

RELEASE DATE: Immediate February 5, 2007

NATIONAL FUEL REPORTS FIRST QUARTER EARNINGS

Williamsville, New York: National Fuel Gas Company (“National Fuel” or the “Company”) (NYSE:NFG) today announced results for the first quarter of its 2007 fiscal year (the quarter ended December 31, 2006).

HIGHLIGHTS

- Reported GAAP earnings per share for the quarter of \$0.64 were down \$0.03 per share from the prior year’s first quarter. Earnings were \$0.04 higher in the Exploration and Production segment due to higher production and higher realized crude oil prices and \$0.03 higher in the Corporate and All Other category, but those increases were more than offset by lower earnings in the Utility, Pipeline and Storage, Energy Marketing, and Timber segments as a result of warmer weather and lower natural gas prices.
- Quarterly operating results before items impacting comparability were \$0.62 per share, down \$0.02 from the prior year’s first quarter.
- Production of crude oil and natural gas volumes for the quarter increased 0.9 billion cubic feet equivalent (“Bcfe”) to 12.0 Bcfe, in line with the Company’s guidance. The Company’s expected production for the entire 2007 fiscal year remains at the previously announced level of 47 to 52 Bcfe.*
- The Company is increasing its earnings guidance range for fiscal 2007 by \$0.05 per share. The revised guidance range for fiscal 2007 is \$2.15 to \$2.35 per share.*
- A conference call is scheduled for Tuesday, February 6, 2007 at 11:00 am Eastern Standard Time.

MANAGEMENT COMMENTS

Philip C. Ackerman, Chairman and Chief Executive Officer of National Fuel Gas Company stated: “The unusually warm, wet weather we experienced in November and December negatively impacted all segments of our business. Lower demand for natural gas reduced Utility and Energy Marketing earnings; lower gas prices reduced the efficiency gas revenues of the Pipeline; and warm, wet, muddy conditions impeded our ability to harvest timber and to drill and complete wells in Pennsylvania. Despite experiencing the warmest weather our operating area

has seen in the last five years, consolidated operating results declined only a modest \$0.02 per share. We now are experiencing colder weather which should allow us to return to our normal timber harvesting rates and catch up on our Appalachian drilling program now that drilling locations can be accessed.”*

SUMMARY OF RESULTS

National Fuel had consolidated earnings for the quarter ended December 31, 2006 of \$54.5 million, or \$0.64 per share, a decrease of \$2.9 million, or \$0.03 per share, from the prior year’s first quarter of \$57.4 million or \$0.67 per share. (note: all references to earnings per share are to diluted earnings per share and all amounts are stated in U.S. dollars).

	Three Months Ended December 31,	
	2006	2005
<i>(in thousands except per share amounts)</i>		
Reported GAAP earnings	\$ 54,520	\$ 57,419

Operating results	<u>\$ 52,632</u>	<u>\$ 54,868</u>
 Reported GAAP earnings per share	 \$ 0.64	 \$ 0.67
Items impacting comparability:		
Discontinuance of hedge accounting ¹	(0.02)	
Out-of-period symmetrical sharing adjustment ¹		(0.03)
Operating results	<u>\$ 0.62</u>	<u>\$ 0.64</u>

¹ See discussion of this item below.

As outlined in the table above, certain items included in GAAP earnings impacted the comparability of the Company’s operating results when comparing the first quarter of fiscal 2007 to the first quarter of fiscal 2006. Excluding these items, operating results for the current first quarter were \$52.6 million, or \$0.62 per share, a decrease of \$2.2 million, or \$0.02 per share, from the prior year’s first quarter. Items impacting comparability will be discussed in more detail within the discussion of segment earnings below.

DISCUSSION OF RESULTS BY SEGMENT

(The following discussion of the earnings of each segment is summarized in a tabular form at pages 7 and 8 of this report. It may be helpful to refer to those tables while reviewing this discussion.)

Utility Segment

The Utility segment operations are carried out by National Fuel Gas Distribution Corporation (“Distribution”), which sells or transports natural gas to customers located in western New York and northwestern Pennsylvania. The Utility segment’s earnings of approximately \$17.2 million, or \$0.20 per share, for the quarter ended December 31, 2006 decreased \$4.6 million or \$0.05 per share compared to the prior year’s first quarter. The comparability of the results is impacted by a \$2.6 million positive out-of-period adjustment recorded in the first quarter of fiscal 2006 to correct Distribution’s calculation of the symmetrical sharing component of New York’s gas adjustment rate. The remaining decrease is mainly due to lower usage per customer account during the quarter.

Pipeline and Storage Segment

The Pipeline and Storage segment operations are carried out by National Fuel Gas Supply Corporation (“Supply Corporation”) and Empire State Pipeline (“Empire”). These companies provide natural gas transportation and storage services to affiliated and non-affiliated companies through an integrated system of pipelines and underground natural gas storage fields in western New York and western Pennsylvania.

The Pipeline and Storage segment’s earnings of \$13.7 million, or \$0.16 per share, for the quarter ended December 31, 2006, decreased \$2.2 million, or \$0.03 per share, when compared with the same period in the prior fiscal year. The comparability of the results for the quarter is impacted by a \$1.9 million gain associated with the prepayment this quarter of the project financing debt for the Empire State Pipeline. Upon the payment of that debt, the corresponding interest rate collar no longer qualifies for hedge accounting, and gains and losses are no longer deferred. Excluding that gain, operating results decreased \$4.1 million mainly due to lower efficiency gas revenue resulting from lower natural gas prices. Also higher throughput realized in the prior year first quarter when Supply and Empire were able to generate additional earnings by utilizing a portion of their system capacity to provide alternate transportation options to customers whose normal natural gas transportation routes were impacted by the hurricanes in the fall of 2005 did not recur this year.

Exploration and Production Segment

The Exploration and Production segment operations are carried out by Seneca Resources Corporation (“Seneca”). Seneca explores for, develops and purchases natural gas and oil reserves in California, in the Appalachian region, in the Gulf Coast region of Texas, Louisiana and Alabama, and in the western provinces of Canada.

The Exploration and Production segment’s earnings in the first quarter of fiscal 2007 increased \$3.3 million or \$0.04 per share to \$20.7 million or \$0.24 per share on a 0.855 Bcfe or 7.6 percent increase in production to 12 Bcfe. A minor drop in oil production was more than offset by an increase in gas production while the drop in natural gas prices was more than offset by the increase in oil prices realized after hedging. While much of the year over year increase in Gulf Coast production is attributable to the resumption of production after last year’s hurricane shut-ins, the 18.5 percent increase in Appalachia production is organic growth attributable to the ramp-up in drilling activity over the past two years and production from those newer wells. For the quarter ended December 31, 2006, the weighted average oil price received by Seneca (after hedging) was \$43.74/barrel (“Bbl”), an increase of \$10.67/Bbl from the prior year’s quarter.

This increase in the weighted average oil price was mainly due to the expiration of older hedges. The weighted average natural gas price received by Seneca (after hedging) was \$6.93 per thousand cubic feet ("Mcf"), a decrease of \$1.51/Mcf from the prior year's quarter.

Energy Marketing

National Fuel Resources, Inc. ("NFR") comprises the Company's Energy Marketing segment. NFR markets natural gas to industrial, commercial, public authority and residential customers in western and central New York and northwestern Pennsylvania, offering competitively priced energy and energy management services to its customers.

The Energy Marketing segment's earnings for the quarter of \$0.5 million compare to earnings of \$1.0 million in the first quarter last year. An increase of 11 percent in sales throughput helped offset the impact of fewer spot sales and other operational opportunities when compared to the prior year's first quarter. Margins were lower due to these reduced opportunities together with higher quarterly operating expenses.

Timber Segment

The Timber segment operations are carried out by Highland Forest Resources, Inc. ("Highland") and Seneca's Northeast Division. This segment markets high quality hardwoods from its New York and Pennsylvania land holdings and owns two sawmill/dry kiln operations in northwestern Pennsylvania.

The Timber segment's first quarter earnings of \$0.2 million compare to \$1.5 million in the prior year's first quarter. Unfavorable weather conditions hindered the harvesting of both veneer and saw logs. This resulted in lower sales of both logs and lumber during the quarter.

Corporate and All Other

Other direct, wholly-owned subsidiaries of the Company include Horizon Energy Development, Inc., a corporation formerly engaged in the development of international power projects, Horizon LFG, Inc., a corporation engaged, through subsidiaries, in the purchase, processing, transportation and sale of landfill gas, and Horizon Power, Inc. ("Horizon Power"), a corporation that develops and owns independent electric generation facilities which are fueled by natural gas or landfill gas.

Earnings in the Corporate and All Other category were \$2.2 million, an increase of \$2.3 million or \$0.03 per share when compared to the prior year's first quarter loss of \$0.1 million. The increase is due to higher intercompany interest income on higher cash balances that the companies in this category made available to other segments for their working capital needs.

SHARE REPURCHASES

During the quarter, the Company repurchased in the open market 1,183,928 shares of its common stock pursuant to the authorization of the Company's Board of Directors to repurchase up to 8,000,000 shares of its common stock. Through December 31, 2006, the Company has repurchased 3,710,478 shares pursuant to this authorization. For the quarter ended December 31,

2006, the Company estimates that the calculated diluted earnings per share were increased by \$0.007 per share as a result of the share repurchases during the quarter.

With respect to the earnings guidance discussed below, the Company has not incorporated any additional share repurchases into its earnings per share guidance. The Company continues to view share repurchases as an appropriate use of its cash, and will continue to consider repurchasing shares up to the full 8,000,000 repurchase authorization of its Board of Directors.* The Company cannot predict with any certainty the timing of those repurchases or the impact of those repurchases on the calculation of earnings per share.

EARNINGS GUIDANCE

The Company is increasing its consolidated earnings guidance for fiscal 2007 by \$0.05 per share to the range of \$2.15 to \$2.35 per share.* This increase results primarily from a decrease in the depreciation, depletion and amortization ("DD&A") expense expected to be incurred in the Exploration and Production segment during the fiscal year. This guidance is still based on the September 21, 2006 commodity pricing incorporated in the Company's original guidance. To the extent that actual pricing during the remainder of the fiscal year varies from those September 21, 2006 prices, the fiscal year earnings will be affected as detailed in the earnings sensitivity table on page 20 of this release.

EARNINGS TELECONFERENCE

The Company will host a conference call on Tuesday, February 6, 2007, at 11 a.m. (Eastern Standard Time) to discuss this announcement. There are two ways to access this call. For those with Internet access, visit National Fuel's Web site at <http://www.nationalfuelgas.com> and click on the "For Investors" link at the top of the homepage. For those without Internet access, access is also provided by dialing (toll-free) 1-866-700-6067, and using the passcode "79640993." For those unable to listen to the live conference call, a replay will be available approximately one hour after the conclusion of the call at the same Web site link and by phone at (toll free) 888-286-8010 using passcode "82459115." Both the webcast and telephonic replay will be available until the close of business on Tuesday, February 13, 2006.

National Fuel is an integrated energy company with \$3.8 billion in assets comprised of the following five operating segments: Utility, Pipeline and Storage, Exploration and Production, Energy Marketing, and Timber. Additional information about National Fuel is available on its Internet Web site: <http://www.nationalfuelgas.com> or through its investor information service at 1-800-334-2188.
