¹ Refer to "Non-GAAP Reconciliations" and "Non-GAAP Measures Definitions" in the additional information section.

² For time periods when preferred stock is dilutive, the weighted average number of diluted shares includes assumed issuance of common shares upon conversion of the preferred stock; additionally, the preferred stock dividends are not deducted from net earnings (loss) or adjusted net earnings (loss).

³ Opportunistic sales volumes fluctuate quarter to quarter depending on economics and market opportunity as we prioritize allocating capital to the highest return opportunities.

⁴ Sales attributable to flow reinsurance to third parties includes the reinsurance sidecar.

² Periods prior to March 31, 2025 have been recast to reflect updated definitions for cost of funds and flow reinsurance fee income to better align amortization and reimbursement of acquisition costs.

Adjusted Net Earnings - Significant Income and Expense Items ^{1 2}

Each reporting period, we identify significant income and expense items that help explain the trends in our adjusted net earnings, as we believe these items provide further clarity to the financial performance of the business. Those significant income and expense items are reported after taxes.

Three months ended

September 30, 2025

Adjusted net earnings of \$165 million for the three months ended September 30, 2025 included income from \$10 million tax valuation allowance benefit and \$4 million of actuarial reserve release. Investment income from alternative investments was \$67 million below management's long-term expected return of approximately 10%.

June 30, 2025

Adjusted net earnings of \$103 million for the three months ended June 30, 2025. Investment income from alternative investments was \$83 million below management's long-term expected return of approximately 10%.

March 31, 2025

Adjusted net earnings of \$91 million for the three months ended March 31, 2025 included income from a \$16 million reinsurance true-up adjustment. Investment income from alternative investments was \$63 million below management's long-term expected return of approximately 10%.

December 31, 2024

Adjusted net earnings of \$143 million for the three months ended December 31, 2024 included income from \$7 million of actuarial model refinements and other items. Investment income from alternative investments was \$32 million below management's long-term expected return of approximately 10%.

September 30, 2024

Adjusted net earnings of \$156 million for the three months ended September 30, 2024 included net expense from \$17 million of actuarial assumption updates; partially offset by income from a \$14 million tax valuation allowance benefit. Investment income from alternative investments was \$41 million below management's long-term expected return of approximately 10%.

Nine months ended

September 30, 2025

Adjusted net earnings of \$359 million for the nine months ended September 30, 2025 included income from \$16 million reinsurance true-up adjustment, \$10 million tax valuation allowance benefit, and \$4 million of actuarial reserve release. Investment income from alternative investments was \$213 million below management's long-term expected return of approximately 10%.

September 30, 2024

Adjusted net earnings of \$403 million for the nine months ended September 30, 2024 included expense from \$33 million of actuarial model updates and refinements; partially offset by income from a \$14 million tax valuation allowance benefit and \$2 million of other income items. Investment income from alternative investments was \$113 million below management's long-term expected return of approximately 10%.

¹ Refer to Reconciliation of net earnings (loss) to adjusted net earnings attributable to common shareholders on page 17 and Adjusted Net Earnings - Management View on page 5.

² Periods prior to March 31, 2025 have been recast to remove CLO redemption and bond prepayment income from significant income and expense items.

¹ Refer to "Non-GAAP Reconciliations" and "Non-GAAP Measures Definitions" in the additional information section.

² Reflects interest and investment income on an adjusted net earnings basis.

³ Comprised of alternative investment income, which includes mark-to-market movement that is reflected in adjusted net earnings, from limited partnerships and limited liability corporations classified as investments in unconsolidated affiliates and non-direct lending and direct lending securitizations classified as fixed maturity securities.

⁴ Includes significant, non-recurring interest and investment income items, which could include call and tender income, commercial loan obligation redemption gains and other miscellaneous investment income.

⁵ Includes interest and investment income from fixed maturity securities (excluding certain asset backed securities considered alternative investments), mortgage loans, equity securities, short-term investments, and long-term investments.

Non-GAAP Measures Definitions

Non-GAAP Measures

Generally Accepted Accounting Principles ("GAAP") is the term used to refer to the standard framework of guidelines for financial accounting. GAAP includes the standards, conventions, and rules accountants follow in recording and summarizing transactions and in the preparation of financial statements. In addition to reporting financial results in accordance with GAAP, this document includes non-GAAP financial measures, which the Company believes are useful to help investors better understand its financial performance, competitive position and prospects for the future. Management believes these non-GAAP financial measures may be useful in certain instances to provide additional meaningful comparisons between current results and results in prior operating periods. Our non-GAAP measures may not be comparable to similarly titled measures of other organizations because other organizations may not calculate such non-GAAP measures in the same manner as we do. The presentation of this financial information is not intended to be considered in isolation of or as a substitute for, or superior to, the financial information prepared and presented in accordance with GAAP. By disclosing these non-GAAP financial measures, the Company believes it offers investors a greater understanding of, and an enhanced level of transparency into, the means by which the Company's management operates the Company. Any non-GAAP measures should be considered in context with the GAAP financial presentation and should not be considered in isolation or as a substitute for GAAP net earnings, net earnings attributable to common shareholders, or any other measures derived in accordance with GAAP as measures of operating performance or liquidity. Reconciliations of these non-GAAP financial measures to the most directly comparable GAAP measures are provided within.

The following represents the definitions of non-GAAP measures used by F&G:

Adjusted Net Earnings attributable to common shareholders

Adjusted net earnings attributable to common shareholders is a non-GAAP economic measure we use to evaluate financial performance each period. Adjusted net earnings attributable to common shareholders is calculated by adjusting net earnings (loss) attributable to common shareholders to eliminate:

- (i) Recognized (gains) and losses, net: the impact of net investment gains/losses, including changes in allowance for expected credit losses and other than temporary impairment ("OTTI") losses, recognized in operations; and the effects of changes in fair value of the reinsurance related embedded derivative and other derivatives, including interest rate swaps and forwards;
- (ii) Market related liability adjustments: the impacts related to changes in the fair value, including both realized and unrealized gains and losses, of index product related derivatives and embedded derivatives, net of hedging cost; the impact of initial pension risk transfer deferred profit liability losses, including amortization from previously deferred pension risk transfer deferred profit liability losses; and the changes in the fair value of market risk benefits by deferring current period changes and amortizing that amount over the life of the market risk benefit;
- (iii) Purchase price amortization: the impacts related to the amortization of certain intangibles (internally developed software, trademarks and value of distribution asset and the change in fair value of liabilities recognized as a result of acquisition activities);
- (iv) Transaction costs: the impacts related to acquisition, integration and merger related items;
- (v) Other and "non-recurring," "infrequent" or "unusual items": Other adjustments include removing any charges associated with U.S. guaranty fund assessments as these charges neither relate to the ordinary course of the Company's business nor reflect the Company's underlying business performance, but result from external situations not controlled by the Company. Further, Management excludes certain items determined to be "non-recurring," "infrequent" or "unusual" from adjusted net earnings when incurred if it is determined these expenses are not a reflection of the core business and when the nature of the item is such that it is not reasonably likely to recur within two years and/or there was not a similar item in the preceding two years;
- (vi) Non-controlling interest on non-GAAP adjustments: the portion of the non-GAAP adjustments attributable to the equity interest of entities that F&G does not wholly own; and
- (vii) Income taxes: the income tax impact related to the above-mentioned adjustments is measured using an effective tax rate, as appropriate by tax jurisdiction.

While these adjustments are an integral part of the overall performance of F&G, market conditions and/or the non-operating nature of these items can overshadow the underlying performance of the core business. Accordingly, management considers this to be a useful measure internally and to investors and analysts in analyzing the trends of our operations. Adjusted net earnings should not be used as a substitute for net earnings (loss). However, we believe the adjustments made to net earnings (loss) in order to derive adjusted net earnings provide an understanding of our overall results of operations.

Non-GAAP Measures Definitions (continued)

Adjusted Weighted Average Diluted Shares Outstanding

Adjusted weighted average diluted shares outstanding is the same as weighted average diluted shares outstanding except for periods in which our preferred stocks are calculated to be dilutive to either net earnings attributable to common shareholders or adjusted net earnings attributable to common shareholders, but not both, or there is a net earnings loss attributable to common shareholders on a GAAP basis, but positive adjusted net earnings attributable to common shareholders using the non-GAAP measure. The above exceptions are made to include relevant diluted shares when dilution occurs and exclude relevant diluted shares when dilution does not occur for adjusted net earnings attributable to common shareholders.

Management considers this non-GAAP financial measure to be useful internally and for investors and analysts to assess the level of return driven by the Company that is available to common shareholders.

Adjusted Net Earnings attributable to common shareholders per Diluted Share

Adjusted net earnings attributable to common shareholders per diluted share is calculated as adjusted net earnings plus preferred stock dividend (if the preferred stock has created dilution). This sum is then divided by the adjusted weighted-average diluted shares outstanding.

Management considers this non-GAAP financial measure to be useful internally and for investors and analysts to assess the level of return driven by the Company that is available to common shareholders.

Adjusted Return on Assets attributable to Common Shareholders

Adjusted return on assets attributable to common shareholders is calculated by dividing year-to-date annualized adjusted net earnings attributable to common shareholders by year-to-date AAUM. Return on assets is comprised of net investment income, less cost of funds, flow reinsurance fee income, owned distribution margin and less expenses (including operating expenses, interest expense and income taxes) consistent with our adjusted net earnings definition and related adjustments. Cost of funds includes liability costs related to cost of crediting as well as other liability costs. Management considers this non-GAAP financial measure to be useful internally and to investors and analysts when assessing financial performance and profitability earned on AAUM.

Adjusted Return on Average Common Shareholder Equity, excluding AOCI

Adjusted return on average common shareholder equity is calculated by dividing the rolling four quarters adjusted net earnings attributable to common shareholders, by total average F&G equity attributable to common shareholders, excluding AOCI. Average equity attributable to common shareholders, excluding AOCI for the twelve month rolling period is the average of 5 points throughout the period. Since AOCI fluctuates from quarter to quarter due to unrealized changes in the fair value of available for sale investments, changes in instrument-specific credit risk for market risk benefits and discount rate assumption changes for the future policy benefits, management considers this non-GAAP financial measure to be a useful internally and for investors and analysts to assess the level return driven by the Company's adjusted earnings.

Assets Under Management (AUM)

AUM is comprised of the following components and is reported net of reinsurance assets ceded in accordance with GAAP:

- (i) total invested assets at amortized cost, excluding investments in unconsolidated affiliates, owned distribution and derivatives;
- (ii) investments in unconsolidated affiliates at carrying value;
- (iii) related party loans and investments;
- (iv) accrued investment income;
- (v) the net payable/receivable for the purchase/sale of investments; and
- (vi) cash and cash equivalents excluding derivative collateral at the end of the period.

Management considers this non-GAAP financial measure to be useful internally and to investors and analysts when assessing the size of our investment portfolio that is retained.

AUM before Flow Reinsurance

AUM before Flow Reinsurance is comprised of AUM plus flow reinsured assets, including certain block reinsured assets that have the characteristics of flow reinsured assets.

Management considers this non-GAAP financial measure to be useful internally and to investors and analysts when assessing the size of our investment portfolio including reinsured assets.

Non-GAAP Measures Definitions (continued)

Average Assets Under Management (AAUM) (Quarterly and YTD)

AAUM is calculated as AUM at the beginning of the period and the end of each month in the period, divided by the total number of months in the period plus one.

Management considers this non-GAAP financial measure to be useful internally and to investors and analysts when assessing the rate of return on retained assets.

Book Value per Common Share, excluding AOCI

Book value per Common share, excluding AOCI is calculated as total F&G equity attributable to common shareholders divided by the total number of shares of common stock outstanding. Management considers this to be a useful measure internally and for investors and analysts to assess the capital position of the Company.

Return on Average F&G common shareholder Equity, excluding AOCI

Return on average F&G common shareholder equity, excluding AOCI is calculated by dividing the rolling four quarters net earnings (loss) attributable to common shareholders, by total average F&G equity attributable to common shareholders, excluding AOCI. Average F&G equity attributable to common shareholders, excluding AOCI for the twelve month rolling period is the average of 5 points throughout the period. Since AOCI fluctuates from quarter to quarter due to unrealized changes in the fair value of available for sale investments, changes in instrument-specific credit risk for market risk benefits and discount rate assumption changes for the future policy benefits, management considers this non-GAAP financial measure to be useful internally and for investors and analysts to assess the level of return driven by the Company that is available to common shareholders.

Sales

Annuity, IUL, funding agreement and non-life contingent PRT sales are not derived from any specific GAAP income statement accounts or line items and should not be viewed as a substitute for any financial measure determined in accordance with GAAP. Sales from these products are recorded as deposit liabilities (i.e., contractholder funds) within the Company's consolidated financial statements in accordance with GAAP. Life contingent PRT sales are recorded as premiums in revenues within the consolidated financial statements. Management believes that presentation of sales, as measured for management purposes, enhances the understanding of our business and helps depict longer term trends that may not be apparent in the results of operations due to the timing of sales and revenue recognition.

Total Capitalization, excluding AOCI

Total capitalization, excluding AOCI is based on total equity excluding the effect of AOCI and the total aggregate principal amount of debt. Since AOCI fluctuates from quarter to quarter due to unrealized changes in the fair value of available for sale investments, changes in instrument-specific credit risk for market risk benefits and discount rate assumption changes for the future policy benefits, management considers this non-GAAP financial measure to provide useful supplemental information internally and to investors and analysts to help assess the capital position of the Company.

Debt-to-Capitalization Ratio, excluding AOCI

Debt-to-capitalization ratio is computed by dividing total aggregate principal amount of debt by total capitalization (total debt plus total equity, excluding AOCI). Management considers this non-GAAP financial measure to be useful internally and to investors and analysts when assessing its capital position.

Total Equity, excluding AOCI

Total equity, excluding AOCI is based on total equity excluding the effect of AOCI. Since AOCI fluctuates from quarter to quarter due to unrealized changes in the fair value of available for sale investments, changes in instrument-specific credit risk for market risk benefits and discount rate assumption changes for the future policy benefits, management considers this non-GAAP financial measure to provide useful supplemental information internally and to investors and analysts assessing the level of earned equity on total equity.

Total F&G Equity attributable to common shareholders, excluding AOCI

Total F&G equity attributable to common shareholder, excluding AOCI is based on total F&G Annuities & Life, Inc. shareholders' equity excluding the effect of AOCI and preferred stocks, including additional paid-in-capital. Since AOCI fluctuates from quarter to quarter due to unrealized changes in the fair value of available for sale investments, changes in instrument-specific credit risk for market risk benefits and discount rate assumption changes for the future policy benefits, management considers this non-GAAP financial measure to be useful internally and for investors and analysts to assess the level of return driven by the Company that is available to common shareholders.

Yield on AAUM

Yield on AAUM is calculated by dividing annualized GAAP net investment income by AAUM. Management considers this non-GAAP financial measure to be useful internally and to investors and analysts when assessing the level of return earned on AAUM.
