## New Logitech Bluetooth Speakers Z600 Deliver Premium Design and High-Performance Audio

Latest Logitech Stereo Speakers Offer Simple Wireless Connectivity for up to Three Devices at the Same Time

NEWARK, Calif.--(BUSINESS WIRE)-- Today Logitech (SIX: LOGN) (NASDAQ: LOGI) introduced the [Logitech® Bluetooth® Speakers Z600](#), an elegantly designed pair of wireless stereo speakers that complement the sleek good looks of Mac® and Ultrabook™ computers. With these speakers you can effortlessly stream music and other audio from your computer, smartphone or tablet. Three devices can be active at the same time, and switching among them is as simple as pressing pause on one and play on another.

tangle of wires on your desk, table or countertop.

"The Logitech Bluetooth Speakers Z600 were designed to resemble an object of art using shapes, materials, and colors that meld with the modern living space and complement the look of ultrathin laptops," said Charlotte Johs, Logitech global vice president of brand development and portfolio for PC accessories. "And with built-in Bluetooth connectivity, a first for Logitech multimedia speakers, these speakers are ideal for today's wireless, multi-device lifestyle."

Whether you're listening to music, watching a movie, playing a game or video chatting, the Logitech Bluetooth Speakers Z600 deliver clear, well-defined audio. With 3 drivers in each speaker, this system is engineered to provide superior acoustics for any space.

The controls on the Logitech Bluetooth Speakers Z600 are another integral component of the clean design. The entire top panel of the right speaker is a smooth, responsive touch disc. To dial the volume up or down, simply glide a finger around the edge. The other controls — power, Bluetooth pairing and 3.5 mm input — are hidden discreetly in the back. And because every detail is important, even the power cord has been carefully considered. Specially designed, lay-flat cables run between the speakers and the power adapter, so there's never an unsightly

A USB Bluetooth transceiver is included with the Logitech Bluetooth Speakers Z600 to ensure the best wireless experience with computers. Connecting through native Bluetooth may be possible, but some computers may not permit audio streaming or smooth device switching. The included USB Bluetooth transceiver also allows you to connect wirelessly to computers that don't support Bluetooth. In addition, you can connect the speakers to any device with an audio output using the 3.5mm auxiliary input.

### Pricing and Availability

The Logitech Bluetooth Speakers Z600 are expected to be available in the U.S. and Europe in August 2013, for a suggested retail price of \$149.99. For more information, please visit [www.logitech.com](http://www.logitech.com) or our [blog](#).
