

## MANAGEMENT'S DISCUSSION AND ANALYSIS

For the six months ended June 30, 2020, our total capital expenditures on income properties were largely in line with the \$20.0 million normalized capital expenditures but increased by \$4.1 million over the same period last year primarily due to higher expenditures in Q1 2020 pre-pandemic as a result of expenditure timing.

For 2020, we currently maintain the \$40.0 million normalized maintenance capital expenditure guidance and will reassess it in the future quarters. Refer to the *Non-GAAP Measures* section of this MD&A for details on how estimates of normalized capital expenditures are determined for 2019 and 2020.

### Properties Under Development

RioCan's development program is an important component of its long-term growth strategy and is focused on well-located properties in the six major markets in Canada. Often, these are properties that RioCan already owns and are located directly on, or in proximity to, major transit lines such as the existing Toronto Transit Commission's subway lines or the Eglinton LRT line, which is currently under construction. Development opportunities also arise from the fact that retail centres are generally built with lot coverages of approximately 25% of the underlying lands and municipalities are supporting additional density particularly near major infrastructure investments. Considering that RioCan already owns the land for its portfolio of mixed-use redevelopment opportunities, these projects are expected to generate strong incremental returns and increase the Trust's net asset value.

The overall development environment in Canada is undergoing changes and development risks are becoming more prevalent. Refer to the *Business Overview, Outlook and Strategy, and Risks and Uncertainties* sections of this MD&A for discussions about the development environment and associated risks. Development risk management is essential to the Trust's successful implementation of its strategy. The Trust strategically and prudently manages its development risks as follows:

- RioCan undertakes developments selectively based on opportunities in its portfolio and within the major markets it focuses on.
- Development projects must be expected to generate appropriate risk-adjusted returns. The Trust will not commence construction until it has third-party market studies of the rental markets in the development areas and, where a large portion of the development has commercial space, the requisite leasing commitments pertaining to the commercial portion of the mixed-use developments are required.
- RioCan's well established and robust internal control framework ensures proper oversight over development approvals and construction management.
- RioCan uses a staggered approach in its development program to avoid unnecessary concentration of development projects in a single period of time to allocate risks and manage the Trust's capital. The staggered development approach also enables proper allocation of personnel resources and ensures that the Trust's experienced development team is at the appropriate scale, resulting in no overhead pressure for RioCan to take on development activities.
- RioCan utilizes strategic co-ownerships to reduce capital requirements and mitigate risks.
- RioCan often already owns the assets with development potential which are income producing. This allows the Trust to manage the timing of development starts, and if required, these assets can continue to generate income until the appropriate time to commence development is reached.
- RioCan's development team utilizes a variety of cost mitigation strategies, such as working with experienced construction managers early in the project design stage to validate that a project's constructability and efficiency is maximized, ensuring that soil and geotechnic conditions are known before breaking ground, that construction drawings are finalized to the furthest extent possible prior to commencing construction, and structuring construction management contracts such that the contracts are converted to fixed price contracts as soon as all of the scope is defined thus limiting cost escalations.
- The Trust's mixed-use residential development allows the Trust to access CMHC insured mortgages, which diversifies the Trust's funding sources and provides lower cost of debt.
- RioCan's developments are across numerous geographic markets, thus permitting diversification of market dynamics.

The Trust categorizes the projects within its development program as follows:

Category	Description
Greenfield Development	Projects on vacant land typically located in suburban markets that are being constructed or developed from the ground-up for future use as income producing properties (IPP or IPPs).
Urban Intensification	Projects at existing IPPs located in urban markets, which typically involve increasing the density or square footage of the properties and are often mixed-use projects.
Expansion and Redevelopment	Existing IPPs, or components thereof, that are being repositioned through redevelopment, which typically increases NOI by adding to the rentable area of the properties.

## MANAGEMENT'S DISCUSSION AND ANALYSIS

In addition to the above development categories, the Trust also owns vacant lands and other properties that could be used for future developments. Such vacant land and other properties are reported as "Development Lands and Other" under properties under development (PUD) in the *Estimated PUD Project Costs* section of this MD&A.

Management's current estimates and assumptions, as discussed throughout this *Properties Under Development* section of this MD&A, are subject to change. Such changes may be material to the Trust. RioCan's estimated NLA, estimated future project timing including estimated time to completion, estimated future development costs and estimated proceeds from disposition are based on assumptions which are updated regularly based on revised site plans, the cost tendering process and continuing tenant negotiations.

These assumptions, among other items, include the following: active construction and development projects permitted by various authorities under the current COVID-19 pandemic, access to job sites, the availability of labour and supplies, ability to attract anchor tenants, estimated NLA and tenant mix among rental, air rights sale, and condominiums/townhouses, the likelihood, timing and amount of future sales of air rights and land dispositions, tenant rents, building sizes, project completion timelines, availability and cost of construction financing and zoning approvals. Although the estimated development expenditures are based upon what management believes are reasonable assumptions, there can be no assurance that actual results will be consistent with these projections particularly under the current health crisis and development expenditures may, therefore, materially differ from management's current estimates. In addition, there is no assurance that all of these developments will be undertaken, and if they are, there is no assurance as to the mix of commercial and residential developments, the costs, the phasing of the projects, or the development yields to be achieved.

### Declaration of Trust and Financial Covenants

The provisions of the Trust's Declaration have the effect of limiting direct and indirect investments in greenfield developments and development properties held for resale (each net of related mortgage debt and mezzanine financing which funds the co-owners' share of such developments) to no more than 15% of total consolidated Unitholders' equity of the Trust, as determined under IFRS. As at June 30, 2020, RioCan's investments in greenfield development and residential inventory as a percentage of consolidated Unitholders' equity is 5.5% and, therefore, the Trust is in compliance with this restriction.

In addition, RioCan's revolving unsecured operating line of credit and non-revolving unsecured credit facilities agreements require the Trust to maintain certain financial covenants, one of which includes a more restrictive covenant as it pertains to the Trust's development activities. As of June 30, 2020, the Trust is in compliance with all financial covenants pursuant to the operating line of credit and credit facilities agreements including the one relating to the Trust's development activities. Refer to Note 24 of the Condensed Consolidated Financial Statements for further details.

### Development Pipeline

RioCan's development pipeline as at June 30, 2020 is estimated as follows:

(thousands of sq. ft.)	Number of Projects (ii)	Estimated Density (NLA) at RioCan's interest (i)					
		Total	PUD (iii)	Residential Inventory (iv)	Components of PUD		
					Commercial	Residential Rental	Air Rights Sale (x)
<b>A. Active projects with detailed cost estimates</b>							
Greenfield Development (v)	2	430	430	—	430	—	—
Urban Intensification (vi)	11	3,260	3,049	211	1,023	996	1,030
	<b>13</b>	<b>3,690</b>	<b>3,479</b>	<b>211</b>	<b>1,453</b>	<b>996</b>	<b>1,030</b>
Expansion & Redevelopment (vii)	10	133	133	—	133	—	—
<b>Subtotal</b>	<b>23</b>	<b>3,823</b>	<b>3,612</b>	<b>211</b>	<b>1,586</b>	<b>996</b>	<b>1,030</b>
<b>B. Active projects with cost estimates in progress(viii)</b>	<b>21</b>	<b>17,695</b>	<b>16,063</b>	<b>1,632</b>	<b>3,281</b>	<b>12,782</b>	<b>—</b>
<b>Total Active Projects</b>	<b>44</b>	<b>21,518</b>	<b>19,675</b>	<b>1,843</b>	<b>4,867</b>	<b>13,778</b>	<b>1,030</b>
<b>C. Future estimated density(ix)</b>	<b>17</b>	<b>21,144</b>	<b>20,964</b>	<b>180</b>	<b>2,194</b>	<b>18,770</b>	<b>—</b>
<b>Total development pipeline</b>	<b>61</b>	<b>42,662</b>	<b>40,639</b>	<b>2,023</b>	<b>7,061</b>	<b>32,548</b>	<b>1,030</b>

- (i) Estimated density across the various components of the development pipeline is expressed as NLA, which represents approximately 90% of Gross Floor Area (GFA) for residential rental and inventory developments. This conversion factor is an estimate, which is based on a number of assumptions including but not limited to, site plan approval, final building design and floor plans as well as the mix of commercial and residential space in a multi-use development project.
- (ii) Given the range of development activities and the multi-phase nature of the development projects included in the total development pipeline, a single investment property could have more than one project. Therefore, the number of projects shall not be viewed as equivalent to number of properties under development.
- (iii) PUD NLA includes NLA for air right sales in addition to commercial and residential rental NLA, but excludes NLA for condominiums and townhouse projects which are reported separately as Residential Inventory.
- (iv) Represents the density associated with the development of our residential condominiums and townhouse projects that are to be sold in the normal course of business upon project completion, not to be held for long-term capital appreciation or rental income. As such, the costs associated with

## MANAGEMENT'S DISCUSSION AND ANALYSIS

this NLA are treated as residential inventory under IFRS and are thus not reported as PUD, even though this NLA forms part of RioCan's development program and is included in the above estimated development pipeline. Condominium and townhouse developments are discussed under the *Residential Inventory* section of this MD&A.

- (v) Greenfield Development projects include approximately 0.2 million square feet that are currently IPP.
- (vi) Urban Intensification projects include approximately 0.2 million square feet that are currently IPP.
- (vii) Expansion and Redevelopment projects include approximately 48 thousand square feet of vacant NLA which was primarily former Sears space prior to its redevelopment.
- (viii) Active projects with cost estimates in progress include approximately 2.6 million square feet that are currently IPP.
- (ix) Future estimated density includes approximately 2.6 million square feet that are currently IPP.
- (x) Under IFRS, costs associated with air rights sales, which include, but are not limited to, the costs of underlying structure and infrastructure required for the closing of the air rights sales, are part of the costs of the properties under development. As a result, density related to air rights sales is included as part of the PUD square footage.

Approximately 5.6 million square feet of NLA out of the total estimated 42.7 million square feet development pipeline as of June 30, 2020 is existing NLA which is currently income producing, resulting in net incremental density estimated at 37.1 million square feet as of June 30, 2020. When compared to the Trust's development pipeline as of December 31, 2019, the development pipeline has increased by 13.6 million square feet despite development completions, primarily in the future estimated density category. The increases were mainly due to the inclusion of all future phases of several existing projects including an additional 6.9 million square feet at RioCan Colossus Centre in Vaughan, Ontario, 1.7 million square feet at Millcroft Shopping Centre in Burlington, Ontario, 0.8 million square feet at RioCan Scarborough Centre in Scarborough, Ontario, and nearly 1.0 million square feet at Strawberry Hill in Surrey, British Columbia. In addition, five properties, namely 2323 Yonge Street, 2345 Yonge Street, 2990 Eglinton Avenue East, and 3180 Dufferin Street, all in Toronto, Ontario and RioCan Centre Kirkland, in Montreal, Quebec were added to the development pipeline. ePlace, King Portland Centre and Frontier were removed from the pipeline during the period as they are completed.

A key milestone of the development process is obtaining zoning approval. The following table details the Trust's development pipeline (at RioCan's interest) by zoning status. As of the date of this MD&A, of the total estimated NLA in the Trust's current development pipeline, 14.8 million square feet or 34.7% have zoning approvals and an additional 6.7 million square feet or 15.7% have zoning applications submitted. Zoned NLA increased by 0.2 million square feet when compared to the year ended December 31, 2019 primarily due to the increase in density at Strawberry Hill in Surrey, British Columbia and RioCan Durham Centre in Ajax, Ontario, partially offset by the exclusion of ePlace, King Portland Centre and Frontier from the development pipeline.

			Estimated Density (NLA) at RioCan's interest (i)					
<i>(thousands of sq. ft., unless otherwise noted)</i>	Number of Projects	% of square footage zoned	Total	PUD (ii)	Residential Inventory (iii)	Components of PUD		
						Commercial	Residential Rental	Air Rights Sale
Zoning approved	38	34.7%	14,800	13,403	1,397	4,249	8,124	1,030
Zoning applications submitted	6	15.7%	6,718	6,272	446	618	5,654	—
Future estimated density	17	49.6%	21,144	20,964	180	2,194	18,770	—
<b>Total development pipeline</b>	<b>61</b>	<b>100.0%</b>	<b>42,662</b>	<b>40,639</b>	<b>2,023</b>	<b>7,061</b>	<b>32,548</b>	<b>1,030</b>

- (i) Estimated density across the various components of the development pipeline is expressed as NLA, which represents approximately 90% of GFA for residential rental and inventory developments. This conversion factor is an estimate, which is based on a number of assumptions including but not limited to, site plan approval, final building design and floor plans as well as the mix of commercial and residential space in a multi-use development project.
- (ii) PUD NLA includes NLA for air right sales in addition to commercial and residential rental NLA, but excludes NLA for condominiums and townhouse projects which are reported separately as Residential Inventory.
- (iii) Represents the density associated with the development of our residential condominiums and townhouse projects that are to be sold in the normal course of business upon project completion, not to be held for long-term capital appreciation or rental income. As such, the costs associated with this NLA are treated as residential inventory under IFRS and are thus not reported as PUD, even though this NLA forms part of RioCan's development program and is included in the above estimated development pipeline. Condominium and townhouse developments are discussed under the *Residential Inventory* section of this MD&A.

## MANAGEMENT'S DISCUSSION AND ANALYSIS

With the exception of one small redevelopment project, all of the mixed-use residential projects are located in the six major markets and are typically located in the vicinity of existing or planned substantive transit infrastructure with 73.0% of the development pipeline located in the GTA.

<i>(thousands of sq. ft., unless otherwise noted)</i>	Estimated Density (NLA) at RioCan's Interest		
	Number of projects	NLA	% of total NLA
Six Major Markets			
Greater Toronto Area	39	31,141	73.0%
Ottawa	8	2,584	6.0%
Calgary	5	3,042	7.1%
Montreal	2	1,353	3.2%
Edmonton	2	3,074	7.2%
Vancouver	2	1,431	3.4%
Total Six Major Markets	58	42,625	99.9%
Other (i)	3	37	0.1%
<b>Total development pipeline</b>	<b>61</b>	<b>42,662</b>	<b>100.0%</b>

(i) Relates to other smaller redevelopment projects.

### **Annual Development Spending**

RioCan's staggered development program provides the flexibility to adjust development starts to conserve capital and enhance the Trust's liquidity under unprecedented circumstances such as the current health pandemic. In Q1 2020, the Trust put a temporary hold on development spend related to some new or early stage projects. While the Trust remains on course with its long-term development strategy, RioCan's development spend for 2020 is estimated to be reduced by \$100 million to the \$400 million range, net of expected cost recoveries and air rights sales. Where there are underlying existing retail assets, we are not hurt by adjusting a start date as the retail tenants in place will continue to pay rent, albeit diminished. Refer to *Properties under Development Continuity* section of this MD&A for a discussion on the higher development spending guidance for the year relative to last quarter's guidance.

This annual development expenditure estimate includes costs applicable to both active PUD projects with detailed cost estimates and residential inventory projects. This represents management's best estimates as of June 30, 2020 and is subject to change due to potential changes in various underlying factors as noted earlier in this MD&A.

Overall, the Trust targets to keep the total IFRS value of PUD and residential inventory on the consolidated balance sheet as a percentage of consolidated gross book value of assets to be around 10% (except for short-term fluctuations as shown in the current quarter as large projects are being completed), despite the maximum of 15% permitted under the Trust's revolving unsecured operating line of credit and non-revolving unsecured credit facilities agreements. As of June 30, 2020, this metric was 10.7%. Refer to Note 24 of the Condensed Consolidated Financial Statements for additional details. The increase in this metric from the previous quarter was driven by development progress and completion timing and the \$451.7 million fair value loss this quarter as a result of the pandemic.

The Trust has been funding and will continue to fund its development pipeline primarily through proceeds from asset pruning (dispositions), sales proceeds from residential inventory developments or air rights sales, strategic development partnerships as well as retained earnings or excess cash flows after maintenance capital expenditures and distributions have been paid.

### **Estimated PUD Project Costs**

RioCan's share of estimated PUD project costs as of June 30, 2020 are summarized in the following table, which includes estimated costs for the 23 active PUD projects with detailed cost estimates (Category A as shown in the Development Pipeline table earlier), plus the current carrying costs of the development lands and other, net of projected proceeds from dispositions including air rights sales. Costs relating to condominiums and townhouse developments are excluded in the following table as they are included in *Residential Inventory* in the Condensed Consolidated Financial Statements and in this MD&A.

## MANAGEMENT'S DISCUSSION AND ANALYSIS

(thousands of dollars or thousands of sq. ft.)	Number of Projects	At RioCan's Interest					
		Total PUD NLA (i)	Total Estimated Costs	Costs Incurred to Date			Estimated PUD Costs to Complete
				Completed (IPP)	PUD	Total	
Greenfield Development	2	430	\$ 184,535	\$ 53,177	\$ 77,941	\$ 131,118	\$ 53,417
Urban Intensification	11	3,049	1,820,874	103,866	873,025	976,891	843,983
	13	3,479	2,005,409	157,043	950,966	1,108,009	897,400
Expansion & Redevelopment (iv)	10	133	87,953	—	61,753	61,753	26,200
<b>Active projects with detailed cost estimates</b>	<b>23</b>	<b>3,612</b>	<b>\$ 2,093,362</b>	<b>\$ 157,043</b>	<b>\$ 1,012,719</b>	<b>\$ 1,169,762</b>	<b>\$ 923,600</b>
Development Lands and Other (ii)		—	343,612	—	343,612	343,612	—
Projected proceeds from dispositions (iii)		—	(152,220)	—	—	—	(152,220)
<b>Total</b>			<b>\$ 2,284,754</b>	<b>\$ 157,043</b>	<b>\$ 1,356,331</b>	<b>\$ 1,513,374</b>	<b>\$ 771,380</b>
<b>Fair Value to Date</b>				<b>\$ 174,616</b>	<b>\$ 1,435,622</b>	<b>\$ 1,610,238</b>	

- (i) Total PUD NLA includes NLA from commercial, residential rental and air rights sales and excludes NLA from residential inventory.
- (ii) Development lands and other includes excess land and other properties that could be used for future developments.
- (iii) Represents conditional land and air right sales that the Trust intends to sell instead of holding for long-term income, which management considers to be reductions to its overall development costs.
- (iv) Expansion and Redevelopment projects tend to be shorter in duration and smaller in size compared to Greenfield and Urban Intensification projects, and generally pertain to the redevelopment of individual unit(s) at a property. Once the redevelopment of the individual unit(s) has/have been completed, the NLA and associated costs are transferred to IPP and no longer included in the development pipeline or development costs, resulting in nil completed IPP in this table.

Total estimated project costs include the current carrying costs of development lands and other, net of estimated proceeds from land and air rights dispositions. Total estimated project costs include land costs measured at fair value of the land or existing IPP upon transfer to PUD, soft and hard construction costs, external leasing costs, tenant inducements, construction and development management fees, and capitalized interest and other carrying costs, as well as capitalized development staff compensation and other expenses.

Total estimated costs for active projects with detailed cost estimates as of June 30, 2020 decreased by \$293.9 million when compared to December 31, 2019. This decrease was primarily due to the removal of ePlace, King Portland Centre and Frontier from total PUD costs as they are completed, partially offset by the addition of the retail and rent replacement units portion of the Yorkville Project.

The above total estimated development costs as at June 30, 2020 are further broken down by committed and non-committed spending as follows:

(thousands of dollars)	At RioCan's Interest				
	Total Estimated Costs	Costs Incurred to Date			Estimated PUD Costs to Complete
		Completed (IPP)	PUD	Total	
Committed (i)	\$ 1,941,142	\$ 157,043	\$ 1,012,719	\$ 1,169,762	\$ 771,380
Non-committed	343,612	—	343,612	343,612	—
<b>Total</b>	<b>\$ 2,284,754</b>	<b>\$ 157,043</b>	<b>\$ 1,356,331</b>	<b>\$ 1,513,374</b>	<b>\$ 771,380</b>

- (i) A project is considered to be committed when all major planning issues have been resolved, anchor tenant(s) for the commercial components has/have been secured, and/or construction is about to commence or has commenced. Although a non-committed project may have a completed portion, the Trust is not committed to completing the remaining phase(s) of the project if it so decides in due course. Development Lands and Other are included in non-committed projects.

### Mixed-Use Residential Development

RioCan is committed to its residential development program despite the current COVID-19 health crisis, even though the longer-term impact of the pandemic is difficult to predict. Refer to the *Business Overview, Outlook and Strategy and Risks and Uncertainties* sections of this MD&A for more details.

RioCan targets to develop approximately 10,000 residential rental units over the next decade. RioCan has currently identified a number of properties, as summarized in the following table, some of which are actively being developed and others that are considered to be strong possible intensification opportunities. This summary does not include Greenfield Development and Urban Intensification projects that have commercial components only.

# MANAGEMENT'S DISCUSSION AND ANALYSIS

					Estimated Density (NLA) at RioCan's interest (i)					
					PUD Components					
(thousands of sq. ft.)	Locations	RioCan Ownership % (Partner)	Total NLA at 100%	Total	PUD (ii)	Residential Inventory (iii)	Commercial	Residential Rental	Air Rights Sale

## MANAGEMENT'S DISCUSSION AND ANALYSIS

- (i) Estimated density across the various components of the development pipeline is expressed as NLA, which represents approximately 90% of GFA for residential rental and inventory developments. This conversion factor is an estimate, which is based on a number of assumptions including but not limited to, site plan approval, final building design and floor plans as well as the mix of commercial and residential space in a multi-use development project.
- (ii) PUD NLA includes NLA for air right sales in addition to commercial and residential rental NLA, but excludes NLA for condominiums and townhouse projects which are reported separately as Residential Inventory.
- (iii) Represents the density associated with the development of residential condominiums and townhouse projects.
- (iv) As at the date of this MD&A, RioCan has obtained final zoning approvals for the development of these properties. The above table includes only mixed-use residential development projects and thus does not include Greenfield Development and Expansion and Redevelopment projects that do not have residential components. As a result, the Trust has more projects with zoning approvals than what is included in this table.
- (v) Active mixed-use residential projects with detailed cost estimates include approximately 0.2 million square feet that are currently IPP.
- (vi) Active mixed-use projects with cost estimates in progress include approximately 2.6 million square feet that are currently IPP.
- (vii) Future estimated density includes approximately 2.6 million square feet that is currently IPP.
- (viii) Excludes Phase One of Windfields Farm Commercial which includes 0.1 million square feet of commercial space. Refer to the *Greenfield Development* section of this MD&A for further details.
- (ix) During Q3 2019, RioCan entered into a firm agreement to sell to Killam a 50% interest in an approximately 1.45 acre discrete portion of Elmvale Acres which is expected to close early in the third quarter of 2020 as severance of the land was obtained.

Mixed-use residential projects account for approximately 98.7% or 42.1 million square feet of NLA of the Trust's total estimated development pipeline, of which 14.2 million square feet currently have zoning approvals, 6.7 million square feet currently have zoning applications submitted and 21.1 million square feet represent sites with future density. In comparison to Q4 2019 mixed-use residential projects increased by 13.7 million square feet due to similar factors as explained earlier for the increase in the entire development pipeline.

Residential developments including rental, air rights sales, and residential inventory account for 83.4% or 35.6 million square feet of the Trust's current development pipeline.

### **Properties under Development Continuity**

The change in the IFRS consolidated net carrying amount is as follows. The development expenditures during the quarter increased relative to Q2 last year because of the changes in the number of active construction projects. Development expenditures during the quarter was higher than the previous quarter because all the active construction projects continued during the quarter despite the pandemic based on government regulations. The Trust was able to regain productivity on its projects following a short slow down at the beginning of the pandemic. Such productivity gains are expected to reduce the risk of future costs escalations resulting from longer construction periods. In some cases, our tenants with committed leases want the Trust to proceed with the projects despite the pandemic as in the case of Windfields Farm Commercial. These reasons led to the higher annual development spending guidance than the last quarter's guidance. Refer to *Annual Development Spend* section of this MD&A.

<i>(thousands of dollars)</i>	Three months ended June 30		Six months ended June 30

### **Development Property Acquisitions**

There were no development property acquisitions during Q2 2020.

On March 19, 2020, RioCan acquired a 100% ownership interest in 2290 Lawrence Avenue East in Scarborough, Ontario for a purchase price of \$5.6 million, including transaction costs.

On March 5, 2020, RioCan acquired a 50% co-ownership interest in 3180 Dufferin Street in Toronto, Ontario for a purchase price of \$28.5 million, including transaction costs. This property is earmarked as a mixed-use redevelopment site with a potential 440,000 square feet (at 100%) of gross floor area and is adjacent to RioCan's 100% owned Dufferin Plaza which also has significant redevelopment potential. The redevelopments of the two sites will be coordinated in order to achieve efficiencies and potentially unlock Dufferin Plaza's redevelopment potential sooner.

## MANAGEMENT'S DISCUSSION AND ANALYSIS

### Development Property Dispositions

There were no development property dispositions during Q2 2020.

On March 31, 2020, RioCan completed the pre-agreed sale of a 100% interest in one-third of the air rights relating to the 5th & THIRD project in Calgary, Alberta, for sales proceeds of \$11.7 million as planned. The firm deal to sell the remaining two-thirds of the residential air rights strata parcel at 5th & THIRD is expected to close by the end of the year.

On February 19, 2020, RioCan sold one development property located in Laval, Quebec, for sales proceeds of \$10.0 million.

### Completed Developments in 2020

During the six months ended June 30, 2020, RioCan transferred \$54.6 million in costs to income producing properties pertaining to 137,000 square feet of completed development projects. A summary of RioCan's NLA completed during the period is as follows:

(thousands of sq. ft.)		NLA at RioCan's Interest			Tenants
		2020			
Property location	RioCan's % ownership	Total NLA	Q2	Q1	
<b>Urban Intensification</b>					
Brentwood Village (Brio)	50 %	72	4	68	Residential Tower, Papa's Grill, Cora's Breakfast, Denim & Smith
Fifth and Third East Village (5th & THIRD)	100 %	23	—	23	Olympia Liquor
<b>Total Urban Intensification</b>		<b>95</b>	<b>4</b>	<b>91</b>	
<b>Expansion and Redevelopment</b>					
Garden City Shopping Centre	100 %	26	—	26	Michaels, Popeyes Louisiana Chicken, Qdoba Mexican Eats
Kennedy Commons	50 %	10	—	10	QuanU Furniture
RioCan West Ridge Place	100 %	4	—	4	State & Main
1910 Bank Street	100 %	2	—	2	Starbucks
<b>Total Expansion and Redevelopment</b>		<b>42</b>	<b>—</b>	<b>42</b>	
<b>Total Development Completion</b>		<b>137</b>	<b>4</b>	<b>133</b>	

For 2020, the Trust estimates to complete 447,034 square feet of developments, which will lead to \$350.7 million in cost transfers from PUD to IPP and \$14.6 million of incremental NOI upon project stabilization.

For 2021, the Trust estimates to complete 334,424 square feet of developments, which will lead to \$221.9 million in cost transfers from PUD to IPP and \$9.9 million of incremental NOI upon project stabilization.

The above project completion estimates have taken into account the effect of the current pandemic based on management's best estimate from information currently available. The cost transfers estimated above reflect gross IFRS costs net of proceeds from sales of air rights. They are not net of applicable interim or fee income during the development period to arrive at net project costs, which RioCan uses in estimating a project's development yield.

## MANAGEMENT'S DISCUSSION AND ANALYSIS

### Greenfield Development

As at June 30, 2020, RioCan currently has two active commercial greenfield development projects with detailed cost estimates as follows:

(thousands of dollars or thousands of sq. ft.)	RioCan's % Ownership	At RioCan's Interest									
		Total NLA Upon Project Completion			Total Estimated Costs	Costs incurred to date			Estimated PUD Costs to Complete	% Commercial Leased (i)	Anticipated Date of Development Completion
		Completed	PUD	Total		Completed	PUD	Total			
East Hills, Calgary, AB	40%	169	121	290	\$ 110,783	\$ 53,177	\$ 38,170	\$ 91,347	\$ 19,436	60%	2022
Windfields Farm Commercial Phase One, Oshawa, ON	100%	—	140	140	73,752	—	39,771	39,771	33,981	68%	2021
<b>Total Estimated PUD Costs</b>		<b>169</b>	<b>261</b>	<b>430</b>	<b>\$ 184,535</b>	<b>\$ 53,177</b>	<b>\$ 77,941</b>	<b>\$ 131,118</b>	<b>\$ 53,417</b>		
<b>Fair Value to date</b>						<b>\$ 53,523</b>	<b>\$ 62,494</b>	<b>\$ 116,017</b>			

(i) Leasing activity includes leasing that is conditional on receiving municipal approvals and meeting construction deadlines. The percentage of commercial leasing activity is as at July 28, 2020.

Windfields Farm is a multi-phase, mixed-use project that includes commercial and residential uses. Phase One of the commercial component of the project has detailed cost estimates approved and is therefore included in the above table. Further details of the remaining components of the Windfields Farm project are included in the *Mixed-Use Residential Development* and *Residential Inventory* sections of this MD&A.

As of the release date of this MD&A, approximately 270,000 square feet of the above greenfield development NLA has committed leases, which includes tenants that have taken possession of the space, at a weighted average net rental rate of approximately \$22.33 per square foot.

### Urban Intensification

A focus within our development growth strategy is urban intensification, which is the category for our residential mixed-use and commercial development program. The Trust currently has 11 active urban intensification projects with detailed cost estimates that will generate approximately 3.0 million square feet of NLA at RioCan's interest upon completion over the next five years, including air rights that have been or are expected to be sold. Excluding such air rights, these 11 active urban intensification projects are expected to generate approximately 2.0 million square feet of estimated NLA. Our urban intensification program currently is focused on properties located in densely populated areas in the urban cores of Toronto, Ottawa and Calgary.

## MANAGEMENT'S DISCUSSION AND ANALYSIS

A summary of our urban intensification projects with detailed cost estimates as at June 30, 2020 is as follows:

(thousands of dollars or thousands of sq. ft.)	RioCan's % Ownership	At RioCan's Interest									
		Total PUD NLA Upon Project Completion			Total Estimated Costs	Costs incurred to date			Estimated PUD Costs to Complete	% Commercial Leased (i)	Anticipated Date of Development Completion
		Completed	PUD	Total		Completed	PUD	Total			
Brentwood Village (Brio), Calgary, AB (iv)	50 %	72	—	72	\$ 38,500	\$ 36,891	\$ —	\$ 36,891	\$ 1,609	66%	2020

Gloucester - Phase Two (Latitude), Ottawa, ON (iv)	50 %	—	80	80	47,042	—	19,045	19,045	27,997	n/a	2021
College & Manning (Strada), Toronto, ON (iv)	50 %	27	27	54	42,129	9,123	18,248	27,371	14,758	91%	2021
The Well, Toronto, ON (iii) (iv) (v)	50% of commercial 40% of residential air rights	—	1,198	1,198	887,019	—	460,246	460,246	426,773	84%	2021-2023
The Well - (FourFifty The Well), Toronto, ON (iv)	50 %	—	196	196	142,591	—	9,784	9,784	132,807	n/a	2023
Yonge Sheppard Centre Residential (Pivot), Toronto, ON (iv)	100 %	—	258	258	237,279	—	210,202	210,202	27,077	n/a	2020
Elmvale Acres - Phase One (Luma), Ottawa, ON (iv) (vi)	100 %	—	136	136	86,372	—	25,490	25,490	60,882	n/a	2022
Westgate - Phase One (Rhythm), Ottawa, ON (iv)	100 %	—	165	165	97,475	—	17,493	17,493	79,982	n/a	2023
<b>Total Estimated Costs (ii)</b>		<b>447</b>	<b>2,602</b>	<b>3,049</b>	<b>\$1,820,874</b>	<b>\$ 103,866</b>	<b>\$873,025</b>	<b>\$ 976,891</b>	<b>\$ 843,983</b>		
<b>Fair Value to date</b>						<b>\$ 121,093</b>	<b>\$942,163</b>	<b>\$1,063,256</b>			

- (i) Leasing activity includes leasing that is conditional on receiving municipal approvals and meeting construction deadlines. Leasing shown in this table is calculated as a percentage of commercial square footage only as there is typically no pre-leasing for residential rental square footage. The percentage of commercial leasing activity is as at July 28, 2020.
- (ii) Total Estimated Costs exclude fair value gains of \$69.1 million for properties under development.
- (iii) The total estimated PUD costs for The Well are net of approximately \$61.0 million of recoverable costs at RioCan's interest relating to matters such as parking, parkland dedication, and an Enwave thermal energy tank based on the air rights sale agreement and other agreements in place. However, the estimated PUD costs have not deducted approximately \$75.6 million (at RioCan's interest) of estimated proceeds from the sale of residential air rights at the project. Net of the estimated proceeds from the sale of residential air rights, the total estimated PUD costs for The Well (at RioCan's interest) would be \$811.4 million. As of July 28, 2020, over 94% of the hard costs have been tendered and 93% awarded.
- (iv) These projects are committed, representing projects where all planning issues have been resolved, anchor tenant(s) has or have been secured, and/or construction is about to commence or has commenced.
- (v) The 84% leased at The Well is based on committed leases, including extension rights, for office space only. The Well project will be completed in phases with the first office possession occurring in 2021, the majority of the phases completing in 2022 and the final building completing in Q1 2023.
- (vi) During Q3 2019, RioCan entered into a firm agreement to sell to Killam a 50% interest in an approximately 1.45 acre discrete portion of Elmvale Acres which is expected to close early in the third quarter of 2020 as severance of the land was obtained.
- (vii) The Yorkville project (11 YV) consists of three components; the condominium tower, rental replacement units and retail. The NLA noted above represents only the rental replacement units and retail components of the project representing approximately 15% of the total area. For information on the condominium component refer to the *Residential Inventory* section in the MD&A.

As of the release date of this MD&A, approximately 642,000 square feet of the above urban intensification NLA under development has committed or in-place leases at a weighted average net rent rate of approximately \$34.56 per square foot. In comparison to the previous quarter, the committed or in-place lease square footage decreased by 135,000 square feet due to the exclusion of the completed project at King Portland Centre offset by additional leasing at the others sites.

## MANAGEMENT'S DISCUSSION AND ANALYSIS

### Expansion & Redevelopment

A summary of RioCan's expansion and redevelopment projects as at June 30, 2020 is as follows:

<i>(thousands of dollars or thousands of sq. ft.)</i>	RioCan's % Ownership	Total PUD NLA Upon Project Completion	Total Estimated Costs	At RioCan's Interest			Estimated PUD Cost to Complete
				Costs Incurred to Date			
				Costs Incurred to Date	Historical IPP Costs (iii)	Total	
Burlington Centre, Burlington, ON	50%	17	\$ 5,444	\$ 2,336	\$ 3,000	\$ 5,336	\$ 108
Five Points, Oshawa, ON	100%	10	6,969	1	2,680	2,681	4,288
RioCan West Ridge Place, Orillia, ON	100%	2	926	471	—	471	455
Place St Jean, Saint-Jean-sur-Richelieu, QC	100%	2	1,457	150	—	150	1,307
Tanger Outlets - Kanata, Kanata, ON	50%	18	10,304	4,039	3,626	7,665	2,639
Yonge Sheppard Centre Commercial, Toronto, ON	100%	33	44,289	33,326	—	33,326	10,963
1208 1216 Dundas Street East, Whitby, ON	100%	8	7,447	3,279	1,551	4,830	2,617
Properties with former Sears units (ii) - 3 projects		43	11,117	4,228	3,066	7,294	3,823
<b>Total Estimated PUD Costs (i)</b>		<b>133</b>	<b>\$ 87,953</b>	<b>\$ 47,830</b>	<b>\$ 13,923</b>	<b>\$ 61,753</b>	<b>\$ 26,200</b>
<b>PUD Fair Value to date</b>						<b>\$ 43,805</b>	

- (i) Total estimated PUD costs include carrying amounts transferred from IPP for redevelopment and exclude historical fair value losses of \$17.9 million.
- (ii) RioCan transferred carrying value associated with the spaces formerly occupied by Sears from IPP to PUD. The estimated PUD costs to complete are based upon various scenarios with the objective of developing these assets, such that RioCan can attract new tenants, achieve higher rents and improve the overall shopping centres.
- (iii) Historical costs were costs of IPP prior to the transfer to PUD.

The 28,000 square foot decrease in NLA during the six months ended June 30, 2020 from the prior year end was primarily due to the transfer of certain projects from PUD to IPP upon project completions.

# MANAGEMENT'S DISCUSSION AND ANALYSIS

## Residential Inventory

Residential inventory is comprised of properties acquired or developed which RioCan intends to dispose all or part of in the ordinary course of business, rather than hold on a long-term basis for capital appreciation or for rental income purposes. It is expected that the Trust will earn a return on these assets through a combination of (i) property operating income earned during the relatively short interim occupancy period, which will be included in net income, and (ii) sales proceeds.

(thousands of dollars or thousands of sq. ft., except where otherwise noted)	RioCan's Ownership % (Partner)	Condominium/Townhouse Units Upon Project Completion (at 100%)			Total Estimated Costs (ii)	At RioCan's Interest				Estimated Costs to Complete (ii)	Inventory gain (\$ millions)	Anticipated Date of Completion

- (i) Excludes a total of 755 condominium units at eCondos and Kingly for which all final closings have occurred.
- (ii) Selling commissions paid are included in prepaid and other assets and will be transferred to costs of sales upon buyer possession of the units. Such selling commissions are included in the total estimated costs and estimated costs to complete in the above table.
- (iii) These projects are included in the 2,600 condominium and townhouse units that are at various stages of active development referred to in the *Business Overview* section of this MD&A.
- (iv) Windfields Farm Future Phases represents the additional townhomes expected to be completed at the site.

The table above summarizes the key condominium projects that are currently under active development.

- **Yorkville (11 YV)** - This is a 50/25/25 joint venture project amongst RioCan, Metropia and Capital Development in the prestigious Toronto neighborhood of Yorkville, which consists of 586 luxury condominium units, retail uses and up to 81 residential rental replacement units. Demolition has commenced at the site during the quarter and the project is expected to be completed by fall of 2024. The property is 98.0% (574 units) pre-sold as of July 28, 2020 at an average price of over \$1,700 per square foot, exceeding initial expectations.

## MANAGEMENT'S DISCUSSION AND ANALYSIS

- **Windfields Farm** - This is a 50/50 joint venture project with Tribute Communities to develop a 31-acre residential component of lands at the Windfields Farm site located in Oshawa, Ontario, which includes 513 townhouses to be constructed in four phases and two phases of high rise condominiums.

U.C. Tower is a 503-unit high rise condominium tower project. As of July 28, 2020, the Trust and its partner Tribute Communities have entered into agreements to sell 87.1% (438 units) of all units, at an average sale price of approximately \$590 per square foot.

Sales at the 153-unit three storey townhouse development at U.C. Uptowns commenced late in the first quarter and agreements to sell 81.7% (125 units) of all units have been entered into as of July 28, 2020, up 28.1% since early May despite the pandemic. This project is selling at approximately \$309 per square foot.

- **Dufferin Plaza** - The current retail property is situated on 3.8 acres of land at the intersection of Dufferin Street and Apex Road in Toronto, Ontario in close proximity to Yorkdale Shopping Centre as well as major arterial roads, highways and public transit. The Trust plans to redevelop the property as a mixed-use property with approximately 608 units or a 417,000 square feet condominium tower and 32,000 square feet of retail. The project already has Official Plan approval.
- **Shoppers World Brampton Phase One** - Shoppers World Brampton is a large shopping centre on a 53-acre site located in Brampton, Ontario. It is located on Brampton's regional intensification corridor just outside of downtown Brampton. It currently has a large bus terminal and is designated as the end terminal for the new LRT line. The City of Brampton has identified it as the city's uptown western anchor suitable for large scale mixed-used development. RioCan has estimated the property to have 4.5 million square feet of future excess density, which will be developed through multiple phases. Phase One of the development is located on two acres of vacant land at the southwest corner of the property, consisting of an estimated 247 condominium units and 248 rental residential units across two 25-storey towers and a 20,000 square foot retail podium.
- **RioCan Leaside Centre** - Leaside Centre is located at the corner of Eglinton Avenue East and Laird Drive in Toronto, Ontario. It is situated in the affluent Leaside area of Toronto and is adjacent to a new station along the new Eglinton Crosstown LRT. The property will have a direct secondary station entrance for the LRT. RioCan is in the process of rezoning the site to include residential rental, condominium, retail and office. The project will have five buildings with a total estimated GFA of 1.5 million square feet. Building D of the project site, which represents approximately 33% of the total GFA, is anticipated to be residential condominium with 637 units and 9,795 square feet of retail.
- **Queensway** - This property is located at the corner of Islington Avenue and the Queensway in Toronto, Ontario and is minutes away from the TTC Bloor Line and Mimico GO station, as well as close to major highways. This project is envisioned to consist of two towers with 525 condominium units, 10,120 square feet of residential rental units and 40,000 square feet of retail.

The following table shows changes in the aggregate carrying value of RioCan's residential inventory:

<i>(thousands of dollars)</i>	Three months ended June 30		Six months ended June 30	
	2020	2019	2020	2019
Balance, beginning of period	\$ 124,421	\$ 180,561	\$ 108,956	\$ 206,123
Dispositions	(1,000)	(37,632)	(1,000)	(79,625)
Development expenditures	6,072	9,262	17,018	25,693
Transfers from investment properties	48,155	—	52,674	—
Balance, end of period	\$ 177,648	\$ 152,191	\$ 177,648	\$ 152,191

For the three and six months ended June 30, 2020, the Trust recognized residential inventory gains of \$0.2 million and \$0.5 million, respectively, from the closing of additional units at Windfields Farm U.C. Towns and the eCondos condominium corporation taking possession of their guest suites during the first quarter, partially offset by cost adjustments for Kingly.

### **Incremental Value Creation**

As of June 30, 2020, the Trust has recognized \$96.9 million of cumulative fair value gains for properties under development, including completed components. Most of the recognized cumulative fair value gains are related to the present value of the expected air rights sales at The Well and 5th & THIRD projects based on firm agreements or fair value gains upon sales of co-ownership interests to partners such as in the case of Sunnybrook Plaza. When compared to the prior quarter, cumulative fair value gains decreased by \$68.3 million mainly due to the transfer of King Portland Centre out of the development pipeline and the \$38.1 million of fair value losses recognized in the three months ended June 30, 2020 as a result of the pandemic.

The Trust anticipates realizing substantial net value creation from its additional 17.7 million square feet of excess density that are either zoned or with zoning application submitted as well as 21.1 million square feet of future density. As of June 30, 2020, nominal fair value gains or inventory gains have been recognized relating to these 38.8 million square feet of densities.
