

NEWS RELEASE

Werner® Honored With FreightWaves 2026 Fraud Fighters Award for Industry-Leading Supply Chain Security Innovation

2026-06-09

OMAHA, Neb.--(BUSINESS WIRE)-- Werner Enterprises, Inc. (Nasdaq: WERN), a premier transportation and logistics provider, was recently named a winner of the prestigious FreightWaves 2026 Fraud Fighters Award. Werner was selected as one of only five companies in the Logistics Operations category for delivering innovative, effective solutions to combat escalating threats like freight fraud and double brokering.

The annual awards recognize organizations demonstrating exceptional, measurable results in safeguarding the supply chain. Werner was specifically celebrated for its Secure Ratecon Protocol, an advanced dual-protection framework engineered directly into its best-of-breed carrier platform, Werner Bridge, safeguarding both carrier operations and network integrity.

"We are incredibly proud to receive the Fraud Fighters Award, which highlights what happens when technology innovation meets elite operational execution," said Werner's Executive Vice President and Chief Information Officer, Daragh Mahon. "While stringent carrier vetting is our baseline, our technology and operations teams collaborated to build a far more secure, controlled data environment on top of our Werner Bridge platform. In a market where trust and peace of mind matter more than ever, this recognition reflects the relentless discipline and hard work across our entire organization."

To achieve this standard of network security, Werner re-engineered how data flows during the critical load-tendering process. By eliminating vulnerable email attachments and enforcing strict, hardware-token multi-factor authentication (MFA), Werner has successfully eliminated double-brokering interception risks. Since deployment,

Werner has achieved an incredible security milestone: recording zero trailer thefts involving compromised carrier email accounts.
