Virtus Total Return Fund Inc. Declares Distribution

11/18/2021

HARTFORD, Conn., Nov. 18, 2021 /PRNewswire/ -- **Virtus Total Return Fund Inc.** (NYSE: ZTR) today announced the following monthly distributions:

Amount of Distribution	Ex-Date	Record Date	Payable Date
\$0.08	December 10, 2021	December 13, 2021	December 20, 2021
\$0.08	January 5, 2022	December 31, 2021	January 10, 2022
\$0.08	February 10, 2022	February 11, 2022	February 18, 2022
\$0.08	March 10, 2022	March 11, 2022	March 18, 2022

For the distribution with the record date of December 31, 2021, the Fund intends to distribute the greater of \$0.08 per share or all available net investment income and net short- and long- term capital gains, in accordance with requirements under the Internal Revenue Code of 1986, as amended. The amount of a supplemental distribution over the \$0.08 per share, if any, will be announced on January 3, 2022.

Under the terms of its Managed Distribution Plan, the Fund will seek to maintain a consistent distribution level that may be paid, in part or in full, from net investment income and realized capital gains, or a combination thereof. Shareholders should note, however, that if the Fund's aggregate net investment income and net realized capital gains are less than the amount of the distribution level, the difference will be distributed from the Fund's assets and will constitute a return of the shareholder's capital. You should not draw any conclusions about the Fund's investment performance from the amount of this distribution or from the terms of the Fund's Managed Distribution Plan.

The Fund estimates that it has distributed more than its income and capital gains; therefore, a portion of your distribution may be a return of capital. A return of capital may occur, for example, when some or all of the money that you invested in the Fund is paid back to you. A return of capital distribution does not necessarily reflect the Fund's investment performance and should not be confused with 'yield' or 'income'.

The Fund provided this estimate of the sources of the distributions:
