## Werner® Earns Two 2025 Quest for Quality Awards from Logistics Management

2025-08-19

OMAHA, Neb.--(BUSINESS WIRE)-- **Werner Enterprises, Inc.** (Nasdaq: WERN), a premier transportation and logistics provider, has been honored with two of Logistics Management's 2025 Quest for Quality Awards — in the Truckload: Dry Freight Carriers category and the Third-Party Logistics (3PL) Companies: Transportation Management category.

The Quest for Quality Awards are among the most respected benchmarks of customer satisfaction and performance in the transportation and logistics industry. Winners are determined entirely by Logistics Management readers — qualified logistics and supply chain professionals who interact with service providers daily — and rated on key service attributes for each category.

Carriers in the Truckload: Dry Freight Carriers category are evaluated on five key criteria: on-time performance, value, information technology, customer service and equipment and operations. Providers in the 3PL: Transportation Management category are rated on carrier selection and negotiation, order fulfillment, transportation distribution, inventory management and logistics information systems.

"These recognitions reflect our consistent focus on safe, reliable, on-time delivery and strong value, even in a challenging freight market," said Werner's Executive Vice President and Chief Commercial Officer, Craig Callahan. "By aligning the right carriers, technology and processes, and leveraging our professional drivers, operations teams and multi-modal expertise, we keep freight moving dependably while helping customers optimize performance across their entire supply chain."

This year's winners were determined through an extensive six-month research process conducted by the Peerless Research Group. More than 3,000 logistics and supply chain decision-makers participated in the survey, rating

carriers and third-party logistics providers who delivered exceptional service and value over the past year.

Werner's diverse, multi-modal portfolio — including truckload, dedicated, intermodal, final mile, cross-border and more — offers customers the flexibility to adapt to market conditions and tailor transportation strategies to their specific needs. By combining this range of capabilities with deep industry expertise, Werner delivers scalable, reliable and efficient solutions to keep supply chains moving.
