Reconciliation of Non-GAAP Financial Measures

This presentation includes certain non-U.S. GAAP financial measures. The calculation of these measures, and a reconciliation to previously reported comparable measures calculated in accordance with U.S. generally accepted accounting principles (GAAP) is shown below. The Company believes that this information, when used in conjunction with information presented in accordance with U.S. GAAP, can facilitate a better understanding of the impact of various factors and trends on the Company's financial condition and results of operations. Management also uses these non-U.S. GAAP financial measures in making financial, operating and planning decisions and in evaluating the Company's performance. These non-GAAP financial measures have limitations as analytical tools and should not be considered in isolation or as a substitute for an analysis of our results calculated in accordance with GAAP. In addition, because not all companies use identical calculations, our presentation of non-U.S. GAAP financial measures may not be comparable to similarly titled measures disclosed by other companies, including companies in our industry. This information should be used in conjunction with the Company's Quarterly Report on Form 10-Q for the quarter ended June 30, 2021 and subsequently publicly filed financial reports.

Add back: Net special items expense (income)	0.07	0.13	(0.02)	0.04	1.07
Adjusted Operating Earnings per Share	<u>\$ 1.06</u>	<u>\$ 0.77</u>	<u>\$ 0.76</u>	<u>\$ 1.81</u>	<u>\$ 1.35</u>

Notes:

The Company calculates Adjusted Operating Earnings (non-GAAP) by excluding the after-tax effect of non-operating pension expense (income) and items considered by management to be unusual (net special items) as reflected in the Consolidated Statement of Operations and related notes from the earnings reported under U.S. generally accepted accounting principles ("GAAP"). Management uses this measure to focus on on-going operations, and believes that it is useful to investors because it enables them to perform meaningful comparisons of past and present consolidated operating results. The Company believes that using this information, along with net earnings, provides for a more complete analysis of the results of operations by quarter. Net earnings attributable to International Paper is the most directly comparable GAAP measure.

Since diluted earnings per share are computed independently for each period, six-month per share amounts may not equal the sum of respective quarters.

INTERNATIONAL PAPER COMPANY
Reconciliation of Cash Provided by Operations to Free Cash Flow
Preliminary and Unaudited
(In millions)

	Three Months Ended		Three Months Ended		Twelve Months Ended December 31,		
	June 30,		March 31,		2020	2019	2018
	2021	2020	2021				
Cash Provided By (Used For) Operating Activities	\$ 766	\$ 890	\$ 512		\$ 3,063	\$ 3,610	\$ 3,226
Adjustments:							
Cash invested in capital projects, net of insurance recoveries	(133)	(252)	(89)		(751)	(1,276)	(1,572)
Free Cash Flow	\$ 633	\$ 638	\$ 423		\$ 2,312	\$ 2,334	\$ 1,654

Free cash flow is a non-GAAP measure and the most directly comparable GAAP measure is cash provided by operations. Management believes that free cash flow is useful to investors as a liquidity measure because it measures the amount of cash generated that is available, after reinvesting in the business, to maintain a strong balance sheet, pay dividends, repurchase stock, service debt and make investments for future growth. It should not be inferred that the entire free cash flow amount is available for discretionary expenditures. By adjusting for certain items that are not indicative of the Company's ongoing performance, free cash flow also enables investors to perform meaningful comparisons between past and present periods.

The non-GAAP financial measures presented in this release have limitations as analytical tools and should not be considered in isolation or as a substitute for an analysis of our results calculated in accordance with GAAP. In addition, because not all companies use identical calculations, the Company's presentation of non-GAAP measures in this release may not be comparable to similarly titled measures disclosed by other companies, including companies in the same industry as International Paper.

Management believes certain non-U.S. GAAP financial measures, when used in conjunction with information presented in accordance with U.S. GAAP, can facilitate a better understanding of the impact of various factors and trends on the Company's financial condition and results of operations. Management also uses these non-U.S. GAAP financial measures in making financial, operating and planning decisions and in evaluating the Company's performance.

Deduct: Foreign Exchange Gain (Loss) Impact, Primarily Related to US Dollar Denominated Net Debt	-	85	-
Adjusted Operating EBITDA - Ilim SA	\$ 335	\$ 138	\$ 181

The Company calculates Adjusted Operating EBITDA (non-GAAP) by excluding the effects of non-controlling interest expense, tax expense, net interest expense, depreciation expense and the effect of foreign exchange gains and losses driven primarily by US dollar denominated net debt. Management uses this measure to focus on on-going operations, and believes that it is useful to investors because it enables them to perform meaningful comparisons of past and present operating results. International Paper believes that using this information, along with net earnings, provides for a more complete analysis of the results of operations by quarter. Net earnings attributable to Ilim SA is the most directly comparable GAAP measure.
