**Carefully consider the Fund's investment objective, risk factors, charges, and expenses before investing. This and additional information can be found in the Fund's prospectus, which can be obtained at [Newfleet.com](#) or by calling 1-800-243-4361. Read the prospectus carefully before investing.**

An investment in the Fund is subject to investment risks; therefore, you may lose money by investing in the Fund. There can be no assurance that the Fund will be successful in meeting its investment objective. Shares of any ETF are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Brokerage commissions will reduce returns. Debt securities are subject to various risks, the most prominent of which are credit and interest rate risk. The issuer of a debt security may fail to make interest and/or principal payments. Values of debt securities may rise or fall in response to changes in interest rates, and this risk may be enhanced with longer-term maturities. There is a greater level of credit risk and price volatility involved with high yield securities than investment grade securities. Investing internationally, especially in emerging markets, involves additional risks such as currency, political, accounting, economic, and market risk. Bank loans may be unsecured or not fully collateralized, may be subject to restrictions on resale and/or trade infrequently on the secondary market. Loans can carry significant credit and call risk, can be difficult to

value and have longer settlement times than other investments, which can make loans relatively illiquid at times.
