This report summarizes the estimated exposures and investment performance on net investments managed by Third Point LLC for the monthly and year-to-date periods ending December 31, 2019. Corresponding results for our reinsurance operations are not available. Results of our net investments managed by Third Point LLC for such periods are based on information provided by our investment manager. This information has not been audited.

Effective August 31, 2018, we transitioned from our separately managed investment account structure to investing in the Third Point Enhanced LP. In addition, certain collateral assets supporting reinsurance contracts and certain other investment assets are managed by Third Point LLC. See additional information in our public filings with the Securities and Exchange Commission.

The estimated returns reflect the combined results of investments managed on behalf of Third Point Reinsurance Company Ltd. and Third Point Reinsurance (USA) Ltd. by Third Point LLC prior to the transition date of August 31, 2018 and the investment in the Third Point Enhanced LP and collateral assets and certain other investment assets from the date of transition. The estimated exposures reflect Third Point Enhanced LP investments as a percentage of total Third Point Reinsurance (Consolidated) assets managed by Third Point LLC.

- ¹ Investment Manager Firm AUM is non-inclusive of \$1.7B in collateral and fixed income assets managed for TP RE.
- ² Exposures are categorized in a manner consistent with the Investment Manager's classifications for portfolio and risk management purposes.
- ³ Gross P&L attribution does not reflect the deduction of management fees, performance allocations and any other expenses which may be incurred in the management of the fund. An investor's actual return will be reduced by such fees and expenses. See Part 2A of the Adviser's Form ADV for a complete description of the management fees, incentive fees and performance allocations customarily charged by Adviser. Net P&L is available upon request.
- ⁴ Primarily broad-based market and equity-based hedges.
- ⁵ Primarily currency hedges. Speculative rates and macro FX excluded from the exposure figures. Corresponding net exposure is 0.08% for rates and (3.7%) for FX. MTD and YTD P&L of Other includes attribution of speculative macro investments as well as residual gains and losses attributable to unhedged currency movements relative to USD.
- ⁶ Market capitalization reflects only those holdings that are exchange-listed equity or any synthetic equity with an underlying reference instrument market capitalization.
- ⁷ Beta-adjusted exposures are calculated relative to the S&P based on one-year of historical daily returns for USD denominated assets and weekly returns for foreign denominated assets. Dollar-adjusted exposures are calculated with option positions shown at current market value in lieu of delta-adjusted exposure.
- ⁸ Excludes any confidential positions, portfolio level hedges, and EU MAR related positions. Reflects single issuer positions only.
