Introduction

EnSCO plc brings energy to the world as a global provider of offshore drilling services to the petroleum industry. For more than 30 years, we have focused on operating safely and exceeding customer expectations. We are the industry leader in customer satisfaction, ranking first for the eighth consecutive year with top honors in 12 of 18 categories in the most recent independent industry survey.

Our high-quality fleet includes drillships, dynamically-positioned semisubmersibles, moored semisubmersibles and premium jackups. Our rigs have drilled some of the most complex wells in virtually every major offshore basin around the globe, and we currently operate across six continents. We also provide drilling management services for customer-owned platforms.

With safety and operational excellence as our highest priorities, we have established a safety performance record that consistently exceeds industry averages. Our skilled employees exceed customer expectations by adhering to our proven safety systems that are actively supported at the highest levels of the organization and applied across the fleet. We also offer extensive training programs to enable our employees to continually build their competence and knowledge. Our Competency Assurance Program is accredited by the International Association of Drilling Contractors.

In order to further differentiate our rigs, we are focused on finding innovative ways to improve the drilling process. We have significantly expanded our intellectual property library with a focus on technology that creates efficiency in customers' drilling programs. For example, ENSCO 120 and 140 series jackups are equipped with our patented Cantilever AdvantageSM technology, which provides cost advantages for customers by allowing them to drill more wells from one location when utilizing the enhanced hoisting capacity at the farthest reach of the cantilever.

Fleet Highlights

EnSCO's drillships are equipped with some of the most technically-advanced well construction features available in the offshore drilling industry including advanced systems for hoisting, blowout preventer handling, drilling, mud controls and station keeping.

Our fleet of semisubmersible rigs are equipped with a wide range of drilling capabilities. The fleet consists of both dynamically-positioned and moored drilling rigs offering customers options for their drilling requirements.

We continue to execute on our long-established strategy of high-grading our jackup fleet by investing in newer equipment and rationalizing older assets. Our diverse rig fleet offers customers a wide range of drilling capabilities in a variety of water depths around the world.

Recognition

For the eighth year in a row, EnSCO ranked highest among offshore drillers in the most recent *Customer Satisfaction Index of Global Oilfield Suppliers* conducted by EnergyPoint Research. We earned first place in Total Satisfaction with top honors in 12 of 18 categories including Safety and Environment; Performance & Reliability; Job Quality; Technology; Ultra-deepwater Wells; Deepwater Wells; Shelf Wells; Special Applications; Horizontal & Directional Wells; Sub-Saharan Africa; and North Sea.

Vision

As the offshore driller of choice, we will go beyond what is expected to achieve a safe zero-incident workplace and to be the clear choice among employees, customers and investors.

Core Values

Ethical behavior

No harm to people, property or to the environment

Success for employees, customers and shareholders

Can-do attitude

Operational excellence

World's largest offshore fleet

- 12 drillships
- 10 dynamically-positioned semisubmersibles (3 with mooring capabilities)
- 3 moored semisubmersibles
- 36 premium jackups
- 2 deepwater managed units
- 2 semisubmersibles and 2 jackups held for sale/retired

New ultra-deepwater fleet

- Average age: 6 years
- 2 drillships under construction

Industry-leading jackup fleet

- \$2 billion+ invested in jackup fleet since 2005
- 1 ultra-premium harsh environment jackup under construction
- 6 rigs outfitted with EnSCO's patented Canti-Leverage AdvantageSM

Geographic reach

- Operations span six continents
- Drilling experience in virtually every major offshore basin
- Headquarters in London and corporate offices in Houston
- Major offices in Angola, Brazil, Scotland, Singapore, UAE and USA
