

Virtus Total Return Fund Declares Distribution

HARTFORD, Conn., May 26, 2020 /PRNewswire/ -- [Virtus Total Return Fund Inc.](#) (NYSE: ZTR) today announced the following monthly distributions:

Amount of Distribution	Ex-Date	Record Date	Payable Date
\$0.08	June 10, 2020	June 11, 2020	June 18, 2020
\$0.08	July 10, 2020	July 13, 2020	July 20, 2020
\$0.08	August 12, 2020	August 13, 2020	August 20, 2020
\$0.08	September 10, 2020	September 11, 2020	September 18, 2020

This distribution represents a per annum distribution rate of approximately 11.24% based on the market price of the fund's shares of \$8.54 as of the close of the New York Stock Exchange on Friday, May 22, 2020 and approximately 11.64% based on the fund's net asset value (NAV) of \$8.25 as of the same date.

The fund's monthly distribution rate has been reduced by \$0.033 per share effective with the June 18, 2020 distribution. As a result of market events during the first quarter of 2020, including the rapid and significant decline in the equities markets, the distribution rate was reduced in order to provide a distribution rate more sustainable in the current environment.

Under the terms of its Managed Distribution Plan, the fund will seek to maintain a consistent distribution level that may be paid in part or in full from net investment income and realized capital gains, or a combination thereof. Shareholders should note, however, that if the fund's aggregate net investment income and net realized capital gains are less than the amount of the distribution level, the difference will be distributed from the fund's assets and will constitute a return of the shareholder's capital. You should not draw any conclusions about the fund's investment performance from the amount of this distribution or from the terms of the fund's Managed Distribution Plan.

The fund estimates that it has distributed more than its income and capital gains; therefore, a portion of your distribution may be a return of capital. A return of capital may occur, for example, when some or all of the money that you invested in the fund is paid back to you. A return of capital distribution does not necessarily reflect the fund's investment performance and should not be confused with 'yield' or 'income'.

The fund provided this estimate of the sources of the distributions:

Fund Risks

An investment in a fund is subject to risk, including the risk of possible loss of principal. A fund's shares may be worth less upon their sale than what an investor paid for them. The options overlay strategy may not be successful in achieving its objective of increasing distributable income while limiting the risk of loss and, in periods of significant moves in the S&P 500® Index, has resulted in, and in the future, may result in, losses for investors. Shares of closed-end funds may trade at a discount to their net asset value. For more information about each fund's investment objective and risks, please see the fund's annual report.
