Hecla Mining Company is the largest U.S. silver producer and the third largest U.S. producer of both zinc and lead.

Hecla owns and operates mines on district-sized land packages in mining-friendly North American jurisdictions: Greens Creek in Alaska, one of the largest and highest-margin primary silver mines in the world; the Lucky Friday silver mine in North Idaho; and the Casa Berardi gold mine in Quebec. In addition to its diversified silver and gold operating and cash-flow generating base, Hecla has a number of exploration properties and pre-development projects in world-class silver and gold mining districts throughout North America.

2020 silver production was 13.5 million ounces and 208,962 ounces of gold production. 2021 estimated production is 12.9-14.0 million ounces of silver and 185,000-193,000 ounces of gold.

The company is positioned to weather COVID-19 with strong assets, an established action plan, senior notes due in 2028, and solid liquidity.

**OPERATING MINES**

**Greens Creek – Admiralty Island, Alaska**

- One of the world’s largest and lowest-cost primary silver mines.
- Produced approx. 25M oz. of silver and 1.6M oz. of gold since startup in 1989.
- 2.6 M oz. of silver production and 13,266 oz. of gold production in Q1/2021.
- 2021E production of 9.5-10.2 M oz. of silver and 40-43 K oz. of gold.

**Casa Berardi – Val d’Or, Quebec**

- 36,190 oz. of gold production in Q1/2021.
- 2021E production of 125-128 K oz. of gold.
- High-grade intersections discovered at East Mine; discovery of the 160 Zone eastern extension in Q4/20.
- Business improvement activities in 2021 are expected to reduce costs and increase cash flow over the next two years.

**Lucky Friday – Mullan, Idaho**

- 863,901 oz. of silver production in Q1/2021.
- 2021E production of 3.4-3.8 M oz. of silver.
- Continue to test and optimize the new mining method to improve safety and increase productivity which could allow an increase in production beyond the 5 million oz. expected in 2023 due to grade.
- Remote Vein Miner delivery expected after completion of reliability testing in Sweden.

**Nevada Operations – Elko, Nevada**

- 2,548 oz. gold production in Q1/2021.
- 2021E production of 20-22 K oz. of gold.
- Fire Creek and Midas mill expected to be placed on care and maintenance by the end of Q2/2021.
- Activities in the second half of 2021 expected to be limited to development at Hollister for Hatter Graben and exploration at Midas.

**Multiple Secure Revenue Streams**

- Strong Cash Flow Flexibility
- Low Political Risk Jurisdictions
- Strong Investment Fundamentals
- Established Work Force
- Commitment to Safety
- High-Quality Operations

Nevada Operations – The project is being studied to determine how to mine it profitably with a lower mining cost. Review includes hydrology studies. The bulk test refractory ore processing is not yet complete. Activities in the second half of 2021 are expected to be at Hollister where development of the decline has commenced to allow drilling at Hatter Graben and exploration at Madas.

San Sebastian – San Sebastian is a past producing silver and gold mine in Mexico. The Company continues to explore this highly prospective land package and will evaluate further mining based on exploration success. 2021 exploration will build on the developing resources of the El Bronco, El Tigre, and El Toro veins.

Rock Creek and Montanore – Rock Creek (acquired in 2015) and Montanore (acquired in September 2016) are two large silver/copper deposits in Montana. Rock Creek Record Decision of (ROD) for the evaluation phase remanded by court on ESA procedural issue in April 2021. Focus will now be on the Montanore Project. U.S. Fish and Wildlife Service to review Biological Opinion and expected completion is early 2022. Evaluation drilling at Montanore can also assist with Rock Creek planning.
