

## **Environmental Sustainability Policy Statement**

Americold is dedicated to responsible sustainability practices and to serving and supporting the local communities in which we operate on behalf of our associates, customers, and shareholders. Americold is committed to deploy innovation, technology, time, and resources to continuously improve energy efficiencies, water usage, elimination of food wastes, and overall usage of resources more responsibly at our temperature controlled warehouses.

Americold Realty Trust is the leading publicly traded real estate investment trust (REIT) that owns and operates more than 238 cold storage facilities in 13 countries, across 4 continents. For over 115 years Americold has been on a journey of continuous improvement in operating our temperature-controlled infrastructure and supply chain at the highest levels of energy efficiency in the cold storage industry. Providing temperature-controlled supply chain solutions that protect and preserve product quality and minimization of food waste is an energy-intensive activity, and we are committed to the environmental sustainability and our corporate responsibility.

Our vision is to lead the Global Cold Chain industry in Energy Excellence and environmental performance. We are committed to leveraging Americold Operating Systems to enhance our sustainability efforts for the benefit of the environment, our customers, our associates, our shareholders, and our communities. Our key sustainability objectives are:

- Protect and Preserve product quality and minimize food waste
- Empower our associates to actively participate in Energy Waste Walks, water conservation programs, and waste reduction initiatives
- Leverage energy management technology to keep operations at the highest levels of energy efficiency and lowest kWh usage
- Continuously lower our GHG emissions and reduce our carbon footprint
- Share out our performance annually and transparently with our associates, customers, and shareholders

It's all part of our commitment to sustainability, to you, and to a healthy planet.
