PART I

ITEM 1. BUSINESS

GENERAL

NIKE, Inc. was incorporated in 1967 under the laws of the State of Oregon. As used in this report, the terms “we,” “us,” “NIKE” and the “Company” refer to NIKE, Inc. and its predecessors, subsidiaries and affiliates, collectively, unless the context indicates otherwise. Our NIKE digital commerce website is located at www.nike.com. On our NIKE corporate website, located at investors.nike.com, we post the following filings as soon as reasonably practicable after they are electronically filed with, or furnished to, the United States Securities and Exchange Commission (the “SEC”): our annual report on Form 10-K, our quarterly reports on Form 10-Q, our current reports on Form 8-K and any amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities and Exchange Act of 1934, as amended. Our definitive Proxy Statements are also posted on our corporate website. All such filings on our corporate website are available free of charge. Copies of these filings are also available on the SEC’s website (www.sec.gov). Also available on our corporate website are the charters of the committees of our Board of Directors, as well as our corporate governance guidelines and code of ethics; copies of any of these documents will be provided in print to any shareholder who submits a request in writing to NIKE Investor Relations, One Bowerman Drive, Beaverton, Oregon 97005-6453.

Our principal business activity is the design, development and worldwide marketing and selling of athletic footwear, apparel, equipment, accessories and services. NIKE is the largest seller of athletic footwear and apparel in the world. We sell our products directly to consumers through NIKE-owned retail stores and digital platforms (which we refer to collectively as our “NIKE Direct” operations) and to retail accounts and a mix of independent distributors, licensees and sales representatives in virtually all countries around the world. We also offer interactive consumer experiences through our digital platforms. Virtually all of our products are manufactured by independent contractors. Nearly all footwear and apparel products are produced outside the United States, while equipment products are produced both in the United States and abroad.

PRODUCTS

We focus our NIKE Brand product offerings in six key categories: Running, NIKE Basketball, the Jordan Brand, Football (Soccer), Training and Sportswear (our sports-inspired lifestyle products). We also market products designed for kids, as well as for other athletic and recreational uses such as American football, baseball, cricket, golf, lacrosse, skateboarding, tennis, volleyball, walking, wrestling and other outdoor activities.

NIKE’s athletic footwear products are designed primarily for specific athletic use, although a large percentage of the products are worn for casual or leisure purposes. We place considerable emphasis on innovation and high-quality construction in the development and manufacturing of our products. Sportswear, the Jordan Brand and Running are currently our top-selling footwear categories and we expect them to continue to lead in footwear sales.

We also sell sports apparel covering the above-mentioned categories, which feature the same trademarks and are sold predominantly through the same marketing and distribution channels as athletic footwear. Our sports apparel, similar to our athletic footwear products, is designed primarily for athletic use and also demonstrates our commitment to innovation and high-quality construction. Sportswear, Training and Running are currently our top-selling apparel categories and we expect them to continue to lead in apparel sales. We often market footwear, apparel and accessories in “collections” of similar use or by category. We also market apparel with licensed college and professional team and league logos.

We sell a line of performance equipment and accessories under the NIKE Brand name, including bags, socks, sport balls, eyewear, timepieces, digital devices, bats, gloves, protective equipment and other equipment designed for sports activities. We also sell small amounts of various plastic products to other manufacturers through our wholly-owned subsidiary, NIKE IHM, Inc., doing business as Air Manufacturing Innovation.

Our Jordan Brand designs, distributes and licenses athletic and casual footwear, apparel and accessories predominantly focused on basketball using the Jumpman trademark. Sales and operating results for Jordan Brand products are reported within the respective NIKE Brand geographic operating segments.

Our wholly-owned subsidiary brand, Converse, headquartered in Boston, Massachusetts, designs, distributes and licenses casual sneakers, apparel and accessories under the Converse, Chuck Taylor, All Star, One Star, Star Chevron and Jack Purcell trademarks. Operating results of the Converse brand are reported on a stand-alone basis.

In addition to the products we sell to our wholesale customers and directly to consumers through our NIKE Direct operations, we have also entered into license agreements that permit unaffiliated parties to manufacture and sell, using NIKE-owned trademarks, certain apparel, digital devices and applications and other equipment designed for sports activities.

SALES AND MARKETING

We experience moderate fluctuations in aggregate sales volume during the year. Historically, revenues in the first and fourth fiscal quarters have slightly exceeded those in the second and third quarters. However, the mix of product sales may vary considerably as a result of changes in seasonal and geographic demand for particular types of footwear, apparel and equipment, as well as other macroeconomic, operating and logistics-related factors, as evidenced by the impact of the COVID-19 pandemic.

Because NIKE is a consumer products company, the relative popularity and availability of various sports and fitness activities, as well as changing design trends, affect the demand for our products. We must, therefore, respond to trends and shifts in consumer preferences by adjusting the mix of existing product offerings, developing new products, styles and categories and influencing sports and fitness preferences through extensive marketing. Failure to respond in a timely and adequate manner could have a material adverse effect on our sales and profitability. This is a continuing risk. Refer to Item 1A. Risk Factors.

We report our NIKE Brand operations based on our internal geographic organization. Each NIKE Brand geographic segment operates predominantly in one industry: the design, development, marketing and selling of athletic footwear, apparel and equipment. The Company's reportable operating segments for the NIKE Brand are: North America; Europe, Middle East & Africa (EMEA); Greater China; and Asia Pacific & Latin America (APLA), and include results for the NIKE and Jordan brands. The Hurley brand results, prior to its divestiture in the beginning of the third quarter of fiscal 2020, are included in North America. Sales through our NIKE Direct operations are managed within each geographic operating segment.

Converse is also a reportable operating segment and operates predominately in one industry: the design, marketing, licensing and selling of casual sneakers, apparel and accessories. Converse direct to consumer operations, including digital commerce, are reported within the Converse operating segment results.

UNITED STATES MARKET

For fiscal 2020, NIKE Brand and Converse sales in the United States accounted for approximately 39% of total revenues, compared to 41% and 42% for fiscal 2019 and fiscal 2018, respectively. We sell our NIKE Brand, Jordan Brand and Converse products to thousands of retail accounts in the United States, including a mix of footwear stores, sporting goods stores, athletic specialty stores, department stores, skate, tennis and golf shops and other retail accounts. In the United States, we utilize NIKE sales offices to solicit such sales. During fiscal 2020, our three largest United States customers accounted for approximately 24% of sales in the United States.

Our NIKE Direct and Converse direct to consumer operations sell NIKE Brand, Jordan Brand and Converse products to consumers through various digital platforms. In addition, our NIKE Direct and Converse direct to consumer operations sell products through the following number of retail stores in the United States:

U.S. RETAIL STORES	NUMBER
NIKE Brand factory stores	212
NIKE Brand in-line stores (including employee-only stores)	28
Converse stores (including factory stores)	98
TOTAL	338

In the United States, NIKE has seven significant distribution centers. Four are located in Memphis, Tennessee, two of which are owned and two of which are leased. Two other distribution centers, one located in Indianapolis, Indiana and one located in Dayton, Tennessee, are leased and operated by third-party logistics providers. One distribution center for Converse is located in Ontario, California, which is leased. There are other smaller distribution facilities located in various parts of the United States, some of which are leased or operated by third-parties.

INTERNATIONAL MARKETS

For fiscal 2020, non-U.S. NIKE Brand and Converse sales accounted for approximately 61% of total revenues, compared to 59% and 58% for fiscal 2019 and fiscal 2018, respectively. We sell our products to retail accounts, through our own NIKE Direct operations and through a mix of independent distributors, licensees and sales representatives around the world. We sell to thousands of retail accounts and ship products from 74 distribution centers outside of the United States. During fiscal 2020, NIKE's three largest customers outside of the United States accounted for approximately 15% of total non-U.S. sales.

In addition to NIKE and Converse owned digital commerce platforms in over 45 countries, our NIKE Direct and Converse direct to consumer businesses operate the following number of retail stores outside the United States:

NON-U.S. RETAIL STORES	NUMBER
NIKE Brand factory stores	643
NIKE Brand in-line stores (including employee-only stores)	52
Converse stores (including factory stores)	63
TOTAL	758

International branch offices and subsidiaries of NIKE are located in Argentina, Australia, Austria, Belgium, Bermuda, Brazil, Canada, Chile, China, Croatia, the Czech Republic, Denmark, Finland, France, Germany, Greece, Hong Kong, Hungary, India, Indonesia, Ireland, Israel, Italy, Japan, Korea, Macau, Malaysia, Mexico, the Netherlands, New Zealand, Norway, Panama, the Philippines, Poland, Portugal, Russia, Singapore, Slovakia, Slovenia, South Africa, Spain, Sri Lanka, Sweden, Switzerland, Taiwan, Thailand, Turkey, the United Arab Emirates, the United Kingdom, Uruguay and Vietnam.

SIGNIFICANT CUSTOMER

No customer accounted for 10% or more of our consolidated net *Revenues* during fiscal 2020.

PRODUCT RESEARCH, DESIGN AND DEVELOPMENT

We believe our research, design and development efforts are key factors in our success. Technical innovation in the design and manufacturing process of footwear, apparel and athletic equipment receives continued emphasis as we strive to produce products that help to enhance athletic performance, reduce injury and maximize comfort, while reducing waste.

In addition to our own staff of specialists in the areas of biomechanics, chemistry, exercise physiology, engineering, digital technologies, industrial design, sustainability and related fields, we also utilize research committees and advisory boards made up of athletes, coaches, trainers, equipment managers, orthopedists, podiatrists, physicians and other experts who consult with us and review designs, materials, concepts for product and manufacturing process improvements and compliance with product safety regulations around the world. Employee athletes, athletes engaged under sports marketing contracts and other athletes wear-test and evaluate products during the design and development process.

As we continue to develop new technologies, we are simultaneously focused on the design of innovative products and experiences incorporating such technologies throughout our product categories and consumer applications. Using market intelligence and research, our various design teams identify opportunities to leverage new technologies in existing categories to respond to consumer preferences. The proliferation of NIKE Air, Zoom, Free, Flywire, Dri-Fit, Flyknit, Flyweave, FlyEase, ZoomX, React and Adaptive technologies, among others, throughout our Running, NIKE Basketball, Jordan Brand, Football (Soccer), Training and Sportswear categories, as well as Converse, typifies our dedication to designing innovative products.

MANUFACTURING

We are supplied by 122 footwear factories located in 12 countries. Virtually all of our footwear is manufactured outside of the United States by over 15 independent contract manufacturers, which often operate multiple factories. The largest single footwear factory accounted for approximately 9% of total fiscal 2020 NIKE Brand footwear production. For fiscal 2020, contract factories in Vietnam, Indonesia and China manufactured approximately 50%, 24% and 22% of total NIKE Brand footwear, respectively. We also have manufacturing agreements with independent contract manufacturers in Argentina and India to manufacture footwear for sale primarily within those countries. For fiscal 2020, four footwear contract manufacturers each accounted for greater than 10% of footwear production and in the aggregate accounted for approximately 61% of NIKE Brand footwear production.

We are supplied by 329 apparel factories located in 38 countries. The largest single apparel factory accounted for approximately 11% of total fiscal 2020 NIKE Brand apparel production. Virtually all of our apparel is manufactured outside of the United States by independent contract manufacturers which often operate multiple factories. For fiscal 2020, contract factories in Vietnam, China and Cambodia produced approximately 28%, 23% and 12% of total NIKE Brand apparel, respectively. For fiscal 2020, two apparel contract manufacturers accounted for more than 10% of apparel production, and the top five contract manufacturers in the aggregate accounted for approximately 48% of NIKE Brand apparel production.

The principal materials used in our footwear products are natural and synthetic rubber, plastic compounds, foam cushioning materials, natural and synthetic leather, nylon, polyester and canvas, as well as polyurethane films used to make NIKE Air-Sole cushioning components. During fiscal 2020, Air Manufacturing Innovation, a wholly-owned subsidiary, with facilities near Beaverton, Oregon, in Dong Nai Province, Vietnam and St. Charles, Missouri, as well as independent contractors in China and

[Table of Contents](#)

Vietnam, were our suppliers of materials and cushioning components used in footwear. Air Manufacturing Innovation also manufactures and sells small amounts of various other plastic products to other manufacturers. The principal materials used in our apparel products are natural and synthetic fabrics and threads (both virgin and recycled); specialized performance fabrics designed to efficiently wick moisture away from the body, retain heat and repel rain and/or snow; and plastic and metal hardware. NIKE's independent contractors and suppliers buy raw materials for the manufacturing of our footwear, apparel and equipment products. Most raw materials are available and purchased by those independent contractors and suppliers in the countries where manufacturing takes place. NIKE's independent contract manufacturers and suppliers have thus far experienced little difficulty in satisfying raw material requirements for the production of our products.

Since 1972, Sojitz Corporation of America ("Sojitz America"), a large Japanese trading company and the sole owner of our redeemable preferred stock, has performed import-export financing services for us. During fiscal 2020, Sojitz America provided financing and purchasing services for NIKE Brand products sold in certain NIKE markets including Argentina, Brazil, Canada, India, South Africa and Uruguay, excluding products produced and sold in the same country. Approximately 4% of NIKE Brand sales occurred in those countries. Any failure of Sojitz America to provide these services or any failure of Sojitz America's banks could disrupt our ability to acquire products from our suppliers and to deliver products to our customers in those markets. Such a disruption could result in canceled orders that would adversely affect sales and profitability. However, we believe that any such disruption would be short-term in duration due to the ready availability of alternative sources of financing at competitive rates.

INTERNATIONAL OPERATIONS AND TRADE

Our international operations and sources of supply are subject to the usual risks of doing business abroad, such as the implementation of, or potential changes in, foreign and domestic trade policies, increases in import duties, anti-dumping measures, quotas, safeguard measures, trade restrictions, restrictions on the transfer of funds and, in certain parts of the world, political instability and terrorism. We have not, to date, been materially affected by any such risk, but cannot predict the likelihood of such material effects occurring in the future.

In recent years, uncertain global and regional economic and political conditions have affected international trade and increased protectionist actions around the world. These trends are affecting many global manufacturing and service sectors, and the footwear and apparel industries, as a whole, are not immune. Companies in our industry are facing trade protectionism in many different regions, and in nearly all cases we are working together with industry groups to address trade issues and reduce the impact to the industry, while observing applicable competition laws. Notwithstanding our efforts, protectionist measures have resulted in increases in the cost of our products, and additional measures, if implemented, could adversely affect sales and/or profitability for NIKE, as well as the imported footwear and apparel industry as a whole.

We monitor protectionist trends and developments throughout the world that may materially impact our industry, and we engage in administrative and judicial processes to mitigate trade restrictions. We are actively monitoring actions that may result in additional anti-dumping measures and could affect our industry. We are also monitoring for and advocating against other impediments that may limit or delay customs clearance for imports of footwear, apparel and equipment. NIKE also advocates for trade liberalization for footwear and apparel in a number of regional and bilateral free trade agreements. Changes in U.S. trade policies, including new and potential tariffs or penalties on imported goods, may negatively affect U.S. corporations with production activities outside the U.S., including NIKE. There have also been discussions and commentary regarding retaliatory actions by countries affected by the new tariffs and other changes in U.S. trade policy, and certain foreign governments have instituted or are considering imposing retaliatory measures on certain U.S. goods, which could negatively affect U.S. corporations with business operations and/or consumer markets in those countries. Depending on the extent that certain new or proposed reforms are implemented by the U.S. government and the manner in which foreign governments respond to such reforms, it may become necessary for us to change the way we conduct business, which may adversely affect our results of operations. In addition, with respect to proposed trade restrictions targeting China, which represents an important sourcing country and consumer market for us, we are working with a broad coalition of global businesses and trade associations representing a wide variety of sectors to help ensure that any legislation enacted and implemented (i) addresses legitimate and core concerns, (ii) is consistent with international trade rules and (iii) reflects and considers China's domestic economy and the important role it has in the global economic community.

Where trade protection measures are implemented, we believe that we have the ability to develop, over a period of time, adequate alternative sources of supply for the products obtained from our present suppliers. If events prevented us from acquiring products from our suppliers in a particular country, our operations could be temporarily disrupted and we could experience an adverse financial impact. However, we believe we could abate any such disruption, and that much of the adverse impact on supply would, therefore, be of a short-term nature, although alternate sources of supply might not be as cost-effective and could have an ongoing adverse impact on profitability.

Our international operations are also subject to compliance with the U.S. Foreign Corrupt Practices Act, or "FCPA", and other anti-bribery laws applicable to our operations. We source a significant portion of our products from, and have important consumer markets, outside of the United States, and we have an ethics and compliance program to address compliance with the FCPA and similar laws by us, our employees, agents, suppliers and other partners.

COMPETITION

The athletic footwear, apparel and equipment industry is highly competitive on a worldwide basis. We compete internationally with a significant number of athletic and leisure footwear companies, athletic and leisure apparel companies, sports equipment companies and large companies having diversified lines of athletic and leisure footwear, apparel and equipment, including adidas, Anta, ASICS, Li Ning, lululemon athletica, Puma, Under Armour and V.F. Corporation, among others. The intense competition and the rapid changes in technology and consumer preferences in the markets for athletic and leisure footwear and apparel and athletic equipment, constitute significant risk factors in our operations.

NIKE is the largest seller of athletic footwear and apparel in the world. Important aspects of competition in this industry are:

- Product attributes such as quality; performance and reliability; new product style, design, innovation and development, as well as consumer price/value.
- Consumer connection, engagement and affinity for brands and products, developed through marketing, promotion and digital experiences; social media interaction; customer support and service; identification with prominent and influential athletes, influencers, public figures, coaches, teams, colleges and sports leagues who endorse our brands and use our products and active engagement through sponsored sporting events and clinics.
- Effective sourcing and distribution of products, with attractive merchandising and presentation at retail, both in-store and on digital platforms.

We believe that we are competitive in all of these areas.

TRADEMARKS AND PATENTS

We believe that our intellectual property rights are important to our brand, our success and our competitive position. We strategically pursue available protections of these rights and vigorously protect them against third-party theft and infringement.

We use trademarks on nearly all of our products and believe having distinctive marks that are readily identifiable is an important factor in creating a market for our goods, in identifying our brands and the Company, and in distinguishing our goods from the goods of others. We consider our NIKE and Swoosh Design trademarks to be among our most valuable assets and we have registered these trademarks in almost 170 jurisdictions worldwide. In addition, we own many other trademarks that we use in marketing our products. We own common law rights in the trade dress of several significant shoe designs and elements. For certain trade dress, we have sought and obtained trademark registrations.

We have copyright protection in our design, graphics and other original works. When appropriate, we also obtain registered copyrights.

We file for, own and maintain many U.S. and foreign utility and design patents protecting components, technologies, materials, manufacturing techniques, features, functionality, and industrial and aesthetic designs used in and for the manufacture of various athletic and leisure footwear and apparel, athletic equipment and digital devices and related software applications. These patents expire at various times.

We believe our success depends upon our capabilities in areas such as design, research and development, production and marketing and is supported by our intellectual property rights, such as trademarks, patents and trade secrets, among others.

We have followed a policy of applying for and registering intellectual property rights in the United States and select foreign countries on trademarks, inventions, innovations and designs that we deem valuable. We also continue to vigorously protect our intellectual property, including trademarks, patents and trade secrets against third-party infringement.

EMPLOYEES

As of May 31, 2020, we had approximately 75,400 employees worldwide, including retail and part-time employees. Management is committed to maintaining an environment where all NIKE employees have the opportunity to reach their full potential. None of our employees are represented by a union, except for certain employees in the APLA geography, where local law requires those employees to be represented by a trade union. Also, in some countries outside of the United States, local laws require employee representation by works councils (which may be entitled to information and consultation on certain Company decisions) or by organizations similar to a union. In certain European countries, we are required by local law to enter into and/or comply with industry-wide or national collective bargaining agreements. NIKE has never experienced a material interruption of operations due to labor disagreements.

INFORMATION ABOUT OUR EXECUTIVE OFFICERS

The executive officers of NIKE, Inc. as of July 24, 2020 are as follows:

Mark G. Parker, Executive Chairman — Mr. Parker, 64, is Executive Chairman of the Board of Directors and served as President and Chief Executive Officer from 2006 - January 2020. He has been employed by NIKE since 1979 with primary responsibilities in product research, design and development, marketing and brand management. Mr. Parker was appointed divisional Vice President in charge of product development in 1987, corporate Vice President in 1989, General Manager in 1993, Vice President of Global Footwear in 1998 and President of the NIKE Brand in 2001.

John J. Donahoe II, President and Chief Executive Officer — Mr. Donahoe, 60, was appointed President and Chief Executive Officer in January 2020 and has been a director since 2014. He brings expertise in digital commerce, technology and global strategy. He previously served as President and Chief Executive Officer at ServiceNow, Inc. Prior to joining ServiceNow, Inc., he served as President and Chief Executive Officer of eBay, Inc. He also held leadership roles at Bain & Company for two decades.

Andrew Campion, Chief Operating Officer — Mr. Campion, 48, joined NIKE in 2007 as Vice President of Global Planning and Development, leading strategic and financial planning. He was appointed Chief Financial Officer of the NIKE Brand in 2010, responsible for leading all aspects of financial management for the Company's flagship brand. In 2014, he was appointed Senior Vice President, Strategy, Finance and Investor Relations. Mr. Campion assumed the role of Executive Vice President and Chief Financial Officer in August 2015. In April 2020, he was appointed Chief Operating Officer and leads NIKE's global technology and digital transformation, demand and supply management, manufacturing, distribution and logistics, sustainability, workplace design and connectivity, and procurement. Prior to joining NIKE, he held leadership roles in strategic planning, mergers and acquisitions, financial planning and analysis, operations and planning, investor relations and tax at The Walt Disney Company.

Matthew Friend, Executive Vice President and Chief Financial Officer — Mr. Friend, 42, joined NIKE in 2009 as Senior Director of Corporate Strategy and Development, and was appointed Chief Financial Officer of Emerging Markets in 2011. In 2014, Mr. Friend was appointed Chief Financial Officer of Global Categories, Product and Functions, and was subsequently appointed Chief Financial Officer of the NIKE Brand in 2016. He was also appointed Vice President of Investor Relations in 2019. Mr. Friend was appointed as Executive Vice President and Chief Financial Officer of NIKE, Inc. in April 2020. Prior to joining NIKE, he worked in the financial industry including roles as VP of investment banking and mergers and acquisitions at Goldman Sachs and Morgan Stanley.

Hilary K. Krane, Executive Vice President, Chief Administrative Officer and General Counsel — Ms. Krane, 56, joined NIKE as Vice President and General Counsel in 2010. In 2011, her responsibilities expanded, and she became Vice President, General Counsel and Corporate Affairs. Ms. Krane was appointed Executive Vice President, Chief Administrative Officer and General Counsel in 2013. Prior to joining NIKE, Ms. Krane was General Counsel and Senior Vice President for Corporate Affairs at Levi Strauss & Co. from 2006 to 2010. From 1996 to 2006, she was a Partner and Assistant General Counsel at PricewaterhouseCoopers LLP.

Monique S. Matheson, Executive Vice President, Global Human Resources — Ms. Matheson, 53, joined NIKE in 1998, with primary responsibilities in the human resources function. She was appointed as Vice President and Senior Business Partner in 2011 and Vice President, Chief Talent and Diversity Officer in 2012. Ms. Matheson was appointed Executive Vice President, Global Human Resources in 2017.

Heidi O'Neill, President of Consumer and Marketplace — Ms. O'Neill, 55, joined NIKE in 1998, and held a variety of leadership roles, including President of NIKE Direct, where she was responsible for NIKE's connection to its consumer globally through the Company's retail and digital-commerce business. She also led NIKE's women's business for seven years, growing it into a multi-billion dollar business, and leading the Company's North America apparel business as VP/GM. Ms. O'Neill was appointed as President of Consumer and Marketplace in April 2020 and is responsible for NIKE's Direct business, including all stores, e-commerce and apps globally.

ITEM 1A. RISK FACTORS

Special Note Regarding Forward-Looking Statements and Analyst Reports

Certain written and oral statements, other than purely historic information, including estimates, projections, statements relating to NIKE's business plans, objectives and expected operating results and the assumptions upon which those statements are based, made or incorporated by reference from time to time by NIKE or its representatives in this report, other reports, filings with the SEC, press releases, conferences or otherwise, are "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995 and Section 21E of the Securities Exchange Act of 1934, as amended. Forward-looking statements include, without limitation, any statement that may predict, forecast, indicate or imply future results, performance or achievements, and may contain the words "believe," "anticipate," "expect," "estimate," "project," "will be," "will continue," "will likely result" or words or phrases of similar meaning. Forward-looking statements involve risks and uncertainties which may cause actual results to differ materially from the forward-looking statements. The risks and uncertainties are detailed from time to time in reports filed by NIKE with the SEC, including reports filed on Forms 8-K, 10-Q and 10-K, and include, among others, the following: health epidemics, pandemics and similar outbreaks, including the COVID-19 pandemic; international, national and local political, civil, economic and market conditions; the size and growth of the overall athletic footwear, apparel and equipment markets; intense competition among designers, marketers, distributors and sellers of athletic footwear, apparel and equipment for consumers and endorsers; demographic changes; changes in consumer preferences; popularity of particular designs, categories of products and sports; seasonal and geographic demand for NIKE products; difficulties in anticipating or forecasting changes in consumer preferences, consumer demand for NIKE products and the various market factors described above; difficulties in implementing, operating and maintaining NIKE's increasingly complex information technology systems and controls, including, without limitation, the systems related to demand and supply planning and inventory control; interruptions in data and information technology systems; consumer data security; fluctuations and difficulty in forecasting operating results, including, without limitation, the fact that advance orders may not be indicative of future revenues due to changes in shipment timing, the changing mix of orders with shorter lead times, and discounts, order cancellations and returns; the ability of NIKE to sustain, manage or forecast its growth and inventories; the size, timing and mix of purchases of NIKE's products; increases in the cost of materials, labor and energy used to manufacture products; new product development and introduction; the ability to secure and protect trademarks, patents and other intellectual property; product performance and quality; customer service; adverse publicity, including without limitation, through social media or in connection with brand damaging events; the loss of significant customers or suppliers; dependence on distributors and licensees; business disruptions; increased costs of freight and transportation to meet delivery deadlines; increases in borrowing costs due to any decline in NIKE's debt ratings; changes in business strategy or development plans; general risks associated with doing business outside of the United States, including, without limitation, exchange rate fluctuations, inflation, import duties, tariffs, quotas, political and economic instability and terrorism; the potential impact of new laws, regulations or policy, including, without limitation, tariffs, import/export, trade and immigration regulations or policies; changes in government regulations; the impact of, including business and legal developments relating to, climate change and natural disasters; litigation, regulatory proceedings, sanctions or any other claims asserted against NIKE; the ability to attract and retain qualified employees, and any negative public perception with respect to key personnel or our corporate culture, values or purpose; the effects of NIKE's decision to invest in or divest of businesses and other factors referenced or incorporated by reference in this report and other reports.

Risk Factors

The risks included here are not exhaustive. Other sections of this report may include additional factors which could adversely affect NIKE's business and financial performance. Moreover, NIKE operates in a very competitive and rapidly changing environment. New risks emerge from time to time and it is not possible for management to predict all such risks, nor can it assess the impact of all such risks on NIKE's business or the extent to which any risk, or combination of risks, may cause actual results to differ materially from those contained in any forward-looking statements. Given these risks and uncertainties, investors should not place undue reliance on forward-looking statements as a prediction of actual results.

Investors should also be aware that while NIKE does, from time to time, communicate with securities analysts, it is against NIKE's policy to disclose to them any material non-public information or other confidential commercial information. Accordingly, shareholders should not assume that NIKE agrees with any statement or report issued by any analyst irrespective of the content of the statement or report. Furthermore, NIKE has a policy against confirming financial forecasts or projections issued by others. Thus, to the extent that reports issued by securities analysts contain any projections, forecasts or opinions, such reports are not the responsibility of NIKE.

Our financial condition and results of operations have been and are expected to continue to be adversely affected by the coronavirus pandemic.

A novel strain of coronavirus (COVID-19) was first identified in Wuhan, China in December 2019, and subsequently declared a pandemic by the World Health Organization. To date, this pandemic and preventative measures taken to contain or mitigate the pandemic have caused, and are expected to continue to cause, business slowdown or shutdown in affected areas and significant disruption in the

financial markets, both globally and in the United States. These events have led to and could continue to lead to a decline in discretionary spending by consumers, and in turn materially impact, our business, sales, financial condition and results of operations. We have experienced a negative impact on our sales, operations and financial results, and we cannot predict the degree to, or the time period over, which our sales, operations and financial results will continue to be affected by the pandemic and preventative measures. Risks presented by the COVID-19 pandemic include, but are not limited to:

- Deterioration in economic conditions in the United States and globally;
- Reduced consumer demand for our products as consumers seek to reduce or delay discretionary spending in response to the impacts of COVID-19, including as a result of a rise in unemployment rates and diminished consumer confidence;
- Cancellation or postponement of sports seasons and sporting events in multiple countries, including in the United States, and bans on large public gatherings, which have reduced consumer spending on our products and could impact the effectiveness of our arrangements with key endorsers;
- Decreased retail traffic as a result of store closures, reduced operating hours, social distancing restrictions and/or changes in consumer behavior;
- The risk that any safety protocols in NIKE-owned or affiliated facilities will not be effective or not be perceived as effective, or that any virus-related illnesses will be linked or alleged to be linked to such facilities, whether accurate or not;
- Incremental costs resulting from the adoption of preventative measures, including providing facial coverings and hand sanitizer, rearranging operations to follow social distancing protocols, conducting temperature checks and undertaking regular and thorough disinfecting of surfaces;
- Disruption to our distribution centers and our third-party manufacturing partners and other vendors, including through the effects of facility closures, reductions in operating hours, labor shortages, and real time changes in operating procedures, including for additional cleaning and disinfection procedures;
- Bankruptcies or other financial difficulties facing our wholesale customers, which could cause them to be unable to make or delay making payments to us, or result in cancellation or reduction of their orders;
- Operational risk, including but not limited to cybersecurity risks, as a result of extended workforce remote work arrangements, and restrictions on employee travel;
- Impacts to our distribution and logistics providers' ability to operate or increases in their operating costs. These supply chain effects may have an adverse effect on our ability to meet consumer demand, including digital demand, and could result in an increase in our costs of production and distribution, including increased freight and logistics costs and other expenses; and
- Significant disruption of and volatility in global financial markets, which could have a negative impact on our ability to access capital in the future.

We continue to monitor the latest developments regarding the pandemic and have made certain assumptions regarding the pandemic for purposes of our operating, financial and tax planning projections, including assumptions regarding the duration and severity of the pandemic and the global macroeconomic impacts of the pandemic. However, we are unable to accurately predict the extent of the impact of the pandemic on our business, operations and financial condition due to the uncertainty of future developments. In particular, we believe the ultimate impacts on our business, results of operations, cash flows and financial condition will depend on, among other things, the further spread and duration of COVID-19, the requirements to take action to help limit the spread of the illness, the availability, safety and efficacy of a vaccine and treatments for COVID-19 and the economic impacts of the pandemic. Even in those regions where we are beginning to experience business recovery should those regions fail to fully contain COVID-19 or suffer a COVID-19 relapse, those markets may not recover as quickly or at all, which could have a material adverse effect on our business and results of operations. The pandemic may also affect our business, operations or financial condition in a manner that is not presently known to us or that we currently do not consider to present significant risks.

In addition, the impact of COVID-19 may also exacerbate other risks discussed in this Item 1A. Risk Factors, any of which could have a material effect on us.

Global economic conditions could have a material adverse effect on our business, operating results and financial condition.

The uncertain state of the global economy continues to impact businesses around the world. If global economic and financial market conditions further deteriorate or do not improve, the following factors could have a material adverse effect on our business, operating results and financial condition:

- Our sales are impacted by discretionary spending by consumers. Declines in consumer spending may result in reduced demand for our products, increased inventories, reduced orders from retailers for our products, order cancellations, lower revenues, higher discounts and lower gross margins.
- In the future, we may be unable to access financing in the credit and capital markets at reasonable rates in the event we find it desirable to do so.

- We conduct transactions in various currencies, which creates exposure to fluctuations in foreign currency exchange rates relative to the U.S. Dollar. Continued volatility in the markets and exchange rates for foreign currencies and contracts in foreign currencies could have a significant impact on our reported operating results and financial condition.
- Continued volatility in the availability and prices for commodities and raw materials we use in our products and in our supply chain (such as cotton or petroleum derivatives) could have a material adverse effect on our costs, gross margins and profitability.
- If retailers of our products experience declining revenues or experience difficulty obtaining financing in the capital and credit markets to purchase our products, this could result in reduced orders for our products, order cancellations, late retailer payments, extended payment terms, higher accounts receivable, reduced cash flows, greater expense associated with collection efforts and increased bad debt expense.
- If retailers of our products experience severe financial difficulty, some may become insolvent and cease business operations, which could negatively impact the sale of our products to consumers.

If contract manufacturers of our products or other participants in our supply chain experience difficulty obtaining financing in the capital and credit markets to purchase raw materials or to finance capital equipment and other general working capital needs, it may result in delays or non-delivery of shipments of our products.

Our products, services and experiences face intense competition.

NIKE is a consumer products company and the relative popularity of various sports and fitness activities and changing design trends affect the demand for our products. The athletic footwear, apparel and equipment industry is highly competitive both in the United States and worldwide. We compete internationally with a significant number of athletic and leisure footwear companies, athletic and leisure apparel companies, sports equipment companies, private labels and large companies that have diversified lines of athletic and leisure footwear, apparel and equipment. We also compete with other companies for the production capacity of independent manufacturers that produce our products. Our NIKE Direct operations, both through our digital commerce operations and retail stores, also compete with multi-brand retailers, which sell our products through their digital platforms and physical stores, and with digital commerce platforms. In addition, we compete with respect to the digital experiences we are able to offer our consumers.

Product offerings, technologies, marketing expenditures (including expenditures for advertising and endorsements), pricing, costs of production, customer service, digital commerce platforms, digital services and experiences and social media presence are areas of intense competition. This, in addition to ongoing rapid changes in technology, a reduction in barriers to the creation of new footwear and apparel companies and consumer preferences in the markets for athletic and leisure footwear and apparel, athletic equipment, services and experiences, constitute significant risk factors in our operations. In addition, the competitive nature of retail, including shifts in the ways in which consumers shop, and the continued proliferation of digital commerce, constitutes a risk factor implicating our NIKE Direct and wholesale operations. If we do not adequately and timely anticipate and respond to our competitors, our costs may increase, demand for our products may decline, possibly significantly, or we may need to reduce wholesale or suggested retail prices for our products.

Failure to maintain our reputation, brand image and culture could negatively impact our business.

Our iconic brands have worldwide recognition, and our success depends on our ability to maintain and enhance our brand image and reputation. Maintaining, promoting and growing our brands will depend on our design and marketing efforts, including advertising and consumer campaigns, product innovation and product quality. Our commitment to product innovation and quality and our continuing investment in design (including materials) and marketing may not have the desired impact on our brand image and reputation. In addition, our success in maintaining, extending and expanding our brand image depends on our ability to adapt to a rapidly changing media environment, including our increasing reliance on social media and digital dissemination of advertising campaigns on our digital platforms and through our digital experiences. We could be adversely impacted if we fail to achieve any of these objectives.

Our brand value also depends on our ability to maintain a positive consumer perception of our corporate integrity, purpose and brand culture. Negative claims or publicity involving us, our culture and values, our products, services and experiences, consumer data, or any of our key employees, endorsers, sponsors or suppliers could seriously damage our reputation and brand image, regardless of whether such claims are accurate. For example, while we require our suppliers of our products to operate their business in compliance with applicable laws and regulations, we do not control their practices. Negative publicity relating to a violation or an alleged violation of policies or laws by such suppliers could damage our brand image and diminish consumer trust in our brand. Social media, which accelerates and potentially amplifies the scope of negative publicity, can increase the challenges of responding to negative claims. Adverse publicity about regulatory or legal action against us, or by us, could also damage our reputation and brand image, undermine consumer confidence in us and reduce long-term demand for our products, even if the regulatory or legal action is unfounded or not material to our operations. If the reputation, culture or image of any of our brands is tarnished or if we receive negative publicity, then our sales, financial condition and results of operations could be materially and adversely affected.

Our business is affected by seasonality, which could result in fluctuations in our operating results.

We experience moderate fluctuations in aggregate sales volume during the year. Historically, revenues in the first and fourth fiscal quarters have slightly exceeded those in the second and third fiscal quarters. However, the mix of product sales may vary considerably from time to time as a result of changes in seasonal or COVID-19 related cancellations or postponements and geographic demand for particular types of footwear, apparel and equipment and in connection with the timing of significant sporting events, such as the NBA Finals, Olympics or the World Cup, among others. In addition, our customers may cancel orders, change delivery schedules or change the mix of products ordered with minimal notice. As a result, we may not be able to accurately predict our quarterly sales. Accordingly, our results of operations are likely to fluctuate significantly from period to period. This seasonality, along with other factors that are beyond our control, including economic conditions, changes in consumer preferences, weather conditions, outbreaks of disease, social or political unrest, availability of import quotas, transportation disruptions and currency exchange rate fluctuations, could adversely affect our business and cause our results of operations to fluctuate. Our operating margins are also sensitive to a number of additional factors that are beyond our control, including manufacturing and transportation costs, shifts in product sales mix and geographic sales trends, all of which we expect to continue. Results of operations in any period should not be considered indicative of the results to be expected for any future period.

If we are unable to anticipate consumer preferences and develop new products, we may not be able to maintain or increase our revenues and profits.

Our success depends on our ability to identify, originate and define product trends as well as to anticipate, gauge and react to changing consumer demands in a timely manner. However, lead times for many of our products may make it more difficult for us to respond rapidly to new or changing product trends or consumer preferences. All of our products are subject to changing consumer preferences that cannot be predicted with certainty. Our new products may not receive consumer acceptance as consumer preferences could shift rapidly to different types of performance products or away from these types of products altogether, and our future success depends in part on our ability to anticipate and respond to these changes. If we fail to anticipate accurately and respond to trends and shifts in consumer preferences by adjusting the mix of existing product offerings, developing new products, designs, styles and categories, and influencing sports and fitness preferences through extensive marketing, we could experience lower sales, excess inventories or lower profit margins, any of which could have an adverse effect on our results of operations and financial condition. In addition, we market our products globally through a diverse spectrum of advertising and promotional programs and campaigns, including social media, mobile applications and online advertising. If we do not successfully market our products or if advertising and promotional costs increase, these factors could have an adverse effect on our business, financial condition and results of operations.

We rely on technical innovation and high-quality products to compete in the market for our products.

Technical innovation and quality control in the design and manufacturing process of footwear, apparel and athletic equipment is essential to the commercial success of our products. Research and development play a key role in technical innovation. We rely upon specialists in the fields of biomechanics, chemistry, exercise physiology, engineering, digital technologies, industrial design, sustainability and related fields, as well as research committees and advisory boards made up of athletes, coaches, trainers, equipment managers, orthopedists, podiatrists and other experts to develop and test cutting-edge performance products. While we strive to produce products that help to enhance athletic performance, reduce injury and maximize comfort, if we fail to introduce technical innovation in our products, consumer demand for our products could decline, and if we experience problems with the quality of our products, we may incur substantial expense to remedy the problems and loss of consumer confidence.

Failure to continue to obtain or maintain high-quality endorsers of our products could harm our business.

We establish relationships with professional athletes, sports teams and leagues, as well as other public figures, including artists, designers and influencers, to develop, evaluate and promote our products, as well as establish product authenticity with consumers. However, as competition in our industry has increased, the costs associated with establishing and retaining such sponsorships and other relationships have increased. If we are unable to maintain our current associations with professional athletes, sports teams and leagues, or other public figures, or to do so at a reasonable cost, we could lose the high visibility or on-field authenticity associated with our products, and we may be required to modify and substantially increase our marketing investments. As a result, our brands, net revenues, expenses and profitability could be harmed.

Furthermore, if certain endorsers were to stop using our products contrary to their endorsement agreements, our business could be adversely affected. In addition, actions taken or statements made by athletes, teams or leagues, or other endorsers, associated with our products that harm the reputations of those athletes, teams or leagues, or endorsers, could also seriously harm our brand image with consumers and, as a result, could have an adverse effect on our sales and financial condition. In addition, poor performance by our endorsers, a failure to continue to correctly identify promising athletes, public figures or sports organizations, to use and endorse our products or a failure to enter into cost-effective endorsement arrangements with prominent athletes, public figures and sports organizations could adversely affect our brand, sales and profitability.

Economic factors beyond our control, and changes in the global economic environment, including fluctuations in inflation and currency exchange rates, could result in lower revenues, higher costs and decreased margins and earnings.

A majority of our products are manufactured and sold outside of the United States, and we conduct purchase and sale transactions in various currencies, which creates exposure to the volatility of global economic conditions, including fluctuations in inflation and foreign currency exchange rates. Additionally, there has been, and may continue to be, volatility in currency exchange rates as a result of the United Kingdom's exit from the European Union, commonly referred to as "Brexit" or new or proposed U.S. policy changes that impact the U.S. Dollar value relative to other international currencies. Our international revenues and expenses generally are derived from sales and operations in foreign currencies, and these revenues and expenses could be affected by currency fluctuations, specifically amounts recorded in foreign currencies and translated into U.S. Dollars for consolidated financial reporting, as weakening of foreign currencies relative to the U.S. Dollar adversely affects the U.S. Dollar value of the Company's foreign currency-denominated sales and earnings. Currency exchange rate fluctuations could also disrupt the business of the independent manufacturers that produce our products by making their purchases of raw materials more expensive and more difficult to finance. Foreign currency fluctuations have adversely affected and could continue to have an adverse effect on our results of operations and financial condition.

We may hedge certain foreign currency exposures to lessen and delay, but not to completely eliminate, the effects of foreign currency fluctuations on our financial results. Since the hedging activities are designed to lessen volatility, they not only reduce the negative impact of a stronger U.S. Dollar or other trading currency, but they also reduce the positive impact of a weaker U.S. Dollar or other trading currency. Our future financial results could be significantly affected by the value of the U.S. Dollar in relation to the foreign currencies in which we conduct business. The degree to which our financial results are affected for any given time period will depend in part upon our hedging activities.

We may be adversely affected by the financial health of our customers.

We extend credit to our customers based on an assessment of a customer's financial condition, generally without requiring collateral. To assist in the scheduling of production and the shipping of our products, we offer certain customers the opportunity to place orders five to six months ahead of delivery under our futures ordering program. These advance orders may be canceled under certain conditions, and the risk of cancellation may increase when dealing with financially unstable retailers or retailers struggling with economic uncertainty. In the past, some customers have experienced financial difficulties up to and including bankruptcies, which have had an adverse effect on our sales, our ability to collect on receivables and our financial condition. When the retail economy weakens or as consumer behavior shifts, retailers may be more cautious with orders. A slowing or changing economy in our key markets could adversely affect the financial health of our customers, which in turn could have an adverse effect on our results of operations and financial condition. In addition, product sales are dependent in part on high quality merchandising and an appealing retail environment to attract consumers, which requires continuing investments by retailers. Retailers that experience financial difficulties may fail to make such investments or delay them, resulting in lower sales and orders for our products.

Failure to accurately forecast consumer demand could lead to excess inventories or inventory shortages, which could result in decreased operating margins, reduced cash flows and harm to our business.

To meet anticipated demand for our products, we purchase products from manufacturers outside of our futures ordering program and in advance of customer orders, which we hold in inventory and resell to customers. There is a risk we may be unable to sell excess products ordered from manufacturers. Inventory levels in excess of customer demand may result in inventory write-downs, and the sale of excess inventory at discounted prices could significantly impair our brand image and have an adverse effect on our operating results, financial condition and cash flows. Conversely, if we underestimate consumer demand for our products or if our manufacturers fail to supply products we require at the time we need them, we may experience inventory shortages. Inventory shortages might delay shipments to customers, negatively impact retailer, distributor and consumer relationships and diminish brand loyalty. The difficulty in forecasting demand also makes it difficult to estimate our future results of operations, financial condition and cash flows from period to period. A failure to accurately predict the level of demand for our products could adversely affect our net revenues and net income, and we are unlikely to forecast such effects with any certainty in advance.

Our NIKE Direct operations have required and will continue to require a substantial investment and commitment of resources and are subject to numerous risks and uncertainties.

Our NIKE Direct operations, including our retail stores and digital platforms, have required and will continue to require significant investment. Our NIKE Direct stores have required and will continue to require substantial fixed investment in equipment and leasehold improvements and personnel. We have entered into substantial operating lease commitments for retail space. Certain stores have been designed and built to serve as high-profile venues to promote brand awareness and marketing activities and to integrate with our digital platforms. Because of their unique design and technological elements, locations and size, these stores require substantially more investment than other stores. Due to the high fixed-cost structure associated with our NIKE Direct retail stores, a decline in sales, a shift in consumer behavior away from brick-and-mortar retail, or the closure, temporary or

otherwise, or poor performance of individual or multiple stores could result in significant lease termination costs, write-offs of equipment and leasehold improvements and employee-related costs.

Many factors unique to retail operations, some of which are beyond our control, pose risks and uncertainties. Risks include, but are not limited to: credit card fraud; mismanagement of existing retail channel partners; and inability to manage costs associated with store construction and operation.

In addition, we have made significant investments in digital technologies and information systems for the digital aspect of our NIKE Direct operations, and our digital offerings will require continued investment in the development and upgrading of our technology platforms. In order to deliver high-quality digital experiences, our digital platforms must be designed effectively and work well with a range of other technologies, systems, networks, and standards that we do not control. We may not be successful in developing platforms that operate effectively with these technologies, systems, networks or standards. A growing portion of consumers access our NIKE Direct digital platforms, but in the event that it is more difficult for consumers to access and use our digital platforms, consumers find that our digital platforms do not effectively meet their needs or expectations or consumers choose not to access or use our digital platforms or use devices that do not offer access to our platforms, the success of our NIKE Direct operations could be adversely impacted. Our competitors may develop, or have already developed, digital experiences, features, content, services or technologies that are similar to ours or that achieve greater acceptance.

We may not realize a satisfactory return on our investment in our NIKE Direct operations and management's attention from our other business opportunities could be diverted, which could have an adverse effect on our business, financial condition or results of operations.

If the technology-based systems that give our consumers the ability to shop or interact with us online do not function effectively, our operating results, as well as our ability to grow our digital commerce business globally or to retain our customer base, could be materially adversely affected.

Many of our consumers shop with us through our digital platforms. Increasingly, consumers are using mobile-based devices and applications to shop online with us and with our competitors, and to do comparison shopping, as well as to engage with us and our competitors through digital experiences that are offered on mobile platforms. We are increasingly using social media and proprietary mobile applications to interact with our consumers and as a means to enhance their shopping experience. Any failure on our part to provide attractive, effective, reliable, user-friendly digital commerce platforms that offer a wide assortment of merchandise with rapid delivery options and that continually meet the changing expectations of online shoppers or any failure to provide attractive digital experiences to our customers could place us at a competitive disadvantage, result in the loss of digital commerce and other sales, harm our reputation with consumers, have a material adverse impact on the growth of our digital commerce business globally and could have a material adverse impact on our business and results of operations. In addition, as use of our digital platforms continues to grow, we will need an increasing amount of technical infrastructure to continue to satisfy our consumers' needs. If we fail to continue to effectively scale and adapt our digital platforms to accommodate increased consumer demand, our business may be subject to interruptions, delays or failures and consumer demand for our products and digital experiences could decline.

Risks specific to our digital commerce business also include diversion of sales from our and our retailers' brick and mortar stores, difficulty in recreating the in-store experience through direct channels and liability for online content. Our failure to successfully respond to these risks might adversely affect sales in our digital commerce business, as well as damage our reputation and brands.

We rely significantly on information technology to operate our business, including our supply chain and retail operations, and any failure, inadequacy or interruption of that technology could harm our ability to effectively operate our business.

We are heavily dependent on information technology systems and networks, including the Internet and third-party services ("Information Technology Systems"), across our supply chain, including product design, production, forecasting, ordering, manufacturing, transportation, sales and distribution, as well as for processing financial information for external and internal reporting purposes, retail operations and other business activities. Information Technology Systems are critical to many of our operating activities and our business processes and may be negatively impacted by any service interruption or shutdown. For example, our ability to effectively manage and maintain our inventory and to ship products to customers on a timely basis depends significantly on the reliability of these Information Technology Systems. Over a number of years, we have implemented Information Technology Systems in all of the geographical regions in which we operate. Our work to integrate, secure and enhance these systems and related processes in our global operations is ongoing and NIKE will continue to invest in these efforts. We cannot provide assurance, however, that the measures we take to secure and enhance these systems will be sufficient to protect our Information Technology Systems and prevent cyber-attacks, system failures or data or information loss. The failure of these systems to operate effectively, including as a result of security breaches, viruses, hackers, malware, natural disasters, vendor business interruptions or other causes, or failure to properly maintain, protect, repair or upgrade systems, or problems with transitioning to upgraded or replacement systems could cause delays in product fulfillment and reduced efficiency of our operations, could require significant capital investments to remediate the problem which may not be sufficient to cover all

eventualities, and may have an adverse effect on our reputation, results of operations and financial condition. Further, like other companies in the retail industry, we have in the past experienced, and we expect to continue to experience, cyber-attacks, including phishing, and other attempts to breach, or gain unauthorized access to, our systems. To date, these attacks have not had a material impact on our operations, but we cannot provide assurance that they will not have an impact in the future.

We also use Information Technology Systems to process financial information and results of operations for internal reporting purposes and to comply with regulatory financial reporting, legal and tax requirements. If Information Technology Systems suffer severe damage, disruption or shutdown and our business continuity plans, or those of our vendors, do not effectively resolve the issues in a timely manner, we could experience delays in reporting our financial results, which could result in lost revenues and profits, as well as reputational damage. Furthermore, we depend on Information Technology Systems and personal data collection for digital marketing, digital commerce, consumer engagement and the marketing and use of our digital products and services. We also rely on our ability to engage in electronic communications throughout the world between and among our employees as well as with other third parties, including customers, suppliers, vendors and consumers. Any interruption in Information Technology Systems may impede our ability to engage in the digital space and result in lost revenues, damage to our reputation, and loss of users.

We are subject to a complex array of laws and regulations and litigation and other legal and regulatory proceedings, which could have an adverse effect on our business, financial condition and results of operations.

As a multinational corporation with operations and distribution channels throughout the world, we are subject to and must comply with extensive laws and regulations in the United States and other jurisdictions in which we have operations and distribution channels. If we or our employees, agents, suppliers, and other partners fail to comply with any of these laws or regulations, such failure could subject us to fines, sanctions or other penalties that could negatively affect our reputation, business, financial condition and results of operations. We are involved in various types of claims, lawsuits, regulatory proceedings and government investigations relating to our business, our products and the actions of our employees and representatives, including contractual and employment relationships, product liability, antitrust, trademark rights and a variety of other matters. It is not possible to predict with certainty the outcome of any such legal or regulatory proceedings or investigations, and we could in the future incur judgments, fines or penalties, or enter into settlements of lawsuits and claims that could have a material adverse effect on our business, financial condition and results of operations and negatively impact our reputation. The global nature of our business means legal and compliance risks, such as anti-bribery, anti-corruption, fraud, trade, environmental, competition, privacy and other regulatory matters, will continue to exist and additional legal proceedings and other contingencies will arise from time to time, which could adversely affect us. In addition, the adoption of new laws or regulations, or changes in the interpretation of existing laws or regulations, may result in significant unanticipated legal and reputational risks. Any current or future legal or regulatory proceedings could divert management's attention from our operations and result in substantial legal fees.

Changes to U.S. or other countries' trade policies and tariff and import/export regulations or our failure to comply with such regulations may have a material adverse effect on our reputation, business, financial condition and results of operations.

Changes in U.S. or international social, political, regulatory and economic conditions could impact our business, financial condition and results of operations. In particular, political and economic instability, geopolitical conflicts, political unrest, civil strife, terrorist activity, acts of war, public corruption, expropriation and other economic or political uncertainties in the United States or internationally could interrupt and negatively affect the sale of our products or other business operations. Any negative sentiment toward the United States as a result of any such changes could also adversely affect our business.

In addition, changes in laws and policies governing foreign trade, manufacturing, development and investment in the territories or countries where we currently sell our products or conduct our business could adversely affect our business. The U.S. presidential administration has instituted or proposed changes in trade policies that include the negotiation or termination of trade agreements, the imposition of higher tariffs on imports into the U.S., economic sanctions on individuals, corporations or countries, and other government regulations affecting trade between the U.S. and other countries where we conduct our business. It may be time-consuming and expensive for us to alter our business operations in order to adapt to or comply with any such changes.

Changes or proposed changes in U.S. or other countries' trade policies may result in restrictions and economic disincentives on international trade. Tariffs and other changes in U.S. trade policy have in the past and could in the future trigger retaliatory actions by affected countries, and certain foreign governments have instituted or are considering imposing retaliatory measures on certain U.S. goods. Further, any emerging protectionist or nationalist trends either in the United States or in other countries could affect the trade environment. The Company, similar to many other multinational corporations, does a significant amount of business that would be impacted by changes to the trade policies of the United States and foreign countries (including governmental action related to tariffs, international trade agreements, or economic sanctions). Such changes have the potential to adversely impact the U.S. economy or certain sectors thereof or the economy of another country in which we conduct operations, our industry and the global demand for our products, and as a result, could have a material adverse effect on our business, financial condition and results of operations.

Failure to adequately protect or enforce our intellectual property rights could adversely affect our business.

We periodically discover counterfeit reproductions of our products or products that otherwise infringe our intellectual property rights. If we are unsuccessful in enforcing our intellectual property rights, continued sales of these products could adversely affect our sales and our brand and could result in a shift of consumer preference away from our products.

The actions we take to establish and protect our intellectual property rights may not be adequate to prevent imitation of our products by others. We also may be unable to prevent others from seeking to block sales of our products as violations of proprietary rights.

We may be subject to liability if third parties successfully claim we infringe on their intellectual property rights. Defending infringement claims could be expensive and time-consuming and might result in our entering into costly license agreements. We also may be subject to significant damages or injunctions against development, use, importation and/or sale of certain products.

We take various actions to prevent the unauthorized use and/or disclosure of our confidential information and intellectual property rights. These actions include contractual measures such as entering into non-disclosure and non-compete agreements and agreements relating to our collaborations with third parties and providing confidential information awareness training. Our controls and efforts to prevent unauthorized use and/or disclosure of confidential information and intellectual property rights might not always be effective. For example, confidential information related to business strategy, innovations, new technologies, mergers and acquisitions, unpublished financial results or personal data could be prematurely, inadvertently, or improperly used and/or disclosed, resulting in a loss of reputation, loss of intellectual property rights, a decline in our stock price and/or a negative impact on our market position, and could lead to damages, fines, penalties or injunctions.

In addition, the laws of certain countries may not protect or allow enforcement of intellectual property rights to the same extent as the laws of the United States. We may face significant expenses and liability in connection with the protection of our intellectual property rights, including outside the United States, and if we are unable to successfully protect our rights or resolve intellectual property conflicts with others, our business or financial condition may be adversely affected.

We are subject to data security and privacy risks that could negatively affect our results, operations or reputation.

In addition to our own sensitive and proprietary business information, we handle transactional and personal information about our wholesale customers and consumers and users of our digital experiences, which include online distribution channels and product engagement, adaptive products and personal fitness applications. Hackers and data thieves are increasingly sophisticated and operate social engineering, such as phishing, and large-scale, complex automated attacks that can evade detection for long periods of time. Any breach of our or our service providers' network, or other vendor systems, may result in the loss of confidential business and financial data, misappropriation of our consumers', users' or employees' personal information or a disruption of our business. Any of these outcomes could have a material adverse effect on our business, including unwanted media attention, impairment of our consumer and customer relationships, damage to our reputation; resulting in lost sales and consumers, fines, lawsuits, or significant legal and remediation expenses. We also may need to expend significant resources to protect against, respond to and/or redress problems caused by any breach.

In addition, we must comply with increasingly complex and rigorous, and sometimes conflicting, regulatory standards enacted to protect business and personal data in the United States, Europe and elsewhere. For example, the European Union adopted the General Data Protection Regulation (the "GDPR"), which became effective on May 25, 2018; and California passed the California Consumer Privacy Act (the "CCPA") which became effective on January 1, 2020. These laws impose additional obligations on companies regarding the handling of personal data and provide certain individual privacy rights to persons whose data is stored. Compliance with existing, proposed and recently enacted laws (including implementation of the privacy and process enhancements called for under GDPR and CCPA) and regulations can be costly and time consuming, and any failure to comply with these regulatory standards could subject us to legal and reputational risks. Misuse of or failure to secure personal information could also result in violation of data privacy laws and regulations, proceedings against the Company by governmental entities or others, imposition of fines by governmental authorities and damage to our reputation and credibility and could have a negative impact on revenues and profits.

Our international operations involve inherent risks which could result in harm to our business.

Virtually all of our athletic footwear and apparel is manufactured outside of the United States, and the majority of our products are sold outside of the United States. Accordingly, we are subject to the risks generally associated with global trade and doing business abroad, which include foreign laws and regulations, varying consumer preferences across geographic regions, political unrest, disruptions or delays in cross-border shipments and changes in economic conditions in countries in which our products are manufactured or where we sell products. This includes, for example, the uncertainty surrounding the effect of Brexit, including changes to the legal and regulatory framework that apply to the United Kingdom and its relationship with the European Union, as well as new and proposed changes affecting tax laws and trade policy in the United States and elsewhere as further described below under *"We could be subject to changes in tax rates, adoption of new tax laws, additional tax liabilities or increased volatility in our effective tax rate"* and *"Changes to U.S. or other countries' trade policies and tariff and import/export regulations or our failure to comply with such regulations may have a material adverse effect on our reputation, business, financial condition and*

results of operations.” The U.S. presidential administration has indicated a focus on policy reforms that discourage U.S. corporations from outsourcing manufacturing and production activities to foreign jurisdictions, including through tariffs or penalties on goods manufactured outside the United States, which may require us to change the way we conduct business and adversely affect our results of operations. The administration has also targeted the specific practices of certain U.S. multinational corporations in public statements which, if directed at us, could harm our reputation or otherwise negatively impact our business.

In addition, disease outbreaks, including the current COVID-19 pandemic, terrorist acts and military conflict have increased the risks of doing business abroad. These factors, among others, could affect our ability to manufacture products or procure materials, our ability to import products, our ability to sell products in international markets and our cost of doing business. If any of these or other factors make the conduct of business in a particular country undesirable or impractical, our business could be adversely affected. In addition, many of our imported products are subject to duties, tariffs or quotas that affect the cost and quantity of various types of goods imported into the United States and other countries. Any country in which our products are produced or sold may eliminate, adjust or impose new quotas, duties, tariffs, safeguard measures, anti-dumping duties, cargo restrictions to prevent terrorism, restrictions on the transfer of currency, climate change legislation, product safety regulations or other charges or restrictions, any of which could have an adverse effect on our results of operations and financial condition.

Furthermore, we are subject to the U.S. Foreign Corrupt Practices Act as well as the anti-corruption laws of other countries in which we operate. Although we implement policies and procedures designed to promote compliance with these laws, our employees, contractors and agents, as well as those companies to which we outsource certain of our business operations, may take actions in violation of our policies. Any such violation could result in sanctions or other penalties and have an adverse effect on our business, reputation and operating results.

Our products are subject to risks associated with overseas sourcing, manufacturing and financing.

The principal materials used in our apparel products — natural and synthetic fabrics and threads, specialized performance fabrics designed to efficiently wick moisture away from the body, retain heat or repel rain and/or snow as well as plastic and metal hardware — are available in countries where our manufacturing takes place. The principal materials used in our footwear products — natural and synthetic rubber, plastic compounds, foam cushioning materials, natural and synthetic leather, natural and synthetic fabrics and threads, nylon, canvas and polyurethane films — are also locally available to manufacturers. Both our apparel and footwear products are dependent upon the ability of our unaffiliated contract manufacturers to locate, train, employ and retain adequate personnel. NIKE contractors and suppliers buy raw materials and are subject to wage rates that are oftentimes regulated by the governments of the countries in which our products are manufactured.

There could be a significant disruption in the supply of fabrics or raw materials from current sources or, in the event of a disruption, our contract manufacturers might not be able to locate alternative suppliers of materials of comparable quality at an acceptable price or at all. Further, our unaffiliated contract manufacturers have experienced and may continue to experience in the future, unexpected increases in work wages, whether government mandated or otherwise and increases in compliance costs due to governmental regulation concerning certain metals used in the manufacturing of our products. In addition, we cannot be certain that our unaffiliated manufacturers will be able to fill our orders in a timely manner. If we experience significant increases in demand, or reductions in the availability of materials, or need to replace an existing manufacturer, there can be no assurance additional supplies of fabrics or raw materials or additional manufacturing capacity will be available when required on terms acceptable to us, or at all, or that any supplier or manufacturer would allocate sufficient capacity to us in order to meet our requirements. In addition, even if we are able to expand existing or find new manufacturing or sources of materials, we may encounter delays in production and added costs as a result of the time it takes to train suppliers and manufacturers in our methods, products, quality control standards and labor, health and safety standards. Any delays, interruption or increased costs in labor or wages, or the supply of materials or manufacture of our products could have an adverse effect on our ability to meet retail customer and consumer demand for our products and result in lower revenues and net income both in the short- and long-term.

Because independent manufacturers make a majority of our products outside of our principal sales markets, our products must be transported by third parties over large geographic distances. Delays in the shipment or delivery of our products due to the availability of transportation, work stoppages, port strikes, infrastructure congestion or other factors, and costs and delays associated with consolidating or transitioning between manufacturers, could adversely impact our financial performance. In addition, manufacturing delays or unexpected demand for our products may require us to use faster, but more expensive, transportation methods such as air freight, which could adversely affect our profit margins. The cost of oil is a significant component in manufacturing and transportation costs, so increases in the price of petroleum products can adversely affect our profit margins. Changes in U.S. trade policies, including new and potential changes to import tariffs and existing trade policies and agreements, could also have a significant impact on our activities in foreign jurisdictions, and could adversely affect our results of operations.

In addition, Sojitz America performs import-export financing services and purchasing services for NIKE Brand products sold in certain countries and any failure of Sojitz America to provide these services or any failure of Sojitz America's banks could have an

adverse effect on our ability to acquire products from our suppliers and to deliver products to our customers in the countries in which Sojitz provides services, which could in turn adversely affect our sales and profitability.

We could be subject to changes in tax rates, adoption of new tax laws, additional tax liabilities or increased volatility in our effective tax rate.

We are subject to the tax laws in the United States and numerous foreign jurisdictions. Current economic and political conditions make tax laws and regulations, or their interpretation and application, in any jurisdiction subject to significant change.

We earn a substantial portion of our income in foreign countries and are subject to the tax laws of those jurisdictions. For example, effective January 1, 2020, the tax law in the Netherlands, one of the Company's major jurisdictions, changed.

Other proposals to reform foreign tax laws could significantly impact how U.S. multinational corporations are taxed on foreign earnings. Although we cannot predict whether or in what form these proposals will pass, several of the proposals considered, if enacted into law, could have an adverse impact on our income tax expense and cash flows.

Portions of our operations are subject to a reduced tax rate or are free of tax under various tax holidays and rulings. We also utilize tax rulings and other agreements to obtain certainty in treatment of certain tax matters. These holidays and rulings expire in whole or in part from time to time and may be extended when certain conditions are met, or terminated if certain conditions are not met. The impact of any changes in conditions would be the loss of certainty in treatment thus potentially impacting our effective income tax rate. For example, in January 2019, the European Commission opened a formal investigation to examine whether the Netherlands has breached State Aid rules when granting certain tax rulings to the Company. If this matter is adversely resolved, the Netherlands may be required to assess additional amounts with respect to current and prior periods and the Company's Netherlands income taxes in the future could increase.

We are also subject to the examination of our tax returns by the United States Internal Revenue Service ("IRS") and other tax authorities. We regularly assess the likelihood of an adverse outcome resulting from these examinations to determine the adequacy of its provision for income taxes. Although we believe our tax provisions are adequate, the final determination of tax audits and any related disputes could be materially different from our historical income tax provisions and accruals. The results of audits or related disputes could have an adverse effect on our financial statements for the period or periods for which the applicable final determinations are made. For example, we and our subsidiaries are also engaged in a number of intercompany transactions across multiple tax jurisdictions. Although we believe we have clearly reflected the economics of these transactions and the proper local transfer pricing documentation is in place, tax authorities may propose and sustain adjustments that could result in changes that may impact our mix of earnings in countries with differing statutory tax rates.

Consolidation of retailers or concentration of retail market share among a few retailers may increase and concentrate our credit risk and impair our ability to sell products.

The athletic footwear, apparel and equipment retail markets in some countries are dominated by a few large athletic footwear, apparel and equipment retailers with many stores and accelerating digital commerce capabilities. The market shares of these retailers may increase through acquisitions and construction of additional stores and investments in digital capacity, and as a result of attrition as struggling retailers exit the market. Consolidation of our retailers will concentrate our credit risk with a smaller set of retailers, any of whom may experience declining sales or a shortage of liquidity, including as a result of the COVID-19 pandemic. In addition, increasing market share concentration among a few retailers in a particular country or region increases the risk that if any one of them substantially reduces their purchases of our products, we may be unable to find sufficient retail outlets for our products to sustain the same level of sales and revenues.

We are subject to the risk our licensees may not generate expected sales or maintain the value of our brands.

We currently license, and expect to continue licensing, certain of our proprietary rights, such as trademarks or copyrighted material, to third parties. If our licensees fail to successfully market and sell licensed products, or fail to obtain sufficient capital or effectively manage their business operations, customer relationships, labor relationships, supplier relationships or credit risks, it could adversely affect our revenues, both directly from reduced royalties received and indirectly from reduced sales of our other products.

We also rely on our licensees to help preserve the value of our brands. Although we attempt to protect our brands through approval rights over the design, production processes, quality, packaging, merchandising, distribution, advertising and promotion of our licensed products, we cannot completely control the use of our licensed brands by our licensees. The misuse of a brand by or negative publicity involving a licensee could have a material adverse effect on that brand and on us.

Failure of our contractors or our licensees' contractors to comply with our code of conduct, local laws and other standards could harm our business.

We work with hundreds of contractors outside of the United States to manufacture our products, and we also have license agreements that permit unaffiliated parties to manufacture or contract for the manufacture of products using our intellectual property. We require the contractors that directly manufacture our products and our licensees that make products using our intellectual property (including, indirectly, their contract manufacturers) to comply with a code of conduct and other environmental,

health and safety standards for the benefit of workers. We also require our direct contractors and the contractors of our licensees to comply with applicable standards for product safety. Notwithstanding their contractual obligations, from time to time contractors may not comply with such standards or applicable local law or our licensees may fail to enforce such standards or applicable local law on their contractors. If one or more of our direct or indirect contractors violates or fails to comply with or is accused of violating or failing to comply with such standards and laws, this could harm our reputation or result in a product recall and, as a result, could have an adverse effect on our sales and financial condition. Negative publicity regarding production methods, alleged unethical or illegal practices or workplace or related conditions of any of our suppliers, manufacturers or licensees could adversely affect our brand image and sales, force us to locate alternative suppliers, manufacturers or licenses or result in the imposition of additional regulations, including new or additional quotas, tariffs, product safety regulations or other regulatory measures, by governmental authorities.

If one or more of our counterparty financial institutions default on their obligations to us or fail, we may incur significant losses.

As part of our hedging activities, we enter into transactions involving derivative financial instruments, which may include forward contracts, commodity futures contracts, option contracts, collars and swaps with various financial institutions. In addition, we have significant amounts of cash, cash equivalents and other investments on deposit or in accounts with banks or other financial institutions in the United States and abroad. As a result, we are exposed to the risk of default by or failure of counterparty financial institutions. The risk of counterparty default or failure may be heightened during economic downturns and periods of uncertainty in the financial markets. If one of our counterparties were to become insolvent or file for bankruptcy, our ability to recover losses incurred as a result of default, or our assets deposited or held in accounts with such counterparty, may be limited by the counterparty's liquidity or the applicable laws governing the insolvency or bankruptcy proceedings. In the event of default or failure of one or more of our counterparties, we could incur significant losses, which could negatively impact our results of operations and financial condition.

We rely on a concentrated source base of contract manufacturers to supply a significant portion of our footwear products.

NIKE is supplied by 122 footwear factories located in 12 countries. We do not own or operate any of the footwear manufacturing facilities and depend upon independent contract manufacturers to manufacture all of the footwear products we sell. In fiscal 2020, four footwear contract manufacturers each accounted for greater than 10% of fiscal 2020 footwear production and in aggregate accounted for approximately 61% of NIKE Brand footwear production in fiscal 2020. Our ability to meet our customers' needs depends on our ability to maintain a steady supply of products from our independent contract manufacturers. If one or more of our significant suppliers were to sever their relationship with us or significantly alter the terms of our relationship, including due to changes in applicable trade policies, or be unable to perform, including as a result of the COVID-19 pandemic, we may not be able to obtain replacement products in a timely manner, which could have a material adverse effect on our sales, financial condition or results of operations. Additionally, if any of our primary contract manufacturers fail to make timely shipments, do not meet our quality standards or otherwise fail to deliver us product in accordance with our plans, there could be a material adverse effect on our results of operations.

Certain of our manufacturers are highly specialized and only produce a specific type of product. Such manufacturing partners may go out of business if consumer preferences or market conditions change such that there is no longer sufficient demand for the types of products they produce. If, in the future, the relevant products are again in demand and the specialized manufacturers no longer exist, we may not be able to locate replacement facilities to manufacture certain products in a timely manner or at all, which could have a material adverse effect on our sales, financial condition or results of operations.

Our success depends on our global distribution facilities.

We distribute our products to customers directly from the factory and through distribution centers located throughout the world. Our ability to meet customer expectations, manage inventory, complete sales and achieve objectives for operating efficiencies and growth, particularly in emerging markets, depends on the proper operation of our distribution facilities, the development or expansion of additional distribution capabilities and the timely performance of services by third parties (including those involved in shipping product to and from our distribution facilities). Our distribution facilities have in the past and could be interrupted by information technology problems, disasters such as earthquakes or fires or outbreaks of disease or government actions taken to mitigate their spread. Any significant failure in our distribution facilities could result in an adverse effect on our business. We maintain business interruption insurance, but it may not adequately protect us from adverse effects caused by significant disruptions in our distribution facilities.

The market for prime real estate is competitive.

Our ability to effectively obtain real estate to open new retail stores and otherwise conduct our operations, both domestically and internationally, depends on the availability of real estate that meets our criteria for traffic, square footage, co-tenancies, lease economics, demographics and other factors. We also must be able to effectively renew our existing real estate leases. In addition, from time to time, we seek to downsize, consolidate, reposition or close some of our real estate locations, which may require modification of an existing lease. Failure to secure adequate new locations or successfully modify leases for existing

locations, or failure to effectively manage the profitability of our existing fleet of retail stores, could have an adverse effect on our operating results and financial condition.

Additionally, the economic environment may make it difficult to determine the fair market rent of real estate properties domestically and internationally. This could impact the quality of our decisions to exercise lease options at previously negotiated rents and to renew expiring leases at negotiated rents. Any adverse effect on the quality of these decisions could impact our ability to retain real estate locations adequate to meet our targets or efficiently manage the profitability of our existing fleet of stores, which could have an adverse effect on our operating results and financial condition.

Extreme weather conditions and natural disasters could negatively impact our operating results and financial condition.

Extreme weather conditions in the areas in which our retail stores, suppliers, manufacturers, customers, distribution centers, headquarters and vendors are located could adversely affect our operating results and financial condition. Moreover, natural disasters such as earthquakes, hurricanes and tsunamis, whether occurring in the United States or abroad, and their related consequences and effects, including energy shortages and public health issues, have in the past temporarily disrupted, and could in the future disrupt, our operations, the operations of our vendors, manufacturers and other suppliers or have in the past and could result in economic instability that may negatively impact our operating results and financial condition. In particular, if a natural disaster were to occur in an area in which we or our suppliers, manufacturers, customers, distribution centers and vendors are located, our continued success would depend, in part, on the safety and availability of the relevant personnel and facilities and proper functioning of our or third parties' computer, telecommunication and other systems and operations. In addition, a severe weather event could negatively impact retail traffic to our stores or stores that carry our products and could have an adverse impact on consumer spending, any of which could in turn result in negative point-of-sale trends for our merchandise. Further, climate change may increase both the frequency and severity of extreme weather conditions and natural disasters, which may affect our business operations, either in a particular region or globally, as well as the activities of our third-party vendors and other suppliers, manufacturers and customers. In addition, the physical changes prompted by climate change could result in changes in regulations or consumer preferences, which could in turn affect our business, operating results and financial condition. We believe the diversity of locations in which we operate, our operational size and our Information Technology Systems position us well, but if we were to experience a local or regional disaster or other business continuity event, we could still experience operational challenges, in particular depending upon how a local or regional event may affect our human capital across our operations or with regard to particular aspects of our operations, such as key executive officers or personnel. Further, if we are unable to find alternative suppliers, replace capacity at key manufacturing or distribution locations or quickly repair damage to our Information Technology Systems or supply systems, we could be late in delivering, or be unable to deliver, products to our customers. These events could result in reputational damage, lost sales, cancellation charges or markdowns, all of which could have an adverse effect on our business, results of operations and financial condition.

Our financial results may be adversely affected if substantial investments in businesses and operations fail to produce expected returns.

From time to time, we may invest in technology, business infrastructure, new businesses, product offering and manufacturing innovation and expansion of existing businesses, such as our NIKE Direct operations, which require substantial cash investments and management attention. We believe cost-effective investments are essential to business growth and profitability; however, significant investments are subject to typical risks and uncertainties inherent in developing a new business or expanding an existing business. The failure of any significant investment to provide expected returns or profitability could have a material adverse effect on our financial results and divert management attention from more profitable business operations. See also *"Our NIKE Direct operations have required and will continue to require a substantial investment and commitment of resources and are subject to numerous risks and uncertainties."*

The success of our business depends, in part, on high-quality employees, including key personnel as well as our ability to maintain our workplace culture and values.

Our success depends in part on the continued service of high-quality employees, including key executive officers and personnel. The loss of the services of key individuals, or any negative perception with respect to these individuals, or our workplace culture or values, could harm our business. Our success also depends on our ability to recruit, retain and engage our personnel sufficiently, both to maintain our current business and to execute our strategic initiatives. Competition for employees in our industry is intense and we may not be successful in attracting and retaining such personnel. In addition, shifts in U.S. immigration policy could negatively impact our ability to attract, hire and retain highly skilled employees who are from outside the United States. We also believe that our corporate culture has been a key driver of our success, and we have invested substantial time and resources in building, maintaining and evolving our culture. Any failure to preserve and evolve our culture could negatively affect our future success, including our ability to retain and recruit employees.

Our business operations and financial performance could be adversely affected by changes in our relationship with our workforce or changes to United States or foreign employment regulations.

We have significant exposure to changes in domestic and foreign laws governing our relationships with our workforce, including wage and hour laws and regulations, fair labor standards, minimum wage requirements, overtime pay, unemployment tax rates, workers' compensation rates, citizenship requirements and payroll taxes, which could have a direct impact on our operating costs. A significant increase in minimum wage or overtime rates in countries where we have workforces could have a significant impact on our operating costs and may require that we relocate those operations or take other steps to mitigate such increases, all of which may cause us to incur additional costs. There is also a risk of potential claims that we have violated laws related to discrimination and harassment, health and safety, wage and hour laws, criminal activity, personal injury and other claims. In addition, if there were a significant increase in the number of members of our workforce who are members of labor organizations or become parties to collective bargaining agreements, we could be vulnerable to a strike, work stoppage or other labor action, which could have an adverse effect on our business.

The sale of a large number of shares of common stock by our principal stockholder could depress the market price of our common stock.

As of June 30, 2020, Swoosh, LLC beneficially owned approximately 75% of our Class A Common Stock. If, on June 30, 2020, all of these shares were converted into Class B Common Stock, the commensurate ownership percentage of our Class B Common Stock would be approximately 16%. The shares are available for resale, subject to the requirements of the U.S. securities laws and the terms of the limited liability company agreement governing Swoosh, LLC. The sale or prospect of a sale of a substantial number of these shares could have an adverse effect on the market price of our common stock. Swoosh, LLC was formed by Philip H. Knight, our Chairman Emeritus, to hold the majority of his shares of Class A Common Stock. Swoosh, LLC is controlled by Mr. Knight's son and NIKE director, Travis Knight.

Changes in our credit ratings or macroeconomic conditions may affect our liquidity, increasing borrowing costs and limiting our financing options.

Our long-term debt is currently rated Investment Grade by Standard & Poor's and Moody's Investors Service. If our credit ratings are lowered, borrowing costs for our existing facilities or for future long-term debt or short-term credit facilities may increase and our financing options, including our access to the unsecured credit market or the capital markets, could be adversely affected. We may also be subject to restrictive covenants that would reduce our flexibility to, among other things, incur additional indebtedness, make restricted payments, pledge assets as security, make investments, loans, advances, guarantees and acquisitions, undergo fundamental changes and enter into transactions with affiliates. Failure to comply with such covenants could result in a default, and as a result, the commitments of our lenders under our credit agreements may be terminated and the maturity of amounts owed may be accelerated. In addition, macroeconomic conditions, such as increased volatility or disruption in the credit markets, could adversely affect our ability to refinance existing debt.

If our internal controls are ineffective, our operating results could be adversely affected.

Our internal control over financial reporting may not prevent or detect misstatements because of its inherent limitations, including the possibility of human error, the circumvention or overriding of controls or fraud. Even effective internal controls can provide only reasonable assurance with respect to the preparation and fair presentation of financial statements. If we fail to maintain the adequacy of our internal controls, including any failure to implement required new or improved controls, or if we experience difficulties in their implementation, our business and operating results could be harmed and we could fail to meet our financial reporting obligations.

If our estimates or judgments relating to our critical accounting policies prove to be incorrect, our operating results could be adversely affected.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. We base our estimates on historical experience and on various other assumptions we believe to be reasonable under the circumstances, as provided in "Management's Discussion and Analysis of Financial Condition and Results of Operations." The results of these estimates form the basis for making judgments about the carrying values of assets, liabilities and equity, and the amount of revenues and expenses that are not readily apparent from other sources. Significant assumptions and estimates used in preparing our consolidated financial statements include those related to revenue recognition, inventory reserves, contingent payments under endorsement contracts, accounting for property, plant and equipment and definite-lived assets, hedge accounting for derivatives, stock-based compensation, income taxes and other contingencies. Our operating results may be adversely affected if our assumptions change or if actual circumstances differ from those in our assumptions, which could cause our operating results to fall below the expectations of securities analysts and investors, resulting in a decline in the price of our Class B Common Stock.

Anti-takeover provisions may impair an acquisition of the Company or reduce the price of our common stock.

There are provisions within our articles of incorporation and Oregon law intended to protect shareholder interests by providing the Board of Directors a means to attempt to deny coercive takeover attempts or to negotiate with a potential acquirer in order to obtain more favorable terms. Such provisions include a control share acquisition statute, a freeze-out statute, two classes of stock that vote separately on certain issues, and the fact that holders of Class A Common Stock elect three-quarters of the Board of Directors rounded down to the next whole number. However, such provisions could discourage, delay or prevent an unsolicited merger, acquisition or other change in control of our company that some shareholders might believe to be in their best interests or in which shareholders might receive a premium for their common stock over the prevailing market price. These provisions could also discourage proxy contests for control of the Company.

We may fail to meet market expectations, which could cause the price of our stock to decline.

Our Class B Common Stock is traded publicly, and at any given time various securities analysts follow our financial results and issue reports on us. These reports include information about our historical financial results as well as analysts' opinions of our future performance, which may, in part, be based upon any guidance we have provided. Analysts' estimates are often different from our estimates or expectations. If our operating results are below the estimates or expectations of public market analysts and investors, our stock price could decline. In the past, securities class action litigation has been brought against NIKE and other companies following a decline in the market price of their securities. If our stock price is volatile for any reason, we may become involved in this type of litigation in the future. Any litigation could result in reputational damage, substantial costs and a diversion of management's attention and resources needed to successfully run our business.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

The following is a summary of principal properties owned or leased by NIKE:

The NIKE World Campus, owned by NIKE and located near Beaverton, Oregon, USA, is an approximately 400-acre site consisting of over 40 buildings which, together with adjacent leased properties, functions as our world headquarters and is occupied by approximately 12,800 employees engaged in management, research, design, development, marketing, finance and other administrative functions serving nearly all of our segments. We lease a similar, but smaller, administrative facility in Hilversum, the Netherlands, which serves as the headquarters for our Europe, Middle East & Africa geography and management of certain brand functions for our non-U.S. operations. We also lease an office complex in Shanghai, China, our headquarters for our Greater China geography, occupied by employees focused on implementing our wholesale, NIKE Direct and merchandising strategies in the region, among other functions.

In the United States, NIKE has seven significant distribution centers. Four are located in Memphis, Tennessee, two of which are owned and two of which are leased. Two other distribution centers, one located in Indianapolis, Indiana and one located in Dayton, Tennessee, are leased and operated by third-party logistics providers. One distribution center for Converse is located in Ontario, California, which is leased. NIKE has a number of distribution facilities outside the United States, some of which are leased and operated by third-party logistics providers. The most significant distribution facilities outside the United States are located in Laakdal, Belgium; Taicang, China; Tomisato, Japan and Incheon, Korea, all of which we own, as well as in Suzhou, China, which is leased and operated by a third-party logistics provider.

Air Manufacturing Innovation manufactures cushioning components used in footwear at NIKE-owned and leased facilities located near Beaverton, Oregon, and in Dong Nai Province, Vietnam, as well as at NIKE-owned facilities in St. Charles, Missouri.

Aside from the principal properties described above, we lease many offices worldwide for sales and administrative purposes. We lease 1,091 retail stores worldwide, which primarily consist of factory stores. See "United States Market" and "International Markets" for additional information regarding our retail stores. Our leases expire at various dates through the year 2043.

ITEM 3. LEGAL PROCEEDINGS

There are no material pending legal proceedings, other than ordinary routine litigation incidental to our business, to which we are a party or of which any of our property is the subject.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

NIKE's Class B Common Stock is listed on the New York Stock Exchange and trades under the symbol NKE. At July 17, 2020, there were 23,114 holders of record of NIKE's Class B Common Stock and 14 holders of record of NIKE's Class A Common Stock. These figures do not include beneficial owners who hold shares in nominee name. The Class A Common Stock is not publicly traded, but each share is convertible upon request of the holder into one share of Class B Common Stock. Refer to Selected Quarterly Financial Data in Part II, Item 6 of this Report for dividends declared on the Class A and Class B Common Stock.

In June 2018, the Board of Directors approved a four-year, \$15 billion share repurchase program. As of May 31, 2020, the Company had repurchased 45.2 million shares at an average price of \$89.00 per share for a total approximate cost of \$4.0 billion under this program.

All share repurchases were made under NIKE's publicly announced program and there are no other programs under which the Company repurchases shares. The following table presents a summary of share repurchases made during the quarter ended May 31, 2020:

PERIOD	TOTAL NUMBER OF SHARES PURCHASED	AVERAGE PRICE PAID PER SHARE	APPROXIMATE DOLLAR VALUE OF SHARES THAT MAY YET BE PURCHASED UNDER THE PLANS OR PROGRAMS (IN MILLIONS)
March 1 — March 31, 2020	1,872,265	\$ 85.08	\$ 10,981
April 1 — April 30, 2020	—	\$ —	\$ 10,981

PERFORMANCE GRAPH

The following graph demonstrates a five-year comparison of cumulative total returns for NIKE's Class B Common Stock; the Standard & Poor's 500 Stock Index; the Standard & Poor's Apparel, Accessories & Luxury Goods Index; and the Dow Jones U.S. Footwear Index. The graph assumes an investment of \$100 on May 31, 2015 in each of the indices and our Class B Common Stock. Each of the indices assumes that all dividends were reinvested on the day of issuance.

COMPARISON OF 5-YEAR CUMULATIVE TOTAL RETURN AMONG NIKE, INC.; S&P 500 INDEX; THE DOW JONES U.S. FOOTWEAR INDEX; AND S&P APPAREL, ACCESSORIES & LUXURY GOODS INDEX

The Dow Jones U.S. Footwear Index consists of NIKE, Deckers Outdoor Corporation, Skechers U.S.A., Inc., Steven Madden, Ltd. and Wolverine World Wide, Inc. Because NIKE is part of the Dow Jones U.S. Footwear Index, the price and returns of NIKE stock have a substantial effect on this index. The Standard & Poor's Apparel, Accessories & Luxury Goods Index consists of Hanesbrands Inc., PVH Corporation, Ralph Lauren Corporation, Tapestry, Inc., Under Armour, Inc. and V.F. Corporation. The Dow Jones U.S. Footwear Index and the Standard & Poor's Apparel, Accessories & Luxury Goods Index include companies in two major lines of business in which the Company competes. The indices do not encompass all of the Company's competitors, nor all product categories and lines of business in which the Company is engaged.

The stock performance shown on the performance graph above is not necessarily indicative of future performance. The Company will not make or endorse any predictions as to future stock performance.

The performance graph above is being furnished solely to accompany this Report pursuant to Item 201(e) of Regulation S-K, is not being filed for purposes of Section 18 of the Securities Exchange Act of 1934, as amended, and is not to be incorporated by reference into any filing of the Company, whether made before or after the date hereof, regardless of any general incorporation language in such filing.

ITEM 6. SELECTED FINANCIAL DATA

All share and per share amounts are reflective of the two-for-one stock split that began trading at the split-adjusted price on December 24, 2015.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

NIKE designs, develops, markets and sells athletic footwear, apparel, equipment, accessories and services worldwide. We are the largest seller of athletic footwear and apparel in the world. We sell our products through NIKE-owned retail stores and through digital platforms (which we refer to collectively as our "NIKE Direct" operations), to retail accounts and to a mix of independent distributors, licensees and sales representatives in virtually all countries around the world. Our goal is to deliver value to our shareholders by building a profitable global portfolio of branded footwear, apparel, equipment and accessories businesses. Our strategy is to achieve long-term revenue growth by creating innovative, "must-have" products, building deep personal consumer connections with our brands and delivering compelling consumer experiences through digital platforms and at retail.

Since fiscal 2018, through the Consumer Direct Offense and our Triple Double strategy, we have focused on doubling the impact of innovation, increasing our speed and agility to market and growing our direct connections with consumers. In June 2020, we announced a new digitally empowered phase of the Consumer Direct Offense strategy: Consumer Direct Acceleration. This strategic acceleration will focus on three specific areas. First, creating the marketplace of the future through more premium, consistent and seamless consumer experiences that more closely align with what consumers want and need. This strategy will lead with NIKE Digital and our own stores, as well as through select strategic partners who share our marketplace vision. Second, we will align our product creation and category organizations around a new consumer construct focused on Men's, Women's and Kids'. This approach allows us to create product that better meets individual consumer needs, including more specialization of our category approach, while re-aligning and simplifying our offense to accelerate our largest growth opportunities. In particular, we'll be reinvesting in our Women's and Kids' businesses and will also simplify our operating model across the remainder of the company to optimize effectiveness. Third, we will unify investments in data and analytics, demand sensing, insight gathering, inventory management and other areas against an end-to-end technology foundation to accelerate our digital transformation. We believe this unified approach will accelerate growth and unlock more efficiency for our business, while driving speed and responsiveness as we serve consumers globally.

On July 22, 2020, management announced a series of leadership and operating model changes to streamline and speed up strategic execution. These changes are expected to lead to a net loss of jobs, resulting in pre-tax, one-time employee termination costs of approximately \$200 million to \$250 million, which is expected to be incurred primarily during the first half of fiscal 2021, in the form of cash expenditures. These amounts are subject to change until such time as all details are finalized.

This next phase of our Consumer Direct Offense is expected to drive sustainable growth and profitability as we accelerate NIKE to a digital-first company. We are committed to the execution of this strategy, despite the short-term adverse impacts to our business from a novel strain of coronavirus (COVID-19). As such, our long-term financial goals on average, per year, remain the same and are outlined below:

- High single-digit revenue growth;
- Gross margin expansion of as much as 50 basis points;
- Slight selling and administrative expense leverage;
- Mid-teens earnings per share growth; and
- Low-thirties percentage rate of return on invested capital.

COVID-19 UPDATE

COVID-19 was first identified in Wuhan, China in December 2019, and subsequently declared a pandemic by the World Health Organization. To date, COVID-19 has surfaced in nearly all regions around the world and resulted in travel restrictions and business slowdowns or shutdowns in affected areas. As a result, COVID-19 has impacted our business globally, including through store closures, reduced operating hours and decreased retail traffic. In particular, the outbreak and preventive measures taken to help curb the spread had material adverse impacts on our operations and business results in Greater China during the third quarter of fiscal 2020, following the temporary closure of, or reduced operating hours in, approximately 75% of NIKE-owned and partner stores within the region. During the fourth quarter of fiscal 2020, our results of operations were further impacted as approximately 90% of our NIKE Brand stores across North America, EMEA and APLA, excluding Korea, were closed for approximately 8 weeks. The majority of Converse direct to consumer stores were also closed for a significant portion of the fourth quarter. Additionally, certain of our wholesale partners closed stores or reduced operating hours during the fourth quarter, resulting in lower than expected sales and a slowing of receipt of shipments of our products. The combined effect of store closures and reduced wholesale shipments caused higher than normal inventory levels at May 31, 2020, as *Inventories* grew 31% compared to the prior year. In order to manage future inventory growth and ensure a return to normalized levels we are modifying our buying plans and canceling certain pre-COVID-19 factory purchases, shifting product offer dates to meet near-term demand, as well as shifting available inventory into our digital channel and increasing digital fulfillment capacity specifically in

North America and EMEA. Additionally, we are investing in targeted promotions and markdowns to accelerate liquidation of excess inventory while continuing to protect the long-term health of our product franchises.

COVID-19 also impacted our distribution centers, our third-party manufacturing partners and other vendors, including through the effects of facility closures, reductions in operating hours, labor shortages and real time changes in operating procedures to accommodate social distancing guidelines and additional cleaning and disinfection procedures.

In response to the uncertainty of the pandemic described above, we enhanced our liquidity position during the fourth quarter through the issuance of \$6 billion in senior unsecured notes, the temporary suspension of our share repurchase program and by entering into a new committed credit facility agreement, which provides for an additional \$2 billion of borrowings. Refer to Liquidity and Capital Resources for additional discussion.

Throughout the third and fourth quarter of fiscal 2020, our digital commerce remained open, supported by the employees in the distribution centers. During the fourth quarter, NIKE Brand digital remained our fastest growing channel, growing 79% on a currency-neutral basis with each of our geographies growing over 50%. Beginning in mid-May, stores within our NIKE Direct operations gradually began reopening. As of July 17, 2020, over 90% of our NIKE Direct stores have reopened across the globe, with 100% open in Greater China, over 90% open in both EMEA and North America, and APLA open over 70%. As of July 17, 2020, substantially all Converse direct to consumer stores have reopened to serve consumers.

We continue to monitor the rapidly evolving situation and guidance from international and domestic authorities, including federal, state and local public health authorities and may take additional actions based on their recommendations. In these circumstances, there may be developments outside our control requiring us to adjust our operating plan. As such, given the dynamic nature of this situation, the Company cannot reasonably estimate the impacts of COVID-19 on our future financial condition, results of operations or cash flows. However, we do expect they will have a material adverse impact on our future revenue growth as well as our overall profitability and may continue to lead to higher than normal inventory levels in various markets, revised payment terms with certain of our wholesale customers, higher sales-related reserves, factory cancellation costs and a volatile effective tax rate driven by changes in the mix of earnings across the Company's jurisdictions.

On March 27, 2020, in response to COVID-19, the United States government enacted the Coronavirus Aid, Relief, and Economic Security Act (the "CARES Act"). The CARES Act is a relief package consisting of various stimulus measures, such as tax payment deferrals, various business incentives and makes certain technical corrections to the U.S. Tax Cuts and Jobs Act of 2017. The enactment of such legislation, while favorable, did not have a material impact on our fiscal 2020 Consolidated Financial Statements.

FISCAL 2020 OVERVIEW

Fiscal 2020 NIKE, Inc. *Revenues* declined 4% to \$37.4 billion, as revenue growth of 7% for the first nine months of fiscal 2020 was more than offset by a 38% decline in the fourth quarter due to the impacts of COVID-19. The NIKE Brand, which represents over 90% of NIKE, Inc. *Revenues*, experienced a 4% decline, down 2% on a currency-neutral basis, driven by declines across nearly all geographies, partially offset by 11% currency-neutral growth in Greater China. NIKE Direct grew 8% on a currency-neutral basis driven by 49% growth in digital, with all geographies growing strong double digits, while wholesale revenues declined 7%. Revenues for Converse declined 3% and 1%, on a reported and currency-neutral basis, respectively, as revenue growth in Asia was more than offset by declines in North America, Europe and licensee markets.

Income before income taxes decreased 40% for fiscal 2020, primarily due to lower revenues and gross margin resulting from the impacts of COVID-19, as well as higher selling and administrative expense. For the first nine months of fiscal 2020, gross margin expanded 30 basis points compared to the first nine months of fiscal 2019. However, this was more than offset by a decline of 820 basis points in the fourth quarter of fiscal 2020, primarily due the impacts of COVID-19. For fiscal 2020, NIKE, Inc. gross margin decreased 130 basis points as higher full-price average selling price (ASP), on a wholesale equivalent basis, was more than offset by higher product costs due to incremental tariffs in the U.S., as well as factory cancellation charges, higher inventory obsolescence reserves and the negative rate impacts of supply chain costs on a lower volume of wholesale shipments in the fourth quarter of fiscal 2020. Selling and administrative expense increased, due to higher operating overhead expense partially offset by lower demand creation expense. Operating overhead expense increased due to higher wage-related expenses, as a result of our continued investment in end-to-end digital capabilities, and higher bad debt expense, partially offset by lower travel and related spend. Demand creation expense decreased primarily due to lower retail brand presentation costs and sports marketing expenses as sporting events were postponed or canceled and a majority of stores were closed globally during the fourth quarter of fiscal 2020. These decreases were partially offset by higher digital brand marketing costs.

Diluted earnings per common share reflects a 2% decline in the weighted average diluted common shares outstanding, driven by our share repurchase program.

As we continue to execute against the Consumer Direct Offense, we are focused on optimizing country operating models across our global portfolio and we remain committed to investing in our most significant growth opportunities. During the third quarter of fiscal 2020, we announced our intention to sell our NIKE Brand businesses in Brazil, Argentina, Chile and Uruguay to strategic third-party distributors in an effort to more personally serve consumers in these respective marketplaces while driving

sustainable, profitable growth. These transactions are expected to close in the first half of fiscal 2021. As a result of this decision, the related assets and liabilities of these entities were classified as held-for-sale on the Consolidated Balance Sheets as of May 31, 2020. Additionally, we recognized a non-recurring impairment charge of \$405 million, within *Other (income) expense, net* on the Consolidated Statements of Income, classified within Corporate. This charge was primarily due to the anticipated release of non-cash cumulative foreign currency translation losses, and could fluctuate due to changes in exchange rates up to the date of close. In future quarters, as we shift from a wholesale and direct to consumer operating model to a distributor operating model within these countries, we expect consolidated NIKE, Inc. and APLA revenue growth will be reduced due to differences in commercial terms. However, we expect the future operating model to have a favorable impact on our overall profitability as we reduce selling and administrative expenses, as well as lessen exposure to foreign exchange rate volatility.

On October 29, 2019, we signed a definitive agreement to sell the assets and liabilities of our wholly-owned subsidiary brand, Hurley. The transaction closed on December 6, 2019, and the impacts of the divestiture are not considered material to the Company.

While foreign currency markets remain volatile, in part due to geopolitical dynamics leading to a stronger U.S. Dollar, we continue to see opportunities to drive future growth and profitability. We remain committed to effectively managing our business to achieve our financial goals over the long-term by executing against the operational strategies outlined above.

For discussion related to the results of operations and changes in financial condition for fiscal 2019 compared to fiscal 2018 refer to Part II, Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations in our fiscal 2019 Form 10-K, which was filed with the United States Securities and Exchange Commission on July 23, 2019.

USE OF NON-GAAP FINANCIAL MEASURES

Throughout this Annual Report on Form 10-K, we discuss non-GAAP financial measures, including references to wholesale equivalent revenues, currency-neutral revenues, as well as Total NIKE Brand earnings before interest and taxes (EBIT) and Total NIKE, Inc. EBIT, which should be considered in addition to, and not in lieu of, the financial measures calculated and presented in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP"). References to wholesale equivalent revenues are intended to provide context as to the total size of our NIKE Brand market footprint if we had no NIKE Direct operations. NIKE Brand wholesale equivalent revenues consist of (1) sales to external wholesale customers and (2) internal sales from our wholesale operations to our NIKE Direct operations, which are charged at prices comparable to those charged to external wholesale customers. Additionally, currency-neutral revenues are calculated using actual exchange rates in use during the comparative prior year period to enhance the visibility of the underlying business trends excluding the impact of translation arising from foreign currency exchange rate fluctuations. EBIT is calculated as *Net Income* before *Interest expense (income), net* and *Income tax expense* in the Consolidated Statements of Income.

Management uses these non-GAAP financial measures when evaluating the Company's performance, including when making financial and operating decisions. Additionally, management believes these non-GAAP financial measures provide investors with additional financial information that should be considered when assessing our underlying business performance and trends. However, references to wholesale equivalent revenues, currency-neutral revenues and EBIT should not be considered in isolation or as a substitute for other financial measures calculated and presented in accordance with U.S. GAAP and may not be comparable to similarly titled non-GAAP measures used by other companies.

TOTAL NIKE BRAND WHOLESALE EQUIVALENT REVENUES	\$ 30,608	\$ 32,550	-6 %	-4 %	\$ 30,301	7 %	11 %

(1) The percent change excluding currency changes and the presentation of wholesale equivalent revenues represent non-GAAP financial measures. See "Use of Non-GAAP Financial Measures" for further information.

(2) Global Brand Divisions revenues are primarily attributable to NIKE Brand licensing businesses that are not part of a geographic operating segment.

(3) Corporate revenues primarily consist of foreign currency hedge gains and losses related to revenues generated by entities within the NIKE Brand geographic operating segments and Converse, but managed through our central foreign exchange risk management program.

- (4) Others include all unisex products, equipment and other products not allocated to Men's, Women's and NIKE Kids', as well as certain adjustments that are not allocated to products designated by gender or age.
- (5) Others include all other categories and certain adjustments that are not allocated at the category level.

FISCAL 2020 NIKE BRAND REVENUE HIGHLIGHTS

The following tables present NIKE Brand revenues disaggregated by reportable operating segment, distribution channel and major product line:

FISCAL 2020 COMPARED TO FISCAL 2019

On a currency-neutral basis, NIKE, Inc. *Revenues* declined 2% for fiscal 2020, driven by lower revenues in both the NIKE Brand and Converse as the first nine months of revenue growth was offset by the impacts of lower shipments to wholesale customers and store closures within our NIKE Direct and Converse direct to consumer operations due to COVID-19 in the fourth quarter. Revenues for North America declined in fiscal 2020, reducing NIKE, Inc. *Revenues* by approximately 4 percentage points, partially offset by revenue growth in Greater China contributing approximately 2 percentage points.

On a currency-neutral basis, NIKE Brand footwear revenues decreased 2% for fiscal 2020, driven by declines in nearly all key categories, primarily Running, Sportswear and Training, partially offset by growth in the Jordan Brand. Unit sales of footwear decreased 8%, partially offset by higher ASP per pair contributing approximately 6 percentage points. The increase in ASP was primarily due to higher full-price and NIKE Direct ASPs, as well as the favorable impact of growth in our NIKE Direct business.

Currency-neutral NIKE Brand apparel revenues decreased 3% for fiscal 2020, due to declines in most key categories, primarily Running, Training and Football (Soccer), partially offset by growth in Sportswear and the Jordan Brand. Unit sales of apparel decreased 8%, partially offset by higher ASP per unit contributing approximately 5 percentage points. The increase in ASP was primarily due to higher full-price ASP and the favorable impact of growth in our NIKE Direct business.

On a reported basis, NIKE Direct revenues represented approximately 35% of our total NIKE Brand revenues for fiscal 2020, compared to 32% for fiscal 2019. Digital commerce sales were \$5.5 billion for fiscal 2020 compared to \$3.8 billion for fiscal 2019. On a currency-neutral basis, NIKE Direct revenues increased 8% for fiscal 2020, driven by strong digital commerce sales growth of 49%, which more than offset comparable store sales contraction of 12% due to temporary store closures and stores operating on reduced hours as a result of COVID-19. Comparable store sales, which exclude digital commerce sales, comprises revenues from NIKE-owned in-line and factory stores for which all three of the following requirements have been met: (1) the store has been open at least one year, (2) square footage has not changed by more than 15% within the past year and (3) the store has not been permanently repositioned within the past year. Comparable store sales includes revenues from stores that were temporarily closed during the period as a result of COVID-19. Comparable store sales represents a performance measure that we believe is useful information for management and investors in understanding the performance of our established NIKE-owned in-line and factory stores. Management considers this metric when making financial and operating decisions. The method of calculating comparable store sales varies across the retail industry. As a result, our calculation of this metric may not be comparable to similarly titled measures used by other companies.

On a currency-neutral basis, fiscal 2020 NIKE Brand Men's and Women's revenues decreased 4% and 3%, respectively. Lower NIKE Brand Men's revenues were driven by declines in nearly all key categories, primarily Running and Training, partially offset by growth in the Jordan Brand. Lower NIKE Brand Women's revenues were driven by declines in most key categories, primarily Running and Training, partially offset by growth in Sportswear and the Jordan Brand. Revenues for our NIKE Kids' business decreased 3%, as declines primarily in Football (Soccer) more than offset growth in the Jordan Brand.

GROSS MARGIN

FISCAL 2020 COMPARED TO FISCAL 2019

For fiscal 2020, our consolidated gross profit decreased 7% to \$16,241 million compared to \$17,474 million for fiscal 2019, which was significantly impacted by lower shipments to our wholesale customers and store closures within our NIKE Direct operations due to COVID-19. Gross margin decreased 130 basis points to 43.4% for fiscal 2020 compared to 44.7% for fiscal 2019 due to the following:

*Wholesale equivalent

Higher product costs were in part due to incremental tariffs in North America. Higher other costs, primarily in the fourth quarter of fiscal 2020 due to the impacts of COVID-19, were specifically related to increased factory cancellations costs, higher inventory obsolescence and the adverse rate impact of supply chain costs on a lower volume of wholesale shipments.

TOTAL SELLING AND ADMINISTRATIVE EXPENSE

(Dollars in millions)

	FISCAL 2020	FISCAL 2019	% CHANGE	FISCAL 2018	% CHANGE
Demand creation expense ⁽¹⁾	\$ 3,592	\$ 3,753	-4%	\$ 3,577	5%
Operating overhead expense	9,534	8,949	7%	7,934	13%
Total selling and administrative expense	\$ 13,126	\$ 12,702	3%	\$ 11,511	10%
% of revenues	35.1%	32.5%	260 bps	31.6%	90 bps

(1) Demand creation expense consists of advertising and promotion costs, including costs of endorsement contracts, complimentary product, television, digital and print advertising and media costs, brand events and retail brand presentation.

FISCAL 2020 COMPARED TO FISCAL 2019

Demand creation expense decreased 4% for fiscal 2020 compared to fiscal 2019, due to lower retail brand presentation costs and lower sports marketing investments, as well as decreased advertising and marketing expenses as sporting events were postponed or canceled and a majority of stores were closed globally during the fourth quarter of fiscal 2020. These decreases were partially offset by higher digital brand marketing costs. Changes in foreign currency exchange rates decreased Demand creation expense by approximately 2 percentage points for fiscal 2020.

Operating overhead expense increased 7% for fiscal 2020 compared to fiscal 2019, driven by higher wage-related and administrative expenses to support our continued investments in end-to-end digital capabilities, including support for a new enterprise resource planning tool. Operating overhead expense was further impacted by higher bad debt expense recognized during the fourth quarter of fiscal 2020 due to the impacts of COVID-19. These increases were partially offset by lower travel and related spend. Changes in foreign currency exchange rates decreased Operating overhead expense by approximately 1 percentage points for fiscal 2020.

OTHER (INCOME) EXPENSE, NET

(Dollars in millions)

	FISCAL 2020	FISCAL 2019	FISCAL 2018
Other (income) expense, net	\$ 139	\$ (78)	\$ 66

Other (income) expense, net comprises foreign currency conversion gains and losses from the re-measurement of monetary assets and liabilities denominated in non-functional currencies and the impact of certain foreign currency derivative instruments, as well as unusual or non-operating transactions that are outside the normal course of business.

FISCAL 2020 COMPARED TO FISCAL 2019

Other (income) expense, net changed from \$78 million of other income, net for fiscal 2019 to \$139 million of other expense, net for fiscal 2020, primarily due to the non-recurring impairment charge of \$405 million related to our planned, strategic distributor partnership transition within APLA. For more information see Note 20 — Acquisitions and Divestitures within the accompanying Notes to the Consolidated Financial Statements. This was offset by a \$121 million net beneficial change in foreign currency conversion gains and losses, including hedges.

We estimate the combination of the translation of foreign currency-denominated profits from our international businesses and the year-over-year change in foreign currency-related gains and losses included in *Other (income) expense, net* had an unfavorable impact on our *Income before income taxes* of \$91 million for fiscal 2020.

INCOME TAXES

	FISCAL 2020	FISCAL 2019	% CHANGE	FISCAL 2018	% CHANGE
Effective tax rate	12.1%	16.1%	(400) bps	55.3%	(3,920) bps

FISCAL 2020 COMPARED TO FISCAL 2019

Our effective tax rate was 12.1% for fiscal 2020, compared to 16.1% for fiscal 2019 due to increased benefits from discrete items such as stock-based compensation.

Our effective tax rate for fiscal 2018 reflected significant changes related to the enactment of the U.S. Tax Cuts and Jobs Act (the "Tax Act"). Refer to Note 9 — Income Taxes in the accompanying Notes to the Consolidated Financial Statements for additional information on the impact of the Tax Act.

OPERATING SEGMENTS

Our operating segments are evidence of the structure of the Company's internal organization. The NIKE Brand segments are defined by geographic regions for operations participating in NIKE Brand sales activity.

Each NIKE Brand geographic segment operates predominantly in one industry: the design, development, marketing and selling of athletic footwear, apparel and equipment. The Company's reportable operating segments for the NIKE Brand are: North America; Europe, Middle East & Africa (EMEA); Greater China; and Asia Pacific & Latin America (APLA), and include results for the NIKE and Jordan brands, with results for the Hurley Brand, prior to its divestiture, included in North America. Refer to Note 20 — Acquisitions and Divestitures within the accompanying Notes to the Consolidated Financial Statements for additional information. The Company's NIKE Direct operations are managed within each geographic operating segment. Converse is also a reportable operating segment for the Company, and operates predominately in one industry: the design, marketing, licensing and selling of casual sneakers, apparel and accessories.

As part of our centrally managed foreign exchange risk management program, standard foreign currency exchange rates are assigned twice per year to each NIKE Brand entity in our geographic operating segments and Converse. These rates are set approximately nine and twelve months in advance of the future selling seasons to which they relate (specifically, for each currency, one standard rate applies to the fall and holiday selling seasons and one standard rate applies to the spring and summer selling seasons) based on average market spot rates in the calendar month preceding the date they are established. Inventories and Cost of sales for geographic operating segments and Converse reflect the use of these standard rates to record non-functional currency product purchases into the entity's functional currency. Differences between assigned standard foreign currency exchange rates and actual market rates are included in Corporate, together with foreign currency hedge gains and losses generated from our centrally managed foreign exchange risk management program and other conversion gains and losses.

The breakdown of revenues is as follows:

<i>(Dollars in millions)</i>	FISCAL 2020	FISCAL 2019	% CHANGE	% CHANGE EXCLUDING CURRENCY CHANGES ⁽¹⁾	FISCAL 2018	% CHANGE	% CHANGE EXCLUDING CURRENCY CHANGES ⁽¹⁾

TOTAL NIKE, INC. REVENUES	\$ 37,403	\$ 39,117	-4 %	-2 %	\$ 36,397	7 %	11 %

(1) The percent change excluding currency changes represents a non-GAAP financial measure. See "Use of Non-GAAP Financial Measures" for further information.

(2) Global Brand Divisions revenues are primarily attributable to NIKE Brand licensing businesses that are not part of a geographic operating segment.

(3) Corporate revenues primarily consist of foreign currency hedge gains and losses related to revenues generated by entities within the NIKE Brand geographic operating segments and Converse, but managed through our central foreign exchange risk management program.

The primary financial measure used by the Company to evaluate performance of individual operating segments is EBIT, which represents *Net income before Interest expense (income), net and Income tax expense* in the Consolidated Statements of Income. As discussed in Note 17 — Operating Segments and Related Information in the accompanying Notes to the Consolidated Financial Statements, certain corporate costs are not included in EBIT of our operating segments.

The breakdown of earnings before interest and taxes is as follows:

<i>(Dollars in millions)</i>	FISCAL 2020	FISCAL 2019	% CHANGE	FISCAL 2018	% CHANGE

We believe there continues to be a meaningful shift in the way consumers shop for product and make purchasing decisions. Consumers are demanding a constant flow of fresh and innovative product, and have an expectation for superior service and rapid delivery, all fueled by the shift toward digital and mono-brand experiences in NIKE Direct. Specifically, in North America we anticipate continued evolution within the retail landscape, driven by shifting consumer traffic patterns across digital and physical channels. The evolution of the North America marketplace is resulting in third-party retail store closures, which is expected to be further accelerated as a result of the effects of COVID-19; however, we remain focused on building long-term momentum with our strategic wholesale customers, fueled by innovative product and NIKE Brand consumer experiences, leveraging digital.

FISCAL 2020 COMPARED TO FISCAL 2019

On a currency-neutral basis, North America revenues decreased 9%, as revenue growth for the first nine months of fiscal 2020 was offset by declines in the fourth quarter, primarily resulting from lower shipments to our wholesale customers and store closures within our NIKE Direct operations due to COVID-19. Revenues declined in nearly all key categories, primarily Running and Training. NIKE Direct revenues increased 2% for fiscal 2020 as strong digital commerce sales growth of 45% more than offset a 20% decline in comparable store sales due to temporary store closures and stores operating on reduced hours as a result of COVID-19 during the fourth quarter.

Footwear revenues contracted 7% on a currency-neutral basis for fiscal 2020, driven by declines in nearly all key categories, primarily Running, Training and Sportswear. Unit sales of footwear decreased 13%, partially offset by higher ASP per pair contributing approximately 6 percentage points. Higher ASP per pair was primarily due to higher NIKE Direct ASP and the favorable impact of growth in our NIKE Direct business, as well as higher full-price ASP.

On a currency-neutral basis, apparel revenues decreased 12% for fiscal 2020 as lower revenues in nearly all key categories, primarily Training, were partially offset by growth in Sportswear. Unit sales of apparel decreased 16%, partially offset by higher ASP per unit contributing approximately 4 percentage points. The increase in ASP per unit was primarily a result of higher full-price and NIKE Direct ASPs, as well as the favorable impact of growth in our NIKE Direct business.

Reported EBIT decreased 26% for fiscal 2020, reflecting lower revenues, gross margin contraction and higher selling and administrative expense. Gross margin declined 230 basis points as higher-full price ASP was more than offset by higher product costs, primarily due to incremental tariffs, as well as increased costs specifically in the fourth quarter due to COVID-19 for warehousing and freight, the adverse rate impact of supply chain costs on a lower volume of wholesale shipments, factory cancellations and inventory obsolescence. Selling and administrative expense grew due to higher operating overhead expense, partially offset by lower demand creation expense. Operating overhead expense increased primarily due to higher bad debt expense and higher administrative costs. The decrease in demand creation expense reflected higher digital brand marketing costs, which were more than offset by lower retail brand presentation costs and sports marketing expenses as leagues and sporting events were suspended and a majority of stores within our NIKE Direct operations were closed during the fourth quarter due to COVID-19.

EUROPE, MIDDLE EAST & AFRICA

<i>(Dollars in millions)</i>	FISCAL 2020	FISCAL 2019	% CHANGE	% CHANGE EXCLUDING CURRENCY CHANGES	FISCAL 2018	% CHANGE	% CHANGE EXCLUDING CURRENCY CHANGES

FISCAL 2020 COMPARED TO FISCAL 2019

On a currency-neutral basis, EMEA revenues for fiscal 2020 declined 1%, as revenue growth for the first nine months of fiscal 2020 was offset by declines in the fourth quarter, primarily resulting from lower shipments to our wholesale customers and store closures within our NIKE Direct operations due to COVID-19. The decline reflects lower revenues in the Northern Europe and Southern Europe territories, which each declined 8%, partially offset by growth in UK & Ireland of 5%. Revenues decreased in most key categories, primarily Football (Soccer) and Running, partially offset by growth in the Jordan Brand. NIKE Direct revenues increased 5% due to strong digital commerce sales growth of 50%, partially offset by a 15% decline in comparable store sales due to temporary store closures and stores operating on reduced hours as a result of COVID-19, as well as declines from certain store closures as we continually optimize our fleet to meet consumer demand across physical and digital channels.

Currency-neutral footwear revenues contracted 3% for fiscal 2020, driven by lower revenues in nearly all key categories, primarily Sportswear. Unit sales of footwear decreased 10%, partially offset by higher ASP per pair contributing approximately 7 percentage points. Higher ASP per pair primarily resulted from higher full-price and NIKE Direct ASPs.

For fiscal 2020, currency-neutral apparel revenues increased 2% as growth in several key categories, most notably Sportswear and the Jordan Brand, was partially offset by declines in Football (Soccer). Unit sales of apparel decreased 2%, partially offset by higher ASP per unit contributing approximately 4 percentage points. Higher ASP per unit was primarily due to higher full-price ASP.

Reported EBIT decreased 23% for fiscal 2020 due to lower revenues, gross margin contraction and higher selling and administrative expense. Gross margin declined 240 basis points as higher full-price ASP was more than offset by unfavorable changes in standard foreign currency exchange rates and higher other costs, which primarily occurred in the fourth quarter due to COVID-19 and reflected increased warehousing and freight costs, the adverse rate impact of supply chain costs on a lower volume of wholesale shipments and higher inventory obsolescence. Selling and administrative expense increased due to higher operating overhead expense, partially offset by lower demand creation expense. Growth in operating overhead expense was primarily due to higher bad debt expense. The decrease in demand creation expense was primarily driven by lower retail brand presentation costs resulting from store closures during the fourth quarter due to COVID-19.

FISCAL 2020 COMPARED TO FISCAL 2019

On a currency-neutral basis, Greater China revenues for fiscal 2020 increased 11%, despite temporary store closures and stores operating on reduced hours as a result of COVID-19 during the third quarter and for part of the fourth quarter. Higher revenues were driven by growth in most key categories, led by the Jordan Brand and Sportswear. NIKE Direct revenues increased 20%, driven by strong digital commerce sales growth of 49%, the addition of new stores and comparable store sales growth of 1%.

Currency-neutral footwear revenues increased 12% for fiscal 2020, driven by growth in nearly all key categories, led by the Jordan Brand and, to a lesser extent, Sportswear. Unit sales of footwear increased 10% and higher ASP per pair contributed approximately 2 percentage points of footwear revenue growth, driven by higher full-price ASP.

The currency-neutral apparel revenue growth of 8% for fiscal 2020 was fueled by higher revenues in most key categories, led by Sportswear and the Jordan Brand. Unit sales of apparel increased 8%, while ASP per unit was flat as higher off-price and full-price ASPs were offset by unfavorable full-price mix and lower NIKE Direct ASP.

Reported EBIT increased 5% for fiscal 2020, driven by higher revenues and selling and administrative expense leverage, partially offset by gross margin contraction. Gross margin decreased 170 basis points as unfavorable changes in standard foreign currency exchange rates and higher product costs more than offset higher full-price ASP. Selling and administrative expense increased due to higher operating overhead and demand creation expense. Growth in operating overhead expense was driven by higher investments within our NIKE Direct operations. Demand creation expense increased primarily due to higher retail brand presentation costs, including digital brand marketing.

As discussed previously, we entered into definitive agreements to sell our NIKE Brand businesses in Brazil, Argentina, Chile and Uruguay and shift to a distributor operating model. The impacts of entering into these agreements are included within Corporate and are not reflected in the APLA operating segment results for fiscal 2020.

FISCAL 2020 COMPARED TO FISCAL 2019

On a currency-neutral basis, APLA revenues increased 1% for fiscal 2020. The increase in revenues reflected growth in the Korea and SOCO (which comprises Argentina, Uruguay and Chile) territories of 14% and 6%, respectively, partially offset by declines in Mexico of 9%. Revenues increased in several key categories, led by the Jordan Brand. NIKE Direct revenues increased 12%, fueled by strong digital commerce sales growth of 62% and the addition of new stores, partially offset by a decline in comparable store sales of 4% due to temporary store closures and stores operating on reduced hours as a result of COVID-19 during the fourth quarter.

Currency-neutral footwear revenues for fiscal 2020 were flat as growth in the Jordan Brand and NIKE Basketball was offset by declines in all other key categories, primarily Training. Unit sales of footwear decreased 12%, offset by higher ASP per pair contributing approximately 12 percentage points, driven by higher full-price and NIKE Direct ASPs, both of which in part reflect inflationary conditions in our SOCO territory.

Currency-neutral apparel revenues grew 3% for fiscal 2020, driven by higher revenues in several key categories, most notably Sportswear. Unit sales of apparel decreased 5%, which were more than offset by higher ASP per unit contributing approximately 8 percentage points, primarily driven by higher full-price and NIKE Direct ASPs, both of which in part reflect inflationary conditions in our SOCO territory.

Reported EBIT decreased 11% for fiscal 2020 reflecting lower revenues and gross margin contraction, partially offset by lower selling and administrative expense. Gross margin decreased 140 basis points as higher full-price ASP was more than offset by higher product costs, unfavorable changes in standard foreign currency exchange rates, as well as higher other costs. The increase in other costs primarily occurred in the fourth quarter due to COVID-19 and reflected increased warehousing and freight, as well as higher inventory obsolescence. Selling and administrative expense decreased as lower demand creation expense was partially offset by higher operating overhead expense. The decrease in demand creation expense was primarily due to lower sports marketing costs, advertising and marketing expenses, as well as lower retail brand presentation costs as sporting events were postponed or canceled and a majority of stores were closed during the fourth quarter due to COVID-19. The increase in operating overhead expense was primarily due to higher bad debt expense and higher wage-related costs.

GLOBAL BRAND DIVISIONS

<i>(Dollars in millions)</i>	FISCAL 2020	FISCAL 2019	% CHANGE	% CHANGE EXCLUDING CURRENCY CHANGES	FISCAL 2018	% CHANGE	% CHANGE EXCLUDING CURRENCY CHANGES
Revenues	\$ 30	\$ 42	-29 %	-26 %	\$ 88	-52 %	-53 %
Earnings (Loss) Before Interest and Taxes	\$ (3,468)	\$ (3,262)	-6 %		\$ (2,658)	-23 %	

Global Brand Divisions primarily represent demand creation and operating overhead expense, including product creation and design expenses that are centrally managed for the NIKE Brand, as well as costs associated with NIKE Direct global digital operations and enterprise technology. Revenues for Global Brand Divisions are primarily attributable to NIKE Brand licensing businesses that are not part of a geographic operating segment.

FISCAL 2020 COMPARED TO FISCAL 2019

Global Brand Divisions' loss before interest and taxes increased 6% for fiscal 2020 as total selling and administrative expense increased compared to fiscal 2019, primarily due to higher operating overhead expense. The increase in operating overhead expense was primarily driven by higher wage-related and administrative costs resulting from investments in data and analytics capabilities, digital commerce platforms and our continued investment in a new enterprise resource planning tool, all of which are in an effort to accelerate our end-to-end digital transformation.

(1) Other revenues consist of territories serviced by third-party licensees who pay royalties to Converse for the use of its registered trademarks and other intellectual property rights. We do not own the Converse trademarks in Japan and accordingly do not earn revenues in Japan.

FISCAL 2020 COMPARED TO FISCAL 2019

On a currency-neutral basis, Converse revenues decreased 1% for fiscal 2020, as revenue growth for the first nine months of fiscal 2020 was offset by declines in the fourth quarter, primarily resulting from lower shipments to our wholesale customers and store closures in our direct to consumer operations due to COVID-19. Revenue declines in North America and Europe, as well as in licensee markets were partially offset by increases in Asia. Wholesale revenues decreased 5% while direct to consumer revenues increased 11%, as strong digital sales growth across all geographies more than offset declines from Converse owned store closures due to COVID-19. Combined unit sales within the wholesale and direct to consumer channels decreased 6%, while ASP grew 6% primarily due to the favorable impact on ASP of growth in the direct to consumer channel and growth within the Asia geography.

Reported EBIT decreased 2%, primarily driven by declines in revenues, partially offset by gross margin expansion and lower selling and administrative expenses. Gross margin increased 60 basis points driven by higher full-price ASP, in part due to growth in our higher margin Asia geography, as well as higher ASP in our direct to consumer channel, primarily through digital, both of which were only partially offset by unfavorable changes in standard foreign currency exchange rates. Selling and administrative expense decreased primarily due to decreases in demand creation expense, as operating overhead expense was flat. Demand creation expense decreased as a result of lower advertising and marketing in response to COVID-19. Operating overhead

expense was flat for fiscal 2020, as decreases in wage-related costs, travel and other discretionary expenses were offset by increased bad debt expense recognized in the fourth quarter.

CORPORATE

<i>(Dollars in millions)</i>	FISCAL 2020	FISCAL 2019	% CHANGE	FISCAL 2018	% CHANGE
Revenues	\$ (11)	\$ (7)	—	\$ 26	—
Earnings (Loss) Before Interest and Taxes	\$ (1,967)	\$ (1,810)	-9 %	\$ (1,456)	-24 %

Corporate revenues primarily consist of foreign currency hedge gains and losses related to revenues generated by entities within the NIKE Brand geographic operating segments and Converse, but managed through our central foreign exchange risk management program.

The Corporate loss before interest and taxes primarily consists of unallocated general and administrative expenses, including expenses associated with centrally managed departments; depreciation and amortization related to our corporate headquarters; unallocated insurance, benefit and compensation programs, including stock-based compensation; and certain foreign currency gains and losses.

In addition to the foreign currency gains and losses recognized in Corporate revenues, foreign currency results in Corporate include gains and losses resulting from the difference between actual foreign currency exchange rates and standard rates used to record non-functional currency denominated product purchases within the NIKE Brand geographic operating segments and Converse; related foreign currency hedge results; conversion gains and losses arising from re-measurement of monetary assets and liabilities in non-functional currencies; and certain other foreign currency derivative instruments.

For fiscal 2020, Corporate includes the non-recurring impairment charge recognized as a result of our decision to transition our NIKE Brand business operations in Brazil, Argentina, Chile and Uruguay to third-party distributors. This charge primarily reflects the anticipated release of associated non-cash cumulative foreign currency translation losses.

FISCAL 2020 COMPARED TO FISCAL 2019

The Corporate loss before interest and taxes increased \$157 million primarily due to the following:

- an unfavorable change of \$494 million, primarily due to the \$405 million non-recurring impairment charge discussed above. For more information see Note 20 — Acquisitions and Divestitures within the accompanying Notes to the Consolidated Financial Statements;
- a favorable change of \$213 million related to the difference between actual foreign currency exchange rates and standard foreign currency exchange rates assigned to the NIKE Brand geographic operating segments and Converse, net of hedge gains and losses; these results are reported as a component of consolidated gross margin; and
- a favorable change in net foreign currency gains and losses of \$124 million related to the re-measurement of monetary assets and liabilities denominated in non-functional currencies and the impact of certain foreign currency derivative instruments, reported as a component of consolidated *Other (income) expense, net*.

FOREIGN CURRENCY EXPOSURES AND HEDGING PRACTICES

OVERVIEW

As a global company with significant operations outside the United States, in the normal course of business we are exposed to risk arising from changes in currency exchange rates. Our primary foreign currency exposures arise from the recording of transactions denominated in non-functional currencies and the translation of foreign currency denominated results of operations, financial position and cash flows into U.S. Dollars.

Our foreign exchange risk management program is intended to lessen both the positive and negative effects of currency fluctuations on our consolidated results of operations, financial position and cash flows. We manage global foreign exchange risk centrally on a portfolio basis to address those risks material to NIKE, Inc. We manage these exposures by taking advantage of natural offsets and currency correlations existing within the portfolio and, where practical and material, by hedging a portion of the remaining exposures using derivative instruments such as forward contracts and options. As described below, the implementation of the NIKE Trading Company (NTC) and our foreign currency adjustment program enhanced our ability to manage our foreign exchange risk by increasing the natural offsets and currency correlation benefits existing within our portfolio of foreign exchange exposures. Our hedging policy is designed to partially or entirely offset the impact of exchange rate changes on the underlying net exposures being hedged. Where exposures are hedged, our program has the effect of delaying the impact

of exchange rate movements on our Consolidated Financial Statements; the length of the delay is dependent upon hedge horizons. We do not hold or issue derivative instruments for trading or speculative purposes.

Refer to Note 6 — Fair Value Measurements and Note 14 — Risk Management and Derivatives in the accompanying Notes to the Consolidated Financial Statements for additional description of outstanding derivatives at each reported period end.

TRANSACTIONAL EXPOSURES

We conduct business in various currencies and have transactions which subject us to foreign currency risk. Our most significant transactional foreign currency exposures are:

- Product Costs — NIKE's product costs are exposed to fluctuations in foreign currencies in the following ways:
 1. Product purchases denominated in currencies other than the functional currency of the transacting entity:
 - a. Certain NIKE entities purchase product from the NTC, a wholly-owned sourcing hub that buys NIKE branded products from third-party factories, predominantly in U.S. Dollars. The NTC, whose functional currency is the U.S. Dollar, then sells the products to NIKE entities in their respective functional currencies. NTC sales to a NIKE entity with a different functional currency results in a foreign currency exposure for the NTC.
 - b. Other NIKE entities purchase product directly from third-party factories in U.S. Dollars. These purchases generate a foreign currency exposure for those NIKE entities with a functional currency other than the U.S. Dollar.

In both purchasing scenarios, a weaker U.S. Dollar reduces inventory costs incurred by NIKE whereas a stronger U.S. Dollar increases its cost.

2. Factory input costs: NIKE operates a foreign currency adjustment program with certain factories. The program is designed to more effectively manage foreign currency risk by assuming certain of the factories' foreign currency exposures, some of which are natural offsets to our existing foreign currency exposures. Under this program, our payments to these factories are adjusted for rate fluctuations in the basket of currencies ("factory currency exposure index") in which the labor, materials and overhead costs incurred by the factories in the production of NIKE branded products ("factory input costs") are denominated.

For the currency within the factory currency exposure indices that is the local or functional currency of the factory, the currency rate fluctuation affecting the product cost is recorded within *Inventories* and is recognized in *Cost of sales* when the related product is sold to a third-party. All currencies within the indices, excluding the U.S. Dollar and the local or functional currency of the factory, are recognized as embedded derivative contracts and are recorded at fair value through *Other (income) expense, net*. Refer to Note 14 — Risk Management and Derivatives in the accompanying Notes to the Consolidated Financial Statements for additional detail.

As an offset to the impacts of the fluctuating U.S. Dollar on our non-functional currency denominated product purchases described above, a strengthening U.S. Dollar against the foreign currencies within the factory currency exposure indices reduces NIKE's U.S. Dollar inventory cost. Conversely, a weakening U.S. Dollar against the indexed foreign currencies increases our inventory cost.

- Non-Functional Currency Denominated External Sales — A portion of our NIKE Brand and Converse revenues associated with European operations are earned in currencies other than the Euro (e.g., the British Pound) but are recognized at a subsidiary that uses the Euro as its functional currency. These sales generate a foreign currency exposure.
- Other Costs — Non-functional currency denominated costs, such as endorsement contracts, also generate foreign currency risk, though to a lesser extent. In certain cases, the Company has entered into contractual agreements which have payments indexed to foreign currencies that create embedded derivative contracts recorded at fair value through *Other (income) expense, net*. Refer to Note 14 — Risk Management and Derivatives in the accompanying Notes to the Consolidated Financial Statements for additional detail.
- Non-Functional Currency Denominated Monetary Assets and Liabilities — Our global subsidiaries have various assets and liabilities, primarily receivables and payables, including intercompany receivables and payables, denominated in currencies other than their functional currencies. These balance sheet items are subject to re-measurement which may create fluctuations in *Other (income) expense, net* within our consolidated results of operations.

MANAGING TRANSACTIONAL EXPOSURES

Transactional exposures are managed on a portfolio basis within our foreign currency risk management program. We manage these exposures by taking advantage of natural offsets and currency correlations that exist within the portfolio and may also elect to use currency forward and option contracts to hedge the remaining effect of exchange rate fluctuations on probable forecasted future cash flows, including certain product cost exposures, non-functional currency denominated external sales and other costs described above. Generally, these are accounted for as cash flow hedges, except for hedges of the embedded derivative components of the product cost exposures and other contractual agreements.

Certain currency forward contracts used to manage the foreign exchange exposure of non-functional currency denominated monetary assets and liabilities subject to re-measurement and embedded derivative contracts are not formally designated as hedging instruments. Accordingly, changes in fair value of these instruments are recognized in *Other (income) expense, net* and are intended to offset the foreign currency impact of the re-measurement of the related non-functional currency denominated asset or liability or the embedded derivative contract being hedged.

TRANSLATIONAL EXPOSURES

Many of our foreign subsidiaries operate in functional currencies other than the U.S. Dollar. Fluctuations in currency exchange rates create volatility in our reported results as we are required to translate the balance sheets, operational results and cash flows of these subsidiaries into U.S. Dollars for consolidated reporting. The translation of foreign subsidiaries' non-U.S. Dollar denominated balance sheets into U.S. Dollars for consolidated reporting results in a cumulative translation adjustment to *Accumulated other comprehensive income (loss)* within *Shareholders' equity*. In the translation of our Consolidated Statements of Income, a weaker U.S. Dollar in relation to foreign functional currencies benefits our consolidated earnings whereas a stronger U.S. Dollar reduces our consolidated earnings. The impact of foreign exchange rate fluctuations on the translation of our consolidated *Revenues* was a detriment of approximately \$867 million, a detriment of approximately \$1,236 million, and a benefit of approximately \$832 million for the years ended May 31, 2020, 2019 and 2018, respectively. The impact of foreign exchange rate fluctuations on the translation of our *Income before income taxes* was a detriment of approximately \$212 million, a detriment of approximately \$233 million, and a benefit of approximately \$177 million for the years ended May 31, 2020, 2019 and 2018, respectively.

Management generally identifies hyper-inflationary markets as those markets whose cumulative inflation rate over a three-year period exceeds 100%. Management has concluded our Argentina subsidiary within our APLA operating segment is operating in a hyper-inflationary market. As a result, beginning in the second quarter of fiscal 2019, the functional currency of our Argentina subsidiary changed from the local currency to the U.S. Dollar. As of and for the period ended May 31, 2020, this change did not have a material impact on our results of operations or financial condition and we do not anticipate it will have a material impact in future periods based on current rates.

MANAGING TRANSLATIONAL EXPOSURES

To minimize the impact of translating foreign currency denominated revenues and expenses into U.S. Dollars for consolidated reporting, certain foreign subsidiaries use excess cash to purchase U.S. Dollar denominated available-for-sale investments. The variable future cash flows associated with the purchase and subsequent sale of these U.S. Dollar denominated investments at non-U.S. Dollar functional currency subsidiaries creates a foreign currency exposure that qualifies for hedge accounting under U.S. GAAP. We utilize forward contracts and/or options to mitigate the variability of the forecasted future purchases and sales of these U.S. Dollar investments. The combination of the purchase and sale of the U.S. Dollar investment and the hedging instrument has the effect of partially offsetting the year-over-year foreign currency translation impact on net earnings in the period the investments are sold. Hedges of the purchase of U.S. Dollar denominated available-for-sale investments are accounted for as cash flow hedges.

We estimate the combination of translation of foreign currency-denominated profits from our international businesses and the year-over-year change in foreign currency related gains and losses included in *Other (income) expense, net* had an unfavorable impact of approximately \$91 million, \$97 million, and \$110 million on our *Income before income taxes* for the years ended May 31, 2020, 2019 and 2018, respectively.

NET INVESTMENTS IN FOREIGN SUBSIDIARIES

We are also exposed to the impact of foreign exchange fluctuations on our investments in wholly-owned foreign subsidiaries denominated in a currency other than the U.S. Dollar, which could adversely impact the U.S. Dollar value of these investments and therefore the value of future repatriated earnings. We have, in the past, hedged and may, in the future, hedge net investment positions in certain foreign subsidiaries to mitigate the effects of foreign exchange fluctuations on these net investments. These hedges are accounted for as net investment hedges in accordance with U.S. GAAP. There were no outstanding net investment hedges as of May 31, 2020 and 2019. There were no cash flows from net investment hedge settlements for the years ended May 31, 2020, 2019 and 2018.

LIQUIDITY AND CAPITAL RESOURCES

CASH FLOW ACTIVITY

Cash provided (used) by operations was an inflow of \$2,485 million for fiscal 2020 compared to \$5,903 million for fiscal 2019. *Net income*, adjusted for non-cash items, generated \$3,730 million of operating cash inflow for fiscal 2020 compared to \$5,341 million for fiscal 2019. The decrease primarily reflects lower *Net Income*, resulting from the unfavorable impacts of COVID-19. The net change in working capital and other assets and liabilities resulted in a decrease to *Cash provided (used) by operations* of \$1,245 million for fiscal 2020, compared to an increase of \$562 million for fiscal 2019. The net change in working capital was impacted by a \$1,364 million increase in *Inventories*, in part reflecting lower shipments to our wholesale customers and store closures within our NIKE Direct operations, as well as a decrease in *Accounts Payable* resulting from lower spending, both of which are due to COVID-19. The net change in working capital was also unfavorably impacted by the net change in cash collateral with derivative counterparties as a result of hedging transactions. During fiscal 2020, cash collateral received from counterparties decreased \$289 million compared to an increase of \$266 million in fiscal 2019. Refer to the Credit Risk section of Note 14 — Risk Management and Derivatives in the accompanying Notes to the Consolidated Financial Statements for additional details. In addition, the net change in working capital was impacted by a \$1,509 million reduction in *Accounts receivable, net*, in fiscal 2020, primarily driven by lower revenues in the fourth quarter of fiscal 2020 due to the impacts of COVID-19.

Cash provided (used) by investing activities was an outflow of \$1,028 million for fiscal 2020, compared to an outflow of \$264 million for fiscal 2019, driven primarily by lower proceeds from the net change in short-term investments. During fiscal 2020, the net change in investments (including sales, maturities and purchases) resulted in a cash inflow of \$27 million compared to \$850 million in fiscal 2019. Additionally, during fiscal 2020, we continued investing in our infrastructure to support future growth, specifically focused around digital capabilities, our end-to-end technology foundation, our corporate facilities and improvements across our supply chain. We expect this trend to continue in future periods.

Cash provided (used) by financing activities was an inflow of \$2,491 million for fiscal 2020 compared to an outflow of \$5,293 million for fiscal 2019, primarily due to the net proceeds from a \$5,942 million corporate bond issuance in the fourth quarter of fiscal 2020, as well as lower share repurchases during fiscal 2020.

In fiscal 2020, we purchased 33.5 million shares of NIKE's Class B Common Stock for \$3,033 million (an average price of \$90.49 per share) under the four-year, \$15 billion share repurchase program approved by the Board of Directors in June 2018. As of May 31, 2020, we had repurchased 45.2 million shares at a cost of \$4,019 million (an average price of \$89.00 per share) under this new program. We continue to expect funding of share repurchases will come from operating cash flows, excess cash and/or proceeds from debt. To enhance our liquidity position in response to COVID-19, during the fourth quarter of fiscal 2020, we elected to temporarily suspend share repurchases under our existing share repurchase program. The existing program remains authorized by the Board of Directors and we may resume share repurchases in the future at any time, depending upon market conditions, our capital needs and other factors.

CAPITAL RESOURCES

On July 23, 2019, we filed a shelf registration statement (the "Shelf") with the U.S. Securities and Exchange Commission (SEC) which permits us to issue an unlimited amount of debt securities from time to time. The Shelf expires on July 23, 2022. On March 27, 2020 we issued \$6 billion of senior unsecured notes with tranches maturing March 27, 2025, March 27, 2027, March 27, 2030, March 27, 2040 and March 27, 2050. For additional information regarding our long-term debt refer to Note 8 — Long-Term Debt in the accompanying Notes to the Consolidated Financial Statements.

On August 16, 2019, we entered into a committed credit facility agreement with a syndicate of banks which provides for up to \$2 billion of borrowings, with the option to increase borrowings up to \$3 billion in total upon lender approval. The facility matures on August 16, 2024, with a one-year extension option prior to any anniversary of the closing date, provided that in no event shall it extend beyond August 16, 2026. This facility replaces the prior \$2 billion credit facility agreement entered into on August 28, 2015, which would have matured August 28, 2020. On April 6, 2020, we entered into a committed credit facility agreement with a syndicate of banks which provides for up to \$2 billion of borrowings, in addition to the existing credit facility discussed above. The new facility matures on April 5, 2021. As of May 31, 2020 and 2019, no amounts were outstanding under our committed credit facilities.

We currently have long-term debt ratings of AA- and A1 from Standard and Poor's Corporation and Moody's Investor Services, respectively. As it relates to our committed credit facility entered into on August 16, 2019, if our long-term debt ratings were to decline, the facility fee and interest rate would increase. Conversely, if our long-term debt ratings were to improve, the facility fee and interest rate would decrease. Under the committed credit facility entered into on April 6, 2020, if our long-term debt ratings were to decline, only the interest rate would increase, but would remain unchanged in the event our long-term debt rating were to improve. Changes in our long-term debt ratings would not trigger acceleration of maturity of any then-outstanding borrowings or any future borrowings under the committed credit facilities. Under these facilities, we have agreed to various covenants. These

covenants include limits on our disposal of assets and the amount of debt secured by liens we may incur. In the event we were to have any borrowings outstanding under these facilities, failed to meet any covenant and were unable to obtain a waiver from a majority of the banks in the syndicate, any borrowings would become immediately due and payable. As of May 31, 2020, we were in full compliance with each of these covenants and believe it is unlikely we will fail to meet any of these covenants in the foreseeable future.

Liquidity is also provided by our \$4 billion commercial paper program, which we increased by \$2 billion during the fourth quarter of fiscal 2020. During the fiscal year ended May 31, 2020, the maximum amount of commercial paper borrowings outstanding at any point was \$1,456 million. As of May 31, 2020, we had \$248 million of commercial paper outstanding at a weighted average interest rate of 1.65%. No commercial paper was outstanding as of May 31, 2019.

We may continue to issue commercial paper or other debt securities depending on general corporate needs. We currently have short-term debt ratings of A1+ and P1 from Standard and Poor's Corporation and Moody's Investor Services, respectively.

To date, in fiscal 2020, we have not experienced difficulty accessing the credit markets; however, future volatility in the capital markets may increase costs associated with issuing commercial paper or other debt instruments or affect our ability to access those markets.

As of May 31, 2020, we had cash, cash equivalents and short-term investments totaling \$8.8 billion, primarily consisting of commercial paper, corporate notes, deposits held at major banks, money market funds, U.S. government sponsored enterprise obligations, U.S. Treasury obligations and other investment grade fixed-income securities. Our fixed-income investments are exposed to both credit and interest rate risk. All of our investments are investment grade to minimize our credit risk. While individual securities have varying durations, as of May 31, 2020, the weighted-average days to maturity of our cash equivalents and short-term investments portfolio was 14 days.

We believe that existing cash, cash equivalents, short-term investments and cash generated by operations, together with access to external sources of funds as described above, will be sufficient to meet our domestic and foreign capital needs in the foreseeable future.

We utilize a variety of tax planning and financing strategies to manage our worldwide cash and deploy funds to locations where they are needed. We indefinitely reinvest a significant portion of our foreign earnings, and our current plans do not demonstrate a need to repatriate these earnings. Should we require additional capital in the United States, we may determine to repatriate indefinitely reinvested foreign funds or raise capital in the United States through debt. Given our existing structure, if we were to repatriate indefinitely reinvested foreign earnings, we would be required to accrue and pay withholding taxes in certain foreign jurisdictions.

OFF-BALANCE SHEET ARRANGEMENTS

In connection with various contracts and agreements, we routinely provide indemnification relating to the enforceability of intellectual property rights, coverage for legal issues that arise and other items where we are acting as the guarantor. Currently, we have several such agreements in place. Based on our historical experience and the estimated probability of future loss, we have determined that the fair value of such indemnification is not material to our financial position or results of operations.

CONTRACTUAL OBLIGATIONS

Our significant long-term contractual obligations as of May 31, 2020, and significant endorsement contracts, including related marketing commitments, entered into through the date of this report are as follows:

DESCRIPTION OF COMMITMENT <i>(Dollars in millions)</i>	CASH PAYMENTS DUE DURING THE YEAR ENDING MAY 31,							TOTAL
	2021	2022	2023	2024	2025	THEREAFTER		
Operating Leases	\$ 550	\$ 514	\$ 456	\$ 416	\$ 374	\$ 1,474	\$ 3,784	
Long-Term Debt ⁽¹⁾	289	286	786	275	1,275	11,541	14,452	
Endorsement Contracts ⁽²⁾	1,330	1,471	1,178	1,064	1,135	3,164	9,342	
Product Purchase Obligations ⁽³⁾	4,234	—	—	—	—	—	4,234	
Other Purchase Obligations ⁽⁴⁾	1,085	345	189	136	127	345	2,227	
Transition Tax Related to the Tax Act ⁽⁵⁾	86	86	86	161	215	268	902	
TOTAL	\$ 7,574	\$ 2,702	\$ 2,695	\$ 2,052	\$ 3,126	\$ 16,792	\$ 34,941	

(1) The cash payments due for long-term debt include estimated interest payments. Estimates of interest payments are based on outstanding principal amounts, applicable fixed interest rates or currently effective interest rates as of May 31, 2020 (if variable), timing of scheduled payments and the term of the debt obligations.

(2) The amounts listed for endorsement contracts represent approximate amounts of base compensation and minimum guaranteed royalty fees we are obligated to pay athlete, public figure, sport team and league endorsers of our products. Actual payments under some contracts may be higher than the

amounts listed as these contracts provide for bonuses to be paid to the endorsers based upon athletic achievements and/or royalties on product sales in future periods. Actual payments under some contracts may also be lower as these contracts include provisions for reduced payments if athletic performance declines in future periods.

In addition to the cash payments, we are obligated to furnish our endorsers with NIKE product for their use. It is not possible to determine how much we will spend on this product on an annual basis as the contracts generally do not stipulate a specific amount of cash to be spent on the product. The amount of product provided to the endorsers will depend on many factors, including general playing conditions, the number of sporting events in which they participate and our own decisions regarding product and marketing initiatives. In addition, the costs to design, develop, source and purchase the products furnished to the endorsers are incurred over a period of time and are not necessarily tracked separately from similar costs incurred for products sold to customers.

- (3) We generally order product at least four to five months in advance of sale based primarily on advanced orders received from external wholesale customers and internal orders from our direct to consumer operations. The amounts listed for product purchase obligations represent agreements (including open purchase orders) to purchase products in the ordinary course of business that are enforceable and legally binding and specify all significant terms. In some cases, prices are subject to change throughout the production process.
- (4) Other purchase obligations primarily include construction, service and marketing commitments, including marketing commitments associated with endorsement contracts, made in the ordinary course of business. The amounts represent the minimum payments required by legally binding contracts and agreements that specify all significant terms, and may include open purchase orders for non-product purchases.
- (5) Represents the future cash payments due as part of the transition tax on deemed repatriation of undistributed earnings of foreign subsidiaries, which is reflected net of foreign tax credits we utilized. Refer to Note 9 — Income Taxes in the accompanying Notes to the Consolidated Financial Statements for additional information.

In addition to the above, we have long-term obligations for uncertain tax positions and various post-retirement benefits for which we are not able to reasonably estimate when cash payments will occur. Refer to Note 9 — Income Taxes and Note 13 — Benefit Plans in the accompanying Notes to the Consolidated Financial Statements for further information related to uncertain tax positions and post-retirement benefits, respectively.

We also have the following outstanding short-term debt obligations as of May 31, 2020. Refer to Note 7 — Short-Term Borrowings and Credit Lines in the accompanying Notes to the Consolidated Financial Statements for further description and interest rates related to the short-term debt obligations listed below.

<i>(Dollars in millions)</i>	AS OF MAY 31, 2020	
Notes payable, due at mutually agreed-upon dates within one year of issuance or on demand	\$	248

As of May 31, 2020, we had bank guarantees and letters of credit outstanding totaling \$239 million, issued primarily for real estate agreements, self-insurance programs and other general business obligations.

NEW ACCOUNTING PRONOUNCEMENTS

Refer to Note 1 — Summary of Significant Accounting Policies in the accompanying Notes to the Consolidated Financial Statements for recently adopted accounting standards.

CRITICAL ACCOUNTING POLICIES

Our previous discussion and analysis of our financial condition and results of operations are based upon our Consolidated Financial Statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses and related disclosure of contingent assets and liabilities. Note 1 — Summary of Significant Accounting Policies in the accompanying Notes to the Consolidated Financial Statements describes the significant accounting policies and methods used in the preparation of our Consolidated Financial Statements.

We believe the estimates, assumptions and judgments involved in the accounting policies described below have the greatest potential impact on our Consolidated Financial Statements, so we consider these to be our critical accounting policies and estimates. Management has reviewed and discussed these critical accounting policies with the Audit & Finance Committee of the Board of Directors.

These policies require that we make estimates in the preparation of our Consolidated Financial Statements as of a given date. Because of the uncertainty inherent in these matters, actual results could differ from the estimates we use in applying the critical accounting policies. Within the context of these critical accounting policies, we are not currently aware of any reasonably likely events or circumstances that would result in materially different amounts being reported.

REVENUE RECOGNITION

On June 1, 2018, we adopted Accounting Standards Update (ASU) No. 2014-09, *Revenue from Contracts with Customers (Topic 606)*, using the modified retrospective method of adoption. Prior to fiscal 2019, amounts have not been restated and continue to be reported in accordance with our historical accounting policies. Our revenue recognition policies under Topic 606 are described

in the following paragraphs and references to prior period policies under Accounting Standard Codification Topic 605 — *Revenue Recognition*, are included below in the event they are substantially different.

Revenue transactions associated with the sale of NIKE Brand footwear, apparel and equipment, as well as Converse products, comprise a single performance obligation, which consists of the sale of products to customers either through wholesale or direct to consumer channels. We satisfy the performance obligation and record revenues when transfer of control has passed to the customer, based on the terms of sale. A customer is considered to have control once they are able to direct the use and receive substantially all of the benefits of the product. Transfer of control passes to wholesale customers upon shipment or upon receipt depending on the country of the sale and the agreement with the customer. Control passes to retail store customers at the time of sale and to substantially all digital commerce customers upon shipment. Prior to fiscal 2019, the requirements for recognizing revenue were met upon delivery to the customer. The transaction price is determined based upon the invoiced sales price, less anticipated sales returns, discounts and miscellaneous claims from customers. Payment terms for wholesale transactions depend on the country of sale or agreement with the customer and payment is generally required within 90 days or less of shipment to or receipt by the wholesale customer. Payment is due at the time of sale for retail store and digital commerce transactions.

As part of our revenue recognition policy, consideration promised in our contracts with customers is variable due to anticipated reductions such as sales returns, discounts and miscellaneous claims from customers. We estimate the most likely amount we will be entitled to receive and record an anticipated reduction against *Revenues*, with an offsetting increase to *Accrued liabilities* at the time revenues are recognized. The estimated cost of inventory for product returns is recorded in *Prepaid expenses and other current assets* on the Consolidated Balance Sheets. Prior to fiscal 2019, reserve balances were reported net of the estimated cost of inventory for product returns and recognized within *Accounts receivable, net* for wholesale transactions and *Accrued liabilities* for our direct to consumer business, on the Consolidated Balance Sheets.

The provision for anticipated sales returns consists of both contractual return rights and discretionary authorized returns. Provisions for post-invoice sales discounts consist of both contractual programs and discretionary discounts that are expected to be granted at a later date.

Estimates of discretionary authorized returns, discounts and claims are based on (1) historical rates, (2) specific identification of outstanding returns not yet received from customers and outstanding discounts and claims and (3) estimated returns, discounts and claims expected but not yet finalized with customers. Actual returns, discounts and claims in any future period are inherently uncertain and may differ from estimates recorded. If actual or expected future returns, discounts or claims were significantly different than reserves established, a reduction or increase to net revenues would be recorded in the period in which such determination was made.

Refer also to Note 1 — Summary of Significant Accounting Policies and Note 16 — Revenues for additional information in the accompanying Notes to the Consolidated Financial Statements.

INVENTORY RESERVES

We make ongoing estimates relating to the net realizable value of inventories based upon our assumptions about future demand and market conditions. If we estimate the net realizable value of our inventory is less than the cost of the inventory recorded on our books, we record a reserve equal to the difference between the cost of the inventory and the estimated net realizable value. This reserve is recorded as a charge to *Cost of sales*. If changes in market conditions result in reductions to the estimated net realizable value of our inventory below our previous estimate, we would increase our reserve in the period in which we made such a determination.

CONTINGENT PAYMENTS UNDER ENDORSEMENT CONTRACTS

A significant amount of our *Demand creation expense* relates to payments under endorsement contracts. In general, endorsement payments are expensed on a straight-line basis over the term of the contract. However, certain contract elements may be accounted for differently based upon the facts and circumstances of each individual contract.

Certain contracts provide for contingent payments to endorsers based upon specific achievements in their sports (e.g., winning a championship). We record demand creation expense for these amounts when the endorser achieves the specific goal.

Certain contracts provide for variable payments based upon endorsers maintaining a level of performance in their sport over an extended period of time (e.g., maintaining a specified ranking in a sport for a year). When we determine payments are probable, the amounts are reported in *Demand creation expense* ratably over the contract period based on our best estimate of the endorser's performance. In these instances, to the extent actual payments to the endorser differ from our estimate due to changes in the endorser's performance, adjustments to *Demand creation expense* may be recorded in a future period.

Certain contracts provide for royalty payments to endorsers based upon a predetermined percent of sales of particular products, which we record in *Cost of sales* as the related sales occur. For contracts containing minimum guaranteed royalty payments, we

record the amount of any guaranteed payment in excess of that earned through sales of product within *Demand creation expense*.

PROPERTY, PLANT AND EQUIPMENT AND DEFINITE-LIVED ASSETS

We review the carrying value of long-lived assets or asset groups to be used in operations whenever events or changes in circumstances indicate the carrying amount of the assets might not be recoverable. Factors that would necessitate an impairment assessment include a significant adverse change in the extent or manner in which an asset is used, a significant adverse change in legal factors or the business climate that could affect the value of the asset or a significant decline in the observable market value of an asset, among others. If such facts indicate a potential impairment, we would assess the recoverability of an asset group by determining if the carrying value of the asset group exceeds the sum of the projected undiscounted cash flows expected to result from the use and eventual disposition of the assets over the remaining economic life of the primary asset in the asset group. If the recoverability test indicates the carrying value of the asset group is not recoverable, we will estimate the fair value of the asset group using appropriate valuation methodologies that would typically include an estimate of discounted cash flows. Any impairment would be measured as the difference between the asset group's carrying amount and its estimated fair value.

HEDGE ACCOUNTING FOR DERIVATIVES

We use derivative contracts to hedge certain anticipated foreign currency and interest rate transactions as well as certain non-functional currency monetary assets and liabilities. When the specific criteria to qualify for hedge accounting has been met, changes in the fair value of contracts hedging probable forecasted future cash flows are recorded in *Accumulated other comprehensive income (loss)*, rather than *Net income*, until the underlying hedged transaction affects *Net income*. In most cases, this results in gains and losses on hedge derivatives being released from *Accumulated other comprehensive income (loss)* into *Net income* sometime after the maturity of the derivative. One of the criteria for this accounting treatment is that the notional value of these derivative contracts should not be in excess of the designated amount of anticipated transactions. By their very nature, our estimates of anticipated transactions may fluctuate over time and may ultimately vary from actual transactions. When the designated amount of anticipated or actual transactions decline below hedged levels, or if it is no longer probable a forecasted transaction will occur by the end of the originally specified time period or within an additional two-month period of time thereafter, we are required to reclassify the cumulative change in fair value of the over-hedged portion of the related hedge contract from *Accumulated other comprehensive income (loss)* to *Other (income) expense, net* during the quarter in which the decrease occurs. In rare circumstances, the additional period of time may exceed two months due to extenuating circumstances related to the nature of the forecasted transaction that are outside our control or influence.

INCOME TAXES

We are subject to taxation in the United States, as well as various state and foreign jurisdictions. The determination of our provision for income taxes requires significant judgment, the use of estimates and the interpretation and application of complex tax laws. On an interim basis, we estimate our effective tax rate for the full fiscal year. This estimated annual effective tax rate is then applied to the year-to-date *Income before income taxes* excluding infrequently occurring or unusual items, to determine the year-to-date *Income tax expense*. The income tax effects of infrequent or unusual items are recognized in the interim period in which they occur. As the fiscal year progresses, we continually refine our estimate based upon actual events and earnings by jurisdiction during the year. This continual estimation process periodically results in a change to our expected effective tax rate for the fiscal year. When this occurs, we adjust the income tax provision during the quarter in which the change in estimate occurs.

We record valuation allowances against our deferred tax assets, when necessary. Realization of deferred tax assets (such as net operating loss carry-forwards) is dependent on future taxable earnings and is therefore uncertain. At least quarterly, we assess the likelihood that our deferred tax asset balance will be recovered from future taxable income. To the extent we believe that recovery is not likely, we establish a valuation allowance against our net deferred tax asset, which increases our *Income tax expense* in the period when such determination is made.

We have not recorded withholding tax expense for foreign earnings we have determined to be indefinitely reinvested within certain of our foreign jurisdictions. The amount of earnings indefinitely reinvested offshore is due to the actual deployment of such earnings in our offshore operations and our expectations of the future cash needs of our U.S. and foreign entities. Withholding tax consequences are also a factor in determining the amount of foreign earnings to be indefinitely reinvested offshore.

We carefully review all factors that drive the ultimate disposition of foreign earnings determined to be reinvested offshore and apply stringent standards to overcome the presumption of repatriation. Despite this approach, because the determination is based on expected working capital and other capital needs in jurisdictions where the earnings are generated, the possibility exists that foreign earnings declared as indefinitely reinvested may be repatriated. For instance, the actual cash needs of our U.S. operations may exceed our current expectations, or the actual cash needs of our foreign entities may be less than our current expectations. This would result in additional withholding tax expense in the year we determined amounts were no longer indefinitely reinvested offshore.

On a quarterly basis, we evaluate the probability a tax position will be effectively sustained and the appropriateness of the amount recognized for uncertain tax positions based on factors including changes in facts or circumstances, changes in tax law, settled audit issues and new audit activity. Changes in our assessment may result in the recognition of a tax benefit or an additional charge to the tax provision in the period our assessment changes. We recognize interest and penalties related to income tax matters in *Income tax expense*.

On December 22, 2017, the United States enacted the Tax Act, which significantly changed previous U.S. tax laws, including provisions for a one-time transition tax on deemed repatriation of undistributed foreign earnings, and a reduction in the corporate tax rate from 35% to 21% for tax years beginning after December 31, 2017, among other changes. The Tax Act also transitions U.S. international taxation from a worldwide system to a modified territorial system and includes base erosion prevention measures on non-U.S. earnings, which has the effect of subjecting certain earnings of our foreign subsidiaries to U.S. taxation. Certain provisions of the Tax Act, including a provision to tax global intangible low-taxed income (GILTI) of foreign subsidiaries, were not effective for the Company until fiscal 2019. In accordance with U.S. GAAP, the Company has made an accounting policy election to treat taxes due under the GILTI provision as a current period expense.

Implementation of the Tax Act required us to record incremental provisional tax expense in fiscal 2018, which increased our effective tax rate in fiscal 2018. We completed our analysis of the Tax Act in the second quarter of fiscal 2019 and no adjustments were made to the provisional amounts recorded.

Refer to Note 9 — Income Taxes in the accompanying Notes to the Consolidated Financial Statements for additional information.

OTHER CONTINGENCIES

In the ordinary course of business, we are involved in legal proceedings regarding contractual and employment relationships, product liability claims, trademark rights and a variety of other matters. We record contingent liabilities resulting from claims against us when a loss is assessed to be probable and the amount of the loss is reasonably estimable. Assessing probability of loss and estimating probable losses requires analysis of multiple factors, including in some cases judgments about the potential actions of third-party claimants and courts. Recorded contingent liabilities are based on the best information available and actual losses in any future period are inherently uncertain. If future adjustments to estimated probable future losses or actual losses exceed our recorded liability for such claims, we would record additional charges during the period in which the actual loss or change in estimate occurred. In addition to contingent liabilities recorded for probable losses, we disclose contingent liabilities when there is a reasonable possibility the ultimate loss will materially exceed the recorded liability. While we cannot predict the outcome of pending legal matters with certainty, we do not believe any currently identified claim, proceeding or litigation, either individually or in aggregate, will have a material impact on our results of operations, financial position or cash flows.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

In the normal course of business and consistent with established policies and procedures, we employ a variety of financial instruments to manage exposure to fluctuations in the value of foreign currencies and interest rates. It is our policy to utilize these financial instruments only where necessary to finance our business and manage such exposures; we do not enter into these transactions for trading or speculative purposes.

We are exposed to foreign currency fluctuations, primarily as a result of our international sales, product sourcing and funding activities. Our foreign exchange risk management program is intended to lessen both the positive and negative effects of currency fluctuations on our consolidated results of operations, financial position and cash flows. We use forward and option contracts to hedge certain anticipated, but not yet firmly committed, transactions as well as certain firm commitments and the related receivables and payables, including third-party and intercompany transactions. We have, in the past, and may in the future, also use forward or options contracts to hedge our investment in the net assets of certain international subsidiaries to offset foreign currency translation adjustments related to our net investment in those subsidiaries. Where exposures are hedged, our program has the effect of delaying the impact of exchange rate movements on our Consolidated Financial Statements.

The timing for hedging exposures, as well as the type and duration of the hedge instruments employed, are guided by our hedging policies and determined based upon the nature of the exposure and prevailing market conditions. Typically, the Company may enter into hedge contracts starting up to 12 to 24 months in advance of the forecasted transaction and may place incremental hedges up to 100% of the exposure by the time the forecasted transaction occurs. The majority of derivatives outstanding as of May 31, 2020 are designated as foreign currency cash flow hedges, primarily for Euro/U.S. Dollar, British Pound/Euro, Japanese Yen/U.S. Dollar and Chinese Yuan/U.S. Dollar currency pairs. Refer to Note 14 — Risk Management and Derivatives in the accompanying Notes to the Consolidated Financial Statements for additional information.

Our earnings are also exposed to movements in short- and long-term market interest rates. Our objective in managing this interest rate exposure is to limit the impact of interest rate changes on earnings and cash flows and to reduce overall borrowing costs. To achieve these objectives, we maintain a mix of commercial paper, bank loans, and fixed-rate debt of varying maturities.

MARKET RISK MEASUREMENT

We monitor foreign exchange risk, interest rate risk and related derivatives using a variety of techniques including a review of market value, sensitivity analysis and Value-at-Risk (“VaR”). Our market-sensitive derivative and other financial instruments are foreign currency forward contracts, foreign currency option contracts, intercompany loans denominated in non-functional currencies, fixed interest rate U.S. Dollar denominated debt and fixed interest rate Japanese Yen denominated debt.

We use VaR to monitor the foreign exchange risk of our foreign currency forward and foreign currency option derivative instruments only. The VaR determines the maximum potential one-day loss in the fair value of these foreign exchange rate-sensitive financial instruments. The VaR model estimates assume normal market conditions and a 95% confidence level. There are various modeling techniques that can be used in the VaR computation. Our computations are based on interrelationships between currencies and interest rates (a “variance/co-variance” technique). These interrelationships are a function of foreign exchange currency market changes and interest rate changes over the preceding one-year period. The value of foreign currency options does not change on a one-to-one basis with changes in the underlying currency rate. We adjust the potential loss in option value for the estimated sensitivity (the “delta” and “gamma”) to changes in the underlying currency rate. This calculation reflects the impact of foreign currency rate fluctuations on the derivative instruments only and does not include the impact of such rate fluctuations on non-functional currency transactions (such as anticipated transactions, firm commitments, cash balances and accounts and loans receivable and payable), including those which are hedged by these instruments.

The VaR model is a risk analysis tool and does not purport to represent actual losses in fair value we will incur nor does it consider the potential effect of favorable changes in market rates. It also does not represent the full extent of the possible loss that may occur. Actual future gains and losses will differ from those estimated because of changes or differences in market rates and interrelationships, hedging instruments and hedge percentages, timing and other factors.

The estimated maximum one-day loss in fair value on our foreign currency sensitive derivative financial instruments, derived using the VaR model, was \$48 million and \$34 million at May 31, 2020 and 2019, respectively. The VaR increased year-over-year as a result of an increase in foreign currency volatilities at May 31, 2020. Such a hypothetical loss in the fair value of our derivatives would be offset by increases in the value of the underlying transactions being hedged. The average monthly change in the fair values of foreign currency forward and foreign currency option derivative instruments was \$126 million and \$83 million during fiscal 2020 and fiscal 2019, respectively.

The instruments not included in the VaR are intercompany loans denominated in non-functional currencies, fixed interest rate Japanese Yen denominated debt, and fixed interest rate U.S. Dollar denominated debt. Intercompany loans and related interest amounts are eliminated in consolidation. Furthermore, our non-functional currency intercompany loans are substantially hedged against foreign exchange risk through the use of forward contracts, which are included in the VaR calculation above. Therefore, we consider the interest rate and foreign currency market risks associated with our non-functional currency intercompany loans to be immaterial to our consolidated financial position, results of operations and cash flows.

Details of third-party debt are provided in the table below. The table presents principal cash flows and related weighted average interest rates by expected maturity dates.

<i>(Dollars in millions)</i>	EXPECTED MATURITY DATE YEAR ENDING MAY 31,							TOTAL	FAIR VALUE
	2021	2022	2023	2024	2025	THEREAFTER			
Foreign Exchange Risk									
Japanese Yen Functional Currency									
Long-term Japanese Yen debt — Fixed rate									
Principal payments	\$ 3	\$ —	\$ —	\$ —	\$ —	\$ —	\$ —	\$ 3	\$ 3
Average interest rate	2.4%	0.0%	0.0%	0.0%	0.0%	0.0%	0.0%	2.4%	
Interest Rate Risk									
Japanese Yen Functional Currency									
Long-term Japanese Yen debt — Fixed rate									
Principal payments	\$ 3	\$ —	\$ —	\$ —	\$ —	\$ —	\$ —	\$ 3	\$ 3
Average interest rate	2.4%	0.0%	0.0%	0.0%	0.0%	0.0%	0.0%	2.4%	
U.S. Dollar Functional Currency									
Long-term U.S. Dollar debt — Fixed rate									
Principal payments	\$ —	\$ —	\$ 500	\$ —	\$ 1,000	\$ 8,000	\$ 9,500	\$ 10,642	
Average interest rate	0.0%	0.0%	2.3%	0.0%	2.4%	3.1%	3.0%		

The fixed interest rate Japanese Yen denominated debt instruments were issued by and are accounted for by one of our Japanese subsidiaries. Accordingly, the monthly translation of these instruments, which varies due to changes in foreign exchange rates, is recognized in *Accumulated other comprehensive income (loss)* upon consolidation of this subsidiary.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

Management of NIKE, Inc. is responsible for the information and representations contained in this report. The financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America ("U.S. GAAP") and include certain amounts based on our best estimates and judgments. Other financial information in this report is consistent with these financial statements.

Our accounting systems include controls designed to reasonably assure assets are safeguarded from unauthorized use or disposition and provide for the preparation of financial statements in conformity with U.S. GAAP. These systems are supplemented by the selection and training of qualified financial personnel and an organizational structure providing for appropriate segregation of duties.

An internal corporate audit department reviews the results of its work with the Audit & Finance Committee of the Board of Directors, presently comprised of three outside, independent directors. The Audit & Finance Committee is responsible for the appointment of the independent registered public accounting firm and reviews, with the independent registered public accounting firm, management and the internal corporate audit staff, the scope and the results of the annual audit, the effectiveness of the accounting control system and other matters relating to the financial affairs of NIKE as the Audit & Finance Committee deems appropriate. The independent registered public accounting firm and the internal corporate auditors have full access to the Audit & Finance Committee, with and without the presence of management, to discuss any appropriate matters.

MANAGEMENT'S ANNUAL REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

Management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rule 13(a) - 15(f) and Rule 15(d) - 15(f) of the Securities Exchange Act of 1934, as amended. Internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of the financial statements for external purposes in accordance with generally accepted accounting principles in the United States of America. Internal control over financial reporting includes those policies and procedures that: (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of assets of the Company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of our management and directors; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of assets of the Company that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer, our management conducted an evaluation of the effectiveness of our internal control over financial reporting based upon the framework in *Internal Control — Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on the results of our evaluation, our management concluded that our internal control over financial reporting was effective as of May 31, 2020.

PricewaterhouseCoopers LLP, an independent registered public accounting firm, has audited (1) the Consolidated Financial Statements and (2) the effectiveness of our internal control over financial reporting as of May 31, 2020, as stated in their report herein.

John J. Donahoe II
President and Chief Executive Officer

Matthew Friend
Executive Vice President and Chief Financial Officer

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of NIKE, Inc.

Opinions on the Financial Statements and Internal Control over Financial Reporting

We have audited the accompanying consolidated balance sheets of NIKE, Inc. and its subsidiaries (the "Company") as of May 31, 2020 and 2019, and the related consolidated statements of income, of comprehensive income, of shareholders' equity and of cash flows for each of the three years in the period ended May 31, 2020, including the related notes and financial statement schedule listed in the index appearing under Item 15(a)(2) (collectively referred to as the "consolidated financial statements"). We also have audited the Company's internal control over financial reporting as of May 31, 2020, based on criteria established in *Internal Control - Integrated Framework* (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of May 31, 2020 and 2019, and the results of its operations and its cash flows for each of the three years in the period ended May 31, 2020 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of May 31, 2020, based on criteria established in *Internal Control - Integrated Framework* (2013) issued by the COSO.

Changes in Accounting Principles

As discussed in Note 1 to the consolidated financial statements, the Company changed the manner in which it accounts for leases as of June 1, 2019 and the manner in which it accounts for revenue from contracts with customers and the manner in which it accounts for income taxes related to intra-entity transfers other than inventory as of June 1, 2018.

Basis for Opinions

The Company's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Annual Report on Internal Control over Financial Reporting. Our responsibility is to express opinions on the Company's consolidated financial statements and on the Company's internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the consolidated financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Critical Audit Matters

The critical audit matter communicated below is a matter arising from the current period audit of the consolidated financial statements that was communicated or required to be communicated to the audit committee and that (i) relates to accounts or disclosures that are material to the consolidated financial statements and (ii) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates.

Accounting for Income Taxes

As described in Note 9 to the consolidated financial statements, the Company recorded income tax expense of \$348 million for the year ended May 31, 2020, and has net deferred tax assets of \$732 million, including a valuation allowance of \$26 million, and total gross unrecognized tax benefits, excluding related interest and penalties, of \$771 million as of May 31, 2020, \$536 million of which would affect the Company's effective tax rate if recognized in future periods. The Company is subject to taxation in the United States, as well as various state and foreign jurisdictions. As disclosed by management, the use of significant judgment and estimates, as well as the interpretation and application of complex tax laws is required by management to determine its provision for income taxes.

The principal considerations for our determination that performing procedures relating to the accounting for income taxes is a critical audit matter are the significant judgment by management when assessing complex tax laws and regulations, including new temporary regulations and recent court rulings, as it relates to determining the provision for income taxes and other tax positions. This in turn led to a high degree of auditor judgment, subjectivity and effort in performing procedures and evaluating audit evidence relating to the provision for income taxes and other tax positions. In addition, the audit effort involved the use of professionals with specialized skill and knowledge to assist in performing procedures and evaluating the audit evidence obtained.

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls relating to the provision for income taxes and other tax positions. These procedures also included, among others, evaluating the effect on the Company's tax provision of changes in its legal entity structure and tax laws, testing management's tax calculations and considering the Company's compliance with tax laws. We also used professionals with specialized skill and knowledge to assist in evaluating the application of relevant tax laws, the provision for income taxes and the reasonableness of management's assessments of whether certain tax positions are more-likely-than-not of being sustained.

NOTE 1 — SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

DESCRIPTION OF BUSINESS

NIKE, Inc. is a worldwide leader in the design, development and worldwide marketing and selling of athletic footwear, apparel, equipment, accessories and services. NIKE, Inc. portfolio brands include the NIKE Brand, Jordan Brand, Hurley and Converse. The NIKE Brand is focused on performance athletic footwear, apparel, equipment, accessories and services across a wide range of sport categories, amplified with sport-inspired lifestyle products carrying the Swoosh trademark, as well as other NIKE Brand trademarks. The Jordan Brand is focused on athletic and casual footwear, apparel and accessories using the Jumpman trademark. Sales and operating results of Jordan Brand products are reported within the respective NIKE Brand geographic operating segments. The Hurley brand is focused on action sports and youth lifestyle apparel and accessories under the Hurley trademark. Sales and operating results of Hurley brand products, prior to its divestiture, are reported within the NIKE Brand's North America geographic operating segment. Refer to Note 20 — Acquisitions and Divestitures for information regarding the divestiture of the Company's wholly-owned subsidiary, Hurley. Converse designs, distributes, licenses and sells casual sneakers, apparel and accessories under the Converse, Chuck Taylor, All Star, One Star, Star Chevron and Jack Purcell trademarks. In some markets outside the U.S., these trademarks are licensed to third parties who design, distribute, market and sell similar products. Operating results of the Converse brand are reported on a stand-alone basis.

BASIS OF CONSOLIDATION

The Consolidated Financial Statements include the accounts of NIKE, Inc. and its subsidiaries (the "Company" or "NIKE"). All significant intercompany transactions and balances have been eliminated.

REVENUE RECOGNITION

Beginning in fiscal 2019, the Company adopted Accounting Standards Update (ASU) No. 2014-09, *Revenue from Contracts with Customers* (Topic 606). Prior to fiscal 2019, amounts have not been restated and continue to be reported in accordance with the Company's historical accounting policies. The Company's revenue recognition policies under Topic 606 are described in the following paragraphs and references to prior period policies under Accounting Standard Codification Topic 605 — *Revenue Recognition* (Topic 605), are included below in the event they are substantially different.

Revenue transactions associated with the sale of NIKE Brand footwear, apparel and equipment, as well as Converse products, comprise a single performance obligation, which consists of the sale of products to customers either through wholesale or direct to consumer channels. The Company satisfies the performance obligation and records revenues when transfer of control has passed to the customer, based on the terms of sale. A customer is considered to have control once they are able to direct the use and receive substantially all of the benefits of the product.

Transfer of control passes to wholesale customers upon shipment or upon receipt depending on the country of the sale and the agreement with the customer. Control passes to retail store customers at the time of sale and to substantially all digital commerce customers upon shipment. Prior to fiscal 2019, the requirements for recognizing revenue were met upon delivery to the customer. The transaction price is determined based upon the invoiced sales price, less anticipated sales returns, discounts and miscellaneous claims from customers. Payment terms for wholesale transactions depend on the country of sale or agreement with the customer and payment is generally required within 90 days or less of shipment to or receipt by the wholesale customer. Payment is due at the time of sale for retail store and digital commerce transactions.

Consideration for trademark licensing contracts is earned through sales-based or usage-based royalty arrangements and the associated revenues are recognized over the license period.

Taxes assessed by governmental authorities that are both imposed on and concurrent with a specific revenue-producing transaction, and are collected by the Company from a customer, are excluded from *Revenues* and *Cost of sales* in the Consolidated Statements of Income. Shipping and handling costs associated with outbound freight after control over a product has transferred to a customer are accounted for as a fulfillment cost and are included in *Cost of sales* when the related revenues are recognized.

SALES-RELATED RESERVES

Consideration promised in the Company's contracts with customers is variable due to anticipated reductions such as sales returns, discounts and miscellaneous claims from customers. The Company estimates the most likely amount it will be entitled to receive and records an anticipated reduction against *Revenues*, with an offsetting increase to *Accrued liabilities* at the time revenues are recognized. The estimated cost of inventory for product returns is recorded in *Prepaid expenses and other current assets* on the Consolidated Balance Sheets. Prior to fiscal 2019, the Company's reserve balances were reported net of the

estimated cost of inventory for product returns and recognized within *Accounts receivable, net* for wholesale transactions and *Accrued liabilities* for the Company's direct to consumer business, on the Consolidated Balance Sheets.

The provision for anticipated sales returns consists of both contractual return rights and discretionary authorized returns. Provisions for post-invoice sales discounts consist of both contractual programs and discretionary discounts that are expected to be granted at a later date.

Estimates of discretionary authorized returns, discounts and claims are based on (1) historical rates, (2) specific identification of outstanding returns not yet received from customers and outstanding discounts and claims and (3) estimated returns, discounts and claims expected, but not yet finalized with customers. Actual returns, discounts and claims in any future period are inherently uncertain and thus may differ from estimates recorded. If actual or expected future returns, discounts or claims were significantly greater or lower than the reserves established, a reduction or increase to net revenues would be recorded in the period in which such determination was made.

COST OF SALES

Cost of sales consists primarily of inventory costs, as well as warehousing costs (including the cost of warehouse labor), third-party royalties, certain foreign currency hedge gains and losses and product design costs. Shipping and handling costs are expensed as incurred and included in *Cost of sales*.

DEMAND CREATION EXPENSE

Demand creation expense consists of advertising and promotion costs, including costs of endorsement contracts, complimentary product, television, digital and print advertising and media costs, brand events and retail brand presentation. Advertising production costs are expensed the first time an advertisement is run. Advertising media costs are expensed when the advertisement appears. Costs related to brand events are expensed when the event occurs. Costs related to retail brand presentation are expensed when the presentation is complete and delivered.

A significant amount of the Company's promotional expenses result from payments under endorsement contracts. In general, endorsement payments are expensed on a straight-line basis over the term of the contract. However, certain contract elements may be accounted for differently based upon the facts and circumstances of each individual contract. Prepayments made under contracts are included in *Prepaid expenses and other current assets* or *Deferred income taxes and other assets* depending on the period to which the prepayment applies.

Certain contracts provide for contingent payments to endorsers based upon specific achievements in their sport (e.g., winning a championship). The Company records *Demand creation expense* for these amounts when the endorser achieves the specific goal.

Certain contracts provide for variable payments based upon endorsers maintaining a level of performance in their sport over an extended period of time (e.g., maintaining a specified ranking in a sport for a year). When the Company determines payments are probable, the amounts are reported in *Demand creation expense* ratably over the contract period based on the Company's best estimate of the endorser's performance. In these instances, to the extent actual payments to the endorser differ from the Company's estimate due to changes in the endorser's performance, adjustments to *Demand creation expense* may be recorded in a future period.

Certain contracts provide for royalty payments to endorsers based upon a predetermined percent of sales of particular products, which the Company records in *Cost of sales* as the related sales occur. For contracts containing minimum guaranteed royalty payments, the Company records the amount of any guaranteed payment in excess of that earned through sales of product within *Demand creation expense*.

Through cooperative advertising programs, the Company reimburses its wholesale customers for certain costs of advertising the Company's products. The Company records these costs in *Demand creation expense* at the point in time it is obligated to its customers for the costs. This obligation may arise prior to the related advertisement being run.

Total advertising and promotion expenses, which the Company refers to as *Demand creation expense*, were \$3,592 million, \$3,753 million and \$3,577 million for the years ended May 31, 2020, 2019 and 2018, respectively. Prepaid advertising and promotion expenses totaled \$686 million and \$773 million at May 31, 2020 and 2019, respectively, of which \$326 million and \$333 million, respectively, was recorded in *Prepaid expenses and other current assets*, and \$360 million and \$440 million, respectively, was recorded in *Deferred income taxes and other assets*, depending on the period to which the prepayment applied.

OPERATING OVERHEAD EXPENSE

Operating overhead expense consists primarily of wage and benefit-related expenses, research and development costs, bad debt expense, as well as other administrative expenses, such as rent, depreciation and amortization, professional services, meetings and travel.

CASH AND EQUIVALENTS

Cash and equivalents represent cash and short-term, highly liquid investments, that are both readily convertible to known amounts of cash, and so near their maturity they present insignificant risk of changes in value because of changes in interest rates, including commercial paper, U.S. Treasury, U.S. Agency, money market funds, time deposits and corporate debt securities with maturities of 90 days or less at the date of purchase.

SHORT-TERM INVESTMENTS

Short-term investments consist of highly liquid investments, including commercial paper, U.S. Treasury, U.S. Agency, time deposits and corporate debt securities, with maturities over 90 days at the date of purchase. Debt securities the Company has the ability and positive intent to hold to maturity are carried at amortized cost. At May 31, 2020 and 2019, the Company did not hold any short-term investments classified as trading or held-to-maturity.

At May 31, 2020 and 2019, *Short-term investments* consisted of available-for-sale debt securities, which are recorded at fair value with unrealized gains and losses reported, net of tax, in *Accumulated other comprehensive income (loss)*, unless unrealized losses are determined to be other than temporary. Realized gains and losses on the sale of securities are determined by specific identification. The Company considers all available-for-sale debt securities, including those with maturity dates beyond 12 months, as available to support current operational liquidity needs and, therefore, classifies all securities with maturity dates beyond 90 days at the date of purchase as current assets within *Short-term investments* on the Consolidated Balance Sheets.

Refer to Note 6 — Fair Value Measurements for more information on the Company's short-term investments.

ALLOWANCE FOR UNCOLLECTIBLE ACCOUNTS RECEIVABLE

Accounts receivable, net consist primarily of amounts receivable from customers. The Company makes ongoing estimates relating to the collectability of its accounts receivable and maintains an allowance for estimated losses resulting from the inability of its customers to make required payments. In addition to judgments about the creditworthiness of significant customers based on ongoing credit evaluations, the Company considers historical levels of credit losses, as well as macroeconomic and industry trends, such as the impacts of COVID-19, to determine the amount of the allowance. Accounts receivable with anticipated collection dates greater than 12 months from the balance sheet date and related allowances are considered non-current and recorded in *Deferred income taxes and other assets*. The allowance for uncollectible accounts receivable was \$214 million and \$30 million as of May 31, 2020 and 2019, respectively.

INVENTORY VALUATION

Inventories are stated at lower of cost and net realizable value, and valued on either an average or a specific identification cost basis. In some instances, the Company ships product directly from its suppliers to the customer, with the related inventory and cost of sales recognized on a specific identification basis. Inventory costs primarily consist of product cost from the Company's suppliers, as well as inbound freight, import duties, taxes, insurance and logistics and other handling fees.

PROPERTY, PLANT AND EQUIPMENT AND DEPRECIATION

Property, plant and equipment are recorded at cost. Depreciation is determined on a straight-line basis for land improvements, buildings and leasehold improvements over 2 to 40 years and for machinery and equipment over 2 to 15 years.

Depreciation and amortization of assets used in manufacturing, warehousing and product distribution are recorded in *Cost of sales*. Depreciation and amortization of all other assets are recorded in *Operating overhead expense*.

SOFTWARE DEVELOPMENT COSTS

Internal Use Software: Expenditures for major software purchases and software developed for internal use are capitalized and amortized over a 2 to 12-year period on a straight-line basis. The Company's policy provides for the capitalization of external direct costs associated with developing or obtaining internal use computer software. In addition, the Company also capitalizes certain payroll and payroll-related costs for employees who are directly associated with internal use computer software projects.

The amount of capitalizable payroll costs with respect to these employees is limited to the time directly spent on such projects. Costs associated with preliminary project stage activities, training, maintenance and all other post-implementation stage activities are expensed as incurred.

Computer Software to be Sold, Leased or Otherwise Marketed: Development costs of computer software to be sold, leased or otherwise marketed as an integral part of a product are subject to capitalization beginning when a product's technological feasibility has been established and ending when a product is available for general release to customers. In most instances, the Company's products are released soon after technological feasibility has been established. Therefore, software development costs incurred subsequent to achievement of technological feasibility are usually not significant, and generally most software development costs have been expensed as incurred.

IMPAIRMENT OF LONG-LIVED ASSETS

The Company reviews the carrying value of long-lived assets or asset groups to be used in operations whenever events or changes in circumstances indicate the carrying amount of the assets might not be recoverable. Factors that would necessitate an impairment assessment include a significant adverse change in the extent or manner in which an asset is used, a significant adverse change in legal factors or the business climate that could affect the value of the asset or a significant decline in the observable market value of an asset, among others. If such facts indicate a potential impairment, the Company would assess the recoverability of an asset group by determining if the carrying value of the asset group exceeds the sum of the projected undiscounted cash flows expected to result from the use and eventual disposition of the assets over the remaining economic life of the primary asset in the asset group. If the recoverability test indicates that the carrying value of the asset group is not recoverable, the Company will estimate the fair value of the asset group using appropriate valuation methodologies, which would typically include an estimate of discounted cash flows. Any impairment would be measured as the difference between the asset group's carrying amount and its estimated fair value.

GOODWILL AND INDEFINITE-LIVED INTANGIBLE ASSETS

The Company performs annual impairment tests on goodwill and intangible assets with indefinite lives in the fourth quarter of each fiscal year or when events occur or circumstances change that would, more likely than not, reduce the fair value of a reporting unit or an intangible asset with an indefinite life below its carrying value. Events or changes in circumstances that may trigger interim impairment reviews include significant changes in business climate, operating results, planned investments in the reporting unit, planned divestitures or an expectation that the carrying amount may not be recoverable, among other factors.

For purposes of testing goodwill for impairment, the Company allocates goodwill across its reporting units, which are considered the Company's operating segments. The Company may first assess qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If, after assessing the totality of events and circumstances, the Company determines it is more likely than not that the fair value of the reporting unit is greater than its carrying amount, an impairment test is unnecessary. If an impairment test is necessary, the Company will estimate the fair value of its related reporting units. If the carrying value of a reporting unit exceeds its fair value, the goodwill of that reporting unit is determined to be impaired and the Company will proceed with recording an impairment charge equal to the excess of the carrying value over the related fair value.

Indefinite-lived intangible assets primarily consist of acquired trade names and trademarks. The Company may first perform a qualitative assessment to determine whether it is more likely than not that an indefinite-lived intangible asset is impaired. If, after assessing the totality of events and circumstances, the Company determines it is more likely than not that the indefinite-lived intangible asset is not impaired, no quantitative fair value measurement is necessary. If a quantitative fair value measurement calculation is required for these intangible assets, the Company primarily utilizes the relief-from-royalty method. This method assumes trade names and trademarks have value to the extent their owner is relieved of the obligation to pay royalties for the benefits received from them. This method requires the Company to estimate the future revenues for the related brands, the appropriate royalty rate and the weighted average cost of capital. If the carrying value of the indefinite-lived intangible exceeds its fair value, the asset is determined to be impaired and the Company will proceed with recording an impairment charge equal to the excess of the carrying value over the related fair value.

OPERATING LEASES

Beginning in fiscal 2020, the Company adopted Accounting Standards Update (ASU) No. 2016-02, *Leases (Topic 842)*. Prior period amounts have not been restated and continue to be reported in accordance with the Company's historical accounting policies. The Company's lease recognition policies under Topic 842 are described in the following paragraphs.

The Company primarily leases retail store space, certain distribution and warehouse facilities, office space, equipment and other non-real estate assets. The Company determines if an arrangement is a lease at inception and begins recording lease activity at the commencement date, which is generally the date in which the Company takes possession of or controls the physical use of the asset. Right-of-use (ROU) assets and lease liabilities are recognized based on the present value of lease payments over the lease term with lease expense recognized on a straight-line basis. The Company's incremental borrowing rate is used to determine the present value of future lease payments unless the implicit rate is readily determinable.

Lease agreements may contain rent escalation clauses, renewal or termination options, rent holidays or certain landlord incentives, including tenant improvement allowances. ROU assets include amounts for scheduled rent increases and are reduced by the amount of lease incentives. The lease term includes the non-cancelable period of the lease and options to extend or terminate the lease when it is reasonably certain the Company will exercise those options. Certain lease agreements include variable lease payments, which are based on a percent of retail sales over specified levels or adjust periodically for inflation as a result of changes in a published index, primarily the Consumer Price Index.

FAIR VALUE MEASUREMENTS

The Company measures certain financial assets and liabilities at fair value on a recurring basis, including derivatives, equity securities and available-for-sale debt securities. Fair value is the price the Company would receive to sell an asset or pay to transfer a liability in an orderly transaction with a market participant at the measurement date. The Company uses a three-level hierarchy established by the Financial Accounting Standards Board (FASB) that prioritizes fair value measurements based on the types of inputs used for the various valuation techniques (market approach, income approach and cost approach).

The levels of the fair value hierarchy are described below:

- Level 1: Quoted prices in active markets for identical assets or liabilities.
- Level 2: Inputs other than quoted prices that are observable for the asset or liability, either directly or indirectly; these include quoted prices for similar assets or liabilities in active markets and quoted prices for identical or similar assets or liabilities in markets that are not active.
- Level 3: Unobservable inputs with little or no market data available, which require the reporting entity to develop its own assumptions.

The Company's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment and considers factors specific to the asset or liability. Financial assets and liabilities are classified in their entirety based on the most conservative level of input that is significant to the fair value measurement.

Pricing vendors are utilized for a majority of Level 1 and Level 2 investments. These vendors either provide a quoted market price in an active market or use observable inputs without applying significant adjustments in their pricing. Observable inputs include broker quotes, interest rates and yield curves observable at commonly quoted intervals, volatilities and credit risks. The fair value of derivative contracts is determined using observable market inputs such as the daily market foreign currency rates, forward pricing curves, currency volatilities, currency correlations and interest rates and considers nonperformance risk of the Company and its counterparties.

The Company's fair value measurement process includes comparing fair values to another independent pricing vendor to ensure appropriate fair values are recorded.

Refer to Note 6 — Fair Value Measurements for additional information.

FOREIGN CURRENCY TRANSLATION AND FOREIGN CURRENCY TRANSACTIONS

Adjustments resulting from translating foreign functional currency financial statements into U.S. Dollars are included in the foreign currency translation adjustment, a component of *Accumulated other comprehensive income (loss)* in *Total shareholders' equity*.

The Company's global subsidiaries have various assets and liabilities, primarily receivables and payables, which are denominated in currencies other than their functional currency. These balance sheet items are subject to re-measurement, the impact of which is recorded in *Other (income) expense, net*, within the Consolidated Statements of Income.

ACCOUNTING FOR DERIVATIVES AND HEDGING ACTIVITIES

The Company uses derivative financial instruments to reduce its exposure to changes in foreign currency exchange rates and interest rates. All derivatives are recorded at fair value on the Consolidated Balance Sheets and changes in the fair value of derivative financial instruments are either recognized in *Accumulated other comprehensive income (loss)* (a component of *Total shareholders' equity*), *Long-term debt* or *Net income* depending on the nature of the underlying exposure, whether the derivative is formally designated as a hedge and, if designated, the extent to which the hedge is effective. The Company classifies the cash flows at settlement from derivatives in the same category as the cash flows from the related hedged items. For undesignated

hedges and designated cash flow hedges, this is primarily within the *Cash provided by operations* component of the Consolidated Statements of Cash Flows. For designated net investment hedges, this is within the *Cash used by investing activities* component of the Consolidated Statements of Cash Flows. For the Company's fair value hedges, which are interest rate swaps used to mitigate the change in fair value of its fixed-rate debt attributable to changes in interest rates, the related cash flows from periodic interest payments are reflected within the *Cash provided by operations* component of the Consolidated Statements of Cash Flows. Refer to Note 14 — Risk Management and Derivatives for additional information on the Company's risk management program and derivatives.

STOCK-BASED COMPENSATION

The Company accounts for stock-based compensation by estimating the fair value, net of estimated forfeitures, of equity awards and recognizing the related expense as *Cost of sales* or *Operating overhead expense*, as applicable, in the Consolidated Statements of Income on a straight-line basis over the vesting period. Substantially all awards vest ratably over four years of continued employment, with stock options expiring ten years from the date of grant. The fair value of options, stock appreciation rights, and employees' purchase rights under the employee stock purchase plans (ESPPs) is determined using the Black-Scholes option pricing model. The fair value of restricted stock and restricted stock units is established by the market price on the date of grant.

Refer to Note 11 — Common Stock and Stock-Based Compensation for additional information on the Company's stock-based compensation programs.

INCOME TAXES

The Company accounts for income taxes using the asset and liability method. This approach requires the recognition of deferred tax assets and liabilities for the expected future tax consequences of temporary differences between the carrying amounts and the tax basis of assets and liabilities. The Company records a valuation allowance to reduce deferred tax assets to the amount management believes is more likely than not to be realized.

The Company recognizes a tax benefit from uncertain tax positions in the financial statements only when it is more likely than not the position will be sustained upon examination by relevant tax authorities. The Company recognizes interest and penalties related to income tax matters in *Income tax expense*.

Refer to Note 9 — Income Taxes for further discussion.

EARNINGS PER SHARE

Basic earnings per common share is calculated by dividing *Net income* by the weighted average number of common shares outstanding during the year. Diluted earnings per common share is calculated by adjusting weighted average outstanding shares, assuming conversion of all potentially dilutive stock options and awards.

Refer to Note 12 — Earnings Per Share for further discussion.

MANAGEMENT ESTIMATES

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates, including estimates relating to assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates. Additionally, the extent to which the evolving COVID-19 pandemic impacts the Company's financial statements will depend on a number of factors, including the magnitude and duration of the pandemic. The Company expects it may have a material, adverse impact on future revenue growth as well as overall profitability and may continue to lead to higher than normal inventory levels, revised payment terms with certain wholesale customers, higher sales-related reserves, factory cancellation costs and a volatile effective tax rate driven by changes in the mix of earnings across the Company's jurisdictions.

RECENTLY ADOPTED ACCOUNTING STANDARDS

In February 2016, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2016-02, *Leases (Topic 842)*, which replaced existing lease accounting guidance. The new standard is intended to provide enhanced transparency and comparability by requiring lessees to record ROU assets and corresponding lease liabilities on the balance sheet. ROU assets represent the Company's right to use an underlying asset for the lease term and lease liabilities represent the Company's obligation to make lease payments arising from the lease. The new guidance requires the Company to continue to classify leases as either an operating or finance lease, with classification affecting the pattern of expense recognition in the income statement. In addition, the new standard requires enhanced disclosure surrounding the amount, timing and uncertainty of cash flows arising from leasing agreements.

In July 2018, the FASB issued ASU No. 2018-11, which provided entities with an additional transition method. Under the new transition method, an entity initially applies the new standard at the adoption date, versus at the beginning of the earliest period presented, and recognizes a cumulative-effect adjustment to the opening balance of retained earnings in the period of adoption. The Company elected this transition method and adopted Topic 842 using a modified retrospective approach in the first quarter of fiscal 2020 with the cumulative effect of initially applying the new standard recognized in *Retained earnings* at June 1, 2019. Comparative prior period information has not been adjusted and continues to be reported in accordance with previous lease accounting guidance in Accounting Standards Codification (ASC) Topic 840 - *Leases*.

Upon adoption, the Company elected the package of transition practical expedients which allowed the Company to carry forward prior conclusions related to: (i) whether any expired or existing contracts are or contain leases, (ii) the lease classification for any expired or existing leases and (iii) initial direct costs for existing leases. Additionally, the Company elected the practical expedient to not separate lease components from nonlease components for all real estate leases within the portfolio. The Company made an accounting policy election to not record leases with an initial term of 12 months or less on the Consolidated Balance Sheets and will recognize related lease payments in the Consolidated Statements of Income on a straight-line basis over the lease term.

In preparation for implementation, the Company executed changes to business processes, including implementing a software solution to assist with the new reporting requirements. The adoption of Topic 842 resulted in a \$2.7 billion increase to total assets and total liabilities as of June 1, 2019. Upon adoption, the Company recognized \$3.2 billion of total operating lease liabilities and \$2.9 billion of operating lease ROU assets, as well as removed \$348 million of existing deferred rent liabilities, which was recorded as an offset against the ROU assets. In addition, the Company removed \$184 million of existing assets and liabilities related to build-to-suit lease arrangements. Several other asset and liability line items in the Company's Consolidated Balance Sheets were also impacted by immaterial amounts. The adoption of the standard did not have a material impact on the Consolidated Statements of Income or Consolidated Statements of Cash Flows. For more information on the Company's lease arrangements refer to Note 19 — *Leases*.

In October 2016, the FASB issued ASU No. 2016-16, *Income Taxes (Topic 740): Intra-Entity Transfers of Assets Other Than Inventory*. The updated guidance requires companies to recognize the income tax consequences of an intra-entity transfer of an asset other than inventory when the transfer occurs. Income tax effects of intra-entity transfers of inventory will continue to be deferred until the inventory has been sold to a third party. The Company adopted the standard on June 1, 2018, using a modified retrospective approach, with the cumulative effect of applying the new standard recognized in *Retained earnings* at the date of adoption. The adoption resulted in reductions to *Retained earnings*, *Deferred income taxes and other assets*, and *Prepaid expenses and other current assets* of \$507 million, \$422 million and \$45 million, respectively, and an increase in *Deferred income taxes and other liabilities* of \$40 million on the Consolidated Balance Sheets.

NOTE 2 — INVENTORIES

Inventory balances of \$7,367 million and \$5,622 million at May 31, 2020 and 2019, respectively, were substantially all finished goods.

NOTE 3 — PROPERTY, PLANT AND EQUIPMENT

Property, plant and equipment, net included the following:

(Dollars in millions)	MAY 31,	
	2020	2019
Land and improvements	\$ 345	\$ 329
Buildings	2,442	2,445
Machinery and equipment	2,751	2,726
Internal-use software	1,483	1,609
Leasehold improvements	1,554	1,563
Construction in process	1,086	797
Total property, plant and equipment, gross	9,661	9,469
Less accumulated depreciation	4,795	4,725
TOTAL PROPERTY, PLANT AND EQUIPMENT, NET	\$ 4,866	\$ 4,744

Capitalized interest was not material for the years ended May 31, 2020, 2019 and 2018.

NOTE 4 — IDENTIFIABLE INTANGIBLE ASSETS AND GOODWILL

Identifiable intangible assets, net consist of indefinite-lived trademarks, acquired trademarks and other intangible assets. The following table summarizes the Company's identifiable intangible assets, net balances as of May 31, 2020 and 2019:

(Dollars in millions)	MAY 31,					
	2020			2019		
	GROSS CARRYING AMOUNT	ACCUMULATED AMORTIZATION	NET CARRYING AMOUNT	GROSS CARRYING AMOUNT	ACCUMULATED AMORTIZATION	NET CARRYING AMOUNT
Indefinite-lived trademarks	\$ 246	\$ —	\$ 246	\$ 281	\$ —	\$ 281
Acquired trademarks and other	47	19	28	22	20	2
IDENTIFIABLE INTANGIBLE ASSETS, NET	\$ 293	\$ 19	\$ 274	\$ 303	\$ 20	\$ 283

Goodwill was \$223 million and \$154 million at May 31, 2020 and 2019, respectively and there were no accumulated impairment losses as of May 31, 2020 and 2019. Additionally, the impact to Goodwill during fiscal 2020 and 2019 as a result of acquisitions and divestitures was not material.

NOTE 5 — ACCRUED LIABILITIES

Accrued liabilities included the following:

<i>(Dollars in millions)</i>	MAY 31,	
	2020	2019
Compensation and benefits, excluding taxes	\$ 1,248	\$ 1,232
Sales-related reserves	1,178	1,218
Allowance for cumulative foreign currency translation losses ⁽¹⁾	405	—
Endorsement compensation	393	424
Dividends payable	384	346
Import and logistics costs	273	296
Taxes other than income taxes payable	202	234
Fair value of derivatives	190	52
Liabilities held-for-sale ⁽¹⁾	146	—
Advertising and marketing	97	114
Collateral received from counterparties to hedging instruments	—	289
Other ⁽²⁾	668	805
TOTAL ACCRUED LIABILITIES	\$ 5,184	\$ 5,010

(1) Refer to Note 20 — Acquisitions and Divestitures for additional information.

(2) Other consists of various accrued expenses with no individual item accounting for more than 5% of the total Accrued liabilities balance at May 31, 2020 and 2019.

NOTE 6 — FAIR VALUE MEASUREMENTS

The following tables present information about the Company's financial assets measured at fair value on a recurring basis as of May 31, 2020 and 2019 and indicate the level in the fair value hierarchy in which the Company classifies the fair value measurement. Refer to Note 1 — Summary of Significant Accounting Policies for additional detail regarding the Company's fair value measurement methodology.

<i>(Dollars in millions)</i>	MAY 31, 2020		
	ASSETS AT FAIR VALUE	CASH AND EQUIVALENTS	SHORT-TERM INVESTMENTS
Cash	\$ 596	\$ 596	—
Level 1:			
U.S. Treasury securities	1,204	800	404
Level 2:			
Commercial paper and bonds	32	—	32
Money market funds	5,973	5,973	—
Time deposits	981	979	2
U.S. Agency securities	1	—	1
Total Level 2	6,987	6,952	35
TOTAL	\$ 8,787	\$ 8,348	439

(Dollars in millions)	MAY 31, 2019		
	ASSETS AT FAIR VALUE	CASH AND EQUIVALENTS	SHORT-TERM INVESTMENTS
Cash	\$ 853	\$ 853	\$ —
Level 1:			
U.S. Treasury securities	347	200	147
Level 2:			
Commercial paper and bonds	34	1	33
Money market funds	1,637	1,637	—
Time deposits	1,791	1,775	16
U.S. Agency securities	1	—	1
Total Level 2	3,463	3,413	50
TOTAL	\$ 4,663	\$ 4,466	\$ 197

As of May 31, 2020, the Company held \$396 million of available-for-sale debt securities with maturity dates within one year and \$43 million with maturity dates over one year and less than five years in *Short-term investments* on the Consolidated Balance Sheets. The fair value of the Company's available-for-sale debt securities approximates their amortized cost.

Included in *Interest expense (income), net* was interest income related to the Company's investment portfolio of \$62 million, \$82 million and \$70 million for the years ended May 31, 2020, 2019 and 2018, respectively.

The Company elects to record the gross assets and liabilities of its derivative financial instruments on the Consolidated Balance Sheets. The Company's derivative financial instruments are subject to master netting arrangements that allow for the offset of assets and liabilities in the event of default or early termination of the contract. Any amounts of cash collateral received related to these instruments associated with the Company's credit-related contingent features are recorded in *Cash and equivalents* and *Accrued liabilities*, the latter of which would further offset against the Company's derivative asset balance. Any amounts of cash collateral posted related to these instruments associated with the Company's credit-related contingent features are recorded in *Prepaid expenses and other current assets*, which would further offset against the Company's derivative liability balance. Cash collateral received or posted related to the Company's credit related contingent features is presented in the *Cash provided by operations* component of the Consolidated Statements of Cash Flows. Any amounts of non-cash collateral received, such as securities, are not recorded on the Consolidated Balance Sheets pursuant to U.S. GAAP. For further information related to credit risk, refer to Note 14 — Risk Management and Derivatives.

The following tables present information about the Company's derivative assets and liabilities measured at fair value on a recurring basis as of May 31, 2020 and 2019 and indicate the level in the fair value hierarchy in which the Company classifies the fair value measurement.

(Dollars in millions)	MAY 31, 2020					
	DERIVATIVE ASSETS			DERIVATIVE LIABILITIES		
	ASSETS AT FAIR VALUE	OTHER CURRENT ASSETS	OTHER LONG-TERM ASSETS	LIABILITIES AT FAIR VALUE	ACCRUED LIABILITIES	OTHER LONG-TERM LIABILITIES
Level 2:						
Foreign exchange forwards and options ⁽¹⁾	\$ 94	\$ 91	\$ 3	\$ 205	\$ 188	\$ 17
Embedded derivatives	1	1	—	2	2	—
TOTAL	\$ 95	\$ 92	\$ 3	\$ 207	\$ 190	\$ 17

(1) If the foreign exchange derivative instruments had been netted on the Consolidated Balance Sheets, the asset and liability positions would have been reduced by \$76 million as of May 31, 2020. As of that date, no amount of cash collateral had been received or posted on the derivative asset and liability balances related to these foreign exchange derivative instruments.

MAY 31, 2019

	DERIVATIVE ASSETS			DERIVATIVE LIABILITIES		
	ASSETS AT FAIR VALUE	OTHER CURRENT ASSETS	OTHER LONG-TERM ASSETS	LIABILITIES AT FAIR VALUE	ACCRUED LIABILITIES	OTHER LONG-TERM LIABILITIES
<i>(Dollars in millions)</i>						
Level 2:						
Foreign exchange forwards and options ⁽¹⁾	\$ 611	\$ 611	\$ —	\$ 51	\$ 51	\$ —
Embedded derivatives	11	5	6	3	1	2
TOTAL	\$ 622	\$ 616	\$ 6	\$ 54	\$ 52	\$ 2

⁽¹⁾ If the foreign exchange derivative instruments had been netted on the Consolidated Balance Sheets, the asset and liability positions each would have been reduced by \$50 million as of May 31, 2019. As of that date, the Company had received \$289 million of cash collateral from various counterparties related to foreign exchange derivative instruments. No amount of collateral was posted on the Company's derivative liability balance as of May 31, 2019.

No transfers among the levels within the fair value hierarchy occurred during the years ended May 31, 2020 or 2019.

For additional information related to the Company's derivative financial instruments, refer to Note 14 — Risk Management and Derivatives. For fair value information regarding *Notes payable* and *Long-term debt*, refer to Note 7 — Short-Term Borrowings and Credit Lines and Note 8 — Long-Term Debt, respectively. The carrying amounts of other current financial assets and other current financial liabilities approximate fair value.

NON-RECURRING FAIR VALUE MEASUREMENTS

As further discussed in Note 20 — Acquisitions and Divestitures, the Company met the criteria to recognize the related assets and liabilities of its Brazil, Argentina, Chile and Uruguay entities as held-for-sale in the third quarter of fiscal 2020 and the classification of these balances remain as such, as of May 31, 2020. This required the Company to remeasure the disposal groups at fair value, less costs to sell, which is considered a Level 3 fair value measurement and was based on each transaction's estimated consideration at the date of close. The carrying value of the Argentina, Chile and Uruguay disposal groups exceeded their fair value, less costs to sell and as a result, the Company recognized a non-recurring impairment charge of \$405 million. This charge was primarily due to the anticipated release of non-cash cumulative foreign currency translation losses which were included as part of the carrying value of the Argentina, Chile and Uruguay disposal groups when measuring for impairment. For the fiscal year ended May 31, 2020, the charge was recognized in *Other (income) expense, net* on the Consolidated Statements of Income, classified within Corporate, and a corresponding allowance within *Accrued Liabilities* on the Consolidated Balance Sheets.

All other assets or liabilities required to be measured at fair value on a non-recurring basis as of May 31, 2020 were immaterial. As of May 31, 2019, all assets or liabilities required to be measured at fair value on a non-recurring basis were immaterial.

NOTE 7 — SHORT-TERM BORROWINGS AND CREDIT LINES

Notes payable as of May 31, 2020 and 2019 are summarized below:

(Dollars in millions)	MAY 31,			
	2020		2019	
	BORROWINGS	INTEREST RATE	BORROWINGS	INTEREST RATE
Notes payable:				
Commercial paper ⁽¹⁾	\$ 248	1.65%	\$ —	0.00%
U.S. operations	—	0.00%	2	0.00% ⁽²⁾
Non-U.S. operations	—	0.00%	7	26.00% ⁽²⁾
TOTAL NOTES PAYABLE	\$ 248		\$ 9	

⁽¹⁾ Commercial paper borrowings with original maturities greater than three months are included in Proceeds from borrowings, net of debt issuance costs on the Consolidated Statements of Cash Flows.

⁽²⁾ Weighted average interest rate includes non-interest bearing overdrafts.

The carrying amounts reflected in the Consolidated Balance Sheets for Notes payable approximate fair value.

On August 16, 2019, the Company entered into a committed credit facility agreement with a syndicate of banks which provides for up to \$2 billion of borrowings, with the option to increase borrowings up to \$3 billion in total upon lender approval. The facility matures on August 16, 2024, with a one year extension option prior to any anniversary of the closing date, provided that in no event shall it extend beyond August 16, 2026. Based on the Company's current long-term senior unsecured debt ratings of AA- and A1 from Standard and Poor's Corporation and Moody's Investor Services, respectively, the interest rate charged on any outstanding borrowings would be the prevailing LIBOR plus 0.46%. The facility fee is 0.04% of the total commitment. This facility replaces the prior \$2 billion credit facility agreement entered into on August 28, 2015, which would have matured August 28, 2020. As of and for the periods ended May 31, 2020 and 2019, no amounts were outstanding under either committed credit facility.

On April 6, 2020, the Company entered into a committed credit facility agreement with a syndicate of banks which provides for up to \$2 billion of borrowings, in addition to the existing credit facility discussed above. The new facility matures on April 5, 2021. Based on the Company's current long-term senior unsecured debt ratings of AA- and A1 from Standard and Poor's Corporation and Moody's Investor Services, respectively, the interest rate charged on any outstanding borrowings would be the prevailing LIBOR plus 1.05%. The facility fee is 0.20% of the total commitment. As of May 31, 2020, no amounts were outstanding under this committed credit facility.

NOTE 8 — LONG-TERM DEBT

Long-term debt, net of unamortized premiums, discounts and debt issuance costs, comprises the following:

Scheduled Maturity (Dollars and Yen in millions)	ORIGINAL PRINCIPAL	INTEREST RATE	INTEREST PAYMENTS	BOOK VALUE OUTSTANDING AS OF MAY 31,	
				2020	2019
Corporate Term Debt: (1)(2)					
May 1, 2023	\$ 500	2.25%	Semi-Annually	\$ 499	\$ 498
March 27, 2025	1,000	2.40%	Semi-Annually	994	—
November 1, 2026	1,000	2.38%	Semi-Annually	995	994
March 27, 2027	1,000	2.75%	Semi-Annually	994	—
March 27, 2030	1,500	2.85%	Semi-Annually	1,489	—
March 27, 2040	1,000	3.25%	Semi-Annually	985	—
May 1, 2043	500	3.63%	Semi-Annually	495	495
November 1, 2045	1,000	3.88%	Semi-Annually	984	983
November 1, 2046	500	3.38%	Semi-Annually	491	491
March 27, 2050	1,500	3.38%	Semi-Annually	1,480	—
Japanese Yen Notes: (3)					
August 20, 2001 through November 20, 2020	¥ 9,000	2.60%	Quarterly	\$ 2	\$ 6
August 20, 2001 through November 20, 2020	4,000	2.00%	Quarterly	1	3
Total				9,409	3,470
Less current maturities				3	6
TOTAL LONG-TERM DEBT				\$ 9,406	\$ 3,464

(1) These senior unsecured obligations rank equally with the Company's other unsecured and unsubordinated indebtedness.

(2) The bonds are redeemable at the Company's option at a price equal to the greater of (i) 100% of the aggregate principal amount of the notes to be redeemed or (ii) the sum of the present values of the remaining scheduled payments, plus in each case, accrued and unpaid interest. However, the bonds also feature a par call provision, which allows for the bonds to be redeemed at a price equal to 100% of the aggregate principal amount of the notes being redeemed, plus accrued and unpaid interest on or after the Par Call Date, as defined in the respective notes.

(3) NIKE Logistics YK assumed a total of ¥13.0 billion in loans as part of its agreement to purchase a distribution center in Japan, which serves as collateral for the loans. These loans mature in equal quarterly installments during the period August 20, 2001 through November 20, 2020.

The scheduled maturity of Long-term debt in each of the years ending May 31, 2021 through 2025 are \$3 million, \$0 million, \$500 million, \$0 million and \$1,000 million, respectively, at face value.

The Company's long-term debt is recorded at adjusted cost, net of unamortized premiums, discounts and debt issuance costs. The fair value of long-term debt is estimated based upon quoted prices for similar instruments or quoted prices for identical instruments in inactive markets (Level 2). The fair value of the Company's long-term debt, including the current portion, was approximately \$10,645 million at May 31, 2020 and \$3,524 million at May 31, 2019.

NOTE 9 — INCOME TAXES

Income before income taxes is as follows:

(Dollars in millions)	YEAR ENDED MAY 31,		
	2020	2019	2018
Income before income taxes:			
United States	\$ 2,954	\$ 593	\$ 744
Foreign	(67)	4,208	3,581
TOTAL INCOME BEFORE INCOME TAXES	\$ 2,887	\$ 4,801	\$ 4,325

The provision for income taxes is as follows:

(Dollars in millions)	YEAR ENDED MAY 31,		
	2020	2019	2018
Current:			
United States			
Federal	\$ (109)	\$ 74	\$ 1,167
State	81	56	45
Foreign	756	608	533
Total Current	728	738	1,745
Deferred:			
United States			
Federal	(231)	(33)	595
State	(47)	(9)	25
Foreign	(102)	76	27
Total Deferred	(380)	34	647
TOTAL INCOME TAX EXPENSE	\$ 348	\$ 772	\$ 2,392

On December 22, 2017, the U.S. enacted the Tax Cuts and Jobs Act (the "Tax Act") which significantly changed previous U.S. tax laws, including a reduction in the corporate tax rate from 35% to 21% and a one-time transition tax on deemed repatriation of undistributed foreign earnings. For fiscal 2018, the change in the corporate tax rate resulted in a blended U.S. federal statutory rate for the Company of approximately 29%.

As of May 31, 2020 and 2019, long-term income taxes payable were \$757 million and \$902 million, respectively, and were included within *Deferred income taxes and other assets* on the Consolidated Balance Sheets.

A reconciliation from the U.S. statutory federal income tax rate to the effective income tax rate is as follows:

	YEAR ENDED MAY 31,		
	2020	2019	2018
Federal income tax rate	21.0 %	21.0 %	29.2 %
State taxes, net of federal benefit	0.8 %	1.0 %	0.8 %
Foreign earnings	5.9 %	-1.1 %	-19.2 %
Foreign-derived intangible income benefit related to the Tax Act	-8.1 %	— %	— %
Transition tax related to the Tax Act	— %	— %	43.3 %
Remeasurement of deferred tax assets and liabilities related to the Tax Act	— %	— %	3.7 %
Excess tax benefits from share-based compensation	-7.2 %	-3.6 %	-5.3 %
Income tax audits and contingency reserves	-1.4 %	1.3 %	2.9 %
U.S. research and development tax credit	-1.8 %	-1.0 %	-0.6 %
Other, net	2.9 %	-1.5 %	0.5 %
EFFECTIVE INCOME TAX RATE	12.1 %	16.1 %	55.3 %

The effective tax rate for the fiscal year ended May 31, 2020 was lower than the effective tax rate for the fiscal year ended May 31, 2019 due to increased benefits from discrete items such as stock-based compensation. The foreign earnings rate impact shown above for the fiscal year ended May 31, 2020 includes withholding taxes of 6.5% and held for sale accounting items of

[Table of Contents](#)

2.9%, offset by a benefit for statutory rate differences and other items of 3.5%. The foreign derived intangible income benefit reflects U.S. tax benefits introduced by the Tax Act for companies serving foreign markets. This benefit became available to the Company as a result of a restructuring of its intellectual property interests. Income tax audit and contingency reserves reflect benefits associated with the modification of the treatment of certain research and development expenditures of 2.9% offset by an increase related to the resolution of an audit by the U.S. Internal Revenue Service ("IRS") and other matters of 1.5%. Included in other is the deferral of income tax effects related to intra-entity transfers of inventory of 2.3% and other items of 0.6%.

The effective tax rate for the year fiscal ended May 31, 2019 was lower than the effective tax rate for the fiscal year ended May 31, 2018 due to significant changes related to the enactment of the Tax Act in fiscal year 2018 and reduction in the U.S. federal statutory rate to 21% in fiscal year 2019.

Deferred tax assets and liabilities comprise the following as of:

<i>(Dollars in millions)</i>	MAY 31,	
	2020	2019
Deferred tax assets:		
Inventories	\$ 84	\$ 66
Sales return reserves	115	128
Deferred compensation	295	271
Stock-based compensation	168	156
Reserves and accrued liabilities	120	101
Operating lease liabilities	491	—
Capitalized research and development expenditures	189	—
Net operating loss carry-forwards	21	81
Other	127	125
Total deferred tax assets	1,610	928
Valuation allowance	(26)	(88)
Total deferred tax assets after valuation allowance	1,584	840
Deferred tax liabilities:		
Foreign withholding tax on undistributed earnings of foreign subsidiaries	(165)	(235)
Property, plant and equipment	(232)	(188)
Right-of-use assets	(423)	—
Other	(32)	(41)
Total deferred tax liabilities	(852)	(464)
NET DEFERRED TAX ASSET	\$ 732	\$ 376

The above amounts exclude deferred taxes of the Company's Brazil, Argentina, Chile and Uruguay operations which are classified as held-for-sale on the Consolidated Balance Sheets as of May 31, 2020. See Note 20 — Acquisitions and Divestitures for additional information.

The following is a reconciliation of the changes in the gross balance of unrecognized tax benefits as of:

<i>(Dollars in millions)</i>	MAY 31,		
	2020	2019	2018
Unrecognized tax benefits, beginning of the period	\$ 808	\$ 698	\$ 461
Gross increases related to prior period tax positions	181	85	19
Gross decreases related to prior period tax positions	(171)	(32)	(12)
Gross increases related to current period tax positions	50	81	249
Settlements	(58)	—	—
Lapse of statute of limitations	(28)	(35)	(20)
Changes due to currency translation	(11)	11	1
UNRECOGNIZED TAX BENEFITS, END OF THE PERIOD	\$ 771	\$ 808	\$ 698

As of May 31, 2020, total gross unrecognized tax benefits, excluding related interest and penalties, were \$771 million, \$536 million of which would affect the Company's effective tax rate if recognized in future periods. The majority of the total gross

unrecognized tax benefits are long-term in nature and included within *Deferred income taxes and other assets* on the Consolidated Balance Sheets.

The Company recognizes interest and penalties related to income tax matters in income tax expense. The liability for payment of interest and penalties decreased by \$16 million during the year ended May 31, 2020, increased by \$17 million during the fiscal year ended May 31, 2019 and decreased by \$14 million during the fiscal year ended May 31, 2018. As of May 31, 2020 and 2019, accrued interest and penalties related to uncertain tax positions were \$158 million and \$174 million, respectively (excluding federal benefit).

The Company is subject to taxation in the United States, as well as various state and foreign jurisdictions. The Company is currently under audit by the IRS for fiscal years 2017 through 2019. The Company has closed all U.S. federal income tax matters through fiscal 2016, with the exception of certain transfer pricing adjustments. Tax years after 2009 remain open in certain major foreign jurisdictions. Although the timing of resolution of audits is not certain, the Company evaluates all domestic and foreign audit issues in the aggregate, along with the expiration of applicable statutes of limitations, and estimates that it is reasonably possible the total gross unrecognized tax benefits could decrease by up to \$50 million within the next 12 months. In January 2019, the European Commission opened a formal investigation to examine whether the Netherlands has breached State Aid rules when granting certain tax rulings to the Company. The Company believes the investigation is without merit. If this matter is adversely resolved, the Netherlands may be required to assess additional amounts with respect to current and prior periods, and the Company's Netherlands income taxes in the future could increase.

The Company historically provided for U.S. income taxes on the undistributed earnings of foreign subsidiaries unless they were considered indefinitely reinvested outside the United States. As a result of the enactment of the Tax Act, in fiscal 2018 the Company reevaluated its historic indefinite reinvestment assertion and determined that any historical or future undistributed earnings of foreign subsidiaries are no longer considered to be indefinitely reinvested. Effective January 1, 2020, however, the tax law in the Netherlands, one of the Company's major jurisdictions, changed. As a result of the change in law, the Company's undistributed earnings in the Netherlands are subject to withholding tax upon distribution. It is the Company's intention to indefinitely reinvest the historical earnings of its foreign subsidiaries outside North America prior to May 31, 2020 to ensure there is sufficient working capital to expand operations outside the United States. Accordingly, the Company has not recorded a deferred tax liability related to foreign withholding taxes on approximately \$8.1 billion of undistributed earnings of these foreign subsidiaries as of May 31, 2020. Withholding taxes of approximately \$1.2 billion would be payable upon the remittance of these undistributed earnings as of May 31, 2020.

A portion of the Company's foreign operations benefit from a tax holiday, which is set to expire in 2021. This tax holiday may be extended when certain conditions are met or may be terminated early if certain conditions are not met. The tax benefit attributable to this tax holiday was \$238 million, \$167 million and \$126 million for the fiscal years ended May 31, 2020, 2019 and 2018, respectively. The benefit of the tax holiday on diluted earnings per common share was \$0.15, \$0.10 and \$0.08 for the fiscal years ended May 31, 2020, 2019 and 2018, respectively.

Deferred tax assets at May 31, 2020 and 2019 were reduced by a valuation allowance. For the fiscal year ended May 31, 2020, a valuation allowance was provided for U.S. foreign tax credit carry-forwards and on tax benefits generated by entities with operating losses. For the fiscal year ended May 31, 2019, the valuation allowance provided primarily related to tax benefits generated by certain entities with operating losses. There was a \$62 million net decrease in the valuation allowance for the fiscal year ended May 31, 2020, compared to a \$7 million net decrease for the fiscal year ended May 31, 2019, and \$13 million net increase for the year ended May 31, 2018. The decrease in the Company's net valuation allowance for the fiscal year ended May 31, 2020 is primarily related to the classification of the Company's Brazil and Argentina operations as held-for-sale on the Consolidated Balance Sheets as of May 31, 2020. See Note 20 — Acquisitions and Divestitures for additional information.

The Company has recorded deferred tax assets of \$15 million at May 31, 2020 for U.S. foreign tax credit carry-forwards which will begin to expire in 2030.

The Company has available domestic and foreign loss carry-forwards of \$83 million at May 31, 2020. If not utilized, such losses will expire as follows:

<i>(Dollars in millions)</i>	YEAR ENDING MAY 31,						
	2021	2022	2023	2024	2025-2040	INDEFINITE	TOTAL
Net operating losses	\$ —	\$ 3	\$ 2	\$ 2	\$ 59	\$ 17	\$ 83

The above amounts at May 31, 2020 exclude net operating loss carry-forwards of the Company's Brazil, Argentina and Chile operations which are included in assets held-for-sale on the Consolidated Balance Sheets at May 31, 2020. See Note 20 — Acquisitions and Divestitures for additional information.

NOTE 10 — REDEEMABLE PREFERRED STOCK

Sojitz America is the sole owner of the Company's authorized redeemable preferred stock, \$1 par value, which is redeemable at the option of Sojitz America or the Company at par value aggregating \$0.3 million. A cumulative dividend of \$0.10 per share is payable annually on May 31 and no dividends may be declared or paid on the common stock of the Company unless dividends on the redeemable preferred stock have been declared and paid in full. There have been no changes in the redeemable preferred stock in the fiscal years ended May 31, 2020, 2019 and 2018. As the holder of the redeemable preferred stock, Sojitz America does not have general voting rights, but does have the right to vote as a separate class on the sale of all or substantially all of the assets of the Company and its subsidiaries, on merger, consolidation, liquidation or dissolution of the Company, or on the sale or assignment of the NIKE trademark for athletic footwear sold in the United States. The redeemable preferred stock has been fully issued to Sojitz America and is not blank check preferred stock. The Company's articles of incorporation do not permit the issuance of additional preferred stock.

NOTE 11 — COMMON STOCK AND STOCK-BASED COMPENSATION

COMMON STOCK

The authorized number of shares of Class A Common Stock, no par value, and Class B Common Stock, no par value, are 400 million and 2,400 million, respectively. Each share of Class A Common Stock is convertible into one share of Class B Common Stock. Voting rights of Class B Common Stock are limited in certain circumstances with respect to the election of directors. There are no differences in the dividend and liquidation preferences or participation rights of the holders of Class A and Class B Common Stock. From time to time, the Company's Board of Directors authorizes share repurchase programs for the repurchase of Class B Common Stock. The value of repurchased shares is deducted from *Total shareholders' equity* through allocation to *Capital in excess of stated value* and *Retained earnings*.

STOCK-BASED COMPENSATION

The NIKE, Inc. Stock Incentive Plan (the "Stock Incentive Plan") provides for the issuance of up to 718 million previously unissued shares of Class B Common Stock in connection with equity awards granted under the Stock Incentive Plan. The Stock Incentive Plan authorizes the grant of non-statutory stock options, incentive stock options, stock appreciation rights, restricted stock, restricted stock units and performance-based awards. The exercise price for stock options and stock appreciation rights may not be less than the fair market value of the underlying shares on the date of grant. A committee of the Board of Directors administers the Stock Incentive Plan. The committee has the authority to determine the employees to whom awards will be made, the amount of the awards and the other terms and conditions of the awards. The Company generally grants stock options and restricted stock on an annual basis. Substantially all awards under the Stock Incentive Plan vest ratably over 4 years of continued employment, with stock options expiring 10 years from the date of grant.

The following table summarizes the Company's total stock-based compensation expense recognized in *Cost of sales* or *Operating overhead expense*, as applicable:

<i>(Dollars in millions)</i>	YEAR ENDED MAY 31,		
	2020	2019	2018
Stock options ⁽¹⁾	\$ 237	\$ 207	\$ 149
ESPPs	53	40	34
Restricted stock	139	78	35
TOTAL STOCK-BASED COMPENSATION EXPENSE	\$ 429	\$ 325	\$ 218

⁽¹⁾ Expense for stock options includes the expense associated with stock appreciation rights. Accelerated stock option expense is recorded for employees meeting certain retirement eligibility requirements. Accelerated stock option expense was \$53 million, \$41 million and \$18 million for the fiscal years ended May 31, 2020, 2019 and 2018, respectively.

The income tax benefit related to stock-based compensation expense was \$207 million, \$175 million and \$230 million for the fiscal years ended May 31, 2020, 2019 and 2018, respectively, and reported within *Income tax expense*.

STOCK OPTIONS

The weighted average fair value per share of the options granted during the years ended May 31, 2020, 2019 and 2018, computed as of the grant date using the Black-Scholes pricing model, was \$18.71, \$22.78 and \$9.82, respectively. The weighted average assumptions used to estimate these fair values were as follows:

	YEAR ENDED MAY 31,		
	2020	2019	2018
Dividend yield	1.0%	1.0%	1.2%
Expected volatility	23.0%	26.6%	16.4%
Weighted average expected life (in years)	6.0	6.0	6.0
Risk-free interest rate	1.5%	2.8%	2.0%

Expected volatilities are based on the historical volatility of the Company's common stock, the implied volatility in market traded options on the Company's common stock with a term greater than one year, as well as other factors. The weighted average expected life of options is based on an analysis of historical and expected future exercise patterns. The interest rate is based on the U.S. Treasury (constant maturity) risk-free rate in effect at the date of grant for periods corresponding with the expected term of the options.

The following summarizes the stock option transactions under the plan discussed above:

	SHARES ⁽¹⁾	WEIGHTED AVERAGE OPTION PRICE
	(In millions)	
Options outstanding as of May 31, 2019	91.3	\$ 50.59
Exercised	(20.1)	35.26
Forfeited	(2.2)	75.74
Granted	19.1	85.29
Options outstanding as of May 31, 2020	88.1	\$ 60.98

(1) Includes stock appreciation rights transactions.

Options exercisable as of May 31, 2020 were 48.5 million and had a weighted average option price of \$46.91 per share. The aggregate intrinsic value for options outstanding and exercisable at May 31, 2020 was \$3,316 million and \$2,506 million, respectively. The total intrinsic value of the options exercised during the years ended May 31, 2020, 2019 and 2018 was \$1,161 million, \$938 million and \$889 million, respectively. The intrinsic value is the amount by which the market value of the underlying stock exceeds the exercise price of the options. The weighted average contractual life remaining for options outstanding and options exercisable at May 31, 2020 was 6.2 years and 4.5 years, respectively. As of May 31, 2020, the Company had \$411 million of unrecognized compensation costs from stock options, net of estimated forfeitures, to be recognized in *Cost of sales* or *Operating overhead expense*, as applicable, over a weighted average remaining period of 2.6 years.

EMPLOYEE STOCK PURCHASE PLANS

In addition to the Stock Incentive Plan, the Company gives employees the right to purchase shares at a discount from the market price under employee stock purchase plans (ESPPs). Subject to the annual statutory limit, employees are eligible to participate through payroll deductions of up to 10% of their compensation. At the end of each six-month offering period, shares are purchased by the participants at 85% of the lower of the fair market value at the beginning or the end of the offering period. Employees purchased 2.7 million, 2.5 million and 3.1 million shares during each of the fiscal years ended May 31, 2020, 2019 and 2018, respectively.

RESTRICTED STOCK AND RESTRICTED STOCK UNITS

Recipients of restricted stock are entitled to cash dividends and to vote their respective shares throughout the period of restriction. Recipients of restricted stock units are entitled to dividend equivalent cash payments upon vesting. The number of restricted stock and restricted stock units vested includes shares of common stock withheld by the Company on behalf of employees to satisfy the minimum statutory tax withholding requirements.

The following summarizes the restricted stock and restricted stock unit activity under the plan discussed above:

	SHARES	WEIGHTED AVERAGE GRANT DATE FAIR VALUE
	(In millions)	
Nonvested as of May 31, 2019	4.4	\$ 70.93
Vested	(1.1)	72.64
Forfeited	(0.3)	79.62
Granted	3.8	88.26
Nonvested as of May 31, 2020	6.8	\$ 79.84

The weighted average fair value per share of restricted stock and restricted stock units granted for the years ended May 31, 2020, 2019 and 2018, computed as of the grant date, was \$88.26, \$80.95, and \$62.51, respectively. During the years ended May 31, 2020, 2019 and 2018, the aggregate fair value of restricted stock and restricted stock units vested was \$98 million, \$44 million and \$113 million, respectively, computed as of the date of vesting. As of May 31, 2020, the Company had \$342 million of unrecognized compensation costs from restricted stock and restricted stock units, net of estimated forfeitures, to be recognized in *Cost of sales* or *Operating overhead expense*, as applicable, over a weighted average remaining period of 2.7 years.

NOTE 12 — EARNINGS PER SHARE

The following is a reconciliation from basic earnings per common share to diluted earnings per common share. The computations of diluted earnings per common share excluded options, including shares under ESPPs, and restricted stock to purchase an additional 30.6 million, 17.5 million and 42.9 million shares of common stock outstanding for the fiscal years ended May 31, 2020, 2019 and 2018, respectively, because the options and restricted stock were anti-dilutive.

<i>(In millions, except per share data)</i>	YEAR ENDED MAY 31,		
	2020	2019	2018
Net income available to common stockholders	\$ 2,539	\$ 4,029	\$ 1,933
Determination of shares:			
Weighted average common shares outstanding	1,558.8	1,579.7	1,623.8
Assumed conversion of dilutive stock options and awards	32.8	38.7	35.3
DILUTED WEIGHTED AVERAGE COMMON SHARES OUTSTANDING	1,591.6	1,618.4	1,659.1
Earnings per common share:			
Basic	\$ 1.63	\$ 2.55	\$ 1.19
Diluted	\$ 1.60	\$ 2.49	\$ 1.17

NOTE 13 — BENEFIT PLANS

The Company has a qualified 401(k) Savings and Profit Sharing Plan, in which all U.S. employees are able to participate. The Company matches a portion of employee contributions to the savings plan. Company contributions to the savings plan were \$107 million, \$90 million and \$80 million and included in *Cost of sales* or *Operating overhead expense*, as applicable, for the years ended May 31, 2020, 2019 and 2018, respectively. The terms of the plan also allow for annual discretionary profit sharing contributions, as recommended by senior management and approved by the Board of Directors, to the accounts of eligible U.S. employees who work at least 1,000 hours in a year. For the fiscal year ended May 31, 2020, there were no profit sharing contributions made to the plan. Profit sharing contributions of \$37 million and \$59 million were made to the plan and included in *Cost of sales* or *Operating overhead expense*, as applicable, for the years ended May 31, 2019 and 2018, respectively.

The Company also has a Long-Term Incentive Plan (LTIP) adopted by the Board of Directors and approved by shareholders in September 1997 and later amended and approved in fiscal 2007 and fiscal 2012. The Company recognized \$66 million, \$83 million and \$33 million of *Operating overhead expense* related to cash awards under the LTIP during the years ended May 31, 2020, 2019 and 2018, respectively.

The Company allows certain highly compensated employees and non-employee directors of the Company to defer compensation under a nonqualified deferred compensation plan. Deferred compensation plan liabilities were \$725 million and \$647 million at

May 31, 2020 and 2019, respectively, and primarily classified as non-current in *Deferred income taxes and other liabilities* on the Consolidated Balance Sheets.

The Company has pension plans in various countries worldwide. The pension plans are only available to local employees and are generally government mandated. The liability related to the unfunded pension liabilities of the plans was \$79 million and \$73 million at May 31, 2020 and 2019, respectively, and primarily classified as non-current in *Deferred income taxes and other liabilities* on the Consolidated Balance Sheets.

NOTE 14 — RISK MANAGEMENT AND DERIVATIVES

The Company is exposed to global market risks, including the effect of changes in foreign currency exchange rates and interest rates, and uses derivatives to manage financial exposures that occur in the normal course of business. The Company does not hold or issue derivatives for trading or speculative purposes.

The Company may elect to designate certain derivatives as hedging instruments under U.S. GAAP. The Company formally documents all relationships between designated hedging instruments and hedged items as well as its risk management objectives and strategies for undertaking hedge transactions. This process includes linking all derivatives designated as hedges to either recognized assets or liabilities or forecasted transactions and assessing, both at inception and on an ongoing basis, the effectiveness of the hedging relationships.

The majority of derivatives outstanding as of May 31, 2020 are designated as foreign currency cash flow hedges, primarily for Euro/U.S. Dollar, British Pound/Euro, Japanese Yen/U.S. Dollar and Chinese Yuan/U.S. Dollar currency pairs. All derivatives are recognized on the Consolidated Balance Sheets at fair value and classified based on the instrument's maturity date.

The following tables present the fair values of derivative instruments included within the Consolidated Balance Sheets as of May 31, 2020 and 2019:

	BALANCE SHEET LOCATION	DERIVATIVE ASSETS	
		MAY 31,	
(Dollars in millions)		2020	2019
Derivatives formally designated as hedging instruments:			
Foreign exchange forwards and options	Prepaid expenses and other current assets	\$ 43	\$ 509
Foreign exchange forwards and options	Deferred income taxes and other assets	1	—
Total derivatives formally designated as hedging instruments		44	509
Derivatives not designated as hedging instruments:			
Foreign exchange forwards and options	Prepaid expenses and other current assets	48	102
Embedded derivatives	Prepaid expenses and other current assets	1	5
Foreign exchange forwards and options	Deferred income taxes and other assets	2	—
Embedded derivatives	Deferred income taxes and other assets	—	6
Total derivatives not designated as hedging instruments		51	113
TOTAL DERIVATIVE ASSETS		\$ 95	\$ 622

DERIVATIVE LIABILITIES

<i>(Dollars in millions)</i>	BALANCE SHEET LOCATION	MAY 31,

Foreign exchange forwards and options	\$ 76	\$ 166	\$ (57)	Other (income) expense, net
Embedded derivatives	(1)	7	(4)	Other (income) expense, net

CASH FLOW HEDGES

All changes in fair value of derivatives designated as cash flow hedges are recorded in *Accumulated other comprehensive income (loss)* until *Net income* is affected by the variability of cash flows of the hedged transaction. Effective hedge results are classified in the Consolidated Statements of Income in the same manner as the underlying exposure. Derivative instruments designated as cash flow hedges must be discontinued when it is no longer probable the forecasted hedged transaction will occur in the initially identified time period. The gains and losses associated with discontinued derivative instruments in *Accumulated other comprehensive income (loss)* will be recognized immediately in *Other (income) expense, net*, if it is probable the forecasted hedged transaction will not occur by the end of the initially identified time period or within an additional two-month period thereafter. In rare circumstances, the additional period of time may exceed two months due to extenuating circumstances related to the nature of the forecasted transaction that are outside the control or influence of the Company. In all situations in which hedge accounting is discontinued and the derivative remains outstanding, the Company accounts for the derivative as an undesignated instrument as discussed below.

The purpose of the Company's foreign exchange risk management program is to lessen both the positive and negative effects of currency fluctuations on the Company's consolidated results of operations, financial position and cash flows. Foreign currency exposures the Company may elect to hedge in this manner include product cost exposures, non-functional currency denominated external and intercompany revenues, demand creation expenses, investments in U.S. Dollar denominated available-for-sale debt securities and certain other intercompany transactions.

Product cost exposures are primarily generated through non-functional currency denominated product purchases and the foreign currency adjustment program described below. NIKE entities primarily purchase product in two ways: (1) Certain NIKE entities purchase product from the NIKE Trading Company (NTC), a wholly-owned sourcing hub that buys NIKE branded products from third party factories, predominantly in U.S. Dollars. The NTC, whose functional currency is the U.S. Dollar, then sells the product to NIKE entities in their respective functional currencies. NTC sales to a NIKE entity with a different functional currency result in a foreign currency exposure for the NTC. (2) Other NIKE entities purchase product directly from third party factories in U.S. Dollars.

These purchases generate a foreign currency exposure for those NIKE entities with a functional currency other than the U.S. Dollar.

The Company operates a foreign currency adjustment program with certain factories. The program is designed to more effectively manage foreign currency risk by assuming certain of the factories' foreign currency exposures, some of which are natural offsets to the Company's existing foreign currency exposures. Under this program, the Company's payments to these factories are adjusted for rate fluctuations in the basket of currencies ("factory currency exposure index") in which the labor, materials and overhead costs incurred by the factories in the production of NIKE branded products ("factory input costs") are denominated. For the portion of the indices denominated in the local or functional currency of the factory, the Company may elect to place formally designated cash flow hedges. For all currencies within the indices, excluding the U.S. Dollar and the local or functional currency of the factory, an embedded derivative contract is created upon the factory's acceptance of NIKE's purchase order. Embedded derivative contracts are separated from the related purchase order, as further described within the Embedded Derivatives section below.

The Company's policy permits the utilization of derivatives to reduce its foreign currency exposures where internal netting or other strategies cannot be effectively employed. Typically, the Company may enter into hedge contracts starting up to 12 to 24 months in advance of the forecasted transaction and may place incremental hedges up to 100% of the exposure by the time the forecasted transaction occurs. The total notional amount of outstanding foreign currency derivatives designated as cash flow hedges was \$8.1 billion as of May 31, 2020.

As of May 31, 2020, approximately \$374 million of deferred net gains (net of tax) on both outstanding and matured derivatives in *Accumulated other comprehensive income (loss)* are expected to be reclassified to *Net income* during the next 12 months concurrent with the underlying hedged transactions also being recorded in *Net income*. Actual amounts ultimately reclassified to *Net income* are dependent on the exchange rates in effect when derivative contracts currently outstanding mature. As of May 31, 2020, the maximum term over which the Company hedges exposures to the variability of cash flows for its forecasted transactions was 24 months.

FAIR VALUE HEDGES

The Company has, in the past, been exposed to the risk of changes in the fair value of certain fixed-rate debt attributable to changes in interest rates. Derivatives used by the Company to hedge this risk are receive-fixed, pay-variable interest rate swaps. All interest rate swaps designated as fair value hedges of the related long-term debt meet the shortcut method requirements under U.S. GAAP. Accordingly, changes in the fair values of the interest rate swaps are considered to exactly offset changes in the fair value of the underlying long-term debt. The Company had no interest rate swaps designated as fair value hedges as of May 31, 2020.

NET INVESTMENT HEDGES

The Company has, in the past, hedged and may, in the future, hedge the risk of variability in foreign currency-denominated net investments in wholly-owned international operations. All changes in fair value of the derivatives designated as net investment hedges are reported in *Accumulated other comprehensive income (loss)* along with the foreign currency translation adjustments on those investments. The Company had no outstanding net investment hedges as of May 31, 2020.

UNDESIGNATED DERIVATIVE INSTRUMENTS

The Company may elect to enter into foreign exchange forwards to mitigate the change in fair value of specific assets and liabilities on the Consolidated Balance Sheets and/or the embedded derivative contracts. These undesignated instruments are recorded at fair value as a derivative asset or liability on the Consolidated Balance Sheets with their corresponding change in fair value recognized in *Other (income) expense, net*, together with the re-measurement gain or loss from the hedged balance sheet position and/or embedded derivative contract. The total notional amount of outstanding undesignated derivative instruments was \$4.1 billion as of May 31, 2020.

EMBEDDED DERIVATIVES

As part of the foreign currency adjustment program described above, an embedded derivative contract is created upon the factory's acceptance of NIKE's purchase order for currencies within the factory currency exposure indices that are neither the U.S. Dollar nor the local or functional currency of the factory. In addition, embedded derivative contracts are created when the Company enters into certain other contractual agreements which have payments that are indexed to currencies that are not the functional currency of either substantial party to the contracts. Embedded derivative contracts are treated as foreign currency forward contracts that are bifurcated from the related contract and recorded at fair value as a derivative asset or liability on the Consolidated Balance Sheets with their corresponding change in fair value recognized in *Other (income) expense, net*, through the date the foreign currency fluctuations cease to exist.

At May 31, 2020, the total notional amount of embedded derivatives outstanding was approximately \$281 million.

CREDIT RISK

The Company is exposed to credit-related losses in the event of nonperformance by counterparties to hedging instruments. The counterparties to all derivative transactions are major financial institutions with investment grade credit ratings; however, this does not eliminate the Company's exposure to credit risk with these institutions. This credit risk is limited to the unrealized gains in such contracts should any of these counterparties fail to perform as contracted. To manage this risk, the Company has established strict counterparty credit guidelines that are continually monitored.

The Company's derivative contracts contain credit risk-related contingent features designed to protect against significant deterioration in counterparties' creditworthiness and their ultimate ability to settle outstanding derivative contracts in the normal course of business. The Company's bilateral credit-related contingent features generally require the owing entity, either the Company or the derivative counterparty, to post collateral for the portion of the fair value in excess of \$50 million should the fair value of outstanding derivatives per counterparty be greater than \$50 million. Additionally, a certain level of decline in credit rating of either the Company or the counterparty could also trigger collateral requirements. As of May 31, 2020, the Company was in compliance with all credit risk-related contingent features, and had derivative instruments with such features in a net liability position of \$137 million. However, no derivative instruments with credit risk-related contingent features in a net liability position were greater than \$50 million by counterparty. Accordingly, the Company was not required to post any collateral as a result of these contingent features. Further, as of May 31, 2020, the Company had received no cash collateral from various counterparties to its derivative contracts. The Company considers the impact of the risk of counterparty default to be immaterial.

For additional information related to the Company's derivative financial instruments and collateral, refer to Note 6 — Fair Value Measurements.

NOTE 15 — ACCUMULATED OTHER COMPREHENSIVE INCOME (LOSS)

The changes in *Accumulated other comprehensive income (loss)*, net of tax, were as follows:

(Dollars in millions)

	FOREIGN CURRENCY TRANSLATION ADJUSTMENT ⁽¹⁾	CASH FLOW HEDGES	NET INVESTMENT HEDGES ⁽¹⁾	OTHER	TOTAL
Balance at May 31, 2019	\$ (346)	\$ 520	\$ 115	\$ (58)	\$ 231

For the fiscal years ended May 31, 2020 and 2019, Other revenues for Global Brand Divisions and Converse were primarily attributable to licensing businesses. For the fiscal years ended May 31, 2020 and 2019, Other revenues for Corporate primarily consisted of foreign currency hedge gains and losses related to revenues generated by entities within the NIKE Brand geographic operating segments and Converse but managed through the Company's central foreign exchange risk management program.

As of May 31, 2020 and 2019, the Company did not have any contract assets and had an immaterial amount of contract liabilities recorded in *Accrued Liabilities* on the Consolidated Balance Sheets.

SALES-RELATED RESERVES

At May 31, 2020 and May 31, 2019, the Company's sales-related reserve balance, which includes returns, post-invoice sales discounts and miscellaneous claims, was \$1,178 million and \$1,218 million, respectively, recorded in *Accrued liabilities* on the Consolidated Balance Sheets. The estimated cost of inventory for expected product returns was \$313 million and \$410 million as of May 31, 2020 and May 31, 2019, respectively, and was recorded in *Prepaid expenses and other current assets* on the Consolidated Balance Sheets.

MAJOR CUSTOMERS

No customer accounted for 10% or more of the Company's consolidated net *Revenues* during the fiscal years ended May 31, 2020, 2019 and 2018.

NOTE 17 — OPERATING SEGMENTS AND RELATED INFORMATION

The Company's operating segments are evidence of the structure of the Company's internal organization. The NIKE Brand segments are defined by geographic regions for operations participating in NIKE Brand sales activity.

Each NIKE Brand geographic segment operates predominantly in one industry: the design, development, marketing and selling of athletic footwear, apparel and equipment. The Company's reportable operating segments for the NIKE Brand are: North America; Europe, Middle East & Africa (EMEA); Greater China; and Asia Pacific & Latin America (APLA), and include results for the NIKE and Jordan brands, with the results for the Hurley brand, prior to its divestiture, included in North America. Refer to Note 20 — Acquisitions and Divestitures for information regarding the divestiture of the Company's wholly-owned subsidiary, Hurley, and the planned transition of NIKE Brand businesses in certain countries within APLA to third-party distributors.

The Company's NIKE Direct operations are managed within each NIKE Brand geographic operating segment. Converse is also a reportable segment for the Company, and operates in one industry: the design, marketing, licensing and selling of athletic lifestyle sneakers, apparel and accessories.

Global Brand Divisions is included within the NIKE Brand for presentation purposes to align with the way management views the Company. Global Brand Divisions primarily represent NIKE Brand licensing businesses that are not part of a geographic operating segment, and demand creation and operating overhead expense, including product creation and design expenses that are centrally managed for the NIKE Brand, as well as costs associated with NIKE Direct global digital operations and enterprise technology.

Corporate consists primarily of unallocated general and administrative expenses, including expenses associated with centrally managed departments; depreciation and amortization related to the Company's headquarters; unallocated insurance, benefit and compensation programs, including stock-based compensation; and certain foreign currency gains and losses, including certain hedge gains and losses. For the fiscal year ended May 31, 2020, Corporate includes the non-recurring impairment charge, recognized as a result of the Company's decision to transition its operations in Brazil, Argentina, Chile and Uruguay to third-party distributors. This charge primarily reflects the anticipated release of associated non-cash cumulative foreign currency translation losses. For more information regarding this charge, refer to Note 20 — Acquisitions and Divestitures.

The primary financial measure used by the Company to evaluate performance of individual operating segments is earnings before interest and taxes (EBIT), which represents *Net income before Interest expense (income), net and Income tax expense* in the Consolidated Statements of Income.

As part of the Company's centrally managed foreign exchange risk management program, standard foreign currency rates are assigned twice per year to each NIKE Brand entity in the Company's geographic operating segments and to Converse. These rates are set approximately nine and twelve months in advance of the future selling seasons to which they relate (specifically, for each currency, one standard rate applies to the fall and holiday selling seasons and one standard rate applies to the spring and summer selling seasons) based on average market spot rates in the calendar month preceding the date they are established. Inventories and cost of sales for geographic operating segments and Converse reflect the use of these standard rates to record non-functional currency product purchases in the entity's functional currency. Differences between assigned standard foreign currency rates and actual market rates are included in Corporate, together with foreign currency hedge gains and losses generated from the Company's centrally managed foreign exchange risk management program and other conversion gains and losses.

Accounts receivable, net, Inventories and Property, plant and equipment, net for operating segments are regularly reviewed by management and are therefore provided below.

REVENUES AND LONG-LIVED ASSETS BY GEOGRAPHIC AREA

After allocation of revenues for Global Brand Divisions, Converse and Corporate to geographical areas based on the location where the sales originated, revenues by geographical area are essentially the same as reported above for the NIKE Brand operating segments with the exception of the United States. Revenues derived in the United States were \$14,625 million, \$16,091 million and \$15,314 million for the fiscal years ended May 31, 2020, 2019 and 2018, respectively.

The Company's largest concentrations of long-lived assets primarily consist of the Company's corporate headquarters, retail locations and distribution facilities in the United States and China, as well as distribution facilities in Belgium. Long-lived assets attributable to operations in these countries, which primarily consists of property, plant and equipment, net, as well as operating lease right-of-use assets, net in conjunction with the adoption of Topic 842 in fiscal 2020, were as follows:

	MAY 31,	
	2020 ⁽¹⁾	2019
<i>(Dollars in millions)</i>		
United States	\$ 5,114	\$ 3,174
Belgium	606	618
China	457	242

(1) Includes operating lease right-of-use assets, net in conjunction with the adoption of Topic 842. Comparative prior period information has not been adjusted and continues to be reported in accordance with previous accounting guidance in effect for those periods.

NOTE 18 — COMMITMENTS AND CONTINGENCIES

As of May 31, 2020 and 2019, the Company had bank guarantees and letters of credit outstanding totaling \$239 million and \$215 million, respectively, issued primarily for real estate agreements, self-insurance programs and other general business obligations.

In connection with various contracts and agreements, the Company provides routine indemnification relating to the enforceability of intellectual property rights, coverage for legal issues that arise and other items where the Company is acting as the guarantor. Currently, the Company has several such agreements in place. However, based on the Company's historical experience and the estimated probability of future loss, the Company has determined the fair value of such indemnification is not material to the Company's financial position or results of operations.

In the ordinary course of its business, the Company is involved in various legal proceedings involving contractual and employment relationships, product liability claims, trademark rights and a variety of other matters. While the Company cannot predict the outcome of its pending legal matters with certainty, the Company does not believe any currently identified claim, proceeding or litigation, either individually or in aggregate, will have a material impact on the Company's results of operations, financial position or cash flows.

NOTE 19 — LEASES

Lease expense is recognized in *Cost of sales* or *Operating overhead expense* within the Consolidated Statements of Income, based on the underlying nature of the leased asset. For the fiscal year ended May 31, 2020, lease expense primarily consisted of operating lease costs of \$569 million, along with \$337 million primarily related to variable lease costs which includes an immaterial amount of short-term lease costs. As of and for the fiscal year ended May 31, 2020, finance leases were not a material component of the Company's lease portfolio.

Amounts of future undiscounted cash flows related to operating lease payments over the lease term are as follows and are reconciled to the present value of the operating lease liabilities as recorded on the Consolidated Balance Sheets:

<i>(Dollars in millions)</i>	AS OF MAY 31, 2020⁽¹⁾	
Fiscal 2021	\$	550
Fiscal 2022		514
Fiscal 2023		456
Fiscal 2024		416
Fiscal 2025		374
Thereafter		1,474
Total undiscounted future cash flows related to lease payments	\$	3,784
Less: Interest		426
Present value of lease liabilities	\$	3,358

⁽¹⁾ Excludes \$67 million of future operating lease payments for lease agreements signed but not yet commenced.

In accordance with Topic 840, rent expense, excluding executory costs, was \$829 million and \$820 million for the fiscal years ended May 31, 2019 and 2018, respectively. Amounts of minimum future annual commitments under non-cancelable operating and capital leases in accordance with Topic 840 were as follows:

<i>(Dollars in millions)</i>	AS OF MAY 31, 2019		
	OPERATING LEASES	CAPITAL LEASES AND OTHER FINANCING OBLIGATIONS⁽¹⁾	TOTAL
Fiscal 2020	\$ 553	\$ 32	\$ 585
Fiscal 2021	513	34	547
Fiscal 2022	441	40	481
Fiscal 2023	386	37	423
Fiscal 2024	345	34	379
Thereafter	1,494	197	1,691
TOTAL	\$ 3,732	\$ 374	\$ 4,106

⁽¹⁾ Capital leases and other financing obligations include payments related to build-to-suit lease arrangements.

The following table includes the weighted average remaining lease terms, in years, and the weighted average discount rate used to calculate the present value of operating lease liabilities:

	AS OF MAY 31,
	2020
Weighted-average remaining lease term (years)	8.7
Weighted-average discount rate	2.4%

The following table includes supplemental cash and non-cash information related to operating leases:

	FISCAL YEAR ENDED	
	MAY 31, 2020	
<i>(Dollars in millions)</i>		
Cash paid for amounts included in the measurement of lease liabilities:		
Operating cash flows from operating leases	\$	532
Operating lease right-of-use assets obtained in exchange for new operating lease liabilities ⁽¹⁾	\$	705

⁽¹⁾ Excludes the amount initially capitalized in conjunction with the adoption of Topic 842.

NOTE 20 — ACQUISITIONS AND DIVESTITURES

ACQUISITIONS

During fiscal 2020, 2019 and 2018, the Company made multiple acquisitions focused on gaining new capabilities to fuel its Consumer Direct Offense strategy, serving consumers personally at a global scale. The impact of acquisitions, individually and in the aggregate, was not considered material to the Company's Consolidated Financial Statements.

DIVESTITURES

During the third quarter of fiscal 2020, as a result of the Company's decision to transition its wholesale and direct to consumer operating model in certain countries within its APLA operating segment, the Company signed definitive agreements to sell its NIKE Brand businesses in Brazil, Argentina, Chile and Uruguay to third-party distributors. Specifically, NIKE entered into agreements to sell its operations in Argentina, Chile and Uruguay to Grupo Axo and to sell substantially all of its operations in Brazil to Grupo SBF S.A., through its wholly-owned subsidiary. The Company will retain a small operation in Brazil focused on certain sports marketing assets, local manufacturing and Converse. These transactions are expected to close in the first half of fiscal 2021, with Grupo SBF S.A.'s transaction subject to Brazil Antitrust Authority approvals.

As a result of this decision, beginning in the third quarter of fiscal 2020, the related assets and liabilities of these entities were classified as held-for-sale and remain as such on the Consolidated Balance Sheets as of May 31, 2020, which consisted of the following:

- Assets of \$506 million, primarily consisting of \$264 million of *Inventories* and \$138 million of *Accounts receivable, net* which were reclassified to *Prepaid expenses and other current assets* on the Company's Consolidated Balance Sheets; and
- Liabilities of \$146 million, primarily consisting of \$85 million of *Accrued liabilities*, as well as \$49 million of *Accounts Payable*, which was reclassified to *Accrued liabilities* on the Company's Consolidated Balance Sheets.

As a result of meeting the criteria for held-for-sale classification, the Company recognized a non-recurring impairment charge of \$405 million within *Other (income) expense, net* on the Consolidated Statements of Income, classified within Corporate, and a corresponding allowance within *Accrued Liabilities* on the Consolidated Balance Sheets. This charge was primarily due to the anticipated release of non-cash cumulative foreign currency translation losses, which were included as part of the carrying value of the Argentina, Chile and Uruguay disposal groups when measuring for impairment. These losses will be reclassified from *Accumulated other comprehensive income (loss)* to *Net income* upon closure of the transaction. For more information see Note 6 — Fair Value Measurements.

On October 29, 2019, the Company signed a definitive agreement to sell the assets and liabilities of its wholly-owned subsidiary brand, Hurley. The transaction closed on December 6, 2019, and the impacts of the divestiture are not considered material to the Company.

NOTE 21 — SUBSEQUENT EVENTS

In June 2020, the Company announced a new digitally empowered phase of its Consumer Direct Offense, the Consumer Direct Acceleration. As a result, on July 22, 2020, management announced a series of leadership and operating model changes to streamline and speed up strategic execution for the Company. The changes are expected to lead to a net loss of jobs, resulting in pre-tax, one-time employee termination costs of approximately \$200 million to \$250 million, which is expected to be incurred primarily during the first half of fiscal 2021, in the form of cash expenditures.

2020 FORM 10-K 94

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

There has been no change of accountants nor any disagreements with accountants on any matter of accounting principles or practices or financial statement disclosure required to be reported under this Item.

ITEM 9A. CONTROLS AND PROCEDURES

We maintain disclosure controls and procedures that are designed to provide reasonable assurance that information required to be disclosed in our Securities Exchange Act of 1934, as amended ("the Exchange Act") reports is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow for timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management is required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

We carry out a variety of ongoing procedures, under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, to evaluate the effectiveness of the design and operation of our disclosure controls and procedures. Based on the foregoing, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective at the reasonable assurance level as of May 31, 2020.

"Management's Annual Report on Internal Control Over Financial Reporting" is included in Item 8 of this Report.

We are continuing several transformation initiatives to centralize and simplify our business processes and systems. These are long-term initiatives, which we believe will enhance our internal control over financial reporting due to increased automation and further integration of related processes. We will continue to monitor our internal control over financial reporting for effectiveness throughout these transformation initiatives.

There have not been any changes in our internal control over financial reporting during our most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

No disclosure is required under this item.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

The information required by Item 401 of Regulation S-K regarding directors is included under “NIKE, Inc. Board of Directors” in the definitive Proxy Statement for our 2020 Annual Meeting of Shareholders and is incorporated herein by reference. The information required by Item 401 of Regulation S-K regarding executive officers is included under “Information about our Executive Officers” in Item 1 of this Report. The information required by Item 406 of Regulation S-K is included under “Corporate Governance — Board Structure and Responsibilities — Code of Conduct” in the definitive Proxy Statement for our 2020 Annual Meeting of Shareholders and is incorporated herein by reference. The information required by Items 407(d)(4) and (d)(5) of Regulation S-K regarding the Audit & Finance Committee of the Board of Directors is included under “Corporate Governance — Board Structure and Responsibilities — Board Committees” in the definitive Proxy Statement for our 2020 Annual Meeting of Shareholders and is incorporated herein by reference.

ITEM 11. EXECUTIVE COMPENSATION

The information required by Items 402, 407(e)(4) and 407(e)(5) of Regulation S-K regarding executive compensation is included under “Corporate Governance — Director Compensation for Fiscal 2020,” “Compensation Discussion and Analysis,” and “Stock Ownership Information — Transactions with Related Persons — Compensation Committee Interlocks and Insider Participation,” in the definitive Proxy Statement for our 2020 Annual Meeting of Shareholders and is incorporated herein by reference.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

The information required by Item 201(d) of Regulation S-K is included under “Compensation Discussion and Analysis — Executive Compensation Tables — Equity Compensation Plan Information” in the definitive Proxy Statement for our 2020 Annual Meeting of Shareholders and is incorporated herein by reference. The information required by Item 403 of Regulation S-K is included under “Stock Ownership Information — Stock Holdings of Certain Owners and Management” in the definitive Proxy Statement for our 2020 Annual Meeting of Shareholders and is incorporated herein by reference.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS AND DIRECTOR INDEPENDENCE

The information required by Items 404 and 407(a) of Regulation S-K is included under “Stock Ownership Information — Transactions with Related Persons” and “Corporate Governance — Individual Board Skills Matrix — Director Independence” in the definitive Proxy Statement for our 2020 Annual Meeting of Shareholders and is incorporated herein by reference.

ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES

The information required by Item 9(e) of Schedule 14A is included under “Audit Matters — Ratification of Appointment of Independent Registered Public Accounting Firm” in the definitive Proxy Statement for our 2020 Annual Meeting of Shareholders and is incorporated herein by reference.

PART IV

* *Management contract or compensatory plan or arrangement.*

The Exhibits filed herewith do not include certain instruments with respect to long-term debt of NIKE and its subsidiaries, inasmuch as the total amount of debt authorized under any such instrument does not exceed 10 percent of the total assets of NIKE and its subsidiaries on a consolidated basis. NIKE agrees, pursuant to Item 601(b)(4)(iii) of Regulation S-K, that it will furnish a copy of any such instrument to the SEC upon request.

Upon written request to Investor Relations, NIKE, Inc., One Bowerman Drive, Beaverton, Oregon 97005-6453, NIKE will furnish shareholders with a copy of any Exhibit upon payment of \$0.10 per page, which represents our reasonable expenses in furnishing Exhibits.

SCHEDULE II — VALUATION AND QUALIFYING ACCOUNTS

(Dollars in millions)

	BALANCE AT BEGINNING OF PERIOD	CHARGED TO COSTS AND EXPENSES	CHARGED TO OTHER ACCOUNTS ⁽¹⁾	WRITE- OFFS, NET	BALANCE AT END OF PERIOD
Sales returns reserve					
For the fiscal year ended May 31, 2018	\$ 343	\$ 640	\$ 5	\$ (658)	\$ 330
For the fiscal year ended May 31, 2019 ⁽²⁾	734	1,959	(30)	(1,820)	843
For the fiscal year ended May 31, 2020	843	1,941	(31)	(2,071)	682

(1) Amounts included in this column primarily relate to foreign currency translation.

(2) As a result of the adoption of ASC Topic 606 during the first quarter of fiscal 2019, an asset for the estimated cost of inventory for expected products returns is now recognized separately from the liability for sales returns reserves, which is presented above.

ITEM 16. FORM 10-K SUMMARY

None.

Consent of Independent Registered Public Accounting Firm

We hereby consent to the incorporation by reference in the Registration Statement on Form S-8 (Nos. 033-63995, 333-63581, 333-63583, 333-68864, 333-68886, 333-71660, 333-104822, 333-117059, 333-133360, 333-164248, 333-171647, 333-173727, 333-208900 and 333-215439) and the Registration Statement on Form S-3 (No. 333-232770) of NIKE, Inc. of our report dated July 24, 2020 relating to the financial statements and financial statement schedule and the effectiveness of internal control over financial reporting, which appears in this Form 10-K.

SUBSIDIARIES OF THE REGISTRANT

Entity Name	Jurisdiction of Formation
NIKE European Operations Netherlands B.V.	Netherlands
NIKE Retail Services, Inc.	Oregon
NIKE Sports (China) Ltd.	People's Republic of China
NIKE USA, Inc.	Oregon

Pursuant to Item 601(b)(21) of Regulation S-K, we have omitted some subsidiaries that, considered in the aggregate as a single subsidiary, would not constitute a significant subsidiary as of May 31, 2020 under Rule 1-02(w) of Regulation S-X.

**Certification of Chief Executive Officer
Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002**

I, John J. Donahoe II, certify that:

1. I have reviewed this annual report on Form 10-K of NIKE, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
