A capitalization rate is determined by dividing the property's net operating income by the purchase price. Net operating income is the property's funds from operations minus a capital expense reserve of either 4% or 5% of gross revenues. Hotel EBITDA flow-through is the change in Hotel EBITDA divided by the change in total revenues. EBITDA, FFO, AFFO, CAD and other terms are non-GAAP measures, reconciliations of which have been provided in prior earnings releases and filings with the SEC.
