FORWARD LOOKING STATEMENTS

In addition to historical information, certain matters set forth herein constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, including forward-looking statements relating to management's beliefs, projections and assumptions concerning future results and events. Forward-looking statements, include descriptions of management's plans or objectives for future operations, products or services, and forecasts of the Company's revenues, earnings or other measures of economic performance. These forward-looking statements involve risks and uncertainties and are based on the beliefs and assumptions of management and on the information available to management at the time that this presentation was prepared and can be identified by the fact that they do not relate strictly to historical or current facts. They often include the words or phrases such as "aim," "can," "may," "could," "predict," "should," "will," "would," "believe," "anticipate," "estimate," "expect," "hope," "intend," "plan," "potential," 'project," "will likely result," "continue," "seek," "shall," "possible," "projection," "optimistic," and "outlook," and variations of these words and similar expressions or the negative version of those words or phrases.

Forward looking statements involve substantial risks and uncertainties, many of which are difficult to predict and are generally beyond our control. There are many factors that could cause actual results to differ materially from those contemplated by these forward-looking statements. The Company does not undertake, and specifically disclaims any obligation, to update any forward-looking statements to reflect occurrences or unanticipated events or circumstances after the date of such statements except as required by law. Any statements about future operating results, such as those concerning accretion and dilution to the Company's earnings or shareholders, are for illustrative purposes only, are not forecasts, and actual results may differ. Risks and uncertainties that could cause our financial performance to differ materially from our goals, plans, expectations and projections expressed in forward-looking statements include those set forth in our filings with the SEC, including under Item 1A of our Annual Report on Form 10-K for the fiscal year ended December 31, 2018.

NON-GAAP FINANCIAL MEASURES

This presentation presents certain "non-GAAP" financial measures for: (1) efficiency ratio, (2) adjusted efficiency ratio, (3) net interest income excluding discount accretion on acquired loans, (4) net interest margin excluding discount accretion on acquired loans, (5) adjusted net income, (6) adjusted return on average assets, (7) adjusted return on average equity, (8) average tangible common equity, (9) return on average tangible common equity, (10) adjusted return on average tangible common equity, (11) tangible common equity, (12) tangible assets, (13) tangible common equity to tangible asset ratio, and (14) tangible book value per share. The components of these non-GAAP measures are computed by using amounts that are determined in accordance with accounting principles generally accepted in the United States of America ("GAAP"). We believe the presentation of certain non-GAAP financial measures provides useful information to assess our consolidated financial condition and consolidated results of operations and to assist investors in evaluating our financial results relative to our peers. These non-GAAP financial measures complement our GAAP reporting and are presented herein to provide investors and others with information that we use to manage the business each period. Because not all companies use identical calculations, the presentation of these non-GAAP financial measures may not be comparable to other similarly titled measures used by other companies. These non-GAAP measures should be taken together with the corresponding GAAP measures and should not be considered a substitute of the GAAP measures.

A reconciliation of non-GAAP financial measures used in this presentation to their nearest comparable GAAP financial measures is included at the end of this presentation.

No non-GAAP metric should be considered as an alternative to any other measure derived in accordance with GAAP.
