

Hi Everyone,

It's me again, with another quick note. We have one more important update to add to the bulletin today:

- **We have made the decision to temporarily increase compensation for our store and distribution centre colleagues by approximately 15% retroactive to March 8th in recognition of their outstanding and ongoing efforts keeping our stores open and operating so effectively**

Our extraordinary teams are motivated by what they see as a responsibility to Canadians and the opportunity to make a difference. But, unlike so many businesses across the country right now, our supermarkets and pharmacies are performing well. And the leaders in our business wanted to make sure that a significant portion of that benefit would go straight into the pockets of the incredible people on the frontline and in our distribution centres.

As a quick tip, the fastest and easiest way to get these updates is through the PC Optimum App.

More soon.

Galen Weston
