2Q17

Financial and operating results for the period ended June 30, 2017

July 27, 2017

Unless otherwise specified, comparisons in this presentation are between 2Q16 and 2Q17.

Forward-Looking Statements

Certain statements made in this presentation should be considered forward-looking statements as defined in the Private Securities Litigation Reform Act of 1995. These include statements about future results of operations and capital plans. We caution investors that these forward-looking statements are not guarantees of future performance, and actual results may differ materially. Investors should consider the important risks and uncertainties that may cause actual results to differ, including those included in our press release issued on July 26, 2017, our Quarterly Reports on Form 10-Q, our Annual Report on Form 10-K and other filings we make with the Securities and Exchange Commission. We assume no obligation to update this presentation, which speaks as of today's date.

Non-GAAP Measures

This presentation contains the following financial measures that differ from the comparable measures under Generally Accepted Accounting Principles (GAAP): operating earnings measures; book value, excluding accumulated other comprehensive income (loss) per share; operating return measures; earnings before the loss on reinsurance transaction, net realized investment gains (losses), fair value changes in embedded derivative liabilities, fair value changes and amendment related to the agent deferred compensation plan, other non-operating items, corporate interest expense and taxes; and debt to capital ratios, excluding accumulated other comprehensive income (loss). Reconciliations between those non-GAAP measures and the comparable GAAP measures are included in the Appendix, or on the page such measure is presented.

While management believes these measures are useful to enhance understanding and comparability of our financial results, these non-GAAP measures should not be considered substitutes for the most directly comparable GAAP measures.

Additional information concerning non-GAAP measures is included in our periodic filings with the Securities and Exchange Commission that are available in the “Investors – SEC Filings” section of CNO’s website, www.CNOinc.com.

Total CNO	\$106.3	\$104.6	\$108.9	\$107.4	\$123.3

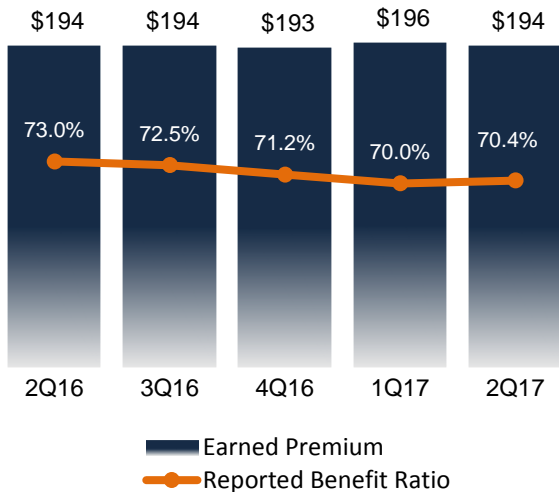

Segment Highlights

- Bankers Life results reflect growth in annuity account values, higher LTC margins, and higher call/prepayment income
- Washington National results reflect higher supplemental health margins and higher call/prepayment income
- Colonial Penn results reflect favorable mortality and lower direct marketing costs
- LTC in run-off reflects favorable incurred claims
- Corporate results reflect higher expenses partially offset by higher investment income

¹ A non-GAAP measure. See the Appendix for a reconciliation to the corresponding GAAP measure.

Health Margins (\$ millions)

Bankers Life Medicare Supplement Benefit Ratio

- Benefit ratio of 70.4% reflecting favorable incurred claims
- Lowering benefit ratio guidance to 70-73% for remainder of 2017**

Bankers Life Long-term Care IABR¹

- Adjusted IABR² of 74.4%, excluding shock lapse and other one-time impacts
- No future loss reserve accrual in 2017
- Lowering IABR¹ guidance to 75-80% for remainder of 2017**

Washington National Supplemental Health IABR¹

- IABR¹ of 60.4% is in-line with expectations
- Maintaining IABR¹ guidance of 58-61% for remainder of 2017**

¹ Interest-adjusted benefit ratio (IABR); a non-GAAP measure. Refer to the Appendix for the corresponding GAAP measure.

Alternative Investment Income	\$4.6	\$4.7	\$6.7	\$8.5	\$6.1

- New money rate lower due to emphasis on minimizing cash float during period of high investable balances
- Significant sequential quarter and year-over-year increase in call and pre-payment income
- Alternatives results benefiting from increased credit and real asset allocation along with higher equity markets

Realized Gains, Losses and Impairments

- Portfolio turnover and realized gains/losses remain low in light of market reinvestment yields
- Continued favorable credit performance (low impairments)
- Continue to reposition recaptured assets; remaining balance of \$74.8 million as of 6/30/17

¹ Earned Yield excludes assets held in our FHLB matchbook program.

Active Risk Management of Bankers Life Long-Term Care

Risk considerations

- Sold primarily to middle-income individuals at/near retirement
- Lower average **benefit levels**;
 - Only 1/3 of insureds include inflation benefit (<50% of these 5% compound)
 - Lifetime benefits comprise 10% of reserves (4% of insureds)
 - Benefit periods of 4 years or less are 73% of reserves (87% of insureds)
- Continue to offer **solutions** to address critical need for our **customers**
 - Over 95% of current sales have benefit periods of **two** years or less
- Assets and liabilities **matched**, mitigating interest rate risk

Proactive in-force management

- Since 2006, completed **five** rounds of actuarially justified rate increases
- Piloting and implementing initiatives to bend the claim cost curve
- Comprehensive claim and persistency studies conducted and refreshed regularly
- Coinsurance of new business since 2008
- Solid claim reserve track record; reserves have been **redundant** over the past 10+ years
- Have opportunistically acted to **reduce** long-term care risk exposure over time
 - Product re-pricings
 - Shorter benefit period offerings

Holistic approach to managing long-term care business

(1) Pre-tax earnings in the Bankers Life segment included: (i) favorable persistency (including the results of extensive procedures performed to identify policies that had terminated prior to June 30, 2017 due to death); and (ii) policy holder actions following long-term care rate increases. These items resulted in a release of reserves, primarily related to the long-term care business in the Bankers Life segment, which totaled \$9.4 million.

*Management believes that an analysis of earnings before net realized investment gains (losses), fair value changes in embedded derivative liabilities, fair value changes and amendment related to the agent deferred compensation plan, loss on reinsurance transaction, other non-operating items, corporate interest expense and taxes ("Adjusted EBIT," a non-GAAP financial measure) provides a clearer comparison of the operating results of the company quarter-over-quarter because it excludes: (1) net realized investment gains (losses); (2) fair value changes due to fluctuations in the interest rates used to discount embedded derivative liabilities related to our fixed index annuities that are unrelated to the company's underlying fundamentals; (3) fair value changes and amendment related to the agent deferred compensation plan; (4) loss on reinsurance transaction; (5) charges in the valuation allowance for deferred tax assets and other tax items; and (6) other non-operating items consisting primarily of earnings attributable to variable interest entities. The table above provides a reconciliation of Adjusted EBIT to net income.

Information Related to Certain Non-GAAP Financial Measures

The following provides additional information regarding certain non-GAAP measures used in this presentation. A non-GAAP measure is a numerical measure of a company's performance, financial position, or cash flows that excludes or includes amounts that are normally excluded or included in the most directly comparable measure calculated and presented in accordance with GAAP. While management believes these measures are useful to enhance understanding and comparability of our financial results, these non-GAAP measures should not be considered as substitutes for the most directly comparable GAAP measures. Additional information concerning non-GAAP measures is included in our periodic filings with the Securities and Exchange Commission that are available in the "Investors – SEC Filings" section of CNO's website, www.CNOinc.com.

Operating earnings measures

Management believes that an analysis of net income applicable to common stock before net realized investment gains or losses, fair value changes due to fluctuations in the interest rates used to discount embedded derivative liabilities related to our fixed index annuities, fair value changes and amendment related to the agent deferred compensation plan, loss on reinsurance transaction, changes in the valuation allowance for deferred tax assets and other tax items and other non-operating items consisting primarily of earnings attributable to variable interest entities ("net operating income," a non-GAAP financial measure) is important to evaluate the financial performance of the Company and is a key measure commonly used in the life insurance industry. Management uses this measure to evaluate performance because the items excluded from net operating income can be affected by events that are unrelated to the Company's underlying fundamentals.

Book value per diluted share

Book value per diluted share reflects the potential dilution that could occur if outstanding stock options were exercised, restricted stock and performance units were vested and convertible securities were converted. The dilution from options, restricted shares and performance units is calculated using the treasury stock method. Under this method, we assume the proceeds from the exercise of the options (or the unrecognized compensation expense with respect to restricted stock and performance units) will be used to purchase shares of our common stock at the closing market price on the last day of the period. In addition, the calculation of this non-GAAP measure differs from the corresponding GAAP measure because accumulated other comprehensive income (loss) has been excluded from the value of capital used to determine this measure. Management believes this non-GAAP measure is useful because it removes the volatility that arises from changes in the unrealized appreciation (depreciation) of our investments.

A reconciliation from book value per share to book value per diluted share, excluding accumulated other comprehensive income (loss) is as follows (dollars in millions, except per share amounts):

Interest-adjusted benefit ratios

The interest-adjusted benefit ratio (a non-GAAP measure) is calculated by dividing the product's insurance policy benefits less imputed interest income on the accumulated assets backing the insurance liabilities by insurance policy income. Interest income is an important factor in measuring the performance of longer duration health products. The net cash flows generally cause an accumulation of amounts in the early years of a policy (accounted for as reserve increases), which will be paid out as benefits in later policy years (accounted for as reserve decreases). Accordingly, as the policies age, the benefit ratio will typically increase, but the increase in the change in reserve will be partially offset by the imputed interest income earned on the accumulated assets. The interest-adjusted benefit ratio reflects the effects of such interest income offset. Since interest income is an important factor in measuring the performance of these products, management believes a benefit ratio, which includes the effect of interest income, is useful in analyzing product performance. The interest-adjusted benefit ratio excluding the impact of rate increases and other one-time impacts eliminates the release of reserves due to the impact of policyholder actions following rate increases and other one-time impacts.

Operating return measures

Management believes that an analysis of net income applicable to common stock before net realized investment gains or losses, fair value changes due to fluctuations in the interest rates used to discount embedded derivative liabilities related to our fixed index annuities, fair value changes and amendment related to the agent deferred compensation plan, loss on reinsurance transaction, changes in the valuation allowance for deferred tax assets and other tax items, loss on extinguishment of debt and other non-operating items consisting primarily of earnings attributable to variable interest entities (“net operating income,” a non-GAAP financial measure) is important to evaluate the financial performance of the Company and is a key measure commonly used in the life insurance industry. Management uses this measure to evaluate performance because the items excluded from net operating income can be affected by events that are unrelated to the Company’s underlying fundamentals.

Management also believes that an operating return, excluding significant items, is important as the impact of these items enhances the understanding of our operating results.

This non-GAAP financial measure also differs from return on equity because accumulated other comprehensive income (loss) has been excluded from the value of equity used to determine this ratio. Management believes this non-GAAP financial measure is useful because it removes the volatility that arises from changes in accumulated other comprehensive income (loss). Such volatility is often caused by changes in the estimated fair value of our investment portfolio resulting from changes in general market interest rates rather than the business decisions made by management.

In addition, our equity includes the value of significant net operating loss carryforwards (included in income tax assets). In accordance with GAAP, these assets are not discounted, and accordingly will not provide a return to shareholders (until after it is realized as a reduction to taxes that would otherwise be paid). Management believes that excluding this value from the equity component of this measure enhances the understanding of the effect these non-discounted assets have on operating returns and the comparability of these measures from period-to-period. Operating return measures are used in measuring the performance of our business units and are used as a basis for incentive compensation.

Debt to capital ratio, excluding accumulated other comprehensive income (loss)

The debt to capital ratio, excluding accumulated other comprehensive income (loss), differs from the debt to capital ratio because accumulated other comprehensive income (loss) has been excluded from the value of capital used to determine this measure. Management believes this non-GAAP financial measure is useful because it removes the volatility that arises from changes in accumulated other comprehensive income (loss). Such volatility is often caused by changes in the estimated fair value of our investment portfolio resulting from changes in general market interest rates rather than the business decisions made by management. A reconciliation of these ratios is as follows (dollars in millions):

	<u>2Q16</u>	<u>3Q16</u>	<u>4Q16</u>	<u>1Q17</u>	<u>2Q17</u>
Corporate notes payable	\$ 912.0	\$ 912.5	\$ 912.9	\$ 913.4	\$ 913.9
Total shareholders' equity	<u>4,456.2</u>	<u>4,493.8</u>	<u>4,486.9</u>	<u>4,606.8</u>	<u>4,779.3</u>
Total capital	<u>\$ 5,368.2</u>	<u>\$ 5,406.3</u>	<u>\$ 5,399.8</u>	<u>\$ 5,520.2</u>	<u>\$ 5,693.2</u>
