident as an important reminder of our collective responsibility to work tirelessly to prevent such incidents. With the establishment of a comprehensive framework, clear and operation communications, allowance of small scale mining on our concessions, and the Rosebel Community Fund to support socio-economic development, it is our sincere hope to see all parties working in harmony going forward.

At IAMGOLD, we take our license to operate very seriously. At both Essakane and Rosebel, we have committed to funding the establishment of community funds. Going forward, the bulk of our funding for community investment initiatives will flow through these dedicated community funds, which have been established to ensure consistent funding on a year-to-year basis, thereby avoiding uncertainty with annual budgetary reviews. This is a particularly important change in the context of a highly cyclical industry like gold mining. The Rosebel Community Fund was officially launched in October 2019, with an endowment of US\$2.5 million from IAMGOLD. IAMGOLD has further committed to making an annual contribution to Fund, in order to make it sustainable over time. IAMGOLD finalized its participation in the Mining Fund for Local Development in Burkina Faso, which was established by the government. As part of our agreement, we have contributed US\$4 million to the Fund, with a commitment to ongoing annual contributions going forward.

I am also taking this opportunity to publicly commit to implementing the World Gold Council's Responsible Gold Mining Principles (RGMP), as a complement to our ongoing commitments under the Mining Association of Canada's Toward Sustainable Mining (TSM) initiative. We will be publishing our inaugural RGMP report in the fall of 2020, which will outline our ongoing gap assessment and an implementation timeline.

At Côté, we celebrated the signing of an impact and benefits agreement with Mattagami and Flying Post First Nations in the spring of 2019. This provided us with a strong foundation to move forward with the project, culminating in a positive construction decision by the Boards of IAMGOLD and Sumitomo in the summer of 2020. From the early days, we have committed to a collaborative approach to running and managing the Côté Gold project. As well as employment and environmental initiatives, a detailed socioeconomic management and monitoring plan is being co-developed with local First Nations to monitor the impact of the mine on neighbouring communities. This plan will be co-owned and co-managed by both Mattagami and Flying Post First Nations and IAMGOLD. Oversight and implementation will be provided through a joint environmental management committee.

“

As the new President and CEO of IAMGOLD, I am recommitting the organization to our core vision of Zero Harm. Our commitment to continually strive to reach the highest standards of human health and safety, minimize our impact on the environment and work co-operatively with our host communities.”

At Essakane, we celebrated the end of Phase 1 of the Triangle D'eau project. IAMGOLD, in partnership with the Government of Canada, Cowater and One Drop, invested US\$17.4 million in building and upgrading water infrastructure as well as promoting proper hygiene practices. IAMGOLD is actively working to identify partners for a phase 2 of this initiative to extend the water infrastructure beyond Dori to two other communities proximate to the Essakane mine.

IAMGOLD's approach to sustainability reflects the nature of our business. Capital-intensive industries such as mining can only earn returns over long time periods. It is critically important that our business is oriented in securing and maintaining our social license to operate over that same time horizon. Doing so requires sustained and consistent investment in programs to identify, manage and mitigate the impacts of our activities, while at the same time ensuring impacted communities and stakeholders benefit from our operations beyond the legal minimum and with initiatives that can endure and deliver benefits well beyond the life of the mining operation. IAMGOLD has a long corporate history of sustainability-oriented operations and part of our operational resiliency is rooted in strong sustainability practices. It is ingrained in our organizational culture to support a strong CSR program. We have consistently been recognized as a top corporate citizen and we take pride in sustainability. As the new President and CEO of IAMGOLD, I am recommitting the organization to our core vision of Zero Harm. Our commitment to continually strive to reach the highest standards of human health and safety, minimize our impact on the environment and work co-operatively with our host communities.

Sincerely,

Gord Stothart
President and Chief Executive Officer

Targets & Achievements

2019 TARGETS	AT-A-GLANCE	STATUS
<p>Initiate implementation of the Impact and Benefits Agreement with Mattagami First Nation and Flying Post First Nation.</p> <p>The IBA includes amongst other commitments, provisions for employment, training, and contracting along with a framework to support permitting. The IBA represents IAMGOLD's commitment to sustainable development of the Côté Gold project.</p>	●	<p>IAMGOLD has implemented an implementation committee with representatives from IAMGOLD and from both Mattagami and Flying Post First Nations. The implementation committee meets monthly to ensure the Impact and Benefits Agreement is being executed as negotiated and intended. Any issues with the implementation process can be raised during the meetings and IAMGOLD representatives are able to resolve it prior to the following meeting.</p>
<p>Continue permitting in support of the Côté Gold Project in Ontario.</p>	●	<p>Significant milestones have been achieved in 2019 and 2020 in securing key permits for the project.</p> <p>Since 2018, we have secured the Leave to Construct from the Ontario Energy Board, Forestry Resource License, Schedule 2 of the Fisheries Act, Section 35 of the Fisheries Act, Environmental Compliance Approval for Construction as well as authorizations under the Canadian Navigable Waters Act.</p> <p>Several other significant permits are outstanding at the provincial level from the Ministry of Natural Resources and Forestry and the Ministry of Environment, Conservation and Parks. IAMGOLD expects to receive approval for these permits in 2020 and 2021.</p>
<p>Secure mining permit to support development of the Boto project in Senegal.</p> <p>Our operations are designed with our commitment to responsible operating practices and compliance with legal requirements in mind. Responsible production means striving to reach the highest standards in human health and safety, minimizing the impact on the environment and working cooperatively with our host communities.</p>	●	<p>IAMGOLD secured the mining permit in 2020.</p>
<p>Update closure plan for Essakane.</p> <p>Every mine has a finite operational life and its eventual closure can contribute to significant social, economic and environmental changes to the receiving environment: flora and fauna and host communities. It is critical that all our sites have updated closure plans to ensure social and economic priorities and concerns are integrated into the plan.</p>	◐	<p>Essakane closure plan was finalized and will be submitted to the Burkinabe government for approval in late 2020.</p>
<p>Initiate ESIA for a potential biomass project at Rosebel Gold Mine.</p> <p>The fight against climate change ultimately requires our industry to prioritize responsible energy use, improve efficiencies, and explore new options for fuel switching and renewables. IAMGOLD is working at both the global and local level to advance these priorities and to reduce our carbon footprint.</p>	○	<p>The ESIA for a potential biomass project was put on hold as we investigate other renewable technology options.</p>
<p>Continue implementation of the Mind Body Achievement program by Axiom in order to increase health and safety awareness at all our sites.</p> <p>To maintain a healthy and safe workplace, we know it is about more than just policies and procedures - it is about building a culture of health and safety alongside our employees and promoting local community health and well-being.</p>	●	<p>We have continued implementation of the Mind Body Achievement program at all of our sites. Health and Safety performance has improved across the organization since 2018 and we expect 2020 to be a strong year for health and safety performance across the organization.</p>

2019 TARGETS	AT-A-GLANCE	STATUS
Finalize participation in the Natural Resources Canada Clean Growth Program for the production and use of desulphurized tailings as a tailings facility cover for Westwood Mine.	●	IAMGOLD has yet to access the funding available through the Natural Resources Canada Clean Growth Program. The design of the production and use of desulphurized tailings as a tailings facility cover is being finalized by our environment team at Westwood.
Initiative implementation the World Gold Council's Responsible Gold Mining Principles at all our operations.	◐	A high-level desktop analysis was conducted to identify organizational gaps. We have initiated a process to implement programs and policies to address any gaps such that IAMGOLD will be in full compliance with the World Gold Council's Responsible Gold Mining Principles by 2022.

● Achieved ◐ Partially achieved ○ Did not achieve

2020 TARGETS

<p>UN SDG 11: Sustainability Cities and Communities. Making cities and human settlements inclusive, safe, resilient and sustainable.</p>	<p>Develop and implement a socio-economic management and monitoring plan in collaboration with Mattagami and Flying Post First Nations to monitor and mitigate the impact of the mine on neighbouring communities.</p> <p>Our operations are designed with our commitment to responsible operating practices and compliance with legal requirements in mind. Responsible productions means striving to reach the highest standards in human health and safety, minimizing the impact on the environment and working cooperatively with our host communities.</p>
<p>UN SDG 8: Decent Work and Economic Growth. Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all.</p> <p>UN SDG 10: Reduce Inequalities. Reduced inequality within among countries and communities.</p> <p>UN SDG 11: Sustainability Cities and Communities. Making cities and human settlements inclusive, safe, resilient and sustainable.</p>	<p>Update Rosebel's strategic community engagement plan and monitor implementation of the Rosebel Community Fund.</p> <p>IAMGOLD is committed to respecting the natural environment and building strong community partnerships. Zero Harm is both a goal and a journey. Corporate Social Responsibility sentiment in the global mining industry has shifted from Right to Operate to Privilege to Operate in our host communities. From IAMGOLD's perspective, strong environmental, social and corporate governance practices have always been part of the way we do business. The establishment of the Rosebel Community Fund will ensure consistent funding on community investment initiatives on a year-to-year basis, thereby avoiding uncertainty with annual budgetary reviews.</p>
<p>UN SDG 7: Affordable and Clean Energy. Ensure access to affordable, reliable, sustainable and modern energy for all.</p> <p>UN SDG 13: Climate Action. Taking urgent action to combat climate change and its impacts.</p>	<p>Establish a defined action plan by 2025 to achieve net zero emissions targets. Provide annual updates on progress through the HSS report.</p> <p>The fight against climate change ultimately requires our industry to prioritize responsible energy use, improve efficiencies, and explore new options for fuel switching and renewables. IAMGOLD is working at both the global and local level to advance these priorities and to reduce our carbon footprint.</p>
<p>UN SDG 7: Affordable and Clean Energy. Ensure access to affordable, reliable, sustainable and modern energy for all.</p> <p>UN SDG 13: Climate Action. Taking urgent action to combat climate change and its impacts:</p>	<p>Implement sources of renewable energy in 3 out of 5 main operations by 2025 including commissioning a solar plant at our Boto Gold project.</p>
<p>UN SDG 12: Responsible Production and Consumption. Ensure sustainable consumption and production patterns.</p>	<p>Implement an environmental compliance system at the Côté Gold project.</p> <p>Our operations are designed with our commitment to responsible operating practices and compliance with legal requirements in mind. Responsible productions means striving to reach the highest standards in human health and safety, minimizing the impact on the environment and working cooperatively with our host communities. IAMGOLD and its partner, Sumitomo, is committed to ensuring that the Côté Gold project fulfills all of its obligations regulatory or otherwise.</p>

2020 TARGETS

UN SDG 12: Responsible Production and Consumption. Ensure sustainable consumption and production patterns.

Implement updated Mining Association of Canada's Towards Sustainable Mining Tailings and Water Management protocols across the organization.

IAMGOLD will initiate an external review of its tailings management practices to identify gaps in advance of the 2021 external audit on organizational TSM performance.

UN SDG 12: Responsible Production and Consumption. Ensure sustainable consumption and production patterns.

Continue implementation of the World Gold Council's Responsible Gold Mining Principles at all our operations.

UN SDG 12: Responsible Production and Consumption. Ensure sustainable consumption and production patterns.

Continue permitting in support of the Côté Gold Project in Ontario.

UN SDG 8: Decent Work and Economic Growth. Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all.

Continue implementation of the Impact and Benefits Agreement with Mattagami First Nation and Flying Post First Nation.

UN SDG 10: Reduce Inequalities. Reduced inequality within among countries and communities.

The IBA includes amongst other commitments, provisions for employment, training, and contracting along with a framework to support permitting. The IBA represents IAMGOLD's commitment to sustainable development of the Côté Gold project.

UN SDG 11: Sustainable Cities and Communities. Making cities and human settlements inclusive, safe, resilient and sustainable.

UN SDG 11: Sustainable Cities and Communities. Making cities and human settlements inclusive, safe, resilient and sustainable:

Continue negotiations with the Métis Nation of Ontario on a possible project agreement on the Côté Gold project.

UN SDG 11: Sustainable Cities and Communities. Making cities and human settlements inclusive, safe, resilient and sustainable:

Advance engagement and negotiations with the Pikogan community on Westwood and Fayolle project.

UN SDG 11: Sustainable Cities and Communities. Making cities and human settlements inclusive, safe, resilient and sustainable.

Update Essakane mine closure plan.

UN SDG 6: Clean Water and Sanitation. Ensuring availability and sustainable management of water and sanitation for all.

The process will go through the identification of possibilities to make productive the land where waste rock dumps and pits are located as well as surrounding degraded land after closure. The objective is to develop a closure plan that does not only cover physical restoration but also socio-economic enhancement of these disturbed lands and community space.

UN SDG 2: Zero Hunger. Ending hunger, achieving food security and improving nutrition, and promoting sustainable agriculture.

UN SDG 8: Decent Work and Economic Growth. Promoting sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all"

UN SDG 15: Life on Land. Protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification, and halt and reverse land degradation and halt biodiversity loss

Complete survey of spatial and seasonal distribution of chimpanzees and other mammals on the Boto mining concession and start the development of Boto's future biodiversity management plan through sustainable and integrated forestry management.

2019 Global Reporting Initiative Index

IAMGOLD prepares its Health, Safety and Sustainability Report under the Global Reporting Initiative (GRI) Standards, in accordance with the core option in the following table, although we have not obtained external assurance for this report.

GRI 101: Foundation 2016

General Disclosures

Organizational Profile			
Disclosure	Disclosure Required		
102-1	Name of the organization		IAMGOLD Corporation
102-2	Activities, brands, products, and services	a. Description of the organization's activities	IAMGOLD is a leading mid-tier gold mining company with four operations in three continents. A solid base of strategic assets in North America, South America and West Africa are complemented by development and exploration projects, and continued assessment of acquisition opportunities.
		b. Primary brands, products, services, including an explanation of any products or services that are banned in certain markets	The organization's primary product is gold.
102-3	Location of headquarters	a. Location of the organization's headquarters	IAMGOLD is headquartered in Toronto, Ontario.
102-4	Location of operations	a. Number of countries where the organization operates, and the names of countries where it has significant operations and/or that are relevant to the topics covered in the report.	<p>Gold Mines:* Essakane, Burkina Faso Rosebel, Suriname Westwood, Quebec, Canada</p> <p>Development Projects: Côté Gold, Ontario, Canada Boto Gold, Senegal</p> <p>Exploration Projects: Pitangui, Brazil Nelligan, Canada Monster Lake, Canada Loma Larga, Ecuador Camp Caiman, French Guiana Siribaya, Mali Eastern Borosi, Nicaragua Karita, Guinea</p> <p>Exploration Offices: Burkina Faso, Brazil, Canada, Colombia, Mali, Peru, Senegal, Suriname</p> <p>Joint Ventures:** Sadiola, Mali</p> <p>* Represent significant operations relevant to the sustainability topics covered in this report. ** The health, safety and sustainability performance of our joint venture interests are covered in the AngloGold Ashanti Limited Sustainability Report at www.anglogoldashanti.com/sustainability/reports/.</p> <p>Annual Information Form, Item I, page 140</p>
102-5	Ownership and legal form	a. Nature of ownership and legal form	Annual Information Form, Item I, page 12

f. An explanation of how the data have been compiled, including any assumptions made	Permanent = employees on permanent, indefinite contracts; Temporary = employees on temporary, fixed-term contracts; Full-time = 40 hours/week; Part-time = < 40 hours/week.					
102-9 Supply chain	a. A description of the organization's supply chain, including its main elements as they relate to the organization's activities, primary brands, products and services	At IAMGOLD, Global Supply Chain is in charge of putting in place contracts for the biggest spends, while every business unit is in charge of operational procurement (purchase orders, bids for smaller spends, etc.). We prioritize local procurement when possible. In the interest of transparency, we are publishing our top publicly traded supplier by dollar spent globally across all sites: Samsung C&T Corporation				
102-10 Significant changes to the organization and its supply chain	a. Significant changes to the organization's size, structure, ownership or supply chain, including: i. Changes in the location of, or changes in, operations, including facility openings, closings and expansions; ii. Changes in the share capital structure and other capital formation, maintenance and alteration operations (for private sector organizations); iii. Changes in the location of suppliers, the structure of the supply chain or relationships with suppliers, including selection and termination	No significant changes.				

Organizational Profile (continued)

Disclosure	Disclosure Required	
102-11 Precautionary Principle or approach	a. Whether and how the organization applies the Precautionary Principle or approach (G4-14)	<p>We take a precautionary approach to emergency response. IAMGOLD policy requires all site personnel to invoke emergency response measures when needed.</p> <p>Crisis Management Plans (CMPs) have been readied throughout the organization including at Corporate to define roles and provide guidelines for the successful and professional management of crisis incidents. These plans are externally audited as per the requirements of the Towards Sustainable Mining (TSM) standard. Crisis management training and workshops are held at least on a quarterly basis.</p>
102-12 External initiatives	a. A list of externally developed economic, environmental and social charters, principles, or other initiatives to which the organization subscribes, or which it endorses	"Industry Participation" Section - HSS Website
102-13 Membership of associations	a. A list of the main memberships of industry and other associations, and national or international advocacy organizations	"Industry Participation" Section - HSS Website

Strategy

Disclosure	Disclosure Required	
102-14 Statement from senior decision-maker	a. A statement from the most senior decision-maker of the organization (such as CEO, chair or equivalent senior position) about the relevance of sustainability to the organization and its strategy for addressing sustainability	See President's Message and 2019 Targets & Achievements

Ethics and Integrity

Disclosure	Disclosure Required	
102-16 Values, principles, standards, and norms of behaviour	a. A description of the organization's values, principles, standards, and norms of behaviour	<p>A driving philosophy for IAMGOLD has been our commitment to Zero Harm. We believe mining in a responsible manner and being accountable for our actions is at the core of who we are and we strive to empower everyone who has a stake in our success to play the part.</p> <p>Corporate Governance - IAMGOLD website</p> <p>Relevant Policies - HSS website</p> <p>HSS Policies - HSS website</p>
102-17 Mechanisms for advice and concerns about ethics	a. A description of internal and external mechanisms for: <ol style="list-style-type: none"> Seeking advice about ethical and lawful behaviour, and organizational integrity; Reporting concerns about unethical or unlawful behaviour, and organizational integrity 	<p>IAMGOLD conducts its business based on the principles of transparency, fairness, honesty, integrity and respect, and strives to ensure that any employee, contractor, representative or member of the public can report perceived misconduct without the risk of retaliation.</p> <p>These values are reflected in the IAMGOLD Whistleblower Policy, Code of Business Conduct and Ethics and Anti-Bribery and Anti-Corruption Policy. All Corporate Governance documents are publicly available on our website.</p> <p>IAMGOLD's Internal Audit department is an appraisal function established to independently examine and evaluate systems, processes and activities of the Corporation as an assurance service to the Audit Committee of the Board. The department also provides risk management, controls assessment, investigations and other services to management.</p> <p>KPMG LLP provides auditing services to IAMGOLD to ensure that our financial reporting are in accordance with IFRS and that we have proper internal controls in place over financial reporting.</p>

Governance

Disclosure	Disclosure Required	
102-18 Governance structure (G4-34)	a. Governance structure of the organization, including committees of the highest governance body	The objective of the Safety, Environment and Reserves (SER) Committee of the Board of Directors is to assist the Board in fulfilling its responsibilities with respect to health, safety, environment and community (HSS) matters at all projects and properties of IAMGOLD. Corporate Governance
	b. Committees responsible for decision-making on economic, environmental, and social topics	SER Committee Charter
102-20 Executive-level responsibility for economic, environmental, and social topics	a. Whether the organization has appointed an executive-level position or positions with responsibility for economic, environmental, and social topics b. Whether post holders report directly to the highest governance body	The Senior Vice President of Corporate Affairs, Health, Safety, and Sustainability and Senior Vice President of International Affairs and Sustainability are executive-level positions with responsibility over environmental, social (including human resources) and sustainability. The Chief Financial Officer oversees all economics-related issues. Both SVPs and the CFO report to the CEO of the organization.
102-29 Identifying and managing economic, environmental, and social impacts	a. Highest governance body's role in identifying and managing economic, environmental, and social topics and their impacts, risks, and opportunities - including its role in the implementation of due diligence processes	The Safety, Environment, and Reserves (SER) Committee of the Board of Directors assists the Board and the Audit and Finance Committee in fulfilling their responsibilities under their mandates and applicable laws and regulations in respect of health, safety, environment and community matters. The committees' responsibilities are mainly limited to oversight or review of issues and management, specifically the SVP of Corporate Affairs, HSS & People is responsible for developing and implementing policies and practices to all of health, safety and sustainability.
	b. Whether stakeholder consultation is used to support the highest governance body's identification and management of economic, environmental, and social topics and their impacts, risks, and opportunities	Social and environmental impact assessments are done on a semi-regular basis. All sites have dedicated community relations teams to regularly interface with nearby communities to identify impacts, risks and opportunities for members. Results of these assessments are shared with the aforementioned SER committee which includes all senior executives including the SVP of Corporate Affairs, HSS & People and the SVP of International Affairs and Sustainability as well as the Board of Directors.

Stakeholder Engagement

Disclosure	Disclosure Required	
102-40 List of stakeholder groups	a. A list of stakeholder groups engaged by the organization	IAMGOLD has thousands of stakeholders. At our projects and operations, our priority stakeholders include, but are not limited to, our employees, our host communities, civil society organizations and both local and national governments. At the corporate level, we share many of the same types of stakeholders, but we also interact regularly with shareholders and our own Board of Directors.

Stakeholder Engagement (continued)

Disclosure	Disclosure Required	
102-41 Collective bargaining agreements	a. Percentage of total employees covered by collective bargaining agreements (use data from Disclosure 102-7 as the basis for calculating the percentage)	<p>Rosebel: 64%</p> <p>The Collective Labour Agreement (CLA) is applicable (for the duration as agreed between Rosebel Gold Mine and Rosebel Gold Workers Organization) for the unionized employees (a member of the Union), paying contribution to the RGWO.</p> <p>However, due to article 15 of the law on collective labour agreements the following is applicable for the remaining non-unionized employees:</p> <p>"If the CLA does not provide otherwise, the employer who is bound by this agreement is obliged, during the term of the agreement, to also comply with the provisions regarding employment conditions with the employment contracts, as referred to in the CLA, which he concerns, with the employees, which are not bound by this collective labour agreement".</p> <p>So therefore the secondary benefits, etc. are also applicable for those not unionized.</p> <hr/> <p>Essakane: 89.46%</p> <hr/> <p>Westwood: 69%</p> <hr/> <p>Corporate: Not applicable</p> <hr/> <p>Exploration: Not applicable</p>
102-42 Identifying and selecting stakeholders	a. The basis for identifying and selecting stakeholders with whom to engage	We encourage our sites to take an inclusive approach to stakeholder identification and to cast a wide net. The identification process is an ongoing exercise in which stakeholders are directly involved. We also encourage our sites to pay extra attention to vulnerable groups that may be excluded from traditional forms of engagement. Each year we engage with thousands of local, regional and national level stakeholders in the countries where we operate.
102-43 Approach to stakeholder engagement	a. The organization's approach to stakeholder engagement, including frequency of engagement by type and by stakeholder group, and an indication of whether any of the engagement was undertaken specifically as part of the report preparation process	<p>Our engagement approach is unique to every site. The frequency and intensity of our meetings depends on the local, regional and national stakeholder context. While each site has the flexibility to design its own engagement program, guidance is provided at the corporate level through various documents, which include:</p> <p>The Sustainability Policy</p> <p>The Management Framework for Sustainability (not publicly available).</p> <p>Community Relations Handbook (not publicly available).</p> <p>Overall, our engagement is guided by principles of honesty and transparency, and by the construction of meaningful relationships. Engagement is done on both an ad hoc and a systematic basis. We respond to incoming questions from communities, civil society, investment firms and others, but we also have management systems that set out ongoing engagement schedules, track meetings and measure the general satisfaction of our engagement. We meet with stakeholders in formal settings, like the Annual General Meeting, community open houses or in scheduled meetings with community consultation committees. We also take advantage of less formal opportunities such as individual consultations and community "walkabouts".</p>
102-44 Key topics and concerns raised	<p>a. Key topics and concerns that have been raised through stakeholder engagement, including:</p> <p>i. How the organization has responded to those key topics and concerns, including through its reporting;</p> <p>ii. The stakeholder groups that raised each of the key topics and concerns</p>	<p>Key topics and concerns have related mainly to health and safety, small-scale mining, indigenous engagement, local procurement, renewable energy, and mine closure.</p> <hr/> <p>There are currently no significant concerns. Any concerns raised by stakeholders are reported through our annual HSS report.</p> <hr/> <p>Not available</p>

102-46 Defining report content and topic Boundaries	a. An explanation of the process for defining the report content and the topic Boundaries	<p>IAMGOLD has presented information in this report that the Company regards as material to its operations and stakeholders. Material issues are those considered to be consistent with IAMGOLD's Health and Safety Policy and its Sustainability Policy. They also take into account the issues raised by our stakeholders.</p> <p>At both the corporate and site level, IAMGOLD continually assesses what issues are material to its stakeholders. Included in this group are IAMGOLD employees, communities, governments and other impacted or interested parties.</p> <p>Our management systems, including our risk management process, identify aspects that present a material risk to an operation or the Company. These are prioritized to prevent accidents, impacts on the environment, and incidents that may involve communities or other stakeholders.</p> <p>The sustainability department within each IAMGOLD site undertakes its own materiality process in both formal and informal ways, but primarily through discussion with stakeholders, and continuous updating of risk registers, stakeholder maps, grievance registers and other consultation documents. Similar exercises are conducted at the corporate office and include strategic planning reviews of stakeholder comments to determine material issues on short-, medium- and long-term bases.</p> <p>Data has been provided on operations for which IAMGOLD is the owner-operator: Westwood, Essakane and Rosebel. The health, safety and sustainability performance of our joint venture interests in Sadiola and Yatela are covered by the AngloGold Ashanti Sustainability Report at anglogoldashanti.com/sustainability/reports.</p> <p>Information is provided where feasible for exploration offices, and we are working on closing information gaps going forward where data is not currently being tracked.</p>
	b. An explanation of how the organization has implemented the Reporting Principles for defining report content	See 102-46a.
102-47 List of material topics	a. A list of the material topics identified in the process for defining report content	See 102-46a IAMGOLD continues to work toward achieving our Zero Harm commitment. Please view our Targets & Achievements page for 2020 objectives and our President's Message for an overview of 2019.
102-48 Restatements of information	a. The effect of any restatements of information given in previous reports, and the reasons for such restatements	There are no restatements from the 2018 report.
102-49 Changes in reporting	a. Significant changes from previous reporting periods in the list of material topics and topic Boundaries	IAMGOLD decided to expand the topic boundaries for significant air emissions and will be publishing data as it relates to Persistent Organic Pollutants (POP) and Hazardous Air Pollutants (HAP).
102-50 Reporting period	a. Reporting period for the information provided	2019 calendar year

Indirect Economic Impacts

Disclosure	Disclosure Required	
103-1 Explanation of the material topic and its Boundary	a. An explanation of why the topic is material	IAMGOLD recognizes that in the countries where we operate, our investments contribute significantly to the local, regional and national economies, which is particularly important in developing countries like Suriname or Burkina Faso.
	b. The Boundary for the material topic, which includes a description of: <ul style="list-style-type: none"> i. Where the impacts occur; ii. The organization's involvement with the impacts. For example, whether the organization has caused or contributed to the impacts, or is directly linked to the impacts through its business relationships 	Indirect economic impacts occur up to the national level in countries where IAMGOLD operates, currently being Canada, Burkina Faso and Suriname. The majority of tangible impacts occur in the latter two nations, as they are developing. IAMGOLD has provided both direct and indirect contributions to community development aspects such as education and health among others. Please refer to our annual HSS report on how we are advancing UN Sustainable Development Goals in our host communities.
	c. Any specific limitation regarding the topic Boundary	Regional impacts of our operations are not accounted for.
103-2 The management approach and its components	a. An explanation of how the organization manages the topic	<p>IAMGOLD manages indirect economic impacts by endorsing our Zero Harm commitment, which considers the health and well-being of the environment, individuals and communities. All sites must demonstrate that the investment strategy is linked to both community and company objectives. Community investment strategies must include baseline information on health, education and economic indicators; demonstration of a participatory approach to decision-making on community investment; identification of civil society, government and community partners to help deliver community development objectives; and a project evaluation procedure and measured results. A comprehensive environmental and social impact assessment (ESIA) is also conducted prior to construction at any site. All of our sites have active closure plans that take into account social impacts. Our sites also conduct needs assessment studies on a periodic basis with local communities.</p> <p>In 2019, IAMGOLD inaugurated the Rosebel Community Fund. IAMGOLD has committed to an initial US \$2.5 million for the Fund. This Fund will allow the mine to consistently fund projects in areas that are in greatest need for investment.</p> <p>Essakane has also come to an agreement with the Burkinabe government to contribute towards the Mining Local Development Fund. Following the agreement, IAMGOLD has made a contribution of US \$3.4 million for 2020 and an additional US \$6 million in retroactive payments for 2017-2019. This Fund will allow for better allocation of resources to projects and in communities with the greatest need.</p>
	b. A statement of the purpose of the management approach	The purpose of the management of indirect economic impacts is to ensure that our contributions support sustainable development within the communities that we operate in.
	c. A description of the following, if the management approach includes that component: <ul style="list-style-type: none"> i. Policies ii. Commitments iii. Goals and targets iv. Responsibilities v. Resources vi. Grievance mechanisms vii. Specific actions, such as processes, projects, programs and initiatives 	According to IAMGOLD's sustainability standard, each site must prepare a Community Investment Strategy as part of their Environmental and Social Management System. The Investment Strategy will outline long-term goals for community investment, a breakdown of milestones required to achieve the envisioned end state, and annual plans and projects required to achieve said milestones.

Indirect Economic Impacts (continued)

Disclosure	Disclosure Required	
<p>103-3 Evaluation of the management approach</p>	<p>For each material topic, the reporting organization shall report the following information:</p> <ul style="list-style-type: none"> a. 203-1 Infrastructure investments and services supported	<p>a. Extent of development of significant infrastructure investments and services supported</p> <p>i. What was the extent of the development?</p> <p>ii. What was the cost?</p> <p>iii. What was the duration?</p> <p>b. Current or expected impacts on communities and local economies, including positive and negative impacts where relevant</p> <p>c. Whether these investments and services are commercial, in-kind, or pro bono engagements</p>	<p>Rosebel Gold Mines (RGM) conducted a needs assessment in seven (7) Communities Of Interest (COIs) from 2017-2018. The Needs assessment was conducted by an external consultant to identify the current needs of the communities of interest. One of the needs identified was investment in the upkeep of road infrastructure.</p> <p>In addition, health infrastructure was also identified as an area of need. Investment was made towards the renovation and construction of the Suriname Eye Care Centre of the Academic Hospital in Paramaribo.</p> <p>US \$7,600 for the road + \$CDN 250,000 for the Eye Care Centre</p> <p>On average, community road maintenance does not take more than a day. Not all of the villages submitted requests for road maintenance. In 2019, the road maintenance was done for two of the communities of interest.</p> <p>2 years for the Eye Care Centre.</p> <p>Improved local road conditions and improved access to health care facility</p> <p>Pro bono</p>	<p>The "Water and Sustainable Economic Growth in the Sahel (Triange d'Eau)" project aims to accelerate sustainable economic growth in Burkina Faso. It aims at the following objectives:</p> <ol style="list-style-type: none"> 1. Improving livelihoods by supporting market gardening, livestock activities and microfinance 2. The supply of drinking water and sanitation 3. Strengthening local governance to better support economic activities and service provision by local communities. <p>The project focuses on the municipalities of Dori, Falagountou and Gorom-Gorom.</p> <p>Phase 1 Funding: Project cost: CDN \$17.6 million IAMGOLD Contribution: CAD \$2.315 million</p> <p>4 years</p> <p>Water and sustainable economic growth in the Sahel region: Supply in potable water for 45 people and access to means of production and sanitation facilities; capacity building.</p> <p>Pro bono</p>	<p>No significant investments were made during the reporting period in either infrastructure or services.</p>

Indirect Economic Impacts (continued)

Disclosure	Disclosure Required	Rosebel	Essakane	Westwood
203-2 Significant indirect economic impacts	<p>a. Examples of significant identified indirect economic impacts of the organization, including positive and negative impacts (e.g., changes in productivity, economic development in areas of high poverty, addressing social/environmental conditions, enhanced skills and knowledge, number of jobs supported in supply chain)</p> <p>b. Significance of the indirect economic impacts in the context of external benchmarks and stakeholder priorities, such as national and international standards, protocols, and policy agendas</p>	<p>In the district of Brokoondo, Rosebel Gold Mines offers the locals the largest employment opportunity. An estimated 32% of Rosebel employees are local. The mine also presents significant procurement opportunities as well.</p> <p>The local contracting policy of RGM requires the company to make use of local suppliers where possible e.g., infrastructure and labour services. The indirect economic impact of this policy is materialized in beneficial spin offs such as job opportunities for locals. This helps the local economy and governmental targets in achieving UN SDGs.</p>	<ul style="list-style-type: none"> • Agriculture: increase of agricultural and livestock productivity thanks to improved seed support and extension programs, increase of forage (hay) availability and agro-industrial by-products for communities bordering the mine, strengthening of capacity of market gardeners, provision of market garden produce for local communities, implementation of an agricultural co-operative for the empowerment of market gardens. • Hydraulics and sanitation: increase of the drinking water supply rate of the population (54% in 2009 against 99% in 2017, INSUCO and DREP study), capacity building of water users for the sustainable management of hydraulic structures, due to the Triange d'Eau program • Local procurement: capacity building of local suppliers, about 1000 indirect jobs generated by local suppliers • Microcredit: increase in income thanks to the financing and microcredit programs, increase in the number of beneficiaries through the solidarity groups strategy • Health: improvement of health through the program to fight against HIV/AIDS, tuberculosis, malaria, the fight against malnutrition, ambulances donations for evacuations, increase the supply of care through construction of CSPS (local public health facilities) and support of pharmaceutical depots <p>These impacts significantly contribute to the achievement of objectives: PNDES (National Economic and Social Development Program), national and international potable water access standards, health and education services, Burkina Faso's Sustainable Development Objectives.</p>	<p>Significant employment provided to local community as well as procurement opportunities. Investment in the community has also increased quality of life.</p> <p>Our operation helps the local economy and governmental targets in achieving UN SDGs.</p>

Procurement Practices

Disclosure	Disclosure Required	
103-1 Explanation of the material topic and its Boundary	a. An explanation of why the topic is material	The procurement of certain goods and services is essential to processes within IAMGOLD operations. It also has a large impact for communities we operate in, with the potential for capacity building of local business by providing local goods and services to our operations.
	b. The Boundary for the material topic, which includes a description of: <ul style="list-style-type: none"> i. Where the impacts occur; ii. The organization's involvement with the impacts. For example, whether the organization has caused or contributed to the impacts, or is directly linked to the impacts through its business relationships 	Procurement occurs at all levels of IAMGOLD operations, from production at sites to activities within corporate. The impacts of procurement occur both directly with the corporation as well as through our business relationships.
	c. Any specific limitation regarding the topic Boundary	Formalized local procurement and business development programs are being developed at sites in an effort to maximize the shared economic benefits of company-wide local procurement practices. Our company-wide policy on the purchase of goods and services encourages mine sites to give priority to local suppliers, provided they are competitive. "Competitive" refers to the total cost, delivery, and quality of the good or service. Where two suppliers are considered equal, the local supplier should prevail.
103-2 The management approach and its components	a. An explanation of how the organization manages the topic	Formalized local procurement and business development programs are being developed at sites in an effort to maximize the shared economic benefits of company-wide local procurement practices. Our company-wide policy on the purchase of goods and services encourages mine sites to give priority to local suppliers, provided they are competitive. "Competitive" refers to the total cost, delivery, and quality of the good or service. Where two suppliers are considered equal, the local supplier should prevail. A Supplier Code of Conduct is also being written and will be implemented by 2021.
	b. A statement of the purpose of the management approach	IAMGOLD is committed to providing opportunities for communities associated with our operations and to sharing in the benefits which flow from our activities. The purpose of this management system is to fulfil said commitment.
	c. A description of the following, if the management approach includes that component: <ul style="list-style-type: none"> i. Policies ii. Commitments iii. Goals and targets iv. Responsibilities v. Resources vi. Grievance mechanisms vii. Specific actions, such as processes, projects, programs and initiatives 	Section 7.2 of the Code of Business Conduct and Ethics . A Supplier Code of Conduct is also being written and will be implemented by 2021.

Procurement Practices (continued)

Disclosure	Disclosure Required				
103-3	Evaluation of the management approach	For each material topic, the reporting organization shall report the following information: a. An explanation of how the organization evaluates the management approach, including: i. The mechanisms for evaluating the effectiveness of the management approach; ii. The results of the evaluation of the management approach; iii. Any related adjustments to the management approach	Audits and verification of the effectiveness of management of this topic are conducted on a site level basis by our internal audit team. No significant changes were made in 2019.		
204-1	Proportion of spending on local suppliers		Rosebel	Essakane	Westwood
	a. Percentage of the procurement budget used for significant locations of operation that is spent on suppliers local to that operation (such as percentage of products and services purchased locally)				
	i. Percentage of total procurement spent on local suppliers (community/local vendors)	0.40%	3.90%	76%	
	ii. Percentage of total procurement spent on national vendors (i.e., vendors based in Ouaga or Paramaribo)	99.60%	62%	99%	
	b. The organization's geographical definition of 'local'	All suppliers that are based in Brokopondo region, or originate from Brokopondo. These suppliers all have family ties with the Brokopondo region, but due to administrative ease offices are based in Paramaribo.	Local: It refers to purchases made in Burkina Faso and purchases made in the Sahel region (the mine's host region) are specifically recorded.	Abitibi-Témiscamingue region	
	i. Where are the 'local' suppliers located? What regions/villages/towns?	In several villages of District Brokopondo, primarily from the 7 communities of interest: Klaaskreek, Nieuw Lombe, Brownsweg, Balingsoela, Marshall Kreek and Nieuw Koffiekamp.	For the Sahel region, they are mostly from the towns and villages of Essakane site, Falagountou, Gorom-Gorom, Dori, Seytenga, Djibo and Yalgho.	Rouyn-Noranda, Lasarre, Amos, Val-d'Or	
	c. The definition used for 'significant locations of operation'	Rosebel Mine	Essakane Mine	Westwood Mine	

Anti-Corruption

Disclosure	Disclosure Required	
103-1 Explanation of the material topic and its Boundary	a. An explanation of why the topic is material	As a corporation with global operations, it is increasingly important to ensure a comprehensive program is in place which considers a broad scope of environments, communities, and individuals and protects them from the adverse effects of corrupt behaviour.
	b. The Boundary for the material topic, which includes a description of: <ul style="list-style-type: none"> i. Where the impacts occur; ii. The organization's involvement with the impacts. For example, whether the organization has caused or contributed to the impacts, or is directly linked to the impacts through its business relationship 	IAMGOLD ensures all directors, employees, contractors and representatives of the company adhere to IAMGOLD's Anti-Bribery and Anti-Corruption Standard and Policy .
	c. Any specific limitation regarding the topic Boundary	Limited to IAMGOLD and supplier activities.
103-2 The management approach and its components	a. An explanation of how the organization manages the topic	IAMGOLD manages anti-corruption by ensuring all directors, employees, contractors, and representatives of the company worldwide operate in alignment with the Code of Business Conduct and Ethics. Furthermore, the corporation requires all of the aforementioned stakeholders to report violations of said Code.
	b. A statement of the purpose of the management approach	IAMGOLD is committed to mitigating corruption in every level of company activity. As outlined in our Business Conduct and Ethics Standard, the corporation aims to eradicate instances of discrimination, harassment, substance abuse, employment inequality, violations of privacy, conflicts of interest, and theft while encouraging protection of the environment, safe working conditions, fair competition, and professional relationships.
	c. A description of the following, if the management approach includes that component: <ul style="list-style-type: none"> i. Policies ii. Commitments iii. Goals and targets iv. Responsibilities v. Resources vi. Grievance mechanisms vii. Specific actions, such as processes, projects, programs and initiatives 	See Code of Business Conduct and Ethics .
103-3 Evaluation of the management approach	For each material topic, the reporting organization shall report the following information: <ul style="list-style-type: none"> a. An explanation of how the organization evaluates the management approach, including: <ul style="list-style-type: none"> i. The mechanisms for evaluating the effectiveness of the management approach; ii. The results of the evaluation of the management approach; iii. Any related adjustments to the management approach 	Audits and verification of the effectiveness of management of this topic are conducted on a site level basis. No significant changes were made in 2019.

Anti-Corruption (continued)

Disclosure	Disclosure Required						
205-1 Operations assessed for risks related to corruption	a. Total number and percentage of operations assessed for risks related to corruption	IAMGOLD assesses risk related to corruption for all business units through the annual enterprise risk management process.					
	b. Significant risks related to corruption identified through the risk assessment	There are no significant risks related to corruption identified through the risk assessment.					
205-2 Communication and training about anti-corruption policies and procedures		Rosebel	Essakane	Westwood	Corporate	Exploration	
	a. Total number and percentage of governance body members that the organization's anti-corruption policies and procedures have been communicated to , broken down by region	100% at Corporate Board-Level					
	b. Total number and percentage of employees that the organization's anti-corruption policies and procedures have been communicated to , broken down by employee category and region	Management:	44 (100%)	Management: 45 (100%)	Management: 19 (100%)	Management: 78 (100%)	Management: 34 (100%)
		Non-management:	500 (40%)	Non-management: 2,432 (100%)	Non-management: 487 (87%)	Non-management: 87 (100%)	Non-management: 140 (100%)
	c. Total number and percentage of business partners that the organization's anti-corruption policies and procedures have been communicated to , broken down by type of business partner and region. Describe if the organization's anti-corruption policies and procedures have been communicated to any other persons or organizations	All suppliers and contractors are aware of anti-corruption policies and procedures.					
d. Total number and percentage of governance body members that have received training on anti-corruption, broken down by region	100% at Corporate Board-level						
e. Total number and percentage of employees that have received training on anti-corruption, broken down by employee category and region	Management:	44 (100%)	Management: 45 (100%)	Management: 19 (100%)	Management: 78 (100%)	Management: 34 (100%)	
	Non-management:	500 (40%)	Non-management: 2,432 (100%)	Non-management: 487 (87%)	Non-management: 87 (100%)	Non-management: 140 (100%)	

GRI 300: Environmental Standards Series

Environmental Indicators

Materials		
Disclosure	Disclosure Required	
103-1	Explanation of the material topic and its Boundary	<p>a. An explanation of why the topic is material</p> <p>Many materials are required at different stages of the gold production process. We monitor materials deemed to be significant, which includes explosives, tires and energy used for mining activities and the reagents used for mineral processing.</p> <p>The materials reported are significant because they are considered critical inputs to extract our final product and have the potential to result in environmental impacts if not managed appropriately. Other materials used by mining and milling activities are not considered to be significant because they generally present less risk and tend to be used in smaller quantities.</p>
		<p>b. The Boundary for the material topic, which includes a description of:</p> <ul style="list-style-type: none"> i. Where the impacts occur; ii. The organization's involvement with the impacts. For example, whether the organization has caused or contributed to the impacts, or is directly linked to the impacts through its business relationships <p>This topic boundary is limited to materials provided to IAMGOLD managed operations and advanced exploration sites by various company suppliers.</p> <p>Mining is a primary industry. As IAMGOLD is a producer of primary raw materials (gold) with final products transported in bulk, materials used for packaging are considered non-material.</p>
		<p>c. Any specific limitation regarding the topic Boundary</p> <p>Materials used at exploration and closed sites are not considered significant as there are no active production or mineral processing activities. Additionally, joint venture projects where IAMGOLD is not the operator are not included.</p>
103-2	The management approach and its components	<p>a. An explanation of how the organization manages the topic</p> <p>Material inventories are tracked and updated routinely for all IAMGOLD managed operations. Recycling, reusing, and reclaiming of input materials within mining and milling operations are encouraged, where feasible. Additional opportunities for salvage are also explored.</p>
		<p>b. A statement of the purpose of the management approach</p> <p>The purpose of management of this topic is to:</p> <ul style="list-style-type: none"> - Optimize the use of input materials; and - Ensure materials are handled, stored and transported appropriately to prevent accidental release to the surrounding environment.
		<p>c. A description of the following, if the management approach includes that component:</p> <ul style="list-style-type: none"> i. Policies ii. Commitments iii. Goals and targets iv. Responsibilities v. Resources vi. Grievance mechanisms vii. Specific actions, such as processes, projects, programs and initiatives <p>Sustainability Policy</p> <p>The IAMGOLD Sustainability Policy outlines our commitment to continual improvement in environmental protection, pollution prevention, community awareness and economic performance.</p> <p>Sites are expected to meet or exceed relevant laws and regulations. All of our sites have procedures in place for the safe transport, storage, handling and disposal of cyanide and other hazardous substances. Further, continuous improvement programs have been implemented to increase efficiency in the use of explosives and fuels.</p>
103-3	Evaluation of the management approach	<p>For each material topic, the reporting organization shall report the following information:</p> <ul style="list-style-type: none"> a. An explanation of how the organization evaluates the management approach, including: <ul style="list-style-type: none"> i. The mechanisms for evaluating the effectiveness of the management approach; ii. The results of the evaluation of the management approach; iii. Any related adjustments to the management approach <p>Audits and verification of the effectiveness of management of this topic are conducted on a site level basis.</p> <p>As a member of the Mining Association of Canada (MAC), IAMGOLD adheres to the Towards Sustainable Mining (TSM) protocols at all our sites. Every three years, it is required that an external verification is conducted to verify level of adherence with the TSM protocols. An internal audit was conducted on tailings and a TSM external audit was conducted in 2018. The results of the audit have been reviewed to identify areas of improvement. An external audit is slated to be conducted in 2020.</p>

Materials (continued)

Disclosure	Disclosure Required	Rosebel	Essakane	Westwood
301-1	Materials used by weight or volume			
	a. Total weight or volume of non-renewable materials (listed below) used during the reporting period (tonnes):	23,879.66	24,241.50	6,278.02
	i. Cyanide	5,104.75	7,059.00	579.61

	Hydrocarbon solvent	18.95	0.00	0.00
	Transmission oil	381.04	211.27	0.00
	b. Total weight or volume of any renewable materials used during the reporting period (tonnes):	Not applicable		
	i. Other	Not applicable		

Energy

Disclosure	Disclosure Required	
103-1 Explanation of the material topic and its Boundary	a. An explanation of why the topic is material	Use of energy contributes to greenhouse gas (GHG) production and is a significant operating cost.
	b. The Boundary for the material topic, which includes a description of: <ol style="list-style-type: none"> i. Where the impacts occur; ii. The organization's involvement with the impacts. For example, whether the organization has caused or contributed to the impacts, or is directly linked to the impacts through its business relationships 	This topic Boundary includes energy use at IAMGOLD managed operations and exploration sites. Energy intensive activities include crushing, grinding, ventilation, pumping, transport, and drilling.
	c. Any specific limitation regarding the topic Boundary	Energy use at closed sites is not considered significant as there are no active production or mineral processing activities. Additionally, joint venture projects where IAMGOLD is not the operator are not included.
103-2 The management approach and its components	a. An explanation of how the organization manages the topic	Energy use is regularly tracked and assessed to identify opportunities to improve energy efficiency and reduce GHG emissions, promote energy conservation and the use of renewable energy. Both Essakane and Rosebel partially utilize solar energy. IAMGOLD is constantly evaluating renewable energy sources for implementation at its sites to reduce the operation's carbon footprint.
	b. A statement of the purpose of the management approach	As per the Towards Sustainable Mining (TSM) initiative, the purpose of management of this topic is to: <ul style="list-style-type: none"> - Optimize energy use and promote use of renewable sources; - Comply with applicable regulatory requirements; and - Reduce operating costs.
	c. A description of the following, if the management approach includes that component: <ol style="list-style-type: none"> i. Policies ii. Commitments iii. Goals and targets iv. Responsibilities v. Resources vi. Grievance mechanisms vii. Specific actions, such as processes, projects, programs and initiatives 	<p>Energy and Greenhouse Gas Emissions Management Standard</p> <p>As per IAMGOLD's Energy and Greenhouse Gases Emissions Management Standard, we recognize that efficient management of energy is required to achieve our business strategy and provide benefits to our stakeholders. Further, effective energy management will directly contribute to operational cost improvements and help mitigate environmental impacts. Our key energy management objectives are to continuously improve energy performance, and support the introduction of clean and renewable energy.</p> <p>One of our priority goals is to increase the proportion of renewable energy for the Company's total energy requirements (target 15% of power generated by renewables).</p>
103-3 Evaluation of the management approach	<p>For each material topic, the reporting organization shall report the following information:</p> <p>a. An explanation of how the organization evaluates the management approach, including:</p> <ol style="list-style-type: none"> i. The mechanisms for evaluating the effectiveness of the management approach; ii. The results of the evaluation of the management approach; iii. Any related adjustments to the management approach 	<p>As a member of the Mining Association of Canada (MAC), IAMGOLD adheres to the Towards Sustainable Mining (TSM) protocols at all our sites. Every three years, it is required that an external verification is conducted to verify level of adherence with the TSM protocols. An internal audit was conducted on tailings and a TSM external audit was conducted in 2018. The results of the audit are currently being reviewed to identify areas of improvement. An next external audit is slated to be conducted in 2020.</p> <p>All IAMGOLD operations conducted the annual TSM self-assessment for the Energy and GHG Emissions Management Protocol.</p> <p>Annual results are available in the TSM Progress Reports.</p>

Energy (continued)

Water

Disclosure	Disclosure Required	
103-1 Explanation of the material topic and its Boundary	a. An explanation of why the topic is material	Water is a key resource for the gold extraction process and is shared with our host communities. We must be responsible water stewards in our operations.
	b. The Boundary for the material topic, which includes a description of: <ul style="list-style-type: none"> i. Where the impacts occur; ii. The organization's involvement with the impacts. For example, whether the organization has caused or contributed to the impacts, or is directly linked to the impacts through its business relationships 	This topic Boundary includes water use at IAMGOLD managed operations and advanced exploration sites on a catchment level basis, as available.
	c. Any specific limitation regarding the topic Boundary	Water use at exploration and closed sites is not considered significant as there are no active production or mineral processing activities. Additionally, joint venture projects where IAMGOLD is not the operator are not included.
103-2 The management approach and its components	a. An explanation of how the organization manages the topic	IAMGOLD is committed to water stewardship. Water quality and quantity is regularly monitored, including water treated and discharged as applicable. Every operation is expected to maintain a water management plan and associated water balance.
	b. A statement of the purpose of the management approach	The purpose of management of this topic is to: <ul style="list-style-type: none"> - Comply with applicable regulatory requirements; - Efficiently manage water resources; and - Recycle and reuse water for mineral processing, where possible.
	c. A description of the following, if the management approach includes that component: <ul style="list-style-type: none"> i. Policies ii. Commitments iii. Goals and targets iv. Responsibilities v. Resources vi. Grievance mechanisms vii. Specific actions, such as processes, projects, programs and initiatives 	<p>Water Management Standard</p> <p>As per our Water Management Standard, we recognize the importance of environmentally sustainable and socially equitable water use. We are dedicated to employing efficient water management and water conservation practices to ensure access to clean water for all users, now and in the future. Water management strategies will address all aspects of the operation, including closure planning, reclamation, tailings management, discharge water quality, potable water and groundwater quality.</p>

Water (continued)

Disclosure	Disclosure Required			
103-3 Evaluation of the management approach	For each material topic, the reporting organization shall report the following information: a. An explanation of how the organization evaluates the management approach, including: i. The mechanisms for evaluating the effectiveness of the management approach; ii. The results of the evaluation of the management approach; iii. Any related adjustments to the management approach	As a MAC member, IAMGOLD has endorsed the TSM Water Stewardship Policy Framework. IAMGOLD is slated to conduct an external audit on its water management in 2021.		
303-1 Water withdrawal by source		Rosebel	Essakane	Westwood
	a. Total volume of water withdrawn (m ³) – the sum of all water drawn into the boundaries from all sources during the reporting period:			
	i. Surface water, including water from wetlands, rivers, lakes, and oceans	0.00	0.00	546,062.00
	ii. Groundwater	1,193,413.67	1,180,074.00	874,960.00
	iii. Rainwater collected directly and stored by the organization	12,610,721.03	3,089,725.60	2,581,622.00
	iv. Waste water from another organization	0.00	0.00	0.00
	v. Municipal water supplies or other public or private water utilities	0.00	0.00	8,194.00
	Total	13,804,134.70	4,269,799.60	4,010,838.00

Water (continued)

Disclosure	Disclosure Required	Rosebel	Essakane	Westwood
303-1 (cont'd)	Water withdrawal by source (cont'd)			
	b. Standards, methodologies, and assumptions use	Calculations based on groundwater well readings. Daily readings are used to develop a daily average and then extrapolated for the full reporting period.	Calculations based on groundwater well readings and for mill activities, the sampling is done through surface water (rainwater) readings.	<p>Surface water from the Rivière Bousquet is used for drilling activities related to underground mining operations.</p> <p>Ground water is the water volumes from dewatering the mine.</p> <p>Municipal water supplies the site's potable water needs.</p> <p>Flowmeters are used to directly measure the volumes of surface water, ground water, municipal water supply, and the total water discharged from the site.</p> <p>Rainwater is estimated by subtracting surface water, ground water and municipal water supply from the total water discharged.</p>
303-3	Water recycled and reused			
	a. Total volume of water recycled and reused by the organization (m ³)	10,706,509.00	3,012,012.00	575,638.00
	b. Total volume of water recycled and reused as a percentage of the total water withdrawal as specified in Disclosure 303-1	78%	71%	14%
	c. Standards, methodologies, and assumptions used	Water sourced from the tailings storage facility is reused for mineral processing needs.	<p>After mineral processing, the tailings are pumped to a thickener. Thickened tailings are sent to the tailings storage facility.</p> <p>The thickening process permits the reduction of cyanide consumption in the treatment process and also enables water to be reused for mineral processing, limiting the need for consumption of additional freshwater.</p>	Water from the tailings storage facilities are reused for mineral processing needs. A flowmeter is used to measure quantities.

Biodiversity

Disclosure	Disclosure Required	
103-1 Explanation of the material topic and its Boundary	a. An explanation of why the topic is material	IAMGOLD seeks to minimize the impact of our mining activities on the environment and biodiversity from exploration to closure. We recognize that sustaining healthy ecosystems is fundamental to achieving our Zero Harm vision.
	b. The Boundary for the material topic, which includes a description of: <ul style="list-style-type: none"> i. Where the impacts occur; ii. The organization's involvement with the impacts. For example, whether the organization has caused or contributed to the impacts, or is directly linked to the impacts through its business relationships 	This topic Boundary is limited to biodiversity aspects related to IAMGOLD managed operations and advanced exploration sites.
	c. Any specific limitation regarding the topic Boundary	Exploration sites are expected to comply with PDAC e3Plus. Biodiversity aspects of closed legacy sites are not currently available. Additionally, joint venture projects where IAMGOLD is not the operator are not included.
103-2 The management approach and its components	a. An explanation of how the organization manages the topic	<p>IAMGOLD recognizes that protecting biodiversity and sustaining healthy ecosystems are fundamental for the responsible environmental management of our operations. All sites and business development opportunities are expected to integrate biodiversity management and conservation to demonstrate our due diligence and ensure the reclamation of disturbed ecosystems.</p> <p>Biodiversity baseline studies are conducted for development projects as part of Environment and Social Impact Assessments (ESIAs). Environmental effects monitoring (EEM) studies are conducted throughout mining operations. Biodiversity considerations are taken into account during mine closure planning and reclamation activities.</p> <p>There are hunting restrictions on the concession area of our operating mines, which has led to positive biodiversity impacts.</p>
	b. A statement of the purpose of the management approach	<p>The purpose of management of this topic is to:</p> <ul style="list-style-type: none"> - Comply with applicable regulatory requirements; and - Sustain healthy ecosystems to the extent possible in areas disturbed by our mining activities.
	c. A description of the following, if the management approach includes that component: <ul style="list-style-type: none"> i. Policies ii. Commitments iii. Goals and targets iv. Responsibilities v. Resources vi. Grievance mechanisms vii. Specific actions, such as processes, projects, programs and initiatives 	<p>Sustainability Policy</p> <p>Biodiversity Management Policy</p> <p>Our Sustainability and Biodiversity policies state that we are committed to integrating biodiversity management and conservation at all stages of our activities, from exploration to mine closure, using the resources and skills necessary to minimize impacts on biodiversity from our activities.</p> <p>Impacts to aquatic and terrestrial species and measures to avoid or reduce impacts are considered early in the project planning process. Recent environmental assessment (EA) reports, such as the EA report for the Côté Gold Project, are available on our website for review. www.iamgold.com/cotegold</p>

Biodiversity (continued)

Disclosure	Disclosure Required			
103-3 Evaluation of the management approach	For each material topic, the reporting organization shall report the following information: <ol style="list-style-type: none"> a. An explanation of how the organization evaluates the management approach, including: <ol style="list-style-type: none"> i. The mechanisms for evaluating the effectiveness of the management approach; ii. The results of the evaluation of the management approach; iii. Any related adjustments to the management approach 	<p>As a member of the Mining Association of Canada (MAC), IAMGOLD adheres to the Towards Sustainable Mining (TSM) protocols at all our sites. Every three years, it is required that an external verification is conducted to verify level of adherence with the TSM protocols. An internal audit was conducted on tailings and a TSM audit was conducted in 2018. The results of the audit have been reviewed to identify areas of improvement. An external audit is expected to be conducted in 2021.</p> <p>All IAMGOLD operations conducted the annual TSM self-assessment for the Biodiversity Conservation Management Protocol.</p> <p>Annual results are available in the TSM Progress Reports.</p> <p>Additionally, environmental and social impact assessments (ESIA) are guided by IFC Performance Standards.</p>		
304-1 Operational sites owned, leased, managed in, or adjacent to, protected areas and areas of high biodiversity value outside protected areas		Rosebel	Essakane	Westwood
	a. For each operational site owned, leased or managed in, or adjacent to, any protected areas and areas of high biodiversity value outside protected areas, the following information:			
	i. Geographic location	Brokopondo & Sipaliwini District, Suriname	Oudalan, Sahel region, north east of Burkina Faso	Abitibi region of Quebec, Canada (near Rouyn-Noranda)
	ii. Subsurface and underground land that may be owned, leased, or managed by the organization (km ²)	190	100	
	iii. Position in relation to the protected area (in the area, adjacent to, or containing portions of the protected area) or the high biodiversity value area outside protected areas	The Brinckheuvell Nature Reserve is located 3 km west of the Concession across the Mindrineti River on the west bank. The Brownsberg Nature Reserve is located approximately 10 to 15 km southeast of the RGM concession area. The mine site is extended in the Saramacca Concession (Saramacca Satellite Mine Project), which is located 25 km southwest from RGM.	The mining concession is located inside the 1,600,000-hectare Sahel Partial Faunal Reserve. Mining is permitted in this area. It is a designated zone primarily because of temporary lakes (Mare d'Oursi, Mare de Yomboli, Mare de Kissi) which are of importance for migratory birds. The Mare d'Oursi Wetlands are located 67 km from site.	
	iv. Type of operation (office, manufacturing or production, or extractive)	Extractive	Extractive	Extractive
	v. Size of operational site in km ²	42.7	16.6	

Biodiversity (continued)

Disclosure	Disclosure Required	Rosebel	Essakane	Westwood
304-1 Operational sites owned, leased, managed in, or adjacent to, protected areas and areas of high biodiversity value outside protected areas (cont'd)	vi. Biodiversity value characterized by the attribute of the protected area or area of high biodiversity value outside the protected area (terrestrial, freshwater, or maritime ecosystem)	<p>The ecosystem found on and near RGM is part of the savannas of Suriname and Guyana, which are a widespread ecosystem in the region. Globally, this is a relatively unique ecosystem and one of high biodiversity. A wildlife survey was started in 2011 and continued in the first quarter of 2012, 2014 and 2017. The next external wildlife survey is planned for 2020. Wildlife survey data confirmed that Rosebel areas have a richer mammal fauna as compared to nearby nature reserves. The report emphasized that the RGM area harbours good populations of several species that are internationally considered as vulnerable or near threatened. Internally, there were three wildlife projects conducted: Water birds survey at the tailings storage facility 1 (TSF1), Dung beetles, and large terrestrial mammals assessment conducted at RGM site. For the Saramacca Satellite Mine Project, wildlife assessments (birds, mammals) and pre-clearance surveys were conducted by in-house specialist.</p>	<p>The Sahel region has a very high vulnerability to desertification. Several species of trees, shrubs and grasses are declining in the region. Forests and steppes located along the Goroual River and the Feildegasse River are an important habitat for migrating birds, mammals and reptiles.</p>	
	vii. Biodiversity value characterized by listing of protected status (such as IUCN Protected Area Management Categories, Ramsar Convention, national legislation)	<p>The Ocelot, Margay and Jaguar are in App. I (CITES, 2017). All peccaries, primates, the Brazilian tapir and all cats (except the ones in App. I) are in App. II of CITES.</p> <p>IUCN Red List species on or around the site:</p> <ul style="list-style-type: none"> • Vulnerable [VU]: Oncilla, White-lipped peccary (Tayassu pecari), Brazilian Tapir, Guiana spider monkey; • Near Threatened [NT]: Bush dog (Speothos venaticus), Jaguar (Panthera onca), Margay (Leopardus wiedii) 	<p>IUCN Red List species on or around the site:</p> <ul style="list-style-type: none"> • Vulnerable [VU]: White-headed Vulture (Trigonoceps occipitalis) • Near Threatened [NT]: Rüppells Vulture (Gyps rueppellii), Bateleur (Terathopius ecaudatus) 	

Biodiversity (continued)

Disclosure	Disclosure Required	Rosebel	Essakane	Westwood
304-2 Significant impacts of activities, products, and services on biodiversity	a. Nature of significant direct and indirect impacts on biodiversity with reference to one or more of the following:	Yes Primary impacts to Biodiversity: Habitat loss, conversion and degradation; direct and indirect mortality of individuals; Habitat fragmentation and related edge effects; disturbance and displacement from habitat loss; increased human activity (poaching, operating machinery, and vehicles); noise and light; and increased human hunting pressure from increased human access and human population influx.	Yes Site operations take up a lot of space so land use is very important as it leads to a disturbance in the local flora and fauna ecosystems. Atmospheric emissions and mining activities represent disturbance to the local habitat.	Not applicable
	i. Construction or use of manufacturing plants, mines, and transport infrastructure	Direct impact on biodiversity due to habitat loss associated with vegetation clearing and land use for construction of the mineral processing plant, ancillary facilities, transport infrastructure and mining activities.	Reduction of species habitat, land used, soil degradation, vegetation degradation during the preparation of the Falagountou East Pit, the extension of the waste rock dumps, and the expansion of basins.	Not applicable
	ii. Pollution (introduction of substances that do not naturally occur in the habitat from point and non-point sources)	No measurements on pollution level are available to assess the impact on biodiversity.	No pollution. In 2017, work was conducted in the tailings storage facility (TSF) to control the risk of infiltration and to mitigate potential adverse effects to biodiversity.	Not applicable
	iii. Introduction of invasive species, pests, and pathogens	Our progressive reclamation program makes use of non-native plant material for revegetation. This plant material is introduced as seeds of foreign grass species. Young shrubs of non-native species have been planted too. To date, no invasive character of these introduced species can be observed.	No invasive species, pests, and pathogens introduced. All species used for rehabilitation require validation of the Centre Nationale des Semences Forestières.	Not applicable
	iv. Reduction of species	The 2017 wildlife survey concluded that populations of the jaguar, armadillos, tayra and collared peccaries seem to be decreasing in numbers.	Not applicable	Not applicable
	v. Habitat conversion	All the habitats of the disturbed and cleared areas have been converted to open land area.	Not applicable	Not applicable

Biodiversity (continued)

Disclosure	Disclosure Required	Rosebel	Essakane	Westwood
304-2 Significant impacts of activities, products, and services on biodiversity (cont'd)	vi. Changes in ecological processes outside the natural range of variation (such as salinity or changes in groundwater level)	All the habitats of the disturbed and cleared areas have been converted to open land area and therefore their existing ecological function and processes changed. No data available on specific changes.	Not applicable	Not applicable
	b. Significant direct and indirect positive and negative impacts with reference to the following:	Yes	Yes	
	i. Species affected	No carrying capacity studies conducted on specific species affected.	18 woody species; Herbaceous plants are not inventoried; No data on the micro-level fauna; No significant impact on the macro-level fauna.	Not applicable
	ii. Extent of areas impacted	No data available on extent of areas impacted.	27.81	Not applicable
	iii. Duration of impacts	Permanent	Permanent for all	Not applicable
	iv. Reversibility or irreversibility of the impacts	Irreversible	Irreversible for all	Not applicable
304-3 Habitats protected or restored	a. Size and location of all habitat areas protected or restored (km ² and location)	Not applicable	La Mare d'Oursi, a 450 km ² Ramsar site and designated ornithological sanctuary, is 67 km from the Essakane site	Not applicable
	i. Whether the success of restorative measures approved by independent external professionals (yes/no)	Not applicable	Yes	Not applicable
	b. Whether partnerships exist with third parties to protect or restore habitat areas distinct from where the organization has overseen and implemented restoration or protection measures (yes/no)	Not applicable	No	Not applicable
	c. Status of each area based on its condition at the close of the reporting period	Not applicable	Protected area	Not applicable
	d. Report standards, methodologies, and assumptions used	Not applicable	Annual inventory carried out for the success rate by site and by species	Not applicable

Biodiversity (continued)

Emissions

Disclosure	Disclosure Required	
103-1 Explanation of the material topic and its Boundary	a. An explanation of why the topic is material	<p>Emissions from development, mining production and mineral processing activities have the potential to affect air quality.</p> <p>In particular, we recognize that greenhouse gas emissions contribute to the global issue of climate change.</p> <p>Effective energy management will help control our environmental impacts by reducing the overall, greenhouse gases and other significant emissions produced in addition to directly influencing operational costs.</p>
	b. The Boundary for the material topic, which includes a description of: <ol style="list-style-type: none"> i. Where the impacts occur; ii. The organization's involvement with the impacts. For example, whether the organization has caused or contributed to the impacts, or is directly linked to the impacts through its business relationships 	This topic boundary is limited to IAMGOLD managed operations and advanced exploration sites.
	c. Any specific limitation regarding the topic Boundary	Energy use at exploration and closed sites is not considered significant as there are no active production or mineral processing activities - hence, emissions are also considered non-material. Additionally, joint venture projects where IAMGOLD is not the operator are not included. Scope 3 is calculated to the extent possible with available data.
103-2 The management approach and its components	a. An explanation of how the organization manages the topic	<p>GHG emissions are regularly tracked and assessed to identify opportunities to improve energy efficiency and reduce GHG emissions, promote energy conservation and the use of renewable energy.</p> <p>IAMGOLD is committed to renewable energy as exemplified by the development of the world's largest hybrid photovoltaic plant heavy fuel oil (PV-HFO) of 15 MW at Essakane and a 5 MW solar power plant at Rosebel as well as several smaller solar projects in support of local communities in Suriname. The 15 MV PV-HFO plant at Essakane has so far displaced 11 million litres of heavy fuel use and avoided 34,000 tonnes of CO₂ emissions between 2018 to May 2020.</p>
	b. A statement of the purpose of the management approach	<p>The purpose of management is to:</p> <ul style="list-style-type: none"> - Comply with applicable regulatory requirements; - Quantify our impact by monitoring air quality to ensure effectiveness of any mitigation measures implemented to prevent any adverse effects as a result of our mining activities, and - Reduce emissions that contribute to climate change.
	c. A description of the following, if the management approach includes that component: <ol style="list-style-type: none"> i. Policies ii. Commitments iii. Goals and targets iv. Responsibilities v. Resources vi. Grievance mechanisms vii. Specific actions, such as processes, projects, programs and initiatives 	<p>Energy and Greenhouse Gas Emissions Management Standard</p> <p>Consistent with IAMGOLD's Energy and Greenhouse Gases Emissions Management Standard, signed by the COO, one of our key management objectives is to reduce our emissions of greenhouse gases and resulting impacts on the environment.</p> <p>Projects in Canada are typically subject to provincial air quality guidelines and approvals which seek to protect local receivers that surround the project.</p> <p>We also participate in the Carbon Disclosure Project (CDP) Climate Change Disclosure.</p>
103-3 Evaluation of the management approach	<p>For each material topic, the reporting organization shall report the following information:</p> <p>a. An explanation of how the organization evaluates the management approach, including:</p> <ol style="list-style-type: none"> i. the mechanisms for evaluating the effectiveness of the management approach; ii. the results of the evaluation of the management approach; iii. any related adjustments to the management approach 	<p>As a member of the Mining Association of Canada (MAC), IAMGOLD adheres to the Towards Sustainable Mining (TSM) protocols at all our sites. 305-7 Nitrogen oxides (NOx), sulfur oxides (SOx), and other significant air emissions	a. Significant air emissions, in kilograms, for each of the following:			
	i. NOx	1,708,367	5,219,629	98,271
	ii. SOx	28,410	2,713,233	2,404
	iii. Persistent organic pollutants (POP)	0	0	0
	iv. Volatile organic compounds (VOC)	78,823	55,997	4,517
	v. Hazardous air pollutants (HAP)	53,763	569,586	Not applicable
	vi. Particulate matter (PM)	7,439,608	27,096,403	107,239
	vii. Carbon Monoxide (CO)	1,058,203	1,438,896	71,758
	viii. Ammonia (NH ₃)	409,062	74,035	24,144
	b. Report source of the emission factors used	U.S. EPA AP-42: Compilation of Air Emissions Factors Australian National Pollutant Inventory Emission Estimation Technique Manual for Mining version 3.1 Australian National Pollutant Inventory Emission Estimation Technique Manual for Combustion Engines version 3.0 Environment Canada Unpaved Industrial Road Dust Calculator		
	c. Report standards, methodologies, assumptions, and/or calculation tools used	Emissions were calculated for significant mining, gold processing and supporting activities at IAMGOLD's operational mining sites. The sources of emissions included in this inventory encompass the following mining activities: <ul style="list-style-type: none"> - Blasting (gaseous emissions) - Fugitive dust emissions from material handling activities on the surface - Fugitive dust emissions from unpaved haul roads - Vehicle tailpipe exhaust emissions - Emissions from gold processing and refining - Emissions from auxiliary processes such as comfort heating and power generation The following accepted methods were used to calculate air emissions: <ul style="list-style-type: none"> - Stack testing measurements, where available - Internationally accepted emission factors, and site activity data (note that emissions estimated using emission factors and activity data are considered to be conservative with a low likelihood to underestimate emissions since maximum annual production/consumption rates, distances, and operating hours were used in cases of uncertainty). 		

Effluents and Waste

Disclosure		Disclosure Required			
103-1	Explanation of the material topic and its Boundary		Rosebel	Essakane	Westwood
		a. An explanation of why the topic is material	<p>Guided by our vision of Zero Harm, we closely monitor waste and tailings produced as well as the quality of final effluent during mining operations and post-closure.</p> <p>Waste management includes waste rock, tailings, and other waste streams (hazardous and non-hazardous waste).</p>		
		b. The Boundary for the material topic, which includes a description of: <ul style="list-style-type: none"> i. Where the impacts occur; ii. The organization's involvement with the impacts. For example, whether the organization has caused or contributed to the impacts, or is directly linked to the impacts through its business relationships. 	<p>This topic Boundary includes all IAMGOLD managed operations. Exploration and closed sites are included, where applicable.</p>		
	c. Any specific limitation regarding the topic Boundary	<p>Effluents and waste from joint venture projects where IAMGOLD is not the operator are not included.</p> <p>Judgment of subject matter experts is relied upon to define what is considered significant.</p>			
103-2	The management approach and its components		Rosebel	Essakane	Westwood
		a. An explanation of how the organization manages the topic	<p>Deposition plans are required for waste rock and tailings. Water and sediment quality monitoring is routinely conducted. Standard operating procedures are developed and maintained for material processes such as management of hazardous waste at our operating sites and spill response.</p> <p>In Burkina Faso, IAMGOLD's Essakane Mine provides an opportunity for the mine's scrap metal to be repurposed through the "Fonds Fer" or "Iron Fund" Program. The mine sells its leftover scrap metal at auction and uses the revenues to fund local business ideas.</p>		
		b. A statement of the purpose of the management approach	<p>The purpose of management is to:</p> <ul style="list-style-type: none"> - Comply with applicable regulatory requirements; - Ensure waste streams are handled, stored and transported appropriately to prevent accidental release to the surrounding environment; - Quantify our impact by monitoring water quality to ensure effectiveness of any mitigation measures implemented to prevent any adverse effects as a result of our mining activities; and - Ensure protection of the receiving environment. 		
	c. A description of the following, if the management approach includes that component: <ul style="list-style-type: none"> i. Policies ii. Commitments iii. Goals and targets iv. Responsibilities v. Resources vi. Grievance mechanisms vii. Specific actions, such as processes, projects, programs and initiatives 	<p>Our internal Sustainability Standard outlines the minimum requirements for waste management.</p> <p>Tailings Management Standard</p> <p>As per our tailings management standard, we locate, design, construct, operate and close tailings facilities in compliance with the Mining Association of Canada's (MAC) environmental policy, and with our commitment to stakeholders in mind. We ensure that all structures are stable, and all solids and water are managed within their designated areas.</p> <p>An accidental spill or release can be hazardous to our employees and other stakeholders, and can also contaminate the environment if not responded in a quick and effective manner.</p> <p>We aim to prevent material spills and have spill response procedures to respond appropriately and minimize impacts to the receiving environment.</p>

103-3 Evaluation of the management approach	For each material topic, the reporting organization shall report the following information: a. An explanation of how the organization evaluates the management approach, including: i. The mechanisms for evaluating the effectiveness of the management approach; ii. The results of the evaluation of the management approach; iii. Any related adjustments to the management approach	As a member of the Mining Association of Canada (MAC), IAMGOLD adheres to the Towards Sustainable Mining (TSM) protocols at all our sites. Every three years, it is required that an external verification is conducted to verify level of adherence with the TSM protocols. An internal audit was conducted on tailings and a TSM audit was conducted in 2018. The results of the audit have been reviewed to identify areas of improvement. An external audit is slated to be conducted in 2020. All IAMGOLD operations conducted the annual TSM self-assessment for the Tailings Management Protocol and Crisis Management and Communications Planning Protocol Tailings Management Protocol. Crisis Management and Communications Planning. Annual results are available in the TSM Progress Reports .		
306-1 Water discharge by quality and destination		Rosebel	Essakane	Westwood
	a. Total volume (m ³) of planned and unplanned water discharges (i.e., excluding harvested rainwater and domestic sewage) by:	2,502,381.00	0.00	4,010,838.00
	i. Destination	Mindrineti River (surface water).	Essakane is a site with "zero discharge" – no water used for industrial purposes is discharged to the environment. Water used for mineral processing is recycled for further mineral processing needs. Mine water is stored in a basin until being used. Domestic wastewater is treated then sent to an evaporation field where trees are planted.	Rivière Bousquet.
	ii. Quality of the water, including treatment method	Prior to discharge, the water is treated by the Effluent Treatment Plant and aerated in the Aerated Lagoon. We comply with the IFC limits and end-of-pipe target discharge objectives.	Not applicable "Zero discharge" site.	Treated with lime.
	iii. Whether the water was reused by another organization	No	No, but there is presence of artisanal small-scale mining in the area	No
	b. Report standards, methodologies, and assumptions used	IFC Limits for the discharge of process waste water to the surface water (WB, IFC Guidelines 2007). And End-of-Pipe target discharge objectives set by RGM for Ammonia and Total Cyanide.	Not applicable	Discharge is measured with a flowmeter on a routine basis.

103-3 Evaluation of the management approach	<p>For each material topic, the reporting organization shall report the following information:</p> <p>a. An explanation of how the organization evaluates the management approach, including:</p> <ul style="list-style-type: none"> i. The mechanisms for evaluating the effectiveness of the management approach; ii. The results of the evaluation of the management approach; iii. Any related adjustments to the management approach

As per IAMGOLD Sustainability Standard, a community and stakeholder engagement plan is required for all of our sites to ensure feedback can be received and considered.

A formal grievance mechanism is in place for dealing with complaints and/or concerns from external stakeholders. Stakeholders are well informed of the grievance mechanism which is easily accessible. The Company reports back to communities periodically with the outcomes of the grievances filed. Senior management reviews the engagement system and results annually.

A gap analysis on IAMGOLD's sustainability framework was conducted in 2018, results of the analysis have been reviewed to identify areas of improvement.

Occupational Health and Safety

Disclosure		Disclosure Required	
103-1	Explanation of the material topic and its Boundary	a. An explanation of why the topic is material	Occupational Health and Safety is material as material risks can have serious consequences to IAMGOLD's stakeholders, both internally (IMG employees and contractors) and externally (host communities, governments, shareholders), if not managed effectively.
		b. The Boundary for the material topic, which includes a description of: <ol style="list-style-type: none"> i. Where the impacts occur; ii. The organization's involvement with the impacts. For example, whether the organization has caused or contributed to the impacts, or is directly linked to the impacts through its business relationships 	Health and Safety impacts can occur at any point in IAMGOLD operations, in all locations.
		c. Any specific limitation regarding the topic Boundary	The H&S function is decentralized to the sites and functions. Corporate H&S manages our global H&S Performance, but each site is responsible for managing its local H&S Performance in accordance with IMG's Standards and Procedures. Financial resources are allocated at the corporate level to support the sites and H&S professionals are situated at each of our sites.
103-2	The management approach and its components	a. An explanation of how the organization manages the topic	The Health and Safety Program takes a risk-based approach, guided by our vision of Zero Harm. All of our material health and safety (H&S) risks are documented in risk registers for each of our sites and various departmental functions, which are then consolidated to create the overall company-wide risk register by the Chief Operating Officer. Once risks are identified, prevention and mitigation controls are put in place to manage these risks if they cannot first be eliminated. Audits and inspections are performed to ensure the maintenance and performance of these controls.
		b. A statement of the purpose of the management approach	IAMGOLD has a vision to lead the mining industry in providing a secure, healthy and injury-free work environment. Our people are empowered and committed to embracing the Zero Harm vision.
		c. A description of the following, if the management approach includes that component: <ol style="list-style-type: none"> i. Policies ii. Commitments iii. Goals and targets iv. Responsibilities v. Resources vi. Grievance mechanisms vii. Specific actions, such as processes, projects, programs and initiatives 	<ul style="list-style-type: none"> • H&S Performance monthly report and statistics (leading and lagging indicators): A systematic performance reporting process used by every site at IAMGOLD. • Significant Incident Report (SIR) Procedure and reporting, which include sharing of lessons learned. • Mind Body Achievement (MBA) Program: A behaviour-based program to reduce, report and eliminate at-risk situations and conditions and to encourage and improve safety leadership among workers. • IAMTRAVELLING: A safe travel initiative to inform and protect our business travellers and expatriates travelling abroad. • TSM: The Mining Association of Canada's (MAC) Towards Sustainable Mining (TSM) program, which monitors health and safety initiatives, as well as crisis management and emergency response plans. • OHSAS 18001: Two sites out of three are OHSAS certified. • Enterprise Risk Management: An initiative to identify and manage our internal H&S risks. • Employee Assistance Program (EAP): An HR-managed initiative which provides professional health and well-being support to IMG employees and their families, such as psychological, nutritional and financial guidance.

Rights of Indigenous Peoples

Disclosure	Disclosure Required	
103-1 Explanation of the material topic and its Boundary	a. An explanation of why the topic is material	The respect of the rights of Indigenous Peoples is paramount to IAMGOLD, especially with activities that could affect these communities.
	b. The Boundary for the material topic, which includes a description of: <ol style="list-style-type: none"> i. Where the impacts occur; ii. The organization's involvement with the impacts. For example, whether the organization has caused or contributed to the impacts, or is directly linked to the impacts through its business relationships 	IAMGOLD strives to ensure that employees and contractors respect the rights of Indigenous Peoples.
	c. Any specific limitation regarding the topic Boundary	IAMGOLD strives to ensure that employees and contractors respect the rights of Indigenous Peoples.
103-2 The management approach and its components	a. An explanation of how the organization manages the topic	Governance of relations with communities impacted by our operations is informed by IAMGOLD's vision of Zero Harm, and is ultimately overseen by the Board of Directors as part of the Safety, Environment and Reserves Committee. This structure ensures that IAMGOLD's vision of Zero Harm receives appropriate guidance and resources. Our sites each manage their own community relations and development budget. They receive guidance through our Sustainability Policy and, more specifically, through our Sustainability Standard, which gives detailed guidance on best practices for community relations and development.
	b. A statement of the purpose of the management approach	When it comes to our host communities, IAMGOLD has an objective to go beyond our Zero Harm initiative and provide tangible betterment to communities. Our goals are to build capacity, foster economic growth, contribute wherever possible to health, education, sport and culture, and to work in partnership with local communities.
	c. A description of the following, if the management approach includes that component: <ol style="list-style-type: none"> i. Policies ii. Commitments iii. Goals and targets iv. Responsibilities v. Resources vi. Grievance mechanisms vii. Specific actions, such as processes, projects, programs and initiatives 	As a company, we incorporate the following global guidelines and standards into our approach to community relations: the International Finance Corporation (IFC), the International Council on Mining and Metals (ICMM), the Canadian Mining Association's Towards Sustainable Mining (TSM) program, and the Voluntary Principles on Security and Human Rights (VPSHR).
103-3 Evaluation of the management approach	For each material topic, the reporting organization shall report the following information: <ol style="list-style-type: none"> a. An explanation of how the organization evaluates the management approach, including: <ol style="list-style-type: none"> i. The mechanisms for evaluating the effectiveness of the management approach; ii. The results of the evaluation of the management approach; iii. Any related adjustments to the management approach 	IAMGOLD ensures our dedicated Community Relations team has ongoing dialogue with the local community to promote trust and transparency. All our operations also have a grievance mechanism in place to ensure any issues identified are resolved in a timely manner. No significant changes were made in 2019.

Rights of Indigenous Peoples (continued)

Disclosure		Disclosure Required				
411-1	Incidents of violations involving rights of Indigenous Peoples	Rosebel	Essakane	Westwood	Corporate	Exploration
	a. Total number of identified incidents of violations involving the rights of Indigenous Peoples during the reporting period	(1) On July 28, 2019 there was an interaction between local police and unauthorized artisanal miners, which resulted in the loss of one ASM miner. The incident was on the RGM concession but it was an action of the police authority. The Surinamese government took the lead in the engagement with the communities and RGM is currently working on updating its Social Risk Management Program and strengthening of community relations with the surrounding communities.	None	None		None
	b. For incidents identified, provide details of status of the incidents and actions taken with reference to the following:					
	i. Incidents reviewed by the organization	(1) Police action incident described above	Not applicable	Not applicable		Not applicable
	ii. Remediation plans being implemented	Updated our social risk management program and undertook a program to strengthen community relations with surrounding communities	Not applicable	Not applicable		Not applicable

Rights of Indigenous Peoples (continued)

Disclosure		Disclosure Required				
MM5 (cont'd)	Total number of operations taking place in or adjacent to Indigenous Peoples' territories, and number and percentage of operations or sites where there are formal agreements with Indigenous Peoples' communities (cont'd)	Rosebel	Essakane	Westwood	Corporate	Exploration
		Whether there are any formal agreements in place with Indigenous Peoples' communities	There are protocols in place to manage SSM activities on the mining concession. Rosebel, the Surinamese government, the traditional authority of Nieuw Koffiekamp Makambo and Kamp Mining N.V. signed agreements on small-scale mining; a joint letter on Start of Work in the East Tailings Road Resource and Roma East Protocol. With these agreements, a legal basis has been created to allow a maximum of 500 small scale miners from Nieuw Koffiekamp to work at two concessions within the Rosebel concession.	In the case of the Wafaka pit, there is an agreement with the communities on the return of the area to the town at the end of the project, with respect to agricultural land. In addition, for any new areas where land will be disturbed, we have protocols signed with local communities. In total we have three MOUs.	No formal agreement, discussions are ongoing with Pikogan First Nation.

MM6	Number and description of significant disputes relating to land use, customary rights of local communities and Indigenous Peoples	Rosebel	Essakane	Westwood	Exploration	
	Number of significant disputes relating to land or resource use of local communities and Indigenous Peoples associated with current, planned or proposed future operations	1	No major conflict was reported in 2019. However, complaints about the impact of our operations on sacred places have been resolved through the signing of the memorandum of understanding with the communities of Falagountou. <ul style="list-style-type: none"> 60 minor complaints were registered in 2019, 41 of which were resolved 	None	Not available	
	Describe the nature of these disputes	(1) On July 28th 2019, there was an interaction between local police and unauthorized artisanal miners which resulted in the loss of one ASM miner. The incident was on the RGM concession but it was an action of the police authority. The Surinamese government took the lead in the engagement with the communities and RGM is currently working on updating its Social Risk Management Program and strengthening of the community relations with the surrounding communities.	Details of complaints recorded in 2019: Purchases / services (6), fields (23), buildings (01), blasting effects (5), dust (2), animals (14), employment (3), others (6).	Not applicable	Not available	
	Status of the disputes relating to land use, customary rights of local communities and Indigenous Peoples	Resolved	The major complaints were linked to complaints relating to sacred places. They were resolved under the leadership of local employees and the strong involvement of the mayor of Falagountou.	Not applicable	Not available	
	Definition of Significant Dispute	We define disputes on scale from 1-5, with level 4 or higher being classified as a "significant" dispute. A level 4 dispute is one which would result in protest, arrests, and/or human rights allegations, while a level 5 dispute would be one which would result in an international court hearing or extreme levels of protest resulting in severe injuries or death.				

Local Communities (continued)

Disclosure	Disclosure Required	Rosebel	Essakane	Westwood	Exploration
MM7	The extent to which grievance mechanisms were used to resolve disputes relating to land use, customary rights of local communities and Indigenous Peoples, and the outcomes	Updated our Social Risk Management Program and undertook a program to strengthen community relations with surrounding communities. Rosebel, the Surinamese government, the traditional authority of Nieuw Koffiekamp Makambo and Kamp Mining N.V. signed agreements on small-scale mining; a joint letter on Start of Work in the East Tailings Road Resource and Roma East Protocol. With these agreements, a legal basis has been created to allow a maximum of 500 small scale miners from Nieuw Koffiekamp to work at two concessions within the Rosebel concession.	Inventory of goods by an independent body, setting up of a negotiation committee which leads to compensation agreements around: Field replacements, financial compensation, implementation of a livelihood restoration program (plowing, supply of fertilizers and seeds, technical support).	Not applicable	Not available
	Were grievance procedures used?	Yes	Yes, the grievance procedure was used. Grievance received (telephone, meeting, letter, etc.) complainant informed that the grievance will be analyzed, a solution will be proposed, validated and implemented. Complaint will be closed once a solution has been implemented.	Not applicable	Not available
	What was the outcome of the procedures used?	Signed multiple agreements and updated community outreach strategy.	41 out of 60 complaints were resolved in 2019, i.e., 68%, the unresolved complaints remain mainly complaints related to blasting effects of which the BUMIGEB has, in agreement with local communities, to conduct a study.	Not applicable	Not available

Artisanal Small-Scale Mining

Disclosure	Disclosure Required	
103-1 Explanation of the material topic and its Boundary	a. An explanation of why the topic is material	Artisanal and small-scale mining can be difficult to avoid in areas where public regulation on the matter is minimal or does not exist. IAMGOLD recognizes the negative impacts of these activities and makes efforts to reduce them at our sites.
	b. The Boundary for the material topic, which includes a description of: <ul style="list-style-type: none"> i. Where the impacts occur; ii. The organization's involvement with the impacts. For example, whether the organization has caused or contributed to the impacts, or is directly linked to the impacts through its business relationships 	This topic is limited to where we have operating sites.
	c. Any specific limitation regarding the topic Boundary	This topic is limited to where we have operating sites.
103-2 The management approach and its components	a. An explanation of how the organization manages the topic	IAMGOLD strives to ensure that our operations coexist and operate in harmony with small-scale miners including providing small-scale miners with training on safe methods and safe handling of chemicals. We have a number of agreements in place with small-scale miners globally.
	b. A statement of the purpose of the management approach	The purpose of the approach is to ensure that proper health and safety practices are followed and that the impact to the environment is minimal.
	c. A description of the following, if the management approach includes that component: <ul style="list-style-type: none"> i. Policies ii. Commitments iii. Goals and targets iv. Responsibilities v. Resources vi. Grievance mechanisms vii. Specific actions, such as processes, projects, programs and initiatives 	As a company, we incorporate the following global guidelines and standards into our approach to community relations: the International Finance Corporation (IFC), the International Council on Mining and Metals (ICMM), the Canadian Mining Association's Towards Sustainable Mining (TSM) program, and the Voluntary Principles on Security and Human Rights (VPSHR).
103-3 Evaluation of the management approach	For each material topic, the reporting organization shall report the following information: <ul style="list-style-type: none"> a. An explanation of how the organization evaluates the management approach, including: <ul style="list-style-type: none"> i. The mechanisms for evaluating the effectiveness of the management approach; ii. The results of the evaluation of the management approach; iii. 103-3	Evaluation of the management approach	For each material topic, the reporting organization shall report the following information: a. An explanation of how the organization evaluates the management approach, including: i. The mechanisms for evaluating the effectiveness of the management approach; ii. The results of the evaluation of the management approach; iii. Any related adjustments to the management approach	IAMGOLD ensures our dedicated Community Relations team has ongoing dialogue with the local community to promote trust and transparency. All our operations also have a grievance mechanism in place to ensure any issues identified are resolved in a timely manner. No significant changes were made in 2019.

Closure Planning

Disclosure	Disclosure Required	
103-1	Explanation of the material topic and its Boundary	<p>a. An explanation of why the topic is material</p> <p>An economic mining deposit is considered to be finite and active operations will ultimately come to an end. IAMGOLD is committed to responsible mine closure.</p> <p>Upon closure, some mining components will remain and may permanently alter the pre-existing landforms. These are primarily the tailings management facilities, mine rock piles, and any open pits and/or underground workings. Reclamation efforts are guided towards a suitable end land use as per agreed-upon closure criteria such as physical, chemical and biological stability.</p> <p>b. The Boundary for the material topic, which includes a description of: i. Where the impacts occur; ii. The organization's involvement with the impacts. For example, whether the organization has caused or contributed to the impacts, or is directly linked to the impacts through its business relationships</p> <p>This topic boundary includes all IAMGOLD managed operations. Closure plans for advanced exploration and development projects, and closed sites are expected to meet or exceed relevant laws and regulations.</p> <p>c. Any specific limitation regarding the topic Boundary</p> <p>Joint venture projects where IAMGOLD is not the operator are not included.</p>

Closure Planning (continued)

Disclosure	Disclosure Required			
103-2 The management approach and its components	a. An explanation of how the organization manages the topic	IAMGOLD's Sustainability Standard outlines the necessity of a closure plan as a portion of each site's required Environmental and Social Impact Assessment. The closure plan must outline the site's proposed strategy for transitioning the site to a stable condition upon cessation of commercial mining activity and will be developed at the direction of the Corporate Health, Safety, and Sustainability team in coordination with site management and Operations.		
	b. A statement of the purpose of the management approach	<p>Closure plans are required at all IAMGOLD operations. Mine closure plans are updated routinely throughout the Life-of-Mine (LOM). Mine closure plans are updated every 5 years for operating sites or as management regulated. Progressive reclamation is strongly encouraged, where feasible.</p> <p>The purpose of management is to:</p> <ul style="list-style-type: none"> - Comply with applicable regulatory requirements, - Adequately prepare for a transition from operations into closure to ensure consideration of environmental and social aspects and sufficient funding is secured, and - Implement reclamation activities and monitor for effectiveness. 		
	c. A description of the following, if the management approach includes that component: <ol style="list-style-type: none"> i. Policies ii. Commitments iii. Goals and targets iv. Responsibilities v. Resources vi. Grievance mechanisms vii. Specific actions, such as processes, projects, programs and initiatives 	IAMGOLD is developing an internal Closure Standard that elaborates on the closure requirements outlined in the IAMGOLD Sustainability Standard.		
103-3 Evaluation of the management approach	For each material topic, the reporting organization shall report the following information: <ol style="list-style-type: none"> a. An explanation of how the organization evaluates the management approach, including: <ol style="list-style-type: none"> i. The mechanisms for evaluating the effectiveness of the management approach; ii. The results of the evaluation of the management approach; iii. Any related adjustments to the management approach 	<p>As a member of the Mining Association of Canada (MAC), IAMGOLD has endorsed the TSM Mine Closure Framework.</p> <p>Closure Plans are currently in the process of being updated at our sites.</p>		
MM10 Number and percentage of operations with closure plans		Rosebel	Essakane	Westwood
	Closure plan (yes/no, date of last update, status)	Yes, closure plan updated in 2018	Yes, closure plan updated in 2019	Yes, closure plan updated in 2016
	Percentage of operations with closure plans	100%, mine closure plans are reviewed and updated routinely and help inform the Asset Retirement Obligation (ARO), which is updated on an annual basis at a minimum.		

Public Policy

Disclosure	Disclosure Required
