CAUTIONARY STATEMENT ON FORWARD-LOOKING INFORMATION

Certain statements and information herein, including all statements that are not historical facts, contain forward-looking statements and forward-looking information within the meaning of applicable securities laws. The forward-looking statements include estimates, forecasts and statements as to the Company’s expectations of production and sales volumes, and expected timing of completion of project development at Cobre Panama and Enterprise and are subject to the impact of ore grades on future production, the potential of production disruptions (including at Cobre Las Cruces as a result of the land slippage in February 2019), capital expenditure and mine production costs, the outcome of mine permitting, other required permitting, the outcome of legal proceedings which involve the Company, information with respect to the future price of copper, gold, nickel, zinc, pyrite, cobalt, iron and sulphuric acid, estimated mineral reserves and mineral resources, First Quantum’s exploration and development program, estimated future expenses, exploration and development capital requirements, the Company’s hedging policy, and goals and strategies. Often, but not always, forward-looking statements or information can be identified by the use of words such as “plans”, “expects” or “does not expect”, “is expected”, “budget”, “scheduled”, “estimates”, “forecasts”, “intends”, “anticipates” or “does not anticipate” or “believes” or variations of such words and phrases or statements that certain actions, events or results “may”, “could”, “would”, “might” or “will” be taken, occur or be achieved.

With respect to forward-looking statements and information contained herein, the Company has made numerous assumptions including among other things, assumptions about continuing production at all operating facilities, the price of copper, gold, nickel, zinc, pyrite, cobalt, iron and sulphuric acid, anticipated costs and expenditures and the ability to achieve the Company’s goals. Forward-looking statements and information by their nature are based on assumptions and involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements, or industry results, to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements or information. These factors include, but are not limited to, future production volumes and costs, the temporary or permanent closure of uneconomic operations, costs for inputs such as oil, power and sulphur, political stability in Zambia, Peru, Mauritania, Finland, Spain, Turkey, Panama, Argentina and Australia, adverse weather conditions in Zambia, Finland, Spain, Turkey, Mauritania and Panama, labour disruptions, potential social and environmental challenges, power supply, mechanical failures, water supply, procurement and delivery of parts and supplies to the operations, and the production of off-spec material.

See the Company’s Annual Information Form for additional information on risks, uncertainties and other factors relating to the forward-looking statements and information. Although the Company has attempted to identify factors that would cause actual actions, events or results to differ materially from those disclosed in the forward-looking statements or information, there may be other factors that cause actual results, performances, achievements or events not to be anticipated, estimated or intended. Also, many of these factors are beyond First Quantum’s control. Accordingly, readers should not place undue reliance on forward-looking statements or information. The Company undertakes no obligation to reissue or update forward-looking statements or information as a result of new information or events after the date hereof except as may be required by law. All forward-looking statements and information made herein are qualified by this cautionary statement.

</tbody>
</table>

Las Cruces land slippage

- Lower production by approximately 25,000 tonnes in 2019 and 2020
- Currently processing stockpiles
- Phase 6 mining planned once regulatory approval has been received

Law 9 - Panama

- Ongoing issue
- Working closely with government to resolve
- Does not impact our ability to commission, ramp-up and operate
GROWTH IN PRODUCTION

Gold production* 2019E – 185,000 ozs
*Excludes production form Cobre Panama

Zinc production 2019E – 12,000 tonnes

2018A Production by Region
- Zambia 79%
- Spain 8%
- Other 13%

2020E Production by Region
- Zambia 60%
- Panama 35%
- Other 5%
Cobre Panama Provides Continuing Growth

May 9, 2019
Annual General Meeting
Cobre Panama produces first copper concentrate in Q1 2019
Cobre Panama – Significant milestones achieved in Q1
Cobre Panama - Ore commissioning of Train 1 complete
Cobre Panama -
Power station sets
100% complete
Cobre Panama –.
Over 80% of 2019 production expected in H2 2019
Cobre Panama – 140,000 – 175,000 tonnes of production expected in 2019
TACA TACA PROJECT: ARGENTINA

Copper-gold-molybdenum porphyry deposit acquired in August 2014

Located in the Puna region of Salta Province, Argentina

Work continues on the project:

• Environmental impact assessment studies continue
• Stakeholder engagement is ongoing
• Water supply studies progressing
  • Includes the development of boreholes for pump testing sustainable groundwater resources.
HAQUIRA PROJECT: PERU

Large copper porphyry deposit acquired in December 2010
Located in Apurímac in southern Peru adjacent to Las Bambas

• Continued focus on community and environmental aspects of the project
• Reconsidering our relocation program with the communities
UNIQUELY POSITIONED GLOBAL COPPER PRODUCER

- Solid financial and operational results
  - High quality copper focused portfolio

- Copper Market
  - Outlook continues to show supply deficit in the next few years

- Delivering significant growth
  - Cobre Panama ramping up to full production over next few years
