Financial Advisory

- ▶ Total Revenues were up 40% for the quarter and 17% year-to-date compared to the same periods last year, primarily due to an increase in activity in our Restructuring and Park Hill fund placement businesses.
- ▶ Restructuring has maintained strong performance despite the improving economy, as the business was ranked #1 in the Thomson Reuters Restructuring league tables for worldwide completed transactions for the first nine months of 2013.
- ▶ Park Hill's revenue increased year-over-year, and the pipeline remains strong as challenging fundraising market conditions continue to drive demand for alternative asset placement services.
- ▶ Blackstone Advisory Partners revenue was up modestly year-over-year and down year-to-date as strategic advisory and merger and acquisition activity globally remains soft.

Definitions and Distribution Policy

Blackstone discloses the following financial measures that are calculated and presented on the basis of methodologies other than in accordance with generally accepted accounting principles in the United States of America (“non-GAAP”) in this presentation:

- Blackstone uses Economic Income, or “EI”, as a key measure of value creation, a benchmark of its performance and in making resource deployment and compensation decisions across its five segments. EI represents segment net income before taxes excluding transaction-related charges. Transaction-related charges arise from Blackstone’s initial public offering (“IPO”) and long-term retention programs outside of annual deferred compensation and other corporate actions, including acquisitions. Transaction-related charges include equity-based compensation charges, the amortization of intangible assets and contingent consideration associated with acquisitions. EI presents revenues and expenses on a basis that deconsolidates the investment funds Blackstone manages.
- Economic Net Income, or “ENI”, represents EI adjusted to include current period taxes. Taxes represent the current tax provision (benefit) calculated on Income (Loss) Before Provision for Taxes.
- Blackstone uses Fee Related Earnings, or “FRE”, as a key measure to highlight earnings from operations excluding: (a) the income related to performance fees and related carry plan costs, (b) income earned from Blackstone’s investments in the Blackstone Funds, and (c) realized and unrealized gains (losses) from other investments except for such gains (losses) from Blackstone’s Treasury cash management strategies. Blackstone uses FRE as a measure to assess whether recurring revenue from its businesses is sufficient to adequately cover all of its operating expenses and generate profits. FRE equals contractual fee revenues, investment income from Blackstone’s Treasury cash management strategies and interest income, less (a) compensation expenses (which includes amortization of non-IPO and non-acquisition-related equity-based awards, but excludes amortization of IPO and acquisition-related equity-based awards, carried interest and incentive fee compensation), and (b) other operating expenses.
- Distributable Earnings, or “DE”, which is derived from Blackstone’s segment reported results, is a supplemental measure to assess performance and amounts available for distributions to Blackstone unitholders, including Blackstone personnel and others who are limited partners of the Blackstone Holdings partnerships. DE is intended to show the amount of net realized earnings without the effects of the consolidation of the Blackstone Funds. DE, which is a component of ENI, is the sum across all segments of: (a) Total Management and Advisory Fees, (b) Interest and Dividend Revenue, (c) Other Revenue, (d) Realized Performance Fees, and (e) Realized Investment Income (Loss); less (a) Compensation, excluding the expense of equity-based awards, (b) Realized Performance Fee Compensation, (c) Other Operating Expenses, and (d) Taxes and Related Payables Including the Payable Under Tax Receivable Agreement. DE is reconciled to Blackstone’s Consolidated Statement of Operations.
- Blackstone uses Adjusted Earnings Before Interest, Taxes and Depreciation and Amortization, or “Adjusted EBITDA”, as a measure of segment performance and an indicator of its ability to cover recurring operating expenses. Adjusted EBITDA equals DE before segment interest expense, segment depreciation and amortization, and the taxes and related payables including the Payable Under Tax Receivable Agreement.
- Net Cash Available for Distribution to Common Unitholders is The Blackstone Group L.P.’s share of Distributable Earnings, less realized investment gains and returns of capital from investments and acquisitions, in excess of amounts determined by Blackstone’s general partner to be necessary or appropriate to provide for the conduct of its business, to make appropriate investments in its business and funds, to comply with applicable law, any of its debt instruments or other agreements, or to provide for future cash requirements such as tax-related payments, clawback obligations and distributions to unitholders for any ensuing quarter.

Distribution Policy. For 2013, Blackstone’s intention is to distribute to common unitholders each quarter substantially all of its Net Cash Available for Distribution to Common Unitholders, subject to a minimum base quarterly distribution of \$0.12 per unit. In circumstances in which the Net Cash Available for Distribution to Common Unitholders for a quarter falls short of the amount necessary to support such per unit distribution, Blackstone intends to correspondingly reduce subsequent quarterly distributions below the amounts supported by the Net Cash Available for Distribution to Common Unitholders by the amount of the shortfall, but not below \$0.12 per unit. All of the foregoing is subject to the qualification that the declaration and payment of any distributions are at the sole discretion of Blackstone’s general partner and may change at any time, including, without limitation, to reduce the quarterly distribution payable to common unitholders to less than \$0.12 per unit or even to eliminate such distributions entirely.
