Werner® Named a 2025 Green Supply Chain Partner by Inbound Logistics for 13th Straight Year

2025-07-08

OMAHA, Neb.--(BUSINESS WIRE)-- **Werner Enterprises, Inc.** (Nasdaq: WERN), a premier transportation and logistics provider, has once again been named a Green Supply Chain Partner by Inbound Logistics, marking the 13th consecutive year the company has earned this recognition. The annual list highlights 75 companies demonstrating a deep and ongoing commitment to sustainability in global supply chains.

“Being named a Green Supply Chain Partner for the 13th year in a row is an honor that reflects the hard work and vision of our entire team,” said Werner’s Senior Vice President of One-Way Network and Innovation Council Leader, Chad Dittberner. “At Werner, sustainability isn’t just a goal; it’s embedded in how we operate every day. From investing in innovative fleet technologies to setting ambitious emissions targets, we’re driving meaningful progress and helping build a greener future for our industry.”

Werner’s commitment to reducing CO₂ emissions by 55% by 2035 is supported by a broad portfolio of initiatives focused on alternative fuels and advanced technologies. Across its operations, the company uses renewable natural gas, biodiesel blends and renewable diesel—lowering carbon impact today while building a foundation for a more sustainable future.

In addition, Werner has deployed a range of innovative fleet technologies, including compressed natural gas engines, Class 8 battery electric vehicles, a hydrogen fuel cell truck and aerodynamic enhancements across its trailers. The company also actively participates in the EPA’s SmartWay Transport Partnership and works exclusively with SmartWay-certified carriers to drive greater environmental efficiency across its network.

These efforts reflect Werner’s belief that environmental responsibility, operational excellence and long-term value

creation are closely connected. Making strategic investments reducing emissions and increasing efficiency also contributes to healthier communities and a more sustainable industry.
